14.00 ESD PRINCIPLES

Breakfast Point Master Plan 2002 preceded State Environmental Planning Policy No 65-Design Quality of Residential Flat Development and BASIX water and energy conservation requirements under Cl 97A of the EP&A Act regulations. These statutory requirements are applicable to all lands in NSW, including Breakfast Point.

The planning and every phase of the construction process for the Breakfast Point community is to be directed towards:

- Reducing dependence on non-renewable and environmentally detrimental energy resources
- Reducing household energy demands
- Providing convenient and pleasurable access alternatives to the use of motor vehicles for local trips
- Reduction in residential waste to landfill
- Minimising pollutants to atmosphere, ground and water

ESD principles and initiatives applicable to this Concept Plan are:

- Planning provision is in place for a bus route linking all major community destinations, the Village Green, the Recreation Centre, the Village Centre and the waterfront.
- A pedestrian/cycleway system in accord with Chapter 10 is to provide safe and convenient and attractive links between facilities.
- Priority is to be given to deciduous trees and shrubs to the north of internal and external living spaces to maximise solar and light availability in winter.
- Natural gas is reticulated throughout the estate

Specific ESD performance standards and guidelines for built development will be in accordance with SEPP 65 guidelines and Basix.
