

I am totally against any changes to the current plan - especially increasing the height and bulk of these buildings it impacts the look, nature and future of our area. We bought and built on the promise of wonderful view of the marina. we would not have moved if we knew it was going to be like Sydney. There is no need for this 11 storey hotel frazers are wanting to add appartments on-top and sell off. they are selling other peoples dreams. Frazers have said the reason for the increase and changes to hotel to include serviced appartments and residential appartments due to decrease in tourist accommodation needs & low occupancy rates. This is money grabbing
We do not want are area turning into a cement jungle - we have moved away from this in Sydney and promises have been made.

Social impact - our primary schools and high schools are over flowing - Warilla High school is over capacity and they have to take 800 more new homes being built in Shell heights as well as the marina area. The roads cant cope at the moment with the amount of traffic coming and going without adding tourist traffic - you need to do your own research and not look at Frazers tick boxes. This is inappropriate and strategically unacceptable and non complying > Please knock this back
