Munmorah Gas Turbine EIS - Post-exhibition Community Consultation
Telephone Conversation Record for 1800 817 711 (27/3/06 – 18/4/06)

No.	Name	Phone	Address	Date	Time	Issue	Details	Response	By	Further action?
21	Jan Deeves	4390 5863	cnr Lilo & Sunrise Ave, Budgewoi	27/3/06	14:30	Noise	Enough noise as it is, not necessarily from power station (e.g. road noise), Hadn't seen EA	Explained further noise monitoring to take place and wouldn't be 24/7 operation	SF	No
22	Mr Woodall	43909515	20 Huene Ave, Halekulani	29/3/06	13:06	Noise Air	<p>Wants to know what the impact of the new power plant will be if the existing plant is already running (i.e. the ambient noise levels were measured at night when it was very quiet, not when the power plant was running).</p> <p>Is 27dBA in Table 10.7 of the EA the predicted noise level on top of the background noise level?</p> <p>What will air quality impact be?</p>	<p>Explained:</p> <ul style="list-style-type: none"> - additional noise monitoring - wouldn't be 24/7 <p>Explained:</p> <ul style="list-style-type: none"> - won't convert to diesel 	SF	<p>Carlos to call back</p> <p>Carlos called back 29/3:</p> <ul style="list-style-type: none"> - Mr Woodall's call was related to the original flyer from Bevington Shores that caused alarm to many residents - he suggested that we talk about the noise being less than existing background levels rather than using dB measurements to describe noise - confusion regarding Table 10.7 in the EA - seemed ok with explanation and will pass the 'word' onto others

No.	Name	Phone	Address	Date	Time	Issue	Details	Response	By	Further action?
23	Bill Sweedman	43900249	Halekulani	29/3/06	14:43	Power	What is the megawatt output capacity of the proposed plant?	600 megawatts	SF	No. Just interested in power stations.
24	Colin Enrod	0402303552	Halekulani	30/3/06	9.57	Noise	Concern with noise. His property backs onto the fence at the boundary of the buffer zone (approx. 1km from gas turbine) Has friends living near a "similar" power station at Alice Springs and they say it is very noisy. These turbines operate all the time.	Asked Carlos to call	CO	Carlos responded (10:15am; 31/3/06) Informed caller that: - Munmorah would be a peaking plant only - noise would be below or just above background noise during the night. - noise would be monitored during commissioning; and - compliance with noise limits needs to be assured for DEC licence. Resident seemed ok with explanation.
25	Anne Murphy	43904114	Site 6, Bevington Shores	30/3/06	9.34 and 14.30	Site Noise Air	Concern about noise and emissions. Site A would be better for them. Wanted to make it clear that they are permanent residents, not a caravan park.	Returned call 31/3/06 (after 2 other attempts) Explained: additional noise monitoring to take place at Bevington Shores, and the comparison with site AvE Assured her that her concerns would be noted.	SF	N/A

No.	Name	Phone	Address	Date	Time	Issue	Details	Response	By	Further action?
26	Wendy Dawkins		Bevington Shores	30/3/06	14.00	Site Noise Air	Registered the following issues: - would prefer site A over E - concerned about noise and air emissions	Didn't leave call-back number so no response made		N/A
27	Phyllis Preston-trippas	43902908	175 Bevington Shores (backs onto Delta site)	31/3/06	10.37	Air Noise	Quite concerned about change in air quality, has asthma and emphysema, concern for her health. Also concerned about noise	Called back, explained that emissions would be guided by DEC licence and there would be further review during design, commissioning and Delta has proposed to fit each stack with monitoring equipment	SF	N/A
28	Narelle Collinson	4390 4485	Emu Drive, San Remo	31/3/06	10:49	Noise Options	Heard a very loud noise from existing power plant (early Sunday morning in February). Was worried the proposed station may be like that. If it does go ahead and is noisy what options do they have.	I investigated the noise and explained it to her and gave her a number to call to ask about existing operations. Assured her that the gas turbines would not produce similar noise. Explained her options/rights regarding complaints eg. call Delta, then DEC. Explained DEC licences.	SF	Called Delta then called Mrs Collinson back to explain details

No.	Name	Phone	Address	Date	Time	Issue	Details	Response	By	Further action?
29	Judy Hellier		32 Bevington Shores	31/3/06	11:03	Site Noise	Would rather site A because of the noise factor. Otherwise has no objections to the proposal	Didn't leave call-back number so no response made		N/A
30	Peter Ross	43904492	7 Bevington Shores	31/3/06	14:14	Site Noise	Prefer site A due to noise and possible other pollution (air) Would diesel be used often?	Explained: additional noise monitoring to take place at Bevington Shores, and the comparison with site AvE Explained diesel only used as back up and why gas power station wouldn't eventually operate only with Diesel. Caller very satisfied with response	SF	N/A
31	Ann Daly	4390 8601	Bevington Shores	3/4/06	13:28	Site Noise	Would prefer site A not E Concern regarding loud noise Friday night	Explained: additional noise monitoring to take place at Bevington Shores, and the comparison with site AvE Caller seemed satisfied with response	SF	N/A
32	Leslie Kerry		Bevington Shores	5/4/06	9:46	Site	Would prefer site A not E Already sent a letter (I assume submission) and just wanted to back this up	Didn't leave call-back number so no response made		N/A

No.	Name	Phone	Address	Date	Time	Issue	Details	Response	By	Further action?
33	David Sanson	43246311	Site 11, Bevington Shores	18/4/06	9.37	Flyer Site Noise Air	Thought he should have received correspondence (flyer) but hasn't Would prefer site A not E Concerned whether it would increase noise levels Concerned that dust emissions may increase.	Promised to send flyer Explained: additional noise monitoring at Bevington Shores, and the comparison with site AvE, Explained that it is a peaking plant, that noise would be restricted by the licence and would be generally below background levels. Explained that dust from operation would be minimal	SF	Send flyer (newsletter#3)
34	Denise George	43991242	7 Lilo Avenue, Budgewoi, 2262	18/4/06	9.57	Decision	Wanted to know whether any decision has been made. (Also contacted Delta)	Delta provided answer that decision was still a number of weeks (months?) away. I confirmed this. Promised to send the flyer to her.	SF	Send flyer (newsletter#3)
