and Environment

Dear Sir

I have read many comments on The
Helipad at Morisset Park.

We are always being asked to care for the
wildlife, the environment and climate change,
and to take more responsibility about these
things. I cannot see helicopters helping
with any of these.

It seems these helicopters are only
going to be there for the whim of a few
people, while the rest of us will have
to suffer the exhaust pollution and
down wash every time they land and depart.
Parts of the lake will have to be cleared of
small boats and swimmers, when it should
be there for everyone not just a few.

There will also be an impact on the Bird
life and the noise will be intrusive no matter
what guidelines are in place.

Thanking you Mrs J. Bailey
