Content:

I object to the proposal due to the noise, dust, site contamination, traffic and odour issues this proposal will inflict on the surrounding services, businesses and users of James Ruse Dr.

I especially object to the intended breach of the sealed cap protecting people from the harmful contaminants on the site residual from the former James Hardie business.

This potentially can be harmful to the health and well being of the surrounding businesses and services and the wider community because if it is not carefully contained the wind can carry these fibres for miles! Of particular concern is the daycare centre and the innocent children located within 30 ms of the proposal. Not only can they be subjected to harmful contamination in the short term but their quality of life will be affected in the long term with ongoing traffic, odour, noise and dust issues. This is definitely a conflict of use for this area - why have a waste treatment facility located so close to a day care centre, an Aldi shopping centre, the race course and university just to name a few.

If this proposal is approved than the Government should be ashamed of itself because you could easily stop it by enacting the rights of the covenant declaring the site "contaminated and a serious risk to humans". I implore you to stop this proposal.
