

With the amount of development and high density housing there MUST be more vehicle access to the waterfront precinct to prevent traffic congestion and enable easy access for Emergency Services. Not to forget that it won't just be the locals driving through the area, this precinct will draw big crowds every day of the week whether it's for shopping, dinning, holidaying, swimming, nights out, working, the list goes on.

So in turn Sophia St and Mary St should have through access to the waterfront precinct joining Harbour Boulevard, Cove Boulevard, Boolwarroo Parade.  
Ensuring there is free flowing vehicular movement and no bottle necks getting in and out of this amazing development.
