STRUCTURAL LETTER

PROJECT: Pitt St, Redfern
CLIENT: Kaymet Pty Ltd
LOCATION: 133-144 Pitt St, Redfern
SUBJECT: Colonnade Column Support Frame

During demolition of the existing Rachel Forster hospital, Dr. Anthony S. Hasham of Australian Consulting Engineers P/L, Chartered Professional Engineer (Structural - 912202) and Accredited Certifier (N.P.E.R) of Institution of Engineers, Australia, was asked to inspect and advise on the existing Colonnade support frame at the above mentioned address. The colonnade support frame is to become a part of the new structure.

Based on the inspection it was found that in the stage of demolition at the time of the inspection, the colonnade columns were unstable and it would have been impractical to brace the columns during further demolition works. It was advised to Kaymet Pty. Ltd. in order to ensure minimal impact on the colonnade columns they should be safely and carefully dismantled. Once dismantled, the columns are to be kept in suitable storage that would protect them from any damage until they are to be re-erected at a later stage.

Yours faithfully,

Australian Consulting Engineers Pty Ltd

Dr. Anthony S. Hasham
