RE: Carshare at Woollooware Bay

Dear Assessment Manager,

I write to express GoGet carshare's support for carshare on site at Woollooware Bay. GoGet is about to launch carshare in Miranda with Westfield and we have a large member base already in Woollooware with over 70 members and no current carshare in the area. Launching carshare in this prominent location will benefit the owners/tenants of the development as well as the surrounding community. Every owner/tenant of this development will have access to a discount carshare membership.

The benefits to the local community will be significant, and include:

1. Each GoGet car is shared between approximately 30 members. Fewer cars means less parking hassles for everyone.
2. GoGet member drive on average 2,000km less each year than a car owner
3. Carshare encourages public and active transport use, facilitating interaction which creates cohesive residential communities.
4. For every GoGet car, 9-12 private cars are taken off the road.
5. The GoGet fleet has newer, more fuel-efficient cars, which means less pollution.

GoGet has had recent success partnering with retail centres, and hotels bringing a new amenity to guests and shoppers, and easing congestion in these centres. I encourage you to approve this application and look forward to seeing the project commence.

Sincerely,

Christopher Vanneste PhD
