NOTE:

The sources of existing building information indicated on the View Analysis drawings are:-

1. Three dimensional digital city model;
2. Photographic information;
3. Photocopies of images and drawings and
4. Information searched from various sources from the internet.

The drawing shows the general elevations of the existing buildings but this is not from building surveyed information. It shows the building windows as assessed from digital CD, city model and photographic evidence.

As the above sources exist in various mediums, scales and may be subject to distortion in scale, the accuracy of this information should only be a general indication of the effects of the Concept Plans when compared with each other. The same base information has been used for all comparisons.
