Application number MP 10_0076 MOD 5
Kirrawee brick Pit , 556-594 Princes highway Kirrawee

I would like to **object** to the proposal of modification of the project above.

Reasons: increasing the number of units will add more traffic to the area (the old plans will impact the traffic and adding more units will make it worse).

Parking will be affected and there not enough parking spots for residents and not enough street parking in that area .

Council parking at kirrawee is not big enough to accomodate this increase in the number of cars .

My business is at Kirrawee and I already started to suffer from traffic and the project is just starting.

Kirrawee public school is not ready for that sudden increase in population .

There is a suggestion from the owners of the project to move Sutherland library to replace the pond and the park (as in old plans) and that will make site more crowded and will add more traffic to the site and increasing number of units will have a negative impact .

Council is not showing any intention or future plans to increase or modify the parking at kirrawee .

I haven't done any reportable political donation in the previous two years.

attention : Director - Modification Assessments
