

More development means more opportunity. I trust that Fraser's Property Group will do all they can to ensure they work with the community to progress the development of the foreshore, for the benefit of the company, current and future residents.

With opportunity comes prosperity, and I strongly believe the opportunities created will mean more employment, more business, more facilities for this region, of which the current and future residents of this area can benefit from.

Fraser's Property must work hard to ensure they include and provide involvement opportunities for the local community as the company progresses the development of the harbour. It is ultimately the resident's home, and they want the best for their families, their friends and their future. Through working together all parties can enjoy a positive outcome.
