**Subject:** Pemplwuy project

Dear Robert,

Nicola and I have reviewed the comments from the AHC and developers. We feel that our concerns around the bulk of the development, the significant increase in people to the site, concerns about parking, the increase in FSR among the other concerns in our original submission still are relevant and were not addressed adequately in the response. We request that our original concerns are reconsidered as part of the ongoing process.

Regards,

Carolyn Murray and Nicola Bath
