I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It is an unsuitable location as there is already enough traffic congestion as it is. This intermodal will not only create even more traffic congestion but also air pollution therefore infecting the clean air that the residential families living in the area will be harmed by. There are primary schools, high school and day cares located in various spots around Wattle Grove, Holsworthy, Hamondville and Moorebank.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

SIMTA continues to develop its proposal with disdain for and lack of consultation with the local community.

They promised that they would build warehouses that were going to block all of the noise from their development. It was always dubious that it could be effective in this way, but now it becomes apparent that SIMTA doesn't care whether the tremendous amount of noise they will be creating will impact residents or not.

They started with a dubious claim that a noisy infrastructure (a warehouse) would block a larger noise (a container terminal). It is clear they don't care whether it does or not. Now they are "reconfiguring" their plan so they can put the trucks and loading docks, with all of the associated noise, light and pollution as close to houses as possible. Perhaps they are hoping to park in my street too. Residents need protection against this company.

The issue of fill is a hot topic amongst locals. Most residents that I have talked to think that SIMTA is bringing the fill in to make money from someone who needs to dispose of it.

The quantity of fill that they are intending to bring on site is enough to put the whole site some metres in the air. This will make all of the issues worrying residents so much worse. The noise will travel further because it is higher up above any obstacles. The light will travel further because the ground level it is above is higher. SIMTA seems to be deliberately trying to keep residents awake at night and destroy their health. If that is not the case, they are not doing a very good job of helping residents understand how they will avoid being impacted.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

the importation of fill for this application is contrary to the needs of our community. this fill will create pollution in the form of dust. it will be exaggerated by the addition of diesel fumes from the trucks entering and exiting the site.

the widening of the local road will cause enormous disruption to the local community. Widening of Moorebank Avenue will achieve nothing but create a black spot at the intersection of Moorebank Avenue and Anzac Road. the result of this road work and the subsequent number of trucks entering and exiting with fill for the site will create rat runs through the local streets to avoid this intersection and road in general. the Local community will be put at risk, Childrens playgrounds 'will not be safe due to increase traffic. Homes on the adjoining roads which are as close as 2 metres from the road will run the risk of being involved in motor vehicle accidents and the aftermath.

this is a residential area. the government sold off this military land over 15 years ago to develop the suburb of Wattle Grove, encouraging families and their families to come to this area. Holsworthy railway station was built to service these families. there are convenient public bus routes running on time and allowing residents to reach their destinations in safety and peace. it defies logic that the government would then sell off the balance of this land to create an industrial area which has no place in the middle of a residential community.

I am not against Intermodals as such and see that there is a real need within the transport infrastructure to accommodate the movement of freight. this however should be done in a way which does not deliver so many negatives to a residential community such as Moorebank.

I don't understand why its necessary to increase the height of the site by up to two metres. My suspicion is that in increasing the site height will remove the necessity to re-mediate the site which the previous occupants (Army) had a practice of burying unwanted materials within the site.

Re configuring the internal road network is being done to enable the internal road on the eastern side of the MPE site to be easily modified to allow Moorebank Ave to be diverted around that side of the site which is very underhanded behavior on the part of the proponents. This modification should be approved under any circumstances.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. How can you raise road by 2 metres is so all run off will go into georges river or towards Wattle Grove. 2,500 trucks per day equal 104 trucks per hour put in some traffic lights moorebank avenue would be at a stand still. 100% object to intermodule

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Brian Bennett

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Responses to Moorebank Precinct East (MPE): Concept Plan Modification – MP10_0193 MOD2

Noise transmission due to fill Increasing the height of Moorebank Avenue by up to 2 metres will more negatively impact the noise transmission and reception to the environment and community. Increasing the site's operational elevation will impact more negatively through the generation, transmission and reception of noise during the construction and operational phases of the project. Erecting 2m noise barriers 5m from generating sources will be an unsafe and impractical venture, especially when these sources are not static. Other mitigation efforts include a 5m partial wall on the western side of the site. Little effort is made to stem generation, and minimal for reception. Perhaps another particularly high noise retardant wall could be constructed at the complete perimeter of the site in an attempt to address this reception.

Flooding More fill for this modification? Seemingly, given the flood classification of the land, there appears to be motivation to raise the level of the hardstand and warehousing areas of the site to reduce flooding frequency. Understandable. However, this will negatively affect runoff by the increase in energy that water will have, the seepage to adjacent lands from the elevated site, and increased inundation effects on surrounding topography. For example, will the eastern side of the site (DNSDC) be negatively impacted by uncaptured flows to Anzac Creek? The increase in elevation will give additional energy and different characteristics to captured and overland flows.

Vegetation destruction

“No threatened species or communities can be cleared other than required for early works” There had been a Construction Flora and Fauna Management Plan. With recent previously thought extinct species discovery on site, is there a plan for the conservation or preservation of the small community of plants that exist on site? Which department will be the delegated authority to ensure such a plan is reported from the applicant?

Increase to site area – is this encroaching upon the riparian corridor, or leave a smaller greenbelt zone around the site, minimising the buffer to surrounding businesses and residences? What environmental offset will be proposed for this modification? The visual amenity for those at Casula who are elevated will be reduced.

Rearrange the freight village

Does the configuration support noise and light buffering? The effective containment of vehicular movements around site?

Rearrangement of locations of land uses

Are the new locations best positioned in order to minimise light spill and noise effects?

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It has been proven time and again that there will be no reduction but an increase of trucks and general traffic in the area.

The original EIS did not allow for the amount of fill required or for retail, commercial or light industrial uses and therefore should be reassessed.

The public should not be expected to pay for the extensive road works and traffic control nor the rail link for this private facility.

The area surrounding this monstrosity has changed considerably since first thought of, many areas have been rezoned to medium density and high density greatly increasing the population, traffic and strain on resources making the siting of this facility all the more unsuitable.

This type of facility should not be sited so close to an environmental sensitive area as the Georges River nor as close to residential areas.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Denis Muller

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I do not wish to have any freight infrastructure located in Moorebank or anywhere else where there are so many young families, schools, nursing homes, etc. Your proposed intermodal terminal will impact greatly on the lives of the residents of the area, and particularly if you are bringing in truckloads of fill – 600 million cubic metres as at your current estimate. As with everything else that has gone on with this proposal, SIMTA change their minds and attempt to alter any provisions that have already been ‘approved’ and the fact that you lodged 3 Plan Modifications 3 days prior to Christmas says it all – you are underhand and sly.

I greatly object to any of the proposals you put forward in this modification you have lodged.

I consent to my name being published as an objector.

I object to this application and the entire project at this location.

Pile on another 600,000 cubic metres of dirt, like its an extra oven in a kitchen. You have got to be kidding me.

This puts cumulative amount at 2.2 MILLION cubic metres of dirt.

I can see no adequate attempt or really any attempt to figure out what to do with the 10,000 plus trucks the terminal will generate everyday.

Still the applicant will be adding 450,000 truck movements onto the site, just to bring in the dirt. It has not been studied let alone "considered for mitigation". Exhibiting the height of arrogance – about 2 metres worth.

At best the DP&E should knock this idiocy on its head, at worst the DP&E should instruct the Applicant to start again with the Precinct Plan it was asked for long ago.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Any increase to traffic in this area will overwhelm both residents and “normal” users of these roads and access points. People will begin using Wattle Grove streets to try and avoid the main roads. The increase in diesel trucks will worsen the air quality in an area that is so close to a large residential area, schools, nursing homes and retail areas.

Importation of more fill will simply increase the issues noted above.

Attn: Director
GPO Box 39, Sydney NSW 2001
Social & Other Infrastructure Assessments, Department of Planning

42

I would like to submit my objection to the following Development Applications:

MOOREBANK PRECINCT WEST (MPW): RtS Concept Plan Modification- SSD 5506 MOD1

The Amended Modification Proposal seeks:

- 1 • Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- 2 • Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- Modify the staging of future applications
- 4 • Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- 3 • Increase to building heights and ground levels.
- Subdivision.

I object to this modification:

1 - 2 - 3 - & 4

Name: G. FORCONI Dated: 16-2-17
Address: 3 MONASH AVE WHITE GROVE

Do you wish your name to be withheld from publication. (Please circle) ☒ No / Yes

Have you made any Political donations (please circle) ☒ No / Yes

I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2

The Amended Modification Proposal seeks:

- 1 • Increase the site area to include works proposed within the Moorebank Avenue road corridor
- 2 • Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
- Provide interim site access to warehousing from the Moorebank Avenue upgrade
- 3 • Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- 4 • Importation of 600,000 cubic metres of fill
- 5 • Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
- Modify the staging of future applications

I object to this modification:

1 - 2 - 3 - 4 & 5

Name: G. FORCONI Dated: 16/2/17
Address: 3 MONASH AVE WHITE GROVE

Do you wish your name to be withheld from publication. (Please circle) ☒ No / Yes

Have you made any Political donations (please circle) ☒ No / Yes

I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Stage 2 Application – SSD7628

- 1 • Construction of Approximately 300,000 square metres of warehousing and distribution facilities
- 2 • Construction of a freight village comprising 8,000 square metres of retail, commercial and light industrial uses
- 3 • Construction of the internal road network and its connection to the public road network
- 4 • Construction of ancillary infrastructure such as drainage infrastructure and utilities relocation and installation
- 5 • Clearing of vegetation earthworks, remediation, landscaping and signage
- 6 • Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres, widening the road and upgrading infrastructure such as stormwater drainage
- 7 • Upgrading of intersections along Moorebank Avenue
- 8 • Subdivision to facilitate long term leases for future tenants.

I object to this application:

1-2-3-4-5-6-7-8 (FOR ALL THE ABOVE)

Name: G. FORCONI Dated: 10/2/17
Address: 3 MONASH AVE WHITE GROVE

Do you wish your name to be withheld from publication. (Please circle) (No) / Yes

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

My primary concern relates to air quality for nearby residences. I am encouraged that the conclusion of the regional and local air quality results in the conclusion that "adverse impact on the surrounding environment from air pollutants generated by the project would be very low." This statement is fraught with vague use of the English language. Whatever the "very low" effects of the project, it does not make any logical sense to negatively impact, punish and make ill thousands of residents who reside adjacent this development. Thankfully, Table 5 and Table 6 of the PB EIS dated 20/04/2016 has an annualised emission quantification and qualification which in my opinion does not resemble "very low." There are many papers that indicate that there are increased health risks for populations residing adjacent source points of diesel fuel, (One being Matsuoka M, Hricko A, Gottlieb, R, and De Lara J Global Trade Impacts: Addressing the Health, Social and Environmental Consequences of Moving International Freight through Our Communities

. Occidental College and University of Southern California (Los Angeles, forthcoming, 2011)). There is scientific correlation of health risk within proximity to freeways, rail yards, and diesel emission sources, and sadly health considerations typically are not integrated into land use decision-making.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. A clear sign this project is a waste of tax payers money is the ground works that has to be done, raising the area by 2m for a start is a complete waste of tax payers money for a private companies benefit. The stormwater up grades, the road works in the area is crazy, what impact is this going to have on local traffic & areas in the region during this time? Then you have the importation of the 600,000 cubic metres of fill that will need to be delivered to site by trucks, so this will be another impact on local traffic & the M5 to carry these works out. These Billions of dollars could be used on many other important issues like the homeless, hospitals, pensioners, schools & the list goes on.

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Jennifer French Glenfield Farm

Objection to Modification to SIMTA Moorebank Intermodal Facility Concept Plan MP10 0193 MOD 2

This objection raises a number of points in respect of the modification plan submitted.

First and foremost, "The consent authority must first consider whether the proposed modification is of minimal environmental impact." [Environmental and Planning Law in New South Wales, Lyster, Lipman, Franklin, Witten, & Pearson, Chapter 4, Developmental Control, Lapse, Modification and Revocation, pg 109]

The potential and immediate environmental impacts of this project modification are in real terms, massive, not minor. They include potentially very serious and undocumented flood diversion risks to residents, associated pollution risk, diesel particulate risk to the large adjoining residential population, high level noise pollution, damaging traffic impacts to residents, and visual impacts impacts, including a major visual impact to historic Glenfield Farm viewpoints, resulting from the project buildings, warehouses, and heavy equipment being raised by two metres, by the importation of 600,000 cubic metres of landfill. These impacts are addressed below.

The developers have failed to address this aspect of the application, and the applications fails on these grounds. It should be rejected.

1.Historic Glenfield Farm.

In page 70, Glenfield Farm is identified as a site that will be "potentially" affected by the MPE project. In fact, the MPE project will project tens of metres into the air and be clearly visible from Glenfield Farm and the adjacent important Aboriginal escarpment viewpoints.

This historic viewpoint has been temporarily spoiled by the presence of the Glenfield Waste Service Facility, which, as land zoned for public use, was to be filled and returned to use as public recreational land, under the care of the National Parks and Wildlife Service. This land has been quietly secured for use for two highly visually invasive and acoustically unacceptable spur lines, as part of the project's "rail corridor". Glenfield Farm's close visual historic view has been appropriated without, when the initial approval was given, any consultation with the landowner. Now, the distant viewpoint is also going to be highly compromised by the presence of huge warehouses and other buildings.

The applicants claim that tree cover along Moorebank Avenue would "help" to mitigate potential impact on views from Glenfield Farm resulting from new buildings within the MPE site. How tall are these trees going

to grow? Thirty-five metres in a year? Or is the result going to be similar to the scruffy line of trees along the SSFL, also planted to “help” to mitigate the views. They do very little.

Previously, the viewpoint from Glenfield Farm and the adjacent Aboriginal historic site was very similar to what it would have been for the last ten thousand years, a vast uninterrupted panorama that would give the NSW people an opportunity to see what the Aboriginal population saw, and what Charles and Jane Throsby saw from Glenfield Farm exactly 200 years ago.

The Moorebank Intermodal project, and this modification application, are to take this valuable and irreplaceable part of NSW history away, without so much as a squawk from the State heritage office which is duty bound to protect it.

This modification proposal should be rejected and the applicants instructed to present a realistic and quantifiable projection of the real effects of it on Glenfield Farm and the adjoining Aboriginal site.

1. Irresponsible flood impacts.

The area proposed for the Moorebank Intermodal is located on the primary floodplain for the Georges River. According to a paper entitled “Have We Forgotten About Flooding on the Georges River?” presented at the 2001 Floodplain Management Authorities Conference at the Wentworth Shire Council, planning considerations need to be made for a maximum flood, which can be up to 5 metres higher than the 100 year flood, which is 10.5 metres. [Have We Forgotten About Flooding on the Georges River? Maddocks, J., 2001 Floodplain Management Authorities Conference Wentworth Shire Council].

The paper points out that filling of federally owned land has been carried out on the floodplain apparently without as assessment of its impact on flooding. To answer the question posed by the paper, yes, the federal government and the Moorebank proponents have indeed forgotten about flooding on the Georges River. The developers of the entire Moorebank Intermodal project appeared to be afflicted by selective amnesia in respect to flooding. Finally, though, this modification seeks to do an emergency rejig of the Eastern site, using 600,000 cubic metres of fill. If any evidence was needed of the back-of-the envelope, poor planning process underway here, this is it. The applicants appear proud that their interference with the natural landform will ensure that floodwaters will be diverted, to add to the misery inflicted on residents downstream. This disgraceful plan does not offer modelling or floodwater displacement estimates, for example, calculating how many houses or lives m

ay be lost in a severe flood as a result of displaced floodwater being diverted from the site.

The Moorebank Intermodal modification proposal to raise by two metres the level of a vast area of intermodal land that is directly adjacent to the river, is a highly irresponsible measure in terms of the floodwater diversion impacts to communities downstream in the event of severe or minor flooding. It is essential that a full flood modelling study is carried out in respect of this modification proposal. If the developers of the Moorebank Intermodal hope, by raising the site, to mitigate the effects on flooding to their own operation, the hope is forlorn, given the figures above. Certainly, the army occupied the site, but the army did not run an enormous warehousing operation for other people's goods. It difficult to see how these goods can be insured, given the proximity to a large, highly flood prone river. Two metres of fill will be enough to cause damage to downstream communities, but not enough to save the Moorebank Intermodal and its access lines in the event of a ver

y severe flood. Informed tenants will think long and hard before they commit clients' goods to such a warehousing risk scenario. There is a risk that the state or federal governments will eventually wear the indemnification costs of this project - after all, they will have approved it.

As former objections have pointed out, the Moorebank Intermodal, though it has been touted as a rail to road transfer point, an intermodal transport hub, it has gradually been revealed to be a massive warehousing operation. The risks of building warehouses next to a river, on a known flood plain with a devastating 100 year maximum flood prediction, now need to be properly assessed, particularly since the applicants now propose to transfer the risks to a large, vulnerable, residential population.

This modification proposal is far more than the correction of a minor error or miscalculation by the proponents. It is a highly invasive change to the floodplain. and also may an attempt to cover up the long list of pollutants either found on the site or suspected to be present, such as toxic firefighting residue. In the absence of a project masterplan which might have identified these issues, the modifications should be dismissed and the entire project sent back for proper flood risk and other pollution assessments in a properly organised application.

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The reasons behind my objection is as follows:-

1. Construction Noise and the operation of 300,000m² of warehousing and distribution facilities on the MPE site and the traffic on Moorebank Avenue will be horrendous.
2. The extent of construction works to facilitate the construction of the Moorebank Avenue upgrade 24/7 will impact on the surrounding community in regards to noise, emissions, breaking, lighting and shunting.
3. The proposed raising of the vertical alignment of Moorebank Avenue for 1.5 kilometres by two metres, from the northern boundary of the MPE site to approximately 120 metres south of the MPE site will require more space for the proposed site.
4. Visual Impact Assessment and Light Spill Study shows that there is going to need significant and intensive landscaping, screening and architectural elements in order to shield the site operations.
5. The impact of light spill to residential properties will affect residents 24/7.
6. The continuous noise to transfer containers between the MPE Stage 1 IMT and the Proposal's warehousing and distribution facilities will require a fleet of heavy vehicles capable of being loaded with containers which will be stored and used on the MPE Stage 2 site 24/7.
7. The Environmental impact on:-

• The removal of vegetation • Remediation works • Demolition of existing buildings and infrastructure on the Proposal site • Earthworks and levelling of the Proposal site • Drainage and utilities installation • Establishment of hardstand across the Proposal site • Construction of a temporary diversion road to allow for traffic management along the Moorebank Avenue site during construction (including temporary signalised intersections adjacent to the existing intersections) (the Moorebank Avenue Diversion Road) will cause traffic chaos.

1. The constant noise associated with the construction of the warehouses and distribution facilities, ancillary offices and the ancillary freight village will impact the community 24/7. Works associated with signage, landscaping, stormwater and drainage 24/7.
2. Traffic chaos on the M5 Motorway, M7 Motorway and Moorebank Avenue.
3. Building this terminal will affect the surrounding suburbs and communities of Wattle Grove, Moorebank, Casula & Glenfield for years to come.

We do not want this terminal on our door steps. Period. Leave Moorebank alone!

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It is unrealistic to assume such a development in a small community area will have no impact on the local residents. A development of shipping freight from one location to another, to only on forward this freight will unnecessarily clog roads and add costs to shipping and freighting goods.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, kylie van blerk Holsworthy, New South Wales, 2173, Australia

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Responses to Moorebank Precinct East (MPE): Concept Plan Modification – MP10_0193 MOD2

Noise transmission due to fill Increasing the height of Moorebank Avenue by up to 2 metres will more negatively impact the noise transmission and reception to the environment and community. Increasing the site's operational elevation will impact more negatively through the generation, transmission and reception of noise during the construction and operational phases of the project. Erecting 2m noise barriers 5m from generating sources will be an unsafe and impractical venture, especially when these sources are not static. Other mitigation efforts include a 5m partial wall on the western side of the site. Little effort is made to stem generation, and minimal for reception. Perhaps another particularly high noise retardant wall could be constructed at the complete perimeter of the site in an attempt to address this reception.

Flooding More fill for this modification? Seemingly, given the flood classification of the land, there appears to be motivation to raise the level of the hardstand and warehousing areas of the site to reduce flooding frequency. Understandable. However, this will negatively affect runoff by the increase in energy that water will have, the seepage to adjacent lands from the elevated site, and increased inundation effects on surrounding topography. For example, will the eastern side of the site (DNSDC) be negatively impacted by uncaptured flows to Anzac Creek? The increase in elevation will give additional energy and different characteristics to captured and overland flows.

Vegetation destruction

“No threatened species or communities can be cleared other than required for early works” There had been a Construction Flora and Fauna Management Plan. With recent previously thought extinct species discovery on site, is there a plan for the conservation or preservation of the small community of plants that exist on site? Which department will be the delegated authority to ensure such a plan is reported from the applicant?

Increase to site area – is this encroaching upon the riparian corridor, or leave a smaller greenbelt zone around the site, minimising the buffer to surrounding businesses and residences? What environmental offset will be proposed for this modification? The visual amenity for those at Casula who are elevated will be reduced.

Rearrange the freight village

Does the configuration support noise and light buffering? The effective containment of vehicular movements around site?

Rearrangement of locations of land uses

Are the new locations best positioned in order to minimise light spill and noise effects?

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Yours sincerely, Lauren Adams Wattle Grove, New South Wales, 2173, Australia

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This project is completely unsuited to a growing residential area with road and transport links that are struggling to cope with the current numbers.

I am very concerned about the detrimental health effects on a community predominantly made up of young families.

The project was first proposed many years ago and the changing demographic and the approval of so many homes in the location makes the project untenable at the proposed site.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. If this amount of modification is required to the application then the initial application was flawed and should be thrown out.

If 600000 tonnes of fill is required then the site is not suitable and the original application was not carried out correctly. This is not a modification but a whole new development.

The movement of the amount of trucks required to move such a large amount of fill will have detrimental effects on traffic and air quality in the surrounding areas.

The area surrounding this monstrosity has changed considerably since first thought of, many areas have been rezoned to medium density and high density greatly increasing the population, traffic and strain on resources making the siting of this facility all the more unsuitable.

Multi story residential buildings up to thirty stories high have been or are being built within 1.5 km of the facility and adjacent to the freight rail line. What a lovely place to live and O what a view!

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Thirty story apartment blocks have been or are being built within 1.5km of this proposed facility and will have a wonderful view of this outrageous proposal as well as being adjacent to the freight rail line with an almost continuous line of trains passing them 24 hours a day.

This facility is within two km of Liverpool station and shopping centre and is far to close to an import business growth centre and will only stifle growth.

It has been proven time and again that there will be no reduction but an increase of trucks and general traffic in the area.

The original EIS did not allow for the amount of fill required or for retail, commercial or light industrial uses and therefore should be reassessed

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I find that the proposal to import 600,000 cubic meters of fill appalling. This land is very close to the Georges River. I am concerned that by raising the road and land by this amount will increase the flood levels in other areas during any flood of the Georges River. It would not be allowed in any other area, why is it being considered here?

My other concern is the amount of trucks possibly with dogs attached that will be necessary to import this amount of fill, they will cause clogging of our roads, which are already near capacity. It will also cause massive amount of dust in the atmosphere, which in turn can cause problems for people with respiratory troubles.

Please reconsider immediately. Money/profit should not be above peoples health and safety!

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. After having lived in the area for over ten years I have observed the changes in traffic. New suburbs have been established close by and already the traffic is horrendous. The amount of extra vehicles on the road once this project goes ahead will be intolerable, not only will there be additional trucks but also extra delivery vans. The air quality will be poor not to mention the noise. I object totally to the project.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community.

I object to this application and the entire project at this location. The drastic environmental effects, high chance of flooding to local homes, pollution which the the proposed terminal and container port will cause in our local riverfront and area.

Currently, an accidently causes hours of chaos on the M5. The reality of the impact of this proposal on the M5 and our local roads would needs to be investigated with RMS Traffic Impact study.

Our area is emerging with endless new positive business growth possibility for the local people, new International airport upcoming, likely more new opportunities for the locals.

So don't dump port and container terminal proposal on us, the people without thorough research finding to substantiate your project to the local people.

As a tax payer I do not agree to govt subsidised funding for Private business.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I am distressed about SIMTA'S official report 'Operational Traffic and Transport Assessment' which states that at this point in time there is a 20 fold higher crash rate, than the RMS threshold for blackspots, on Moorebank Avenue and Cambridge Ave. Already the SIMTA EIS has reported two fatalities over a five year period. I am even more distressed about MICL's EIS, which states that currently there is a 40 fold higher crash rate, than the RMS threshold for blackspots, on the M5 between Heathcote Road and the Hume Highway. This is the current situation. In the future, the reports state that between 75% and 85% of the trucks from the intermodals will use this M5 current black spot and 100% will use Moorebank Ave and 25% will use Sydney's worst accident hot spot. This will result in more deaths due simply, to bad planning. I am therefore highly opposed to this project and its amendments. I cannot understand this total disregard for human safety.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I do not wish to have any freight infrastructure located in Moorebank or anywhere else where there are so many young families, schools, nursing homes, etc. Your proposed intermodal terminal will impact greatly on the lives of the residents of the area, and particularly if you are bringing in truckloads of fill – 600 million cubic metres as at your current estimate. As with everything else that has gone on with this proposal, SIMTA change their minds and attempt to alter any provisions that have already been ‘approved’ and the fact that you lodged 3 Plan Modifications 3 days prior to Christmas says it all – you are underhand and sly.

I greatly object to any of the proposals you put forward in this modification you have lodged and to the entire project.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This ridiculous amount for extra dirt, enough to build the Pyramid of Giza is also enough to change the whole nature of the flood zone and the Georges River Catchment.

Not only will it result in more flooding more often, it will spread further and spread the pollution further, having untold horrific impacts, particularly on nearby endangered flora and fauna.

This makes no sense, especially when there are far better, more viable locations for container terminals.

I consent to my name being published as an objector.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location. The southern aspect of the proposed site will present bushfire threat as it also has a sloped indexed land which under the right temperature and wind direction could pose problems to the residents who then may have to be evacuated through one main exit/entry point in wattle grove.

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location . If this amount of modification is required to the application then the initial application was flawed and should be thrown out.

If 600000 tonnes of fill is required then the site is not suitable and the original application was not carried out correctly.

The movement of the amount of trucks required to move such a large amount of fill will have detrimental effects on traffic and air quality in the surrounding areas.

Since the original plan for this facility was mooted the area around it has undergone a lot of change. large parts of the surrounding suburbs have been rezoned to medium and high density increasing the load on local roads and infrastructure which is already at saturation point.

Thirty story apartment blocks have been or are being built within 1.5km of this proposed facility and will have a wonderful view of this outrageous proposal as well as being adjacent to the freight rail line with an almost continuous line of trains passing them 24 hours a day.

This facility is within two km of Liverpool station and shopping centre and is far to close to an import business growth centre and will only stifle growth.

It has been proven time and again that there will be no reduction but an increase of trucks and general traffic in the area.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Attn: Director

GPO Box 39, Sydney NSW 2001

Social & Other Infrastructure Assessments, Department of Planning and Environment

I would like to submit my objection to the following Development Applications:

MOOREBANK PRECINCT WEST (MPW): Rts Concept Plan Modification- SSD 5506 MOD1

The Amended Modification Proposal seeks:

- Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- Modify the staging of future applications
- Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- Increase to building heights and ground levels.
- Subdivision.

AND CONSTRUCTION

I object to this modification: AND TO THE BUILDING[^] OF ALL OF THE INTERMODAL AT MOOREBANK AS THE TOTAL IMPACT ON THE RESIDENTS OF WATTLE GROVE, 400M AWAY ADJACENT TO THE SITE WILL BE UNBEARABLE. I.E. POLLUTION, NOISE, HUGE INCREASE IN TRAFFIC, HUGE INCREASE IN TRUCK TRAFFIC, LAND VALUE DECREASE, TRAIN NOISE 24 HRS PER DAY ETC.

Name: ROBERT WILSON Dated: 23/2/2017
Address: 21 TORRENS COURT WATTLE GROVE 2173

Do you wish your name to be withheld from publication. (Please circle) No / Yes

Have you made any Political donations (please circle) No / Yes

I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2

The Amended Modification Proposal seeks:

- Increase the site area to include works proposed within the Moorebank
- Avenue road corridor
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
- Provide interim site access to warehousing from the Moorebank Avenue upgrade
- Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- Importation of 600,000 cubic metres of fill
- Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
- Modify the staging of future applications

AND CONSTRUCTION

I object to this modification: AND TO THE BUILDING[^] OF ALL OF THE INTERMODAL AT MOOREBANK AS THE TOTAL IMPACT ON THE RESIDENTS OF WATTLE GROVE 400M AWAY ADJACENT TO THE SITE WILL BE UNBEARABLE I.E. POLLUTION, NOISE, HUGE INCREASE IN STREET TRAFFIC, HUGE INCREASE IN TRUCK TRAFFIC, LAND VALUE DECREASE, TRAIN NOISE 24 HRS PER DAY

I agree that RAID Moorebank is also acting on my behalf and that of the community.

Please, how many times do we have to say no.

I object to this application and the entire project at this location.

It will affect thousands of family's and hundreds of thousands of commuters on a daily basis. Residents and young family's live in moorebank and surrounds because they like a quiet lifestyle. My home is my only asset, will the government reimburse me for any capital lost due to this development? Most politicians live on the northern suburbs, but I bet they wouldn't allow an intermodal to be built! Many residents have illnesses and a peaceful lifestyle with quiet and green surrounds aid recoveries and minimize symptoms. The government should think ahead to the future rather than coming up with bandaid solutions. Locate the intermodal closer to the new airport, in preparation for future growth instead of imposing it on existing residential areas. It is too close to family homes, meaning loud noise, dust, pollutants etc would affect residents. This would then lead to an increase in Medicare and hospital costs due to the increased number of people visiting the doctor with intermo

dal inflicted illnesses. Putting the intermodal in the moorebank will only COST the government money, and community lives. DO NOT BUILD the intermodal in moorebank.

Yours sincerely, Ross

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I oppose the imposition of the Moorebank Intermodal proposals on my community, I am disgusted that key information was withheld until after the approval process relating to the previously thought extinct species and would like to remind the government that this project will do enormous damage to the people and the environment of the Georges River. I am dismayed that such contempt is held for my neighbours and my community and resist outright the need to put this proposal in suburban Liverpool

It would be well worth considering the Greens proposal to place intermodal projects on the periphery of the cities and use both Port Kembla and Newcastle ports along with port Botany to distribute products fairly and will less environmental destruction where more could be transferred by rail and not put in jeopardy the health and well being of the people of Liverpool.

It is abhorrent to me that those tasked with the long term running of the intermodal will not be liable for the additional health costs associated with the pollutants being thrust on our community. It is abhorrent that again this government is happy to allow profits to be wrought by developers and all the long term health costs be borne by the community and tax payers generally.

It is time the Government of the day accepted they work for the community not big business and did what is right long term for the families that pay taxes and have the right to vote them in AND OUT.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

In order to service this facility, phenomenal increases in traffic will be generated and will impact on either the Georges River or the M5 motorway. Possibly both.

This is going to compromise the abilities of the citizens in areas as diverse as Bayside Council, Sutherland Shire, Georges River Council, Canterbury and Bankstown council areas to enjoy their homes and surrounds.

It is an ill-thought-out concept impacting negatively on an enormous swathe of Sydney that has been completely left out of consultation.

The project should not proceed at all; it should certainly not proceed without proper consultation of the stakeholders in the wider area.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

This project will increase traffic in an already congested area resulting in higher risks of accidents (in an area with many black spots already). In addition to the traffic, this project will result in sound and light pollution as well as the inevitable increase in air pollution as a direct result of the large numbers of trucks that the project will require.

In addition to this, the works required to be done to reconfigure the road will also increase traffic in an already congested area and ultimately, the reconfiguration will not remove the problems referred to above.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The reasons behind my objection is as follows:-

1. Construction Noise and the operation of 300,000m² of warehousing and distribution facilities on the MPE site and the traffic on Moorebank Avenue will be horrendous.
2. The extent of construction works to facilitate the construction of the Moorebank Avenue upgrade 24/7 will impact on the surrounding community in regards to noise, emissions, breaking, lighting and shunting.
3. The proposed raising of the vertical alignment of Moorebank Avenue for 1.5 kilometres by two metres, from the northern boundary of the MPE site to approximately 120 metres south of the MPE site will require more space for the proposed site.
4. Visual Impact Assessment and Light Spill Study shows that there is going to need significant and intensive landscaping, screening and architectural elements in order to shield the site operations.
5. The impact of light spill to residential properties will affect residents 24/7.
6. The continuous noise to transfer containers between the MPE Stage 1 IMT and the Proposal's warehousing and distribution facilities will require a fleet of heavy vehicles capable of being loaded with containers which will be stored and used on the MPE Stage 2 site 24/7.
7. The Environmental impact on:-

• The removal of vegetation • Remediation works • Demolition of existing buildings and infrastructure on the Proposal site • Earthworks and levelling of the Proposal site • Drainage and utilities installation • Establishment of hardstand across the Proposal site • Construction of a temporary diversion road to allow for traffic management along the Moorebank Avenue site during construction (including temporary signalised intersections adjacent to the existing intersections) (the Moorebank Avenue Diversion Road) will cause traffic chaos.

1. The constant noise associated with the construction of the warehouses and distribution facilities, ancillary offices and the ancillary freight village will impact the community 24/7. Works associated with signage, landscaping, stormwater and drainage 24/7.
2. Traffic chaos on the M5 Motorway, M7 Motorway and Moorebank Avenue.
3. Building this terminal will affect the surrounding suburbs and communities of Wattle Grove, Moorebank, Casula & Glenfield for years to come.

We do not want this terminal on our door steps. Period. Leave Moorebank alone!

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

The road realignment will force additional traffic through Wattle Grove along Anzac Road. The road is also being pushed into an area which was always considered a green zone. An area that was set aside as a separation between the residents and the military as part of the Wattle Grove Development by Delfin.

The fill is being brought in to bury contaminated land. Burying the problem does not remove it. These chemicals in the soil will eventually leach into the river and water table causing permanent and irreversible damage.

I do not see why the site needs to be raised as it does not flood.

The dust born particles as a result of the importation of the fill will cause permanent respiratory damage to the residents of Wattle Grove.

The very real potential of the imported fill eroding away in the event of a heavy storm will pollute the Georges river, the creek that runs through Wattle Grove and kill the what was believed to be extinct plants found on this site. It has happened previously during the development of the new DNSDC and to this day no one has been held accountable.

I consent to my name being published as an objector.

I have not made any Political donations over \$1000.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

If the organisation building this terminal can't even work out how much fill is need when they are drawing up their plans and putting in the submission it makes it very hard to trust anything the tell us.

There was no mention on fill until the North connects go underway and they had fill to get rid of and this project saw away to make some money at the expense of residents and the local environment.

They have consistanly demonstrated a lack of proper attention to detail and brush off any concerns residents raise with glib platitudes and assurances that things will be fixed in the next amendment to the proposal.

They said that there were no endangered species of flora and this was a lie. What else are they lying about?

Just how many amendments are we going to have to review before we get a viable plan with adequate mitigation of impact which is actually enforceable and accountable.

The sheer amount of variations, amendments and organisations we as residents have had to deal with along the way with this project is the true testament to how wrong this project is for the area. _____

Attn: Director
GPO Box 39, Sydney NSW 2001
Social & Other Infrastructure Assessments, Department of Planning

133

I would like to submit my objection to the following Development Applications:

MOOREBANK PRECINCT WEST (MPW): Rts Concept Plan Modification- SSD 5506 MOD1

The Amended Modification Proposal seeks:

- Importation of 1.6million cubic metres of fill.
- Altered Construction footprint including additional land parcels.
- Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites.
- Re-arrangement of approved uses such as the freight village, truck parking and drainage infrastructure.
- Modify the staging of future applications
- Change of function of the interstate terminal to accommodate interstate, intrastate and port shuttle rail freight.
- Increase to building heights and ground levels.
- Subdivision.

I object to this modification:

It should never be near residential housing. The land fill
will destroy the ecology of the area and the quality of water in
the Georges River Basin.

Name: Dated: 23-2-2017
Address:

Do you wish your name to be withheld from publication. (Please circle) No / ☒ Yes

Have you made any Political donations (please circle) ☒ No / Yes

I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Concept Plan Modification – MP10 0193 MOD 2

The Amended Modification Proposal seeks:

- Increase the site area to include works proposed within the Moorebank
- Avenue road corridor
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres widening the road and upgrading infrastructure such as stormwater drainage
- Provide interim site access to warehousing from the Moorebank Avenue upgrade
- Reconfigure the internal road network and combine use of internal road network for both light and heavy vehicles
- Importation of 600,000 cubic metres of fill
- Re-arrange the locations of land uses such as the freight village, warehouses and intermodal facility
- Modify the staging of future applications

I object to this modification: Moorebank Avenue is already congested. The
area cannot cope with more traffic flow. The M5 is a
car park most of the time. It would destroy the flood plain.

Name: Dated: 23-2-2017
Address:

Do you wish your name to be withheld from publication. (Please circle) No / ☒ Yes

Have you made any Political donations (please circle) ☒ No / Yes

I agree that RAID Moorebank is also acting on my behalf and that of the community

Moorebank Precinct East (MPE): Stage 2 Application – SSD7628

- Construction of Approximately 300,000 square metres of warehousing and distribution facilities
- Construction of a freight village comprising 8,000 square metres of retail, commercial and light industrial uses
- Construction of the internal road network and its connection to the public road network
- Construction of ancillary infrastructure such as drainage infrastructure and utilities relocation and installation
- Clearing of vegetation earthworks, remediation, landscaping and signage
- Upgrade of Moorebank Avenue, including raising the height of the road by up to 2 metres, widening the road and upgrading infrastructure such as stormwater drainage
- Upgrading of intersections along Moorebank Avenue
- Subdivision to facilitate long term leases for future tenants.

I object to this application:

It is an abomination. Too many housing estates border
this area. Are you going to rehouse everyone in Wattle Grove
and the ne Glenfield Estate.

Name: Dated: 23-2-2017.....

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

Letter of objection: Name: Vivienne Age: 9 Hi, my name is Vivienne and I am David's daughter, and I do not like how you are wanting to take over our precious area because trees help us to breathe and if we chop them down, that will be harsh for the environment. So people who are trying to stop putting stuff in precious natured areas is a waste of God's work. So I am trying to encourage you to stop knocking over precious land and putting in buildings and stuff that some people might not think is right for Moorebank.

So me and my family would like to stop this invasion of buildings and trucks. I would like to let nature run through so people can appreciate the work that God had done for us and the world, and could even appreciate you for building our houses. Me and my family think it's enough because there are too many houses and would love your help if you could switch your brain on and think about the future. If you have pets at home they will probably be extinct in the future because you are giving this man money and knock down all nature and put in buildings so people who would like to stop this nonsense would really appreciate if you did.

Thank you.

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

It has already been identified that the 1.6 Million m3 of imported fill does not satisfy the 'substantially the same' test as defined by legal precedent under Section 96(2) of the EP&A Act.

Add to that the subsequent Modification Applications which together expect 2.2 Million m3 of untested "clean fill" to be added to the project. That is enough dirt to build the Pyramid of Giza, on our river, at Moorebank.

This amount of fill and the ensuing 450,000+ truck movements required to bring the dirt down the M5, were never part of the assessment process and not factored into the original concept. We firmly doubt the project would have proceeded had these "late additions" been included.

Just as significant, is using the dirt to raise the Sites and Moorebank Ave by up to 2 metres from its current level. This makes all previous assessments mute; from visual amenity and light pollution to flooding and contamination, biodiversity and heritage, noise and air pollution.

By introducing a huge amount of extra trucks and raising or rather burying the site, the applicant has created a domino effect. Such that the entire list of studies done heretofore on Environmental Impacts are not worth the paper they are printed on.

1. IF THE PRIVATE COMPANY BEHIND THE TERMINAL IS SO CONFIDENT OF ITS SUCCESS THEN IT SHOULD PAY FOR THE RAIL LINK [Almost \$400 million] AND ALL ROAD UPGRADES [Likely over \$3 billion].
2. THE FEDERAL AND STATE GOVERNMENTS [The People] SHOULD NOT BE PAYING TO SUBSIDISE PRIVATE BUSINESS. BOTH GOVERNMENTS SHOULD PULL ALL FINANCIAL SUPPORT IMMEDIATELY.
3. THE PLANNING DEPARTMENT SHOULD REJECT ALL CURRENT APPLICATIONS. AFFORDING SIMTA THE OPPORTUNITY TO REAPPLY WITH A FULLY COSTED PRECINCT MASTER PLAN. ONE THAT INCLUDES ALL THE LATE ADDITIONS AND FACTORS IN THE RMS TRAFFIC IMPACT STUDY – AS DETERMINED BY PAC

I consent to my name being published as an objector.

I have not made any Political donations over.

Yours sincerely, Yow Wai Fong Wattle Grove, New South Wales, 2173, Australia

Subject: MOOREBANK PRECINCT EAST [MPE] : Concept Plan Modification 2 - MP10_0193 MOD 2

I am against the importation of 600,000 cubic metres of fill

I am concerned that the current land on the proposed site will not be remediated adequately enough and will just be covered over with the fill. This concerns me due to the high number of chemicals and materials left behind by The Defence Department. The area is known for floods and should a big flood occur it could cause irreparable damage to the environment, in particular The Georges River and the critically endangered, assumed extinct plant of the *hibbertia fumana* species.

I am against the increase to height of Moorebank Ave for similar reasons to the above eg flooding and run off.

Talk of moving Moorebank Ave so it runs down the eastern side of this East Terminal brings this road closer to Wattle Grove residents adding more noise, light and pollution to these residents. I am opposed to the idea of this.

I am against the Increased operational vehicle movements between the Moorebank Precinct West and Moorebank Precinct East sites

I agree that RAID Moorebank is also acting on my behalf and that of the community

I object to this application and the entire project at this location.

I consent to my name being published as an objector.

I object to this application and the entire project at this location.

I have lived in Wattle Grove my entire life and what I enjoy is the peaceful, clean and quiet atmosphere. Wattle Grove is a family orientated suburb with people from all walks of life enjoying their surroundings.

I went to primary school locally at Hammondville P.S. and Wattle Grove P.S. I continue to be proud of the high quality of life that we currently have.

In addition, children studying in local schools and people going about their lives around the area will be subjected to constant polluted air from increased transport and work. Their health will be impacted and they will increase needs for health care at local clinics and hospitals.

At the moment Wattle Grove residents have enjoyed clean and fresh air from the greens along its streets and park land. The intermodal project will change all these and potentially put off residents and drive people and investors away.

On the other hand, if these waterfront lands are developed into beautiful residential and commercial properties, it will do good to the Liverpool and CBD precinct.

I am appealing to politicians and policy makers to take a close look at the suitability of this project and consider the effects it will have if it continues this path and the opposite effects if residential development is pursued.

I consent to my name being published as an objector.

I have not made any Political donations at all.

I agree that RAID Moorebank is also acting on my behalf and that of the community.

I object to this application and the entire project at this location.

The estimated levels of noise provided in the submission as being acceptable are contradicted by Transport for NSW and Sydney Trains Noise Logging reports of 2015. The non-reporting of the extinct flora until 4 days after the report points to this proponent doing anything it can to achieve its own interest and not the interest of the community. There is no community consultation.

The input of 2million tons of fill to raise the ground levels of the area above the flood plain will change the entire water flow and flood plain area. The re-direction of rainfall from the natural ground levels will cause Anzac and Harris Creeks to dry up. The natural water flows of the surrounding land and concreting with drainage towards Georges River means these creeks will die. There are no plans to create an alternate site for the backed up flood waters to retreat will mean other areas previously free from flooding could be endangered. The existing Concept plan submitted by SIMTA and MICL will be completely change by these new submissions and therefore all work should cease until there is a new PAC and community consultation. The three new submission make a joke of the Concept plan . The increase in sealed areas will stop normal water runoff soaking the ground and following the natural watercourses into Anzac and Harris Creeks. More must be done to protect these pristine creeks, their flora and fauna.

I consent to my name being published as an objector.

As the proponents state they need to import millions of cubic metres of fill. to make the project viable, a Recent Georges River flood study has found that as a result of raising the level of the land in and around the Bankstown Airport, also in the flood plain of the Georges River, and another Federal Govt facility, that this has the effect of raising the potential flood height 15cm, how much more effect will this amount of fill on the flood plain.

For the attention of the General Manager / Planning Manager / Planning Department

Application MP 10_0193 MOD2
Address Moorebank Avenue, Moorebank, Liverpool, NSW
Description SIMTA Intermodal Terminal Facility - Modification to Concept Plan Approval MP10_0193 for: - Extension of the land to which the concept plan applies - The Moorebank Avenue Upgrade - Provision of an interim MPE site access to warehousing - Reconfiguration of the internal road network - Importation of clean general fill - Change to the location of and land uses within the freight village and provision of warehousing along the Moorebank Avenue frontage - changes to the staging of the development including construction of all warehouses as part of the MPE Stage 2 Proposal - Subdivision of the MPE Site
Name of commenter Local Resident
Address of commenter 26 Haughton Court, Wattle Grove
Email of commenter redwolfoz@gmail.com

Comment

The intermodal is not appropriate to the area. It will place a huge burden on already overcrowded roads and will excessively increase noise.

Why is this not located at Badgerys Creek near the proposed airport?

This comment was submitted via PlanningAlerts, a free service run by [the OpenAustralia Foundation](#) for the public good. [View this application on PlanningAlerts](#)
