RE: Objection to MP 06 _ 0309 MOD 3

Dear Sir/ Madam,

I live in the community of quiet Bardens Bay. A location where I enjoy the peacefulness of this area. Helicopter operations are a real and unacceptable intrusion on my lifestyle, the location and the environment.

The noise intrusion is offensive to the whole concept of Bardens Bay as a place of relative tranquillity enjoyed by residents and visitors for its passive and active recreational activities.

Every flight movement will be a disruption to the ambience of this area.

I strongly object to this new development on the following basis;

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹2 schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. However, no matter how many arithmetical calculations are produced and averages recorded, intrusive helicopter noise jar upon the human ear, the wildlife and my lifestyle.

I strongly object to **ANY** helipad or helicopter operations being approved in Bardens Bay. I have not made any political donations.

Signed

Date: *Dec 9 2016*

¹ Includes wind up, shut down, overflight, landing and taking off.

I support Morisset Park & District Action Groups (MPDAG) and other local associations objections to Johnson Property Group new development application.

RE: Objection to MP 06 _ 0309 MOD 3

Dear Sir/ Madam,

I am 1 of 8000 homes which will be affected by the helicopter operations for this additional development application.

I have examined the proposed flight paths and diagrams submitted by Johnson Property Group (JPG) and CONSIDER THIS INFORMATION TO BE MISLEADING as these are accompanied by statements indicating that;

1. These are preferred flight paths
2. The helicopter pilot makes the final decision for overfly, take- off and landings.
3. The helicopter pilot makes decisions for take- off and landing according to the wind direction i.e. 'into wind' for both operations.

The flight paths contained in JPG's documentation are misleading because;

1. There is no indication of the overfly requirements
2. There is no indication of the height at which the helicopter will descend and take-off over the 8000 residents from the proposed helipad.
3. The descent and take-off wind directions indicated in JPG's diagrams are not a true reflection of the prevailing winds.

The reality for the 8000 residents is that;

1. The helicopter will descend from 1000 feet at approximately 2 kilometres from the landing site. This means that all suburbs surrounding Bardens Bay and extending to Summerland Point are affected by the helicopter operations.
2. An 'over flight' of the landing site is not included in any of the flight paths are listed
3. The new development application involves repetitive use of up to 9 different helicopters.
4. Every different pilot for every different helicopter will use their own judgement, skill and knowledge when assessing the preferred flight paths.

I strongly reject and oppose this new development for any helipad or helicopter operations in Bardens Bay as:

1. The information and diagrams are misleading.
2. There is no helicopter height information for the 9 different helicopters listed in JPG's documents intending to 'fly-over,' land and take-off within the 2 kilometres zone.
3. The flight paths outlined are not a true reflection and are inconsistent with pre-vailing winds.

I strongly object to **ANY** helipad or helicopter operations being approved at Trinity Point Marina. I have not made any political donations in the past.

Signed

RE: Objection to MP 06_0309 MOD 3

Dear Sir/ Madam,

I live in the community of quiet Bardens Bay. A location where I enjoy the peacefulness of this area. Helicopter operations are a real and unacceptable intrusion on my lifestyle, the location and the environment.

The noise intrusion is offensive to the whole concept of Bardens Bay as a place of relative tranquillity enjoyed by residents and visitors for its passive and active recreational activities.

Every flight movement will be a disruption to the ambience of this area.

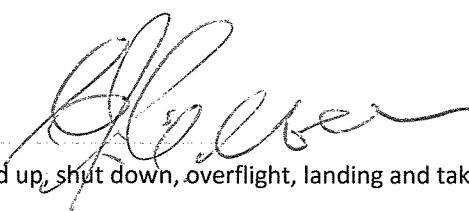

I strongly object to this new development on the following basis;

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹2 schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. However, no matter how many arithmetical calculations are produced and averages recorded, intrusive helicopter noise jar upon the human ear, the wildlife and my lifestyle.

I strongly object to **ANY** helipad or helicopter operations being approved in Bardens Bay. I have not made any political donations.

Signed

Date: 10 - 12 - 2016

RE: Objection to MP 06_0309 MOD 3

Dear Sir/ Madam,

I live in the community of quiet Bardens Bay. A location where I enjoy the peacefulness of this area. Helicopter operations are a real and unacceptable intrusion on my lifestyle, the location and the environment.

The noise intrusion is offensive to the whole concept of Bardens Bay as a place of relative tranquillity enjoyed by residents and visitors for its passive and active recreational activities.

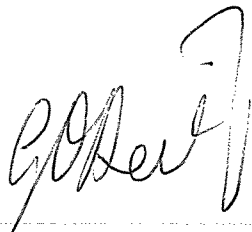

Every flight movement will be a disruption to the ambience of this area.

I strongly object to this new development on the following basis;

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹2 schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. However, no matter how many arithmetical calculations are produced and averages recorded, intrusive helicopter noise jar upon the human ear, the wildlife and my lifestyle.

I strongly object to **ANY** helipad or helicopter operations being approved in Bardens Bay. I have not made any political donations.

Signed 

Date: 9.12.16.

¹ Includes wind up, shut down, overflight, landing and taking off.

I support Morisset Park & District Action Groups (MPDAG) and other local associations objections to Johnson Property Group new development application.

I strongly object to this new development on the following basis;

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹2 schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. However, no matter how many arithmetical calculations are produced and averages recorded, intrusive helicopter noise jar upon the human ear, the wildlife and my lifestyle.

I strongly object to **ANY** helipad or helicopter operations being approved in Bardens Bay. I have not made any political donations.

RE: Objection to MP 06 _ 0309 MOD 3

Dear Sir/ Madam,

I live in the community of quiet Barden's Bay. A location where I enjoy the peacefulness of this area. Helicopter operations are a real and unacceptable intrusion on my lifestyle, the location and the environment.

The noise intrusion is offensive to the whole concept of Bardens Bay as a place of relative tranquillity enjoyed by residents and visitors for its passive and active recreational activities.

Every flight movement will be a disruption to the ambience of this area.

I strongly object to this new development on the following basis;

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.

The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹² schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. However, no matter how many arithmetical calculations are produced and averages recorded, intrusive helicopter noise jar upon the human ear, the wildlife and my lifestyle.

I strongly object to **ANY** helipad or helicopter operations being approved in Bardens Bay. I have not made any political donations.

RE: Objection to MP 06 _ 0309 MOD 3

Dear Sir/ Madam,

I live in the community of quiet Bardens Bay. A location where I enjoy the peacefulness of this area. Helicopter operations are a real and unacceptable intrusion on my lifestyle, the location and the environment.

The noise intrusion is offensive to the whole concept of Bardens Bay as a place of relative tranquillity enjoyed by residents and visitors for its passive and active recreational activities.

Every flight movement will be a disruption to the ambience of this area.

I strongly object to this new development on the following basis;

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹2 schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. RE: Objection to MP 06 _ 0309 MOD 3

Dear Sir/ Madam,

I live in the community of quiet Barden's Bay. A location where I enjoy the peacefulness of this area. Helicopter operations are a real and unacceptable intrusion on my lifestyle, the location and the environment.

The noise intrusion is offensive to the whole concept of Bardens Bay as a place of relative tranquillity enjoyed by residents and visitors for its passive and active recreational activities.

Every flight movement will be a disruption to the ambience of this area.

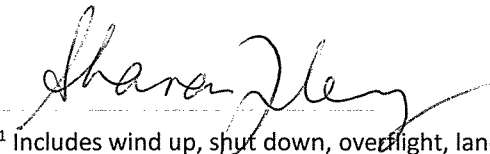

I strongly object to this new development on the following basis;

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹2 schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. However, no matter how many arithmetical calculations are produced and averages recorded, intrusive helicopter noise jar upon the human ear, the wildlife and my lifestyle.

RE: Objection to MP 06 _ 0309 MOD 3

Dear Sir/ Madam,

I live in the community of quiet Bardens Bay. A location where I enjoy the peacefulness of this area. Helicopter operations are a real and unacceptable intrusion on my lifestyle, the location and the environment.

The noise intrusion is offensive to the whole concept of Bardens Bay as a place of relative tranquillity enjoyed by residents and visitors for its passive and active recreational activities.

Every flight movement will be a disruption to the ambience of this area.

I strongly object to this new development on the following basis;

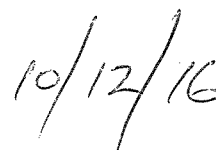

1. The development information makes it appear as though the site chosen is because there are no other suitable sites for helicopter operations. Belmont and Wanervale airports are close by. The Belmont (Areo-pelican) airport is just a 12-15 minute boat ride from Bardens Bay. Wanervale airstrip is an approximate 15 minutes car trip to Bardens Bay.
2. There is inadequate analysis of alternative sites listed in the developer's new application.
3. Helicopter operations in this location is an unacceptable noise intrusion for up to 8000 residents, ¹2 schools, a hospital and an aged care facility resulting in up to 2 hours of noise disturbance each day.
4. There are many standards for the assessment of noise, and it is possible by selecting a noise measurement standard by the developer show that the proposed operations are acceptable. However, no matter how many arithmetical calculations are produced and averages recorded, intrusive helicopter noise jar upon the human ear, the wildlife and my lifestyle.

I strongly object to **ANY** helipad or helicopter operations being approved in Bardens Bay. I have not made any political donations.

Signed

Date: 10-12-16

¹ Includes wind up, shut down, overflight, landing and taking off.

I support Morisset Park & District Action Groups (MPDAG) and other local associations objections to Johnson Property Group new development application.
