Dear Ms Collier

**Director-General's Requirements
Chullora Waste Centre Project
Application Number: 08_0089**

The Department has received your application for the Chullora Waste Centre Project.

I have attached a copy of the Director-General's requirements for the project. These requirements have been prepared in consultation with the relevant agencies, and are based on the information you have provided to date. I have also attached a copy of the agencies comments for your information.

Please note that the Director-General may alter these requirements at any time.

As you are aware, the Department's preference is for facilities such as the Chullora Waste Centre to operate under a single, modern planning approval. Consequently, you are encouraged to develop the project with this in mind, and to consider surrendering all existing planning approvals for the site should the project be approved.

If your proposal is likely to have a significant impact on matters of National Environmental Significance, it will require an approval under the Commonwealth *Environment Protection Biodiversity Conservation Act 1999* (EPBC Act). This approval is in addition to any approvals required under NSW legislation. It is your responsibility to contact the Department of Environment, Water, Heritage and the Arts in Canberra (6274 1111 or <http://www.environment.gov.au>) to determine if the proposal requires an approval under the EPBC Act. The Commonwealth Government has accredited the NSW environmental assessment process, so if it is determined that an approval is required under the EPBC Act, please contact me immediately as supplementary Director-General's requirements may need to be issued.

I would appreciate it if you would contact the Department at least two weeks before you propose to submit your Environmental Assessment for the project. This will enable the Department to determine the:

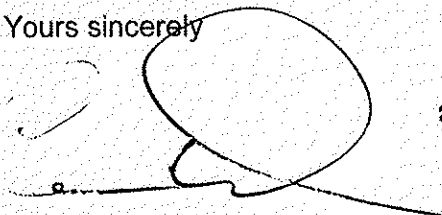

- applicable fee (see Division 1A, Part 15 of the Environmental Planning and Assessment Regulation 2000);
- consultation and public exhibition arrangements; and
- number of copies (hard-copy or CD-ROM) of the Environmental Assessment that will be required for exhibition purposes.

Once it receives the Environmental Assessment, the Department will review it in consultation with the relevant agencies to determine if it adequately addresses the Director-General's requirements, and may require you to revise it prior to public exhibition.

The Department is required to make all the relevant information associated with the project publicly available on its website. Consequently, I would appreciate it if you would ensure that all the documents you subsequently submit to the Department are in a suitable format for the web, and arrange for an electronic version of the Environmental Assessment to be hosted on a suitable website during the exhibition period.

If you have any enquiries about these requirements, please contact Jacqueline Ingham.

Yours sincerely

A handwritten signature in black ink, appearing to read 'C. Wilson', written over a horizontal line.

20.5.08

Chris Wilson
Executive Director
Major Project Assessment
As delegate for the Director-General

Director-General's Requirements

Section 75F of the *Environmental Planning and Assessment Act 1979*

Application number	08_0089
Project	Upgrade of the Chullora Waste Centre including the development of an Alternative Waste Technology (AWT) Facility with a processing capacity of 90,000 tonnes per annum.
Location	19 Muir Road, Chullora
Proponent	WSN Environmental Solutions
Date of Issue	30 May 2008
General Requirements	<p>The Environmental Assessment (EA) must include</p> <ul style="list-style-type: none"> • an executive summary; • a detailed description of the following within the Chullora Waste Management Facility and any associated areas: <ul style="list-style-type: none"> – historical waste and recycling operations; – existing and approved operations/facilities, including any statutory approvals that apply to these operations and facilities; – the existing layout of the site; and – existing environmental management and monitoring regime; • a detailed description on of existing operations and the proposed upgrades, including the: <ul style="list-style-type: none"> – need for the project; – alternatives considered, including a justification for the proposed AWT and waste management strategy on economic, social and environmental grounds; – likely staging of the project; and – plans of all proposed building works; • a risk assessment of the potential environmental impacts of the project, identifying the key issues for further assessment; • a detailed assessment of the key issues specified below, and any other significant issues identified in the risk assessment (see above), which includes: <ul style="list-style-type: none"> – a description of the existing environment, using sufficient baseline data; – an assessment of the potential impacts of all stages of the project, including any cumulative impacts, taking into consideration any relevant statutory provisions and technical or policy guidelines (see below); – a description of the measures that would be implemented to avoid, minimise, mitigate, rehabilitate/remediate, monitor and/or offset the potential impacts of the project, including detailed contingency plans for managing any potentially significant risks to the environment; • a statement of commitments, outlining all the proposed environmental management and monitoring measures; • a conclusion justifying the project on economic, social and environmental grounds, taking into consideration the suitability of the site and whether the project is consistent with the objects of the <i>Environmental Planning and Assessment Act 1979</i>; • a table indicating where each of the Director-General's requirements have been addressed in the EA and appendices; and • a signed statement from the author of the Environmental Assessment certifying that the information contained in the report is neither false nor misleading.

Key Issues	<ul style="list-style-type: none"> • Waste Management – including: <ul style="list-style-type: none"> – identify, classify and quantify the likely waste streams that would be handled/stored/disposed of at the facility; – describe how this waste would be stored and handled on site, and transported to and from the site; – describe the strategic role of the project in the context of the broader waste management strategies; and – details of the potential impacts associated with treating and storing this waste; • Soil and Water – including: <ul style="list-style-type: none"> – a detailed water balance for the project, outlining the measures that would be implemented to minimise the use of water on site; – wastewater predictions, and the measures that would be implemented to treat, reuse and/or dispose of this water; – the proposed erosion and sediment controls during construction; – the proposed stormwater management system; and – consideration of the potential salinity, contamination, flooding and acid sulfate soil impacts of the project; • Odour; • Greenhouse Gas – including: <ul style="list-style-type: none"> – a quantitative assessment of the potential scope 1 and 2 greenhouse gas emissions of the project, and qualitative assessment of the potential impacts of these emissions on the environment; and – a detailed description of the measures that would be implemented on site to ensure that the project is energy efficient; • Air Quality; • Noise – including construction, operation and traffic noise; • Traffic – including: <ul style="list-style-type: none"> – a detailed traffic impact study of the project on the safety and performance of the surrounding road network, and a description of the measures that would be implemented to upgrade and/or maintain this network over time; – an assessment of the potential parking demand of the project; and – detailed plans of the proposed layout of the internal road network and parking on site in accordance with the relevant Australian standards. • Hazards – including a Preliminary Hazard Analysis (PHA) of the project, and an assessment of the potential fire risks of the project; • Flora and Fauna – including any threatened species, populations and ecological communities, aquatic ecosystems and native vegetation. • Visual impacts; and • Heritage – including impacts on historic rail-yards and track.
References	While not exhaustive, the following attachment contains a list of the guidelines, policies, and plans that may be relevant to the project.
Consultation	<p>During the preparation of the Environmental Assessment, you should consult with the relevant local, State or Commonwealth government authorities, service providers, community groups or affected landowners.</p> <p>In particular you must consult with:</p> <ul style="list-style-type: none"> • Department of Environment and Climate Change; • Department of Water and Energy; • Sydney Water; • Roads and Traffic Authority; and • Bankstown City Council. <p>The consultation process and the issues raised must be described in the Environmental Assessment.</p>
Deemed refusal period	60 days
