

I have concerns regarding the increasing of heights of buildings in the Marina Precinct.
PARKING

Will additional parking be allocated for the additional residents/people?

Will additional visitor parking be allocated to accommodate the increase in volume?

RUBBISH

The increase in people living or using the additional space will generate an increase in waste to be removed. Will this mean additional waste bins in the street? If so it could also impact on parking on garbage collection days. Plus more unsightly bins to be seen.

TRAFFIC

Has a study been done to ensure the road infrastructure will cope with additional usage?

I object to the proposed height increases as I feel the existing height levels were sufficient. I personally will not be affected in regard to water views etc
