

I'm strongly against the proposed changes to the marina.  
The whole project has been from the beginning nothing but a disaster.  
The new changes are nothing but another cash grab for the Fraser group.

The area is already grossly over populated. All homes are already built on top of each other. I already feel suffocated driving around the new suburb. This is no coastal sea change- all you see are town house after town house, no yards - just views of garages and roof tops. Not the coastal sea change that residents were drawn to the area for.

Our community is already dealing with parking, traffic congestion in this area not to mention that the rapidly growing area can not handle the influx of hospital beds and the ageing community.

The proposed changes do not offer the community any advantages at all for the long term. Only lining the pockets of the developers and real estate agents who are rubbing their grubby little hands together at the extortionate cost to live here.
