Subject: Cullen Bullen Coal Mine

Dear Sir,

I have written previously about this proposed development, it appears Lithgow has lost these workers and jobs, because the Green Movement has more influence on our State Government than they should. The letters written in our local paper by these hysterical people who seem to think mining should be prohibited I'm sure drive cars and use electricity, they are usually from Sydney or the Blue Mountains. Lithgow needs these jobs to survive, we have always been a mining town, and really support these industries, having no work is more detrimental to health and wellbeing.

Please consider this application favourably and quickly as we are already losing very valuable families which will have a very longlasting effect on the down, we have been through employment cycles before but not caused by our Government who we hope are there to help us.

People of Lithgow are very supportive of the Cullen Bullen mine, and so are the majority of Cullen Bullen residents, who are mostly miners or retired miners also, If you were to visit you would see that the development is further away from the town than the previous development .

Yours sincerely

Lyn Mickkleson
