Subject: power line location objection

Director, Strategic Assessments, NSW Department of Planning.

I have seen proposals that indicate a major power line is going to go up my street at Cassidy Street, Denham Court to power something relevant to the new development at Edmonson Park. I object greatly to this proposal for a number of reasons.

Firstly, the new development is nothing to do with the existing area and we are already suffering adversely from it. I personally disagree with the proposed disruption to our normal daily lives and the destruction of our lawns and driveways, the noise and inconvenience that will occur in our quiet semi-rural community and I am against a massive substation that is not going to assist our local existing community in any shape or form.

Any power to another area or facility can be deployed within the boundaries of that project or facility. This would be more cost effective to the government and less disruptive for existing residents.

I personally disagree with this disruption to our day to day living, the destruction of our lawns and driveways, the noise and inconvenience that will occur in our quiet semi-rural community, just to deliver electricity to a substation that is unwanted in our community.

Yours truly,

Troy Platten

60 Cassidy Street, Denham Court 2565
