The proponent uses words that are very vague (not likely) (unlikely). they might as well be(could be) or (may be)

ONE letter to a FISH shop is NOT a proper Study of the effect commercial fishing in Port Stephens.

Discharge of 1,000 kg of nitrogen per year into a Estuary that does not flush out ,could build up and change the water quality.

Will the fish caught in Port Stephens have traces of by products of the MAY BE polluted waters in the port ?

NO SCIENTIFIC STUDY has been undertaken on Marine Life .only VAGUE words.

NO SCIENTIFIC STUDY on Marine water Quality only vague words.

NO Credible Monitoring of noise from the farm, The Proponent used RURAL STAND:
It is a RESIDENTIAL VILLAGE.

NO study of orders from the rotting dead Abalone or marine life in the Bay that may die from changed water quality.

I am worried about the family swimming in the water .

We make our objections to the development on the above points .
