Attention: John Crawford

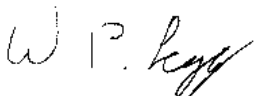

Dear John

**Sydney Heritage Fleet – Revised Environmental Assessment Application
Water Sensitive Urban Design**

Regarding the Water Sensitive Urban Design Report (no. 610.10676-R3R1), we confirm that the change in design associated with the removal of the floating dock restoration facility from the proposed wharf area of the Bank Street site which has enabled the water lease component of the application to be reduced in length by 23 metres, does not alter the recommendations or conclusions that were made in our original report on behalf of the Sydney Heritage Fleet.

Yours sincerely

SLR Consulting Australia Pty Ltd
