## Channel Nine Site, Willoughby, Redevelopment

To: The NSW Premier, Barry O'Farrell, The Minister for Planning & Infrastructure, Brad Hazzard, The Director General, NSW Planning & Infrastructure, Sam Haddad

This petition of the undersigned seeks that the NSW Government undertake effective community consultation for the development of the Channel 9 site in Willoughby NSW with a view to creating a viable and sustainable solution for the greater community.

We further request that in view of the surrounding residential character and limited local infrastructure, the NSW Government prevail upon the proponent to adopt a floor space ratio more commensurate with the existing surrounding building density and to reduce the maximum height of any single building to eight levels.

### Why is this important?

We, the undersigned, believe that community consultation to date has been a rushed process that has not informed or engaged with the community sufficiently nor has it provided citizens with the opportunity to participate adequately in the discussion of the future of their area.

## Channel Nine Site, Willoughby, Redevelopment

To: The NSW Premier, Barry O'Farrell, The Minister for Planning & Infrastructure, Brad Hazzard, The Director General, NSW Planning & Infrastructure, Sam Haddad

This petition of the undersigned seeks that the NSW Government undertake effective community consultation for the development of the Channel 9 site in Willoughby NSW with a view to creating a viable and sustainable solution for the greater community.

We further request that in view of the surrounding residential character and limited local infrastructure, the NSW Government prevail upon the proponent to adopt a floor space ratio more commensurate with the existing surrounding building density and to reduce the maximum height of any single building to eight levels.

### Why is this important?

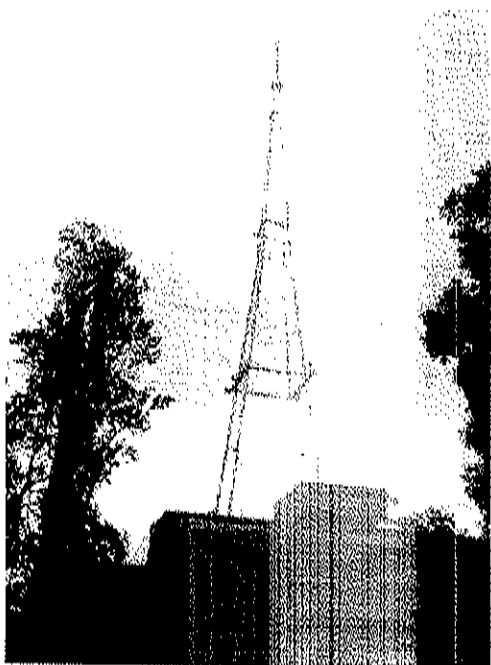

We, the undersigned, believe that community consultation to date has been a rushed process that has not informed or engaged with the community sufficiently nor has it provided citizens with the opportunity to participate adequately in the discussion of the future of their area.

## Channel Nine Site, Willoughby, Redevelopment

To: The NSW Premier, Barry O'Farrell, The Minister for Planning & Infrastructure, Brad Hazzard, The Director General, NSW Planning & Infrastructure, Sam Haddad

This petition of the undersigned seeks that the NSW Government undertake effective community consultation for the development of the Channel 9 site in Willoughby NSW with a view to creating a viable and sustainable solution for the greater community.

We further request that in view of the surrounding residential character and limited local infrastructure, the NSW Government prevail upon the proponent to adopt a floor space ratio more commensurate with the existing surrounding building density and to reduce the maximum height of any single building to eight levels.

### Why is this important?

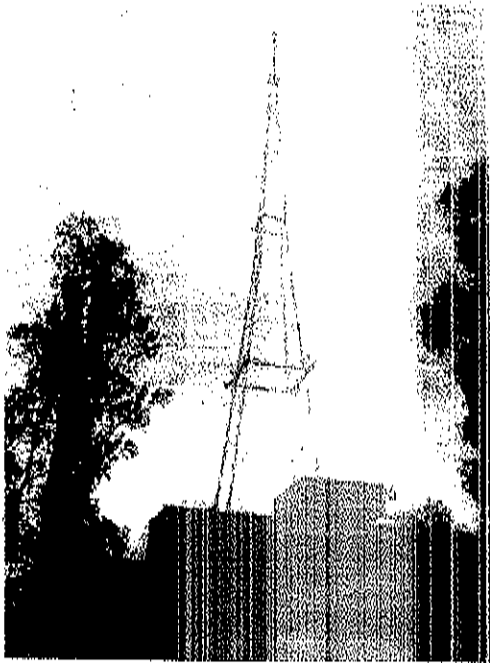

We, the undersigned, believe that community consultation to date has been a rushed process that has not informed or engaged with the community sufficiently nor has it provided citizens with the opportunity to participate adequately in the discussion of the future of their area.

We further request that in view of the surrounding residential character and limited local infrastructure, the NSW Government prevail upon the proponent to adopt a floor space ratio more commensurate with the existing surrounding building density and to reduce the maximum height of any single building to eight levels.

### Why is this important?

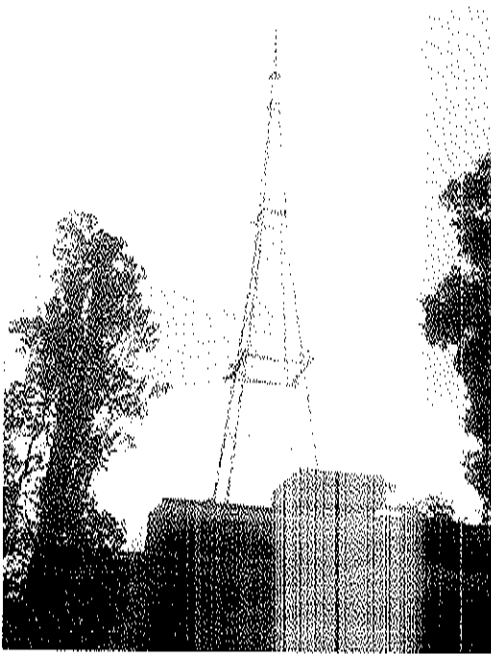

We, the undersigned, believe that community consultation to date has been a rushed process that has not informed or engaged with the community sufficiently nor has it provided citizens with the opportunity to participate adequately in the discussion of the future of their area.

## Channel Nine Site, Willoughby, Redevelopment

To: The NSW Premier, Barry O'Farrell, The Minister for Planning & Infrastructure, Brad Hazzard, The Director General, NSW Planning & Infrastructure, Sam Haddad

This petition of the undersigned seeks that the NSW Government undertake effective community consultation for the development of the Channel 9 site in Willoughby NSW with a view to creating a viable and sustainable solution for the greater community.

We further request that in view of the surrounding residential character and limited local infrastructure, the NSW Government prevail upon the proponent to adopt a floor space ratio more commensurate with the existing surrounding building density and to reduce the maximum height of any single building to eight levels.

### Why is this important?

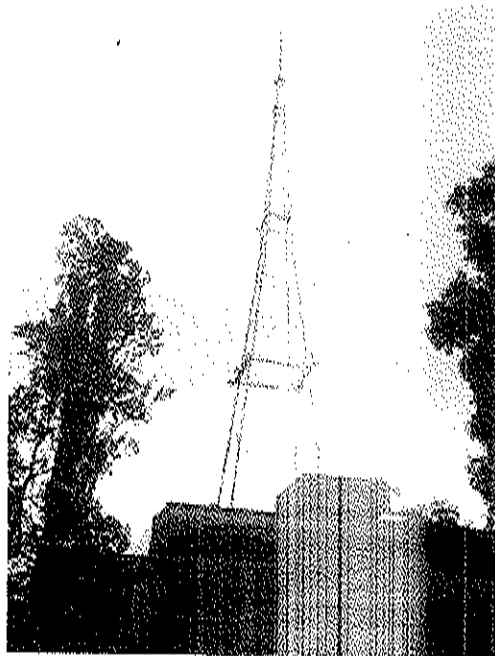

We, the undersigned, believe that community consultation to date has been a rushed process that has not informed or engaged with the community sufficiently nor has it provided citizens with the opportunity to participate adequately in the discussion of the future of their area.
