

i strongly disagree along with a lot of shell cove residences with the proposed changes to the shellcove marina.legally changes to the original plans should never be allow to be altered just because Frasers and shellharbour council can see a way of making more money than what they have done already.im disgusted to think that the council nad frasers have proposed changes to a marina that was suppose to be for families with a relaxed coastal feeling.With these extra storeys to buildings it will look a ugly overcrowded city (as the article said "LEGO LAND") , . residence have purchased homes and blocks on the prevision of the original plans.

the increase to the apartments and dwellings will have a huge impact on the area, it will take away the feeling of an relaxed coastal look . the hight of the buildings will have a huge impact on overshadowing also parking , where are people going to park.

schools and essential services ??what a huge effect these changes will make to these 2 things just to name a few.

council should think strongly about these changes that have been proposed , i can tell you there are a lot of unhappy residnce not only in sheelcove but around the local area, we have been waiting for this marina for 20 years now why would council stuff it up with chnages.

im am not very happy and i hope other people put their thoughts forward.
