

Proposed modifications.

I am very concerned this will become one of those over developed projects similar to whats happening in Sydney mainly motivated by profit but lack of consideration for the people living within the development area.

Hopefully, you don't lose sight of the beauty of this place and end up spoiling it due to over development meaning more people, more traffic, more rubbish on land and water and strain on services within the area.

I would like it known on record that I am against these modifications and hopefully Planning & Environment will not go ahead with approving them but I am just a little person with no power or influence against the might of such a proposal so presume what I say is meaningless and will make no difference whatsoever
