

I am very against frasers wanting to do more town houses and high rise apartments. We were made to sit through seminars where they raved about the quality and the look of the marina. If you drive through there now it looks like a commission ghetto. They have allowed for so many poor quality designs and textures. The narrow roads cannot accommodate for the amount of townhouses and apartments frasers are doing. It's a safety issue for the young families that have moved there being promised a safe and family environment. We need to put a stop to frasers as they are ruining a beautiful piece of paradise . the dwellings are too close together and allows no privacy and blocking any potential views of the marina. Allowing 3 story townhouses and 5 story apartments is a greedy way of making profits rather than making more spacious/ wider dwellings. And the quality and look of them are putrid
