Dear Sir/Madam

With respect for the planned development I would like to say that the infrastructure, ie roads and by-ways cannot cope with the existing traffic, let alone more vehicles.

I went to a meeting this past August when it was tabled that funding for the by-pass was almost completed.

I would ask that no more development can take place until the by-pass has been initiated by the Hawkesbury Council.

The developer has developed roads within the estate, but the council roads are sorely lacking, with some being no more than goat tracks and are considerably unsafe for further traffic. This I know from first hand experience having almost been side swiped a few times.

Thank you for your consideration in this matter.

Yours sincerely....Gwen Day
