Website
Submission 01/11/2010 Online Submission from Katrina
Rotunno (support)

The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

North Byron Parklands will provide training and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

P2531	Project Website Submission	01/11/2010	Online Submission from NICOLE VERLAAN (support)	North Byron Parklands commitment to the preserving and enhancing the local ecosystems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the â€œcoast to hinterlandâ€™ wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise â€œdowntimeâ€™ will allow the Parklands site to assist the functioning of the adjoining Nature Reserve. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. From a cultural breeding ground perspective alone we must get the proposal approved. Itâ€™s a fabulous exciting vision and we are very lucky that this proposal is before us.

P2532	Project Website Submission	01/11/2010	Online Submission from Trent Davies of AdvantageSA (support)

North Byron Parklands commitment to the preserving and enhancing the local ecosystems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed an environmental, health and safety management manual to ensure the end result is a sustainable cultural events site.

Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, "I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a community". (Donna Sue Sanders "Executive Director of the Daytona State Foundation).

This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this.

Online Submission from Kieron
Brown (support)

To Whom It May Concern,

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to.

It is for these reasons and more that I would like to see the Splendour in the Grass festival given a permanent home, and the opportunity to continue setting the benchmark for responsible event management.

Regards,

Kieron Brown

P2535	Project Website Submission	01/11/2010	Online Submission from Tansy Stowe (support)

Music events such as Splendour are few and far between, and obviously hugely popular. These events foster the coming together of the music loving community from right around the country regardless of ethnic / socio-economic background or age group. It fosters a common appreciation for music for all to share. Events such as Splendor are important in supporting a healthy music culture in Australia, as well as supporting anti-discriminatory sentiment. It is great that organisers go to such length to make these events possible in a safe and responsible environment and it's really important that our regulatory system supports them in being able to achieve this. Please support 'Splendor in the Grass' by allowing the event to establish itself on a long-term basis at the North Byron Parklands. In addition to the contribution this event makes to the local tourism industry, it is an event that a significant portion of the Australian community enjoys and this should be reason enough for state and local government to put considerable effort into supporting it.

 Submission

01/11/2010 Online Submission from Richard
 Millington of Territory Iron (support)

North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual.

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands!

P2537	Project Website Submission	01/11/2010	Online Submission from Georgia Munn (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all don't move to cities. Name: Georgia Munn Address: 12 Jerula Avenue, Mt Eliza, Victoria, 3930 IP Address: cpe-124-180-230-10.lns9.lon.bigpond.net.au - 124.180.230.10 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2538	Project Website Submission	01/11/2010	Online Submission from carmen perkins (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing.

While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

Why wouldn't we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal.

P2539	Project Website Submission	01/11/2010	Online Submission from Liam Browne (support)

Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home!

North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it!

North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map.

P2540	Project Website Submission	01/11/2010	Online Submission from Trudi Anderson (support)

North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations.

The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

P2541	Project Website Submission	01/11/2010	Online Submission from Liam Bailey of BDO International (support)	There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map. For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands. Name: Liam Bailey Organisation: BDO International Address: 14a jarrett Street, Leichhardt NSW 2040 IP Address: proxy4.message-labs.net - 117.120.16.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2542	Project Website Submission	01/11/2010	Online Submission from Sam Atkinson (support)	The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with

low natural hollow abundance. These are very positive initiatives.

This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments.

P2543	Project Website Submission	01/11/2010	Online Submission from Melanie Gaunt (support)

While much is made of the Marshallâ€™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities.

We can look at other parts of the world to help understand the likely impacts of the North Byron Parklands proposal. Donna Sue Sanders â€œ Executive Director of the Daytona State Foundation states that â€œcommunities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ€™

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community.

P2544	Project Website Submission	01/11/2010	Online Submission from Elizabeth Jokantas (support)

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

North Byron Parklands proposal to rejuvenate the Parklands site has lead to the employment of local indigenous bush regeneration teams to plant thousands of trees across their site. This program is an ecellent way to involve the traditional land owners in the area and helps to restore the site and set the foundations for a sustainable event site.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

P2547	Project Website Submission	01/11/2010	Online Submission from Jo Ward (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron

Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

P2550	Project Website Submission	01/11/2010	Online Submission from Michael Rumbold (other)	I am generally in favour except for the number of major event days and the fact no upper limit is set for the major event days on the number of people. A major event is classified as being greater than 10,000 with no upper limit. There should be an upper limit set of maximum 20,000 if not then I would have objections. The number of days for major events is excessive when you consider 'bump' in and out days. I would propose 6 to 8 days being the maximum for major events. Name: Michael Rumbold Address: 12 Alice Avenue Newtown NSW 2042 IP Address: proxy-web-prd-ext-1.ucc.usyd.edu.au - 129.78.32.21 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2551	Project Website Submission	01/11/2010	Online Submission from Tara Cullen (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. This is an awesome event that rightfully should be held in the most awesome environment in the world! BYRON!

P2554	Project Website Submission	01/11/2010	Online Submission from Lydia Smith (support)	Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. Name: Lydia Smith Address: 46/87-89 Scott Road, Herston 4006 QLD IP Address: 60-242-251-8.static.tpgi.com.au - 60.242.251.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2555	Project Website Submission	01/11/2010	Online Submission from Alana Muir (support)	12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review with be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community.

Regards,

Alana Muir

P2556	Project Website Submission	01/11/2010	Online Submission from Kate Wall (support)	Byron Bay is known for its culture and events. Donâ€™t deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal! In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. Name: Kate Wall Address: 27/7-17 Sinclair St Wollstonecraft NSW 2065 IP Address: d122-104-50-185.sbr2.nsw.optusnet.com.au - 122.104.50.185 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2557	Project Website Submission	01/11/2010	Online Submission from Shelley Bennic (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved! Name: Shelley Bennic Address: 6 Bucknall Court, Hattonvale Qld 4341 IP Address: 103.1.221.203.static.comindico.com.au - 203.221.1.103 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2558	Project Website Submission	01/11/2010	Online Submission from Emma Howatson (support)	I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth. Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one. Name: Emma Howatson Address: 1/156 Bonney Av, Clayfield 4011 IP Address: dsl-61-95-54-202.request.com.au - 61.95.54.202 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2559	Project Website Submission	01/11/2010	Online Submission from Aaron Piltz of ASIC (support)	Splendour in the Grass continues to promote Byron, ensuring tourists return to Byron long after the event. This tourism is what has built Byron into the beautiful thriving town it is. To turn your back on the Splendour now would show no appreciation for the tourist industry that is Byron Bay.

If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

P2560	Project Website Submission	01/11/2010	Online Submission from Angela McCormack (support)	North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community. North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately \$55,000 compared with \$71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region. The North Byron Parklands has gone to great lengths to protect and enhance the biodiversity values of the site. This is shown by the Parklands group developing a environmental, health and safety management manual to identify, manage and monitor all the identified potential ecological risks. Website
Submission 01/11/2010 Online Submission from Megan
Alessandrini (support)

The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment.

Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids.

It would be a shame to see this proposal turned down, it doesn't take much to see that the North Byron Parklands proposal has so much to offer.

P2562	Project Website Submission	01/11/2010	Online Submission from Sean Russell (support)

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

P2563 Project
Website
Submission 01/11/2010 Online Submission from Greg
McKenna of Coffey (support)

The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

P2564	Project Website Submission	01/11/2010	Online Submission from Kylie Ellis (support)	North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community. Name: Kylie Ellis Address: Medical School South, From Road, Adelaide, SA 5000 IP Address: pulteney-pix.border.net.adelaide.edu.au - 192.43.227.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2565	Project Website Submission	01/11/2010	Online Submission from Gabriella Croker (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental

inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world's best environmental practice.

Being young it's important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available.

P2567	Project Website Submission	01/11/2010	Online Submission from Brydie Nielson (support)	I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. North Byron Parklands proposal to rejuvenate the Parklands site has lead to the employment of local indigenous bush regeneration teams to plant thousands of trees across their site. This program is an ecellent way to involve the traditional land owners in the area and helps to restore the site and set the foundations for a sustainable event site. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. Name: Brydie Nielson Address: 25 Wearne Road, Echuca, Vic. 3564 IP Address: cpe-124-181-108-212.vic.bigpond.net.au - 124.181.108.212 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2568	Project Website Submission	01/11/2010	Online Submission from amanda dey (support)	The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range of skill sets. Projects of this nature should be approved on this basis alone. The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It is impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Name: amanda dey Address: 20 yumbol close forresters beach nsw IP Address: - 125.254.77.193 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2569	Project Website Submission	01/11/2010	Online Submission from Ben Miller of Jacoby Cameron (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. From a cultural breeding ground perspective alone we must get the proposal approved. It?s a fabulous exciting vision and we are very lucky that this proposal is before us. P2572 Project
Website
Submission 01/11/2010 Online Submission from Joel
Campbell (support)

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands.

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

P2573	Project Website Submission	01/11/2010	Online Submission from Faerellen Davis (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the "coast to hinterland"™ wildlife corridor. The extended "rest"™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise "œon-ground" what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P2574	Project Website Submission	01/11/2010	Online Submission from rhys ovenden (support)

I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet.

Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved.

The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that don't require employees. North Byron Parklands will provide many new jobs for the young people in the community.

P2575	Project Website Submission	01/11/2010	Online Submission from Mitch Finlay (support)

The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

P2576	Project Website Submission	01/11/2010	Online Submission from Peter Hanrahan (support)	At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended. In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. These opportunities offered to the young community are truly invaluable to our region. With the recent global financial crisis many businesses in the area were hit hard. Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals.

P2577	Project Website Submission	01/11/2010	Online Submission from Joanna Morgan of NAB (support)

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ™s important to have these opportunities for young people in the region.

In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue.

P2578	Project Website Submission	01/11/2010	Online Submission from Leah Woroglian (support)	I just heard about the proposed North Byron Parklands and got instantly excited. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal. Please don't get rid of this. Music is our escape it is our home it's in all of us and we come together when it's on. Name: Leah Woroglian Address: 31 Troode St, WEST PERTH 6005 IP Address: telcos1.lnk.telstra.net - 165.228.106.174 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2579	Project Website Submission	01/11/2010	Online Submission from James Morgan of ADG Engineers (support)	The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce. P2581 Project
Website
Submission 01/11/2010 Online Submission from Kathi
Satchel (support)

There are massive economic and environmental benefits to have the music festival
Splendour In The Grass at the proposed site at North Byron Parklands.

This proposal will create new jobs to young adults and promote sustainable development.
The local government should welcome that and support this proposal.

From my understanding of the proposal, there will be little to no activity for 280 days each
year, thereby preserving the natural local environment. Splendour has committed to
increasing the size and function of the Marshallâs Ridge wildlife corridor which straddles
the property. They are also working closely with the National Parks and Wildlife Service to
increase habitat cover to make it easier for animals to move freely across the site and to
protect and expand the adjoining Billindugel Nature Reserve. Even with the largest event
less than half of the land will be used, leaving the majority of it for habitat use and bush
regeneration.

Please allow Splendour to "come home" to Byron

P2584	Project Website Submission	01/11/2010	Online Submission from Jodi Woolf (support)	North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures. If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase

opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

It is important for the youth to be proud of where they come from. The Parklands proposed cultural event site is something that the youth are behind and should be supported by the local government.

P2585 Project
Website
Submission 01/11/2010 Online Submission from Tyson
Millar (support)

North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands.

The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.

North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all don't move to cities.

Website
Submission 01/11/2010 Online Submission from Kelly
Newton (support)

Whatâ€™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised.

P2587	Project Website Submission	01/11/2010	Online Submission from Alice brandli of university of melbourne (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the 'Splendid Initiative' offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. P2588	Project Website Submission	01/11/2010	Online Submission from Kasia Ovenden (support)

I truly believe whole heartedly in this country that lets us have a voice about the things we feel extremely passionate about ,and this for me is definitely one of those causes. I think Byron represents an amazingly beautiful and brilliantly natural landscape.. one that people love to come back to experience over and over again. Its town and the residents who live there are extremely genuine, warm, kind, caring and extremely helpful people. All these things that I love about Byron is all the more embodied in its cultural and musical side and there is nothing that represents Byron more greatly and with absolute respect than the Splendour in the Grass Festival. I think that it is quite obvious with the points provided below that this Festival cares deeply for Byrons natural beauty and all its inhabitants. It cares about its residents and the many business owners which flourish most as a result. I think that Byron is the Festival's one and only true home just the same as it is to all the locals that live there and it will never be the same anywhere else... simple as that. Splendour in the Grass needs Byron and Byron needs Splendour! Splendour in the Grass is the most amazing one of a kind Festivals in the whole of Australia.. nothing beats it in my opinion.. and what better place to have it but its true home town that is just as amazingly unique!

Please hear our voices loudly!!!

Kind regards,

Kasia Ovenden.

The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. Its impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and

detail when it comes to considering the health of the environment?

North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately \$192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved!

North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community.

P2592	Project Website Submission	01/11/2010	Online Submission from Sam Evatt (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. My wife and I have attended the festival in the past, and intend to attend future festivals with our family. The experience was amazing, which included visiting and enjoying the entire Byron Bay Shire. The community was very welcoming, and to secure a permanent home for such an event makes great sense in that it can be managed in a way so that it is of benefit to the surrounding land and its community. Name: Sam Evatt Address: 16 Glenning Road, Glenning Valley 2261 IP Address: cpe-124-183-103-72.lns14.ken.bigpond.net.au - 124.183.103.72 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2593	Project Website Submission	01/11/2010	Online Submission from Murray Whiteford (support)	I am just here to add my support to the venture, I have attended 2 events and have been impressed both times with the event and the effort that the organizers have made to ensure that it is environmentally friendly. Given the arguments they make for the venue it is easy to see why you would want to approve it. Please approve. regards Murray Name: Murray Whiteford Address: 4/37 Harrington St, Enmore, NSW 2042 IP Address: - 203.94.171.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2594	Project Website Submission	01/11/2010	Online Submission from Narissa Mathews of gaelic Hotel (support)	There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses.

North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

P2595	Project Website Submission	01/11/2010	Online Submission from Melissa Ridley (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising ?down time? between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. Name: Melissa Ridley Address: 2/64a Cambridge St Stanmore NSW 2048 IP Address: webmail.ingim.com.au - 202.92.68.202 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2596	Project Website Submission	01/11/2010	Online Submission from Penelope Paton of Territory FM (support)	Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. In total Splendor in the Grass is a important investment to the people of Byron Bay. Splendor in the Grass brings tourism and thus brings a positive return for this town. This event is concerned with its carbon footprint, as well it promotes an environmentally friendly attitude amongst its patrons. Splendor is a great medium for young artists to express their opinions and hang their art amongst a backdrop of youth culture. Splendor positively promotes Australian Music and Creative Industries. Without this where is our culture? P2597	Project Website Submission	01/11/2010	Online Submission from Emily Reid (support)	There is current trend on The Northern Rivers for young adults to move to major cities such as Sydney and Melbourne soon after finishing school. North Byron Parklands provides incentives for the youth to remain in the area by creating new and exciting employment opportunities, such as event management, live sound engineering, and even a career in music!

It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning.

Khoury of Individual (support)

I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region.

P2600	Project Website Submission	01/11/2010	Online Submission from Jody McMiles (support)

One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive.

North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved!

The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful.

Online Submission from Craig
Milton (support)

Hi there

Splendour in the Grass has grown so much over the past ten years into such a wonderful annual event, it is right up there with the major players in terms of defining rites of passage for Australia's youth.

But the charm of what makes Splendour so special is its location. Its not in some big sporting stadium or boxed in entertainment centre. It's out there in nature, out of the city, with fresh clean air and friendly laid back locals. Byron Bay has so much to benefit from allowing Splendour to remain in Byron not only in terms of employment and revenue and the flow on effects of tourists attending the festival. The new home would allow many more than the previous site, thereby rapidly expanding the potential for local businesses and accommodation to capitalise on this yearly pilgrimage.

In an era where live music is dying and festivals are going bust, Splendour is a rare success story, which greatly improves year upon year.

Please save Splendour.

Regards

Craig Milton

01/11/2010 Online Submission from Karolina
Kilian (support)

To whom it may concern at the NSW Department of Planning,

I am an avid supporter of Byron Bay becoming the permanent home of the Splendour in the Grass festival.

There are many reasons why I love coming to the festival when it takes place in Byron, however its location in the Byron Shire will also be of benefit to the local community by supporting jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its time to approve the North Byron Parklands proposal.

The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is \$192.6 million annually.

North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region.

Best regards,

Karolina Kilian

P2604	Project Website Submission	01/11/2010	Online Submission from Kylie Taylor (support)	As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

P2605	Project Website Submission	01/11/2010	Online Submission from Arielle Kiss (support)	Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands! Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. Online Submission from Graham
Wood (support)

Hi

I would like to support the movement to approve the New Splendour in the grass site for the following reasons:

Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

I would also like to re-affirm the importance in australia's modern cultural landscape that splendour in the grass offers. Without this key event each year australia would be losing a cultural icon similar to the Bathurst races or the Tamworth country music festival. All of which are breeding grounds for Australian talent to thrive on an international field.

01/11/2010 Online Submission from Zac Xavier
of EML Air Pty Ltd (support)

I support and agree with all the reasons below for myself, my children and my children's children.

I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world's best environmental practice.

The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me.

P2608	Project Website Submission	01/11/2010	Online Submission from Rebecca Craig (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters.

01/11/2010 Online Submission (support)

Dear Sir or Madam,

PLEASE NOTE: I DO NOT WANT MY NAME TO BE MADE AVAILABLE TO THE PROPONENT, AUTHORITIES OR ON YOUR WEBSITE.

I am writing in support of the application to house Splendour in the Grass at North Byron Parklands.

There has been a long search for a permanent cultural events site in the Byron Shire and while the Blues Festival has purchased a site (after the North Byron Parklands property was bought) they have always committed to only hosting the Blues Fest there. So there is still a very strong need for another site that can cater to a range of cultural and community events.

The North Byron Parklands site is the perfect choice conveniently located in the North of the Shire and should be supported by all levels of government. It will be a huge benefit for the area on so many fronts including economic and social.

In addition, the Splendour organisers are taking the environmental impact of the festival seriously, and having successfully organised 9 previous festivals at the existing site, their care and dedication for a mutually beneficial outcome is self-evident.

I would be happy to provide any further feedback if required.

P2610	Project Website Submission	01/11/2010	Online Submission from Chantel Kent (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. Name: Chantel Kent Address: 109 Edinboro St, Mt hawthorn WA 6016 IP Address: cpe-124-178-132-227.lns3.pie.bigpond.net.au - 124.178.132.227 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2611	Project Website Submission	01/11/2010	Online Submission from jillian tierney of Charm Health (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region. Name: jillian tierney Organisation: Charm Health Address: 4/38 Salt StreetWindsor 4030 IP Address: mail.charmhealth.com.au - 203.201.153.106 Submission for Job: #3210 Cultural Events Site (Project Application)

P2612	Project Website Submission	01/11/2010	Online Submission from peta brill (support)	The Byron Shire and Northern Rivers region is home to an aging community with a high proportion of retirees. This means many young people are leaving the area to seek education and employment opportunities elsewhere. North Byron Parklands would help provide employment for many of these young people, thus giving them a reason to stay in the area. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive. The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. Name: peta brill Address: 17 fowles street weston act 2611

P2613	Project Website Submission	01/11/2010	Online Submission from Maddie Morton of Splendour Rocker (support)

Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer.

For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers.

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

From a cultural breeding ground perspective alone we must get the proposal approved. It's a fabulous exciting vision and we are very lucky that this proposal is before us.

P2614	Project Website Submission	01/11/2010	Online Submission from Evelyn Synnott (support)

Good afternoon,

I am writing in regard to the North Byron Parklands proposal.

It is very exciting to see a proposal of this sort in the Byron Shire. North Byron Parklands will see a rise in employment opportunities for residents, a boost in sales in local businesses[™], and a influx of cultural events. This development will make the north coast a definite stop on the tourist map for years to come. Lets get behind it!

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

Thank you for your time.

Kind regards,

Evelyn Synnott

P2615	Project Website Submission	01/11/2010	Online Submission from NEICHA GOODALL (support)	North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year. We have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project. Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see

some excellent environmental outcomes arising from this development. I am very supportive of their approach.

Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that.

P2616	Project Website Submission	01/11/2010	Online Submission from David Sutton (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately \$192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved!

Byron Shire Council has always longer for a permanent event site in its LGA, particularly now that the existing sites are either no longer available or are too inadequate to deal with world class events. The Blues Fest have bought a site which they intend to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would such a shame for the NSW government not to approve it.

With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.

P2617	Project Website Submission	01/11/2010	Online Submission from Tim McCartney of Mcartneymusic (support)	You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. Name: Tim McCartney Organisation: Mcartneymusic Address: PO BOX 391Glebe NSW 2037 IP Address: d110-33-98-38.mas800.nsw.optusnet.com.au - 110.33.98.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2618	Project Website Submission	01/11/2010	Online Submission from Jessica Boyd (support)	The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. Further, Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the

economic and tourism benefits are substantial.

Please approve this submission by Splendour in the Grass. The organisation is committed to running events on this site that are both environmentally and socially aware.

Kind regards,

Jessica Boyd

P2620	Project Website Submission	01/11/2010	Online Submission from Nicolas Schwab (support)	While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region?s

economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality.

A business that combines ecology with events and community giving. That's the kind of business that our young people are looking to for training and experience. Let's get it approved.

P2621	Project Website Submission	01/11/2010	Online Submission from Megan Isabella Guise of Megan Isabella (support)	The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year. The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together. Name: Megan Isabella Guise Organisation: Megan Isabella Address: 63 Drake StreetBayswater WA 6053 IP Address: ppp118-210-201-131.ins20.adl6.internode.on.net - 118.210.201.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2622	Project Website Submission	01/11/2010	Online Submission from Chanelle Maracic (support)	The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

P2623	Project Website Submission	01/11/2010	Online Submission from Lisa Munro (support)	I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved!

Kind regards

Lisa Munro

North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved!

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

PLEASE DO NOT MAKE MY NAME AVAILABLE TO THE PROPONENT OR OTHER INTERESTED PUBLIC AUTHORITIES, AND PLEASE DO NOT PUT IT ON THE DEPARTMENT'S WEBSITE.

Having a world class sustainable event venue at the Parklands site will put The Northern Rivers on the map as a leader in sustainable venue developments. This will also aid local educational institutes such as Southern Cross University in environmental related courses by having a world class example in the area.

North Byron Parklands commitment to the preserving and enhancing the local ecosystems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site.

Also, the North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. The evidence suggests that this proposal will be successful.

P2625	Project Website Submission	01/11/2010	Online Submission from Cassie Schiller (support)	With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth.

P2627	Project Website Submission	01/11/2010	Online Submission from Rosario Rodriguez (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I

think this is a really important benefit for this region.

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

Being young it's important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available.

P2628	Project Website Submission	01/11/2010	Online Submission from Carlie McCulloch (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one. There has been a long search for a permanent cultural events site in the Byron Shire and while the Blues Festival has purchased a site (after the North Byron Parklands property was bought) they have always committed to only hosting the Blues Fest there. So there is still a very strong need for another site that can cater to a range of cultural and community events. The North Byron Parklands site is the perfect choice conveniently located in the North of the Shire and should be supported by all levels of government. It will be a huge benefit for the area on so many fronts. North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities. P2629 Project
Website
Submission 01/11/2010 Online Submission from Peta
Yabsley (support)

One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a area in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area.

The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local business? income. There is no reason why this proposal should not be approved by state government.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P2630	Project Website Submission	01/11/2010	Online Submission from Phillip Reid of Public Education (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this one initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented.

Let's look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment.

The petition response above raise significant points that are being debated. I would like to vouch for the organisers having experienced some of their events. As a regular festival goer I am always comforted by the way the organisers respectfully publicise issues of environmental impact and sensitivity. I believe their attention and commitment to these issues has a positive influence upon the people who attend these events, encouraging a culture of understanding and concern within the festival attendees for their impact on the environment they interact with.

P2631	Project Website Submission	01/11/2010	Online Submission from Anna Armstrong (support)

The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

As someone who has attended several Splendour festivals, including the very first at Belongil, I'd love to see the festival return to its home in the Byron Bay area.

P2633	Project Website Submission	01/11/2010	Online Submission from Gemma Duff (support)	Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy. The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. Personally, I was introduced to Byron by attending Splendour, and I return every year multiple times because of that initial experience. You've got a chance to present to the world the uniqueness of Byron Bay. I was always under the belief that Splendour exhibited some of the core qualities that Byron see's itself as, musical, freeing, going against the grain, celebrating individuality. I would hate to think that Byron bay has become exactly what the first surfies that made Byron were trying to escape, control by government to be conservative and fit a particular mould. It's time to celebrate diversity and culture, and introduce people to a world we're you can be who you are, as you are. P2635	Project Website Submission	01/11/2010	Online Submission from Jeremy Powell (support)	Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Name: Jeremy Powell Address: 2/2 Linton Court IP Address: cpe-124-191-116-208.cxzw1.win.bigpond.net.au - 124.191.116.208 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2636	Project Website Submission	01/11/2010	Online Submission from Jill Richardson of Selleys (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. Name: Jill Richardson Organisation: Selleys Address: 1-15 Gow Street, Padstow 2211 IP Address: - 168.252.233.190 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2637	Project Website Submission	01/11/2010	Online Submission from Marissa Gillies (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised. The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. Name: Marissa Gillies Address: 189 Washington Drive, Bonnet Bay, NSW 2226 IP Address: - 203.98.92.232 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2638	Project Website Submission	01/11/2010	Online Submission from Aaron Bambrick of Michael Page Internation (support)	Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing.

The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesn't proceed then it's likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklands' group? No-one. That would be a terrible lost opportunity.

P2643	Project Website Submission	01/11/2010	Online Submission from Samantha Goldrick of FestivalFansAustralia.org (support)

To Whom It May Concern

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a

development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

Futhermore, in relation to employment and wages the Byron local government area has one of the State's lowest average wages, around \$31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities.

This festival is the heart and soul of the byron community, encourages tourism within Australia and connects people across the country and the world for the love of music. The spirit of such a festival is strong and belongs in the roots where it began so many years ago. Aside from being the main source of income for Byron locals, the nostalgia of this festival is still very much alive and it deserves to remain where the tradition began- in a sleepy little hippie town that is alive with culture and brought together by music.

Kind Regards,

Samantha Goldrick

P2644	Project Website Submission	01/11/2010	Online Submission from josh toole of Australian Sports Marketing (support)	Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

P2645	Project Website Submission	01/11/2010	Online Submission from Krystan Gray (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

P2646	Project Website Submission	01/11/2010	Online Submission from lisa aitken (support)	While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal. While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue.

P2648	Project Website Submission	01/11/2010	Online Submission from Alistair Stephenson (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment.

Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

--

On a more personal note, I've only had the pleasure of experiencing Splendour in the Grass at this year's event. Woodfordia in 2010 was a truly great location for it, but despite the smaller size, people still rave about the original Byron location. I can only take their word for it.

I'm so genuinely excited by the prospect of bringing Splendour back to Byron. Honestly, I would go in 2011 anyway, but Byron and the proposed development plan just sounds like the obvious choice. I hope you consider the collective positive sentiment of thousands of visitors who would agree with me.

Thanks.

P2649	Project Website Submission	01/11/2010	Online Submission from Felicity Maniszewski (support)

In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented.

The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

P2650	Project Website Submission	01/11/2010	Online Submission from Kynan Puru Watt (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone.

North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy.

If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities!

P2651	Project Website Submission	01/11/2010	Online Submission from Monica Franz of N/A (support)

With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative.

North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government.

P2652	Project Website Submission	01/11/2010	Online Submission from Terry Hogg of lick colour (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation's environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. Name: Terry Hogg Organisation: lick colour Address: 5/19a Tusculum Street Potts Point NSW2011 IP Address: 69.77-67-202.dynamic.dsl.syd.iprimus.net.au - 202.67.77.69 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2653	Project Website Submission	01/11/2010	Online Submission from Rafael Urbano of ExtremStudio (support)	The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that

such jobs can be made available. Parklands covers an industry that can provide lots of local jobs.

North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

P2654	Project Website Submission	01/11/2010	Online Submission from Kate Brewster (support)

At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended.

If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that with a rapidly expanding population there is a strong

need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments.

So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality.

P2655	Project Website Submission	01/11/2010	Online Submission from brendon ferreira (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture. Name: brendon ferreira Address: 6 Prestwick Ave, Rouse Hill IP Address: 203-219-44-12.static.tpgi.com.au - 203.219.44.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

Website
Submission

01/11/2010 Online Submission from Adam
Flynn (support)

I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet.

The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

In recent times visitor day trips to the northern rivers has been declining. Coupled with a downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of time include cultural event activities such as those proposed by North Byron Parklands. This business is capable of attracting hundreds of thousands of visitors each year to the northern rivers which will be a huge boon for the area.

A lot of my friends are moving outside of Byron Bay to bigger and better opportunities. It would be great if we had those opportunities offered to us closer to home.

Kind Regards,

Adam Flynn

P2657 Project
Website
Submission 01/11/2010 Online Submission from Bianca
Brooks (support)

No other festival compares to Splendour in the Grass.. and well over half the reason why it far exceeds the rest is because of its prime location in Byron Bay!!

We cant have it destroyed.. we cannot let it die!!

Keep Splendour in Byron Bay - Its true Home.

With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

P2658	Project Website Submission	01/11/2010	Online Submission from Kelsey Giardina of Monash University (support)	Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

P2659	Project Website Submission	01/11/2010	Online Submission from Alex Campbell (support)

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

Please approve this project, it really sounds exciting for various reasons, including arts, employment and cultural awareness.

P2660	Project Website Submission	01/11/2010	Online Submission from Lyndall Murray of AUSTAR Entertainment (support)	North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians.

P2661	Project Website Submission	01/11/2010	Online Submission from mariani vermeend (support)

The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the "coast to hinterland" wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise "downtime" will allow the Parklands site to assist the functioning of the adjoining Nature Reserve.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the

youth and benefit the regions economy.

P2662	Project Website Submission	01/11/2010	Online Submission from Elissa Wass (support)

The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported.

On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives.

P2663	Project Website Submission	01/11/2010	Online Submission from Jack Wilton (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being Being young it's important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available. Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one?

P2664	Project Website Submission	01/11/2010	Online Submission from Ben Dwyer (support)	I believe that the North Byron Parkland proposal will bring benefits to the surrounding community while being sensitive to the needs of the community and the local environment. The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families, as a great way for the society to be brought together. North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. Regards, Ben Dwyer Name: Ben Dwyer Address: 301/14 Macleay St., Potts Point, NSW, 2011 IP Address: au3isa02ex2.resmed.com.au - 203.15.64.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2665	Project Website Submission	01/11/2010	Online Submission from Katrina Campbell (support)	After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ proposal 100% . The local government should approve this application. Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. Name: Katrina Campbell Address: 31 High St, Lutwyche IP Address: - 165.86.71.20 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2666	Project Website Submission	01/11/2010	Online Submission from cecilia crawford (support)	As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application.

The approval of the North Byron Parklands proposal will benefit the local creative industries and lead to a new wave of new and interesting jobs for the youth in the area. Letâ€™s build the local industry and make The Byron Shire a hub for creative individuals.

Website
Submission 01/11/2010 Online Submission from Dee
McGrath of Queensland Brain
Institute (support)

To whom it may concern,

For many reasons I support the proposal that the Splendour in the Grass fesitval returns to the Bryone Shire.

Byron Shire and the wider northern rivers region has been a fast growing area for the creative industries sector. Large numbers of people have moved into the region with expectations of finding work in this sector and more than ever there is a need to ensure that projects that directly and indirectly benefit this growing sector are supported. The Parklands proposal if approved will become a dominant force in expanding the creative industries sector and will provide substantial job opportunities.

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

Please approve this proposal.

Regards,

D. McGrath.

P2668	Project Website Submission	01/11/2010	Online Submission from Bonnie Davies of Bootleg Comedy (support)	I am writing to you in support of the proposed permanent home for Splendour in the Grass. Festivals in Australia are a precious and exciting tourism opportunity for regional Australia and showcases the countryside and natural splendours while attracting residents and tourists alike to large scale celebrations - such as music festivals. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and

training opportunities are needed and are very exciting for young adults in the community.

The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a "sustainable" site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

P2674 Project
Website
Submission 01/11/2010 Online Submission from Matt
Jacques (support)

While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue.

Byron Shire and the wider northern rivers region has been a fast growing area for the creative industries sector. Huge numbers of people have moved into the region with expectations of finding work in this sector and more than ever there is a need to ensure that projects that directly and indirectly benefit this growing sector are supported. The Parklands proposal if approved will become a dominant force in expanding the creative industries sector and will provide substantial job opportunities.

P2675	Project Website Submission	01/11/2010	Online Submission from Sara Swan (support)	It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

P2676	Project Website Submission	01/11/2010	Online Submission from Lisa Maree Mathieson of Healesville High School (support)	There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

P2677	Project Website Submission	01/11/2010	Online Submission from Jess Connor (support)	North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. Name: Jess Connor Address: 19 Dalgety Street, Mt Gravatt East IP Address: - 202.150.62.35 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2678	Project Website Submission	01/11/2010	Online Submission from zoe michalski (support)	One of the things that really impresses me about the North Byron Parklands proposal is the level of community consultation they have undertaken. From public planting days to environmental forums, site tours to newsletters and letter box drops, these guys have demonstrated a strong willingness to communicate and listen to the community. I feel they have shown that they will more than adequately manage a variety of events at this site in a professional and sensitive manner. The approval of the North Byron Parklands proposal will benefit the local creative industries and lead to a new wave of new and interesting jobs for the youth in the area. Let's build the local industry and make The Byron Shire a hub for creative individuals. Online Submission from Josh
Starling (support)

To whom it may concern,

In regards to the North Byron Parklands proposal, I believe it is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative.

I also believe that the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused.

Further to that Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

Yours Sincerely

Josh Starling

Project
Website
Submission

01/11/2010

Online Submission from Jenna
Clark of Tectel Pty Ltd (support)

To whom it may concern,

I believe that by looking at the facts it is clear to see that holding the Splendour in the Grass festival in Byron Bay really is in the best interests of everyone - surely this is exemplified by the lack of objection from the National Parks and Wildlife services?

My strongest feelings on the matter however are regarding employment opportunities in the area. With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity.

Furthermore, there are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses.

I ask that you will kindly take my views into consideration as my feelings on the matter are genuine and with the greatest level of compassion for the people who reside in the area.

Regards,

Jenna Clark

P2683	Project Website Submission	01/11/2010	Online Submission from Laura Shiels (support)

In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented.

North Byron Parklands has a strong focus on cultural management. This is shown by the proposed cultural centre aimed to provide learning opportunities for staff to build a greater understanding of our local indigenous and non-indigenous ancestry.

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

Yours faithfully,

Laura Shiels

P2685	Project Website Submission	01/11/2010	Online Submission from Blake McQuillan of Northside Accountants Centre (NAC) (support)	North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately \$192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved! The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. Name: Blake McQuillan Organisation: Northside Accountants Centre (NAC) Address: 19 Dulwich Road Chatswood NSW 2067 IP Address: 202-129-82-82.perm.iinet.net.au - 202.129.82.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2686	Project Website Submission	01/11/2010	Online Submission from Jeffrey Krigstein of Qantm College (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the ?sustainable? development basket. The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record

only comes about through effective, well planned event policies and procedures.

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

P2687	Project Website Submission	01/11/2010	Online Submission from Will Howard of ANZ (support)

North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual.

North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become "out of bounds" to maintain and protect identified cultural areas of importance.

From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application.

P2688	Project Website Submission	01/11/2010	Online Submission from Alexander Fleming (support)

It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events.

North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

P2689	Project Website Submission	01/11/2010	Online Submission from Selley Gribbin (support)

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. Itâ€™s exactly what we as a community need.

In recent times visitor day trips to the northern rivers has been declining. Coupled with a downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of time include cultural event activities such as those proposed by North Byron Parklands. This business is capable of attracting hundreds of thousands of visitors each year to the northern rivers which will be a huge boon for the area.

P2690	Project Website Submission	01/11/2010	Online Submission from Samantha Tibbetts (support)	North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. These opportunities offered to the young community are truly invaluable to our region.

P2691	Project Website Submission	01/11/2010	Online Submission from Marita Hanscamp (support)

It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being

Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids.

While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect

the environment and demonstrate a commitment to sustainable best practice.

A business that combines ecology with events and community giving. That's the kind of business that our young people are looking to for training and experience. Let's get it approved.

P2692	Project Website Submission	01/11/2010	Online Submission from Carly Sare of APRS (support)	For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands. Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the

types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

P2693	Project Website Submission	01/11/2010	Online Submission from Shaun broughton of MICROSOFT (support)

North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thorough planning and by adhering to the guidelines of the environmental, health and safety management manual they have developed.

I have been searching for a career opportunity close to home since finishing my HSC, this proposal sounds like exactly what I am after. Please approve the North Byron Parklands.

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

SUPPORT MUSIC AND CULTURE!! AUSTRALIA IS BECOMING AMERICA SLOWLY WE SHOULD FOLLOW EUROPE CULTURE NOT AMERICAN

P2695	Project Website Submission	01/11/2010	Online Submission from julie mccarroll (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year. If there were more opportunities for new and interesting jobs in Byron Bay, I believe there would be less of my friends moving away from the area. Please do not take this festival away from us. It is a fantastic event and should not be stopped. P2697	Project Website Submission	01/11/2010	Online Submission from Jess Glover of Student (support)	We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it. There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving

away to the city.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

P2698	Project Website Submission	01/11/2010	Online Submission from Owen Hodda (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on their feet. This proposal will benefit everyone. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Name: Owen Hodda Address: Brunswick East, 3057, VIC IP Address: unknown.net.reach.com - 134.159.131.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2699	Project Website Submission	01/11/2010	Online Submission from Beck Churchill (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. Name: Beck Churchill Address: 19 Mary St Beacon Hill NSW 2100 IP Address: surfli15.lnk.telstra.net - 139.130.248.22 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2700	Project Website Submission	01/11/2010	Online Submission from Stacey Baines of Warner Music (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: Stacey Baines Organisation: Warner Music Address: 47 Albany Street Crows Nest NSW 2065 IP Address: - 203.166.10.210 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2701	Project Website Submission	01/11/2010	Online Submission from Aaron Podmore (support)	I'm writing to lend my support for the movement to return the Splendour In The Grass event to NSW, at the proposed site in the North Byron Parklands. In short, it would be a positive and well-considered decision to accept the proposal - bringing economic benefits and enhancing the tourism profile to the local region, all in an environmentally responsible manner. The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. The Parklands proposal ensures that the site area and the adjoining sites are protected by maximising 'down time' between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. Please don't let us lose this. Name: Aaron Podmore Address: 80 Olivet Street, Glenbrook NSW 2773 IP Address: 110-175-1-155.static.tpgi.com.au - 110.175.1.155 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

Online Submission from Alice
Pemberton (support)

To Whom It May Concern

Please please please bring Splendour in the Grass back to Byron and a permanent home.

Byron Bay created a name for itself by holding this festival and everyone was sad to see it moved last year.

The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is \$192.6 million annually.

Festivals like this are exactly what Australia need.

The proposal conserves wildlife and commits to a limited number of days of use.

I personally cant see the problem....

so BRING SPLENDOUR HOME

Yours Sincerely

Alice Pemberton

P2703	Project Website Submission	01/11/2010	Online Submission from Gemma Bodinner (support)	While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. It is very exciting to see a proposal of this sort in the Byron Shire. North Byron Parklands will see a rise in employment opportunities for residents, a boost in sales in local businesses[™], and a influx of cultural events. This development will make the north coast a definite stop on the tourist map for years to come. Lets get behind it! The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. Name: Gemma Bodinner Address: 2/272 Albert St, Brunswick, Vic 3056 IP Address: 124-148-245-250.dyn.iinet.net.au - 124.148.245.250 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low.

While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

Online Submission from Lillian Tait
(support)

Hi,

My name is Lil and I am a huge Splendour fan! I think the idea of having a permanent festival grounds is brilliant, for both the environmental sustainability of the area as well as economic benefits through tourism brought to the Byron shire. Personally i think its a huge mistake turning the area that had previously held Splendour into residential zoning, but I guess I cant really do anything about that.

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

Thanks, and I hope the amazingness that is Splendour lives on!

 Submission

01/11/2010 Online Submission from Natalie Earles (support)

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

After attending many music events in both Australia and Overseas it is very rare to see an event put so much time into redeveloping and looking after the environment in the planning process of such a large scale event. Splendour has always led the way in Australian festivals in regards to creating a 'green event' and I believe it would be a wonderful opportunity for them to lead the way yet again!

P2718	Project Website Submission	01/11/2010	Online Submission from Kristin Tyrrell (support)

The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the âœsustainableâ development basket.

The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all.

P2719	Project Website Submission	01/11/2010	Online Submission from Daniel Azzopardi (support)	There is a reason why the government agencies including the National Parks and Wildlife services didnâ€™t object to this application, it really is in the best interest of everyone. North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately \$192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved! The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ€™ income. There is no reason why this proposal should not be approved by state government. A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands! P2721	Project Website Submission	01/11/2010	Online Submission from Paul Maher (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the 'sustainable' development basket.

As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we don't have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our state. We must support this application.

P2722	Project Website Submission	01/11/2010	Online Submission from Nicholas Poppi of Banksie Financial Planning (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

This will be the future of Byron Bay. Employment, community benefits, fun. Need we say more?

P2724	Project Website Submission	01/11/2010	Online Submission from Bec Gyde (support)	Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being

P2725	Project Website Submission	01/11/2010	Online Submission from SALLY JUDKINS of pacific apartments (support)	I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. Name: SALLY JUDKINS Organisation: pacific apartments Address: 62 LAWSON ST BYRON BAY IP Address: 203-219-159-205.tpgi.com.au - 203.219.159.205 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2726	Project Website Submission	01/11/2010	Online Submission from Scott Keanie of Scott Keanie Productions (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become âœout of boundsâ to maintain and protect identified cultural areas of importance. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! P2727 Project
Website
Submission 01/11/2010 Online Submission from max
ashford (support)

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

P2728	Project Website Submission	01/11/2010	Online Submission from Tracey Bartelt (support)	The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a ?resource centre? where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. Name: Tracey Bartelt Address: 37/128 Benowa RoadSouthport QLD 4215 IP Address: mail.sandsky.com.au - 123.50.152.37 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2729	Project Website Submission	01/11/2010	Online Submission from Adam Taneski (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the "coast to hinterland"™ wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise "downtime"™ will allow the Parklands site to assist the functioning of the adjoining Nature Reserve. One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive. The North Byron Parklands sounds really interesting and exciting. Name: Adam Taneski Address: 144 Auburn Street, Wollongong IP Address: - 202.53.199.23 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2730	Project Website Submission	01/11/2010	Online Submission from Andrea Rivera of rmit (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities. This proposal is so important for the Northern Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce. North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community. Name: Andrea Rivera Organisation: rmit Address: 51a grange rd, sandringham IP Address: c114-77-20-139.brasd3.vic.optusnet.com.au - 114.77.20.139 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2731	Project Website Submission	01/11/2010	Online Submission from Tim Stokes of Subiaco Restoration (support)	The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. I have travelled from Perth to come to splendour 4 times and just love it , don't let it leave Byron as it's a beautiful location and would never feel right anywhere else. Name: Tim Stokes Organisation: Subiaco Restoration Address: 8/118 Broome st Cottesloe , Perth WA IP Address: 203.161.104.143.static.amnet.net.au - 203.161.104.143 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2732	Project Website Submission	01/11/2010	Online Submission from simon mcdonald of Experian (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends.

The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government.

The Northern Rivers region needs to plan ahead for future employment and training opportunities for our young community. We need to offer options to the young members of the community to encourage them to stay in the area. This proposal will provide these incentives.

P2733	Project Website Submission	01/11/2010	Online Submission from Justin Evans of Student (support)	North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. Name: Justin Evans Organisation: Student Address: 95 Balmoral Street, Hornsby, NSW IP Address: 115-64-31-191.static.tpgi.com.au - 115.64.31.191 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2734	Project Website Submission	01/11/2010	Online Submission from Leah Maglaras (support)	The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesn't proceed then it's likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklands group? No-one. That would be a terrible lost opportunity. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more

than 25 nest boxes for resident fauna.

The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community.

P2738	Project Website Submission	01/11/2010	Online Submission from vicci carnegie of health professional (support)	I am a perthite but have visited the beautiful Byron parklands. What would complement it more is a yearly festival of music and culture bringing people together in happiness, I have travelled across the world to music festivals such as glastonbury. Glastonbury festival creates excellent work opportunities for the community to get involved in, not just for the week but many weeks prior to and following! Festivals put towns on the map of the world!!! they also make milestones in people's life. I have never been to splendour but I am planning to next year!!!! Name: vicci carnegie Organisation: health professional Address: 36 redecliffe street east cannington, perth wa, 6107 IP Address: cpe-121-215-48-127.inse1.pie.bigpond.net.au - 121.215.48.127 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2739	Project Website Submission	01/11/2010	Online Submission from Michelle Hounslow (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. Events are really important for young people today. Coming together is not just about getting drunk and partying. It's about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

P2740	Project Website Submission	01/11/2010	Online Submission from Melissa Bolton (support)	I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. Name: Melissa Bolton Address: 2 Woonona Rd, Northbridge, NSW, ,2063 IP Address: - 202.92.100.217 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2741	Project Website Submission	01/11/2010	Online Submission from Rod O'Connor of CBA (support)	The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead.

P2743	Project Website Submission	01/11/2010	Online Submission from Kat Mahina of www.theaureview.com (support)	The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one.

Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

It would be a shame to see this proposal turned down, it doesn't take much to see that the North Byron Parklands proposal has so much to offer.

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create.

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â€” young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW.

P2749	Project Website Submission	01/11/2010	Online Submission from Simon Buchanan (support)

The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation.

When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered.

P2752	Project Website Submission	01/11/2010	Online Submission from Luke Griffiths (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! Name: Luke Griffiths Address: 2/101 hall street, bondi, nsw 2026 IP Address: gw1.asx.com.au - 203.15.147.155 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2753	Project Website Submission	01/11/2010	Online Submission from Kieran Weston (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

This proposal is so important for the Northern Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce.

The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site.

P2756 Project
Website
Submission 01/11/2010 Online Submission from Matt
Kennedy (support)

Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry.

The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised.

We can look at other parts of the world to help understand the likely impacts of the North Byron Parklands proposal. Donna Sue Sanders â Executive Director of the Daytona State Foundation states that âcommunities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâTM

P2758	Project Website Submission	01/11/2010	Online Submission from Alex Coutts (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great way of retaining our young professionals and aspiring professionals.

P2759	Project Website Submission	01/11/2010	Online Submission from Tim Regan of University of Newcastle (support)	There is a reason why the government agencies including the National Parks and Wildlife services didn't object to this application, it really is in the best interest of everyone.

The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of

predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

P2760	Project Website Submission	01/11/2010	Online Submission from Kristen Babbage of PWC (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region. Name: Kristen Babbage Organisation: PWC Address: 201 Sussex St Sydney NSW 1171 IP Address: - 203.11.225.5 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2761	Project Website Submission	01/11/2010	Online Submission from Tara Moore of Customer Service Manager (support)	North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

There is a reason why the government agencies including the National Parks and Wildlife services didn't object to this application, it really is in the best interest of everyone.

P2762	Project Website Submission	01/11/2010	Online Submission from Joanne Piltz (support)	North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

P2764	Project Website Submission	01/11/2010	Online Submission from David Horne (support)

It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

I think that events like this help people grow, experience North Byron Parklands and all that our area has to offer. The North Byron Parklands proposal would definitely be a growing experience for me.

P2765	Project Website Submission	01/11/2010	Online Submission from Sean Belling (support)

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site.

P2766	Project Website Submission	01/11/2010	Online Submission from wendy best (support)

It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events.

North Byron Parklands has provided employment opportunities for local indigenous people through the planting of over seven thousand native trees across the site. The Madhima Gulgan rainforest regeneration team has also built and implemented over 25 nest boxes for local wildlife across the site.

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

Events are really important for young people today. Coming together is not just about getting drunk and partying. It's about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

P2767	Project Website Submission	01/11/2010	Online Submission from David Kelly (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Most of the businesses within the Northern Rivers and Byron Shire are sole traders and do not offer any employment opportunities to the community. Bringing Splendour in the Grass festival back to Byron Bay would result in North Byron Parklands offering many new employment opportunities for the residents in the region. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. From a cultural breeding ground perspective alone we must get the proposal approved. Itâ€™s a fabulous exciting vision and we are very lucky that this proposal is before us.

P2768	Project Website Submission	01/11/2010	Online Submission from Barbara Pattinson (support)

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ€™s important to have these opportunities for young people in the region.

P2769	Project Website Submission	01/11/2010	Online Submission from Jack Smith (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

Letâ€™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ€™s get on with the job of creating exciting training and employment opportunities for our young people.

P2770	Project Website Submission	01/11/2010	Online Submission from julieann bligh of n/a (support)

The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported.

If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government.

Bring Splendor Back to Byron. Please!

P2771	Project Website Submission	01/11/2010	Online Submission from Tegan Elferkh (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. Name: Tegan Elferkh Address: 11 Monk Place Queanbeyan NSW 2620 IP Address: mail.maximca.com.au - 203.42.50.177 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2772	Project Website Submission	01/11/2010	Online Submission from Linda Holroyd (support)	After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ proposal 100% . The local government should approve this application.

Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire.

While much is made of the Marshallâs Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities.

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

P2773	Project Website Submission	01/11/2010	Online Submission from Richard Struthers (support)	Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a "resource centre"™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. Name: Richard Struthers Address: 35/253 Goulburn Street, Surry Hills, Sydney IP Address: finance.fairfax.com.au - 203.26.177.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2774	Project Website Submission	01/11/2010	Online Submission from kristy jowono (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become âœout of boundsâœ to maintain and protect identified cultural areas of importance. Name: kristy jowono Address: 5 domain court baulkham hills 2153 IP Address: b4b62.static.pacific.net.au - 125.255.43.98 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2775	Project Website Submission	01/11/2010	Online Submission from Shane O'Sullivan (support)	With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home! In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region?s creative industries, providing world class training and work experience opportunities. Name: Shane O'Sullivan Address: 3 Edward StreetSt Kilda East Victoria 3183 IP Address: 220-253-109-137.vic.netspace.net.au - 220.253.109.137 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2776	Project Website Submission	01/11/2010	Online Submission from Shannon Elliott (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are

specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probable that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldn't go ahead.

P2777	Project Website Submission	01/11/2010	Online Submission from Clare Johnston (support)

One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved!

North Byron Parklands has a strong focus on cultural management. This is shown by the proposed cultural centre aimed to provide learning opportunities for staff to build a greater understanding of our local indigenous and non-indigenous ancestry.

Cultural Events Site, Yelgun 09_0028

Dear Sir or Madam,

Regarding the proposal for a permanent events site at Yelgun, BURG wishes to be noted as supporting the current application. As a community group, BURG has been delighted to hold information stalls at previous Splendour in the Grass events to provide information on Cape Byron

Marine Park and the role of volunteer researchers. The Splendour in the Grass organisers kindly gave permission for BURG to fundraise at this event, by holding a raffle - enabling much-needed funds to be generated.

BURG applauds the decision to have an ongoing Community Grants

program generated from events held at the Yelgun site, as Northern Rivers' community groups provide many volunteer services to the local community and environment. Previous events held by the organisation making this application have all been held in an environmentally and socially responsible manner, setting a benchmark for how events

should be run.

Please approve the Yelgun events site.

Sincerely,

BURG

P2781	Project Website Submission	01/11/2010	Online Submission from Zan Hammerton of Southern Cross University Lismore, Dept Environmental Science (support)	Cultural Events Site, Yelgun 09_0028

To Whom This May Concern,

I strongly support the current proposal for a permanent Events site at Yelgun, having considered the social, cultural and environmental aspects of the proposal. The current proposal demonstrates a thorough consideration of environmental aspects of establishing and running the event site with best practises and in an environmentally responsible way.

Having attended this festival on three occasions -this is one of the most well run events in the Northern Rivers region.

It is hoped that the current proposal is approved without delay to enable events to be held in a purpose-built and for the habitat regeneration to continue - with benefits to all interconnected ecosystems.

Thankyou for accepting this supporting letter.

Kind Regards,

Ms. Zan Hammerton B. App. Sci (Hons), PhD (Candidate)

P2782	Project Website Submission	01/11/2010	Online Submission from Amy McCorquodale of Fenetik Design (support)	The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It's up to us as adults to decide that we want to support venues that support young people. Best, Amy Name: Amy McCorquodale Organisation: Fenetik Design Address: 3 / 37 Elizabeth Bay RdElizabeth Bay NSW 2011 IP Address: 27-32-117-30.static.tpgi.com.au - 27.32.117.30 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2783	Project Website Submission	01/11/2010	Online Submission from Alan Stewart (object)	The site is inappropriate for the intended use due to the inconvenience it will cause to local residents by way of traffic congestion and noise and the large influx of attendees seeking accommodation which will no doubt involve illegal camping, overcrowding of rental accommodation. I recently attended an outdoor concert at Rochford Winery in Victoria and witnessed first hand the inconvenience to local residents in the vicinity. Whilst this concert had a 9pm noise curfew the traffic exiting back onto the highway took till midnight. Please do not permit large concerts on this site. P2784	Project Website Submission	31/10/2010	Online Submission from Ross McGarvie (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficulty. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approval projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. Imagine an events venue that can attract tens of thousands of visitors to a rural area.

Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

P2785	Project Website Submission	31/10/2010	Online Submission from Amy Llewellyn (support)	The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

P2786	Project Website Submission	31/10/2010	Online Submission from Roshan Sukhla (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being Name: Roshan Sukhla Address: 3 Kookaburra Place, Erskine Park NSW 2759 IP Address: - 120.19.158.154 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2787	Project Website Submission	31/10/2010	Online Submission from allan thompson of resident (support)	events like this is required if byron shire is going to be viable in the future 30% of byron shire residents object to development just to fill in time. most would like the shire fenced off with no rental properties, fires, development, road repairs, noise etc Name: allan thompson Organisation: resident Address: 19berrimbillah ct ocean shores 2483 IP Address: cpe-60-229-24-192.lns5.ken.bigpond.net.au - 60.229.24.192 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2788	Project Website Submission	31/10/2010	Online Submission from Benoit Wentzinger (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their

vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive.

North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map.

P2790	Project Website Submission	31/10/2010	Online Submission from Cchristopher Sheehan of private response (object)	I want to register my dismay at this proposal which would disrupt the peace and cohesion of this community. I have long term friends in the community and I know it well both physically and socially. Surely the lessons of congestion and distrupction to residents of Byron Bay would have been learnt by now? Thank you for your time Name: Cchristopher Sheehan Organisation: private response Address: 41 Lenton Pde Waterloo 2017 IP Address: cpe-121-216-34-186.lnse1.ken.bigpond.net.au - 121.216.34.186 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2791	Project Website Submission	31/10/2010	Online Submission from George Willison (object)	As a longtime resident of Byron Shire I am completely opposed to the proposed development at Tweed Valley Way and Jones Road , Yelgun for the following reasons: 1.) The area's infrastructure is already overtaxed by the influx of tourists at peak holiday times (Christmas, New Year, Easter) and during NSW & Queensland school holidays. This is evidenced by horrendous traffic delays getting into and out of Byron Bay during these periods. 2.) Massive and regular additional intrusions of event-goers over and above the regular holiday seasons. 3.) Attracting people to the area whose prime objective is to party and who in the past have shown little regard for the environment or the impact their partying has on the amenity of residents of the shire. 4.) An increase in holiday lettings of private residences and the disturbance of neighborhoods.

5.) There is little or no financial return to the shire from hosting these mega events - apart perhaps for a few low-paid, casual jobs. The shire's infrastructure is already at breaking-point and a development of this kind - without a substantial and unequivocal financial return (50%) from gate takings, directly to the shire would be an absurdity.

Sincerely,

George Willison

P2792	Project Website Submission	31/10/2010	Online Submission from Barry Martin (support)

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events.

From a cultural breeding ground perspective alone we must get the proposal approved.
Itâ€™s a fabulous exciting vision and we are very lucky that this proposal is before us.

Its just not right that a vocal minority win in this case. There will be no lasting detrimental effect on the wildlife of the beautiful Byron Shire so please grant permisson for the festival to go ahead

P2793	Project Website Submission	31/10/2010	Online Submission from Ken Caldwell of Austech Appliance Service (object)	This proposal is an outrage. What is cultural or educational about outdoor music festivals attracting many thousands of party goers? Local residents normally peaceful lives will be no more. This site has one access road only and is located just a few hundred metres from the freeway off ramp. Obviously traffic WILL back up onto the freeway straight into the paths of the many road users doing 110km/h including hundreds of semi and B double trailers daily. Result= mayhem, carnage and death. As Tweed Valley Way will effectively be shut down during these events, who is going to compensate local people for lost productivity while trying to earn an income? I cannot object strongly enough against this proposal. The adverse impact on locals lives is immeasurable. Name: Ken Caldwell Organisation: Austech Appliance Service Address: 30 Yamble Drive Ocean Shores 2483 IP Address: cpe-144-131-90-228.lns2.clt.bigpond.net.au - 144.131.90.228 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2794	Project Website Submission	31/10/2010	Online Submission from Emma Pride (support)	Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved.

North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all don't move to cities.

Please bring Splendour back to Byron Bay! The local community needs it!

P2797	Project Website Submission	31/10/2010	Online Submission from Rochelle Donaldson (support)

North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

The future of Byron Bay. Employment, community benefits, fun. Need we say more?

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

From a cultural breeding ground perspective alone we must get the proposal approved. It's a fabulous exciting vision and we are very lucky that this proposal is before us.

P2798 Project
Website
Submission 30/10/2010 Online Submission from Louise
Williams (support)

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

I have attended this event several times and believe this proposal will create a cultural breeding ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home!

P2801	Project Website Submission	30/10/2010	Online Submission from Michael Bourke (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay. Name: Michael Bourke Address: 6/129 Trafalgar StreetStanmore NSW2048

P2802	Project Website Submission	30/10/2010	Online Submission from Bryan Colling (support)

Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community.

The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience.

P2808	Project Website Submission	30/10/2010	Online Submission from Tarik Telesnitsky of ... (support)	Hey there! Getting straight to the point, Splendour has been a fantastic event for the past decade. For at least one long weekend of the year it unites NSW and QLD through music, arts and entertainment. A great reminder that our competitive nature in such events as The State Of Origin are overwhelmed by a desirer to celebrate music and culture made by our generation, for our generation. Such moments are important for our generation. During times of increased violence toward one another, events that promote wholesome fun activities could serve as inhibitors. I myself have some fantastic memories that i can share with not only my immediate friends but people from all down the east coast of Australia. In conclusion, festivites such as Splendour are a tool to unite and contribute to a national identity, particularly for younger generations. Hopefully my peers will advocate other reasons because there are many and events such as Splendour don't become a thing of the past.

P2809	Project Website Submission	30/10/2010	Online Submission from Chris Logan (support)

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers.

There is current trend on The Northern Rivers for young adults to move to major cities such as Sydney and Melbourne soon after finishing school. North Byron Parklands provides incentives for the youth to remain in the area by creating new and exciting employment opportunities, such as event management, live sound engineering, and even a career in music!

P2810	Project Website Submission	30/10/2010	Online Submission from Jean Podhajsky ()

I wish to register my strong opposition to the proposed festival site at Yelgun for the following reasons:

The local infrastructure will be unable to handle such a sudden, huge influx of people that large festivals (Up to 4 x 50,000 and 4 x 10,000 a year!!!) will cause. The traffic will bank up onto the highway and completely congest the local roads into Brunswick Heads and Ocean Shores, which are not built to accommodate such a sudden increase in numbers. (Remember the traffic jams when the Pacific Highway went through Brunswick Heads) The local shopping centre at Ocean Shores is already overcrowded at normal holiday times; the roads are narrow and unsuitable for the large delivery trucks that are already in operation. Local residents will have great difficulty going about their normal activities.

The noise, rubbish and behavioural problems of huge numbers of intoxicated party goers will have a devastating impact on what is essentially a family residential suburb. I am outraged that it has even been considered. Most of the population (apart from a few businesses) as well as the local fauna and flora will be adversely affected. We already have problems with the behaviour of our own teenagers and enough problems with young drink drivers, why on earth would we want to invite 50,000 more. Besides Byron Shire already has one large festival site at Tyagarah. How many can one small shire sustain? Enough is enough! Such a huge influx of young, generally irresponsible party goers will not promote a healthy sustainable community.

Rental accommodation for low income earners (already causing distress to many

families)will also be adversely affected by increased holiday letting of the worst kind.

I am concerned that the welfare of the vast majority is being compromised for the financial advantage and interests of a few. The real cost of these endeavours cannot be evaluated on a purely monetary basis. If we don't consider the full impact of these enterprises on the local environment, flora and fauna as well as the people who live here, we will turn a beautiful paradise into a wasteland where no-one will want to live.

P2811	Project Website Submission	30/10/2010	Online Submission from Megan LANGTIP (support)

Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer.

The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately \$55,000 compared with \$71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region.

Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities.

Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

Being young it's important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available.

P2812	Project Website Submission	30/10/2010	Online Submission from dave weller (support)	The Byron Shire needs a permanent home for festivals outside of Byron Bay. Byron bay is so full with tourists that it is stretched to capacity whenever a festival comes to town. The council is so slack on infrastructure; they do not spend money on roads to ease congestion like a bypass of the city centre from east to west. There is always long traffic queues leading into town when they could easily fix it, not to mention the ancient public toilets that need to be upgraded and increased in size.

The council treats Byron like a cash cow: always taking out but never putting in. For example, The First Sun Caravan Park has not had an additional tree planted in decades, despite in peak season, they cram people into the back paddock, despite a lack of amenities, and charge \$500 a week for an unpowered tent site.

What do they do with all the money?

North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddocks. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving.

Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community.

Please approve this submission and give North Byron Parklands the approval it seeks.

P2813	Project Website Submission	30/10/2010	Online Submission from Julian Walsh (support)

Splendour in the Grass is an integral part of the cultural life of byron bay. It is crucial to the tourist industry and represents the importance of event tourism to the area.

The environmental impact on the site is negligible particularly when compared to the damage which farming has done over the years. The size of the site, the extensive replanting and the limited numbers of days that it is being used mean that it is a sensible use of the site.

P2816	Project Website Submission	30/10/2010	Online Submission from Steve Tassell (support)	The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species.

For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands.

P2819	Project Website Submission	29/10/2010	Online Submission from Amanda Sutherland (support)	I thought it an absolute tragedy both for the organisers and the local youth when it was announced that Splendour had to go interstate to run, as no-one in the community who has any say, seems to want to give them even a trial! When I moved to this area from the city I thought I was getting the best of both worlds, both the country lifestyle and opportunities to catch internationally renowned bands and other cultural events. Now, with opposition from local residents, who claim to want a quiet life, it seems this opportunity aimed at young people is being unfairly dismissed. I believe the organisers of Splendour are talented, environmentally conscious citizens who are also part of the community. They as much as anyone want the festival to be responsibly organised and they use their considerable expertise and up to date knowledge to implement this. The shire has so many young people residing in it and activities for them in their own area are few, so bringing splendour back would enable many of them to go to a world class music festival with a wide range of acts in their own area. This is a broadening experience for a young person, a special treat we used to be able to boast about. For younger teens, parents could actually pick them up late at night without having to drive too far. This worked well when my son was underage but not underenthusiastic about going to festivals! 2010 was a difficult year for many local businesses who might have got through the economic difficulties of winter in a tourist town if Splendour had been allowed to be trialled at the Yelgun site. Please give Splendour a go at North Byron Shire Parklands. Name: Amanda Sutherland Address:

P2820	Project Website Submission	29/10/2010	Online Submission from Rachael McEntee (support)

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region.

With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise âœon-groundâ what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities.

Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. Itâ™s a fantastic opportunity for us all.

P2824	Project Website Submission	29/10/2010	Online Submission from Louise Baillie of noone (support)	This venue would also be just so much more accessible and enjoyable for the festivsl goers. There would be far less traffic than going to Woodford and the larger land would mean that less harm is done to the land. The accomodtion opportunities are much better as there are more back packers hostels and hotels in a half an hour vicinity than Woodford. The fact is that Splendour is synonymous with Byron Bay and the atmosphere it brings, it is only right that the festival is brought home. Also.... North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities

and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

P2825 Project
Website
Submission 29/10/2010 Online Submission from Tess
Antonellis (support)

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create.

P2826	Project Website Submission	29/10/2010	Online Submission from Elvira Wilkinson of OH ROBIN! (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

Also with so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

P2827	Project Website Submission	29/10/2010	Online Submission from susan carroll (support)	I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved!

While much is made of the Marshall's Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities.

my friends and i loved going to byron and splendor. it was much easier to get to than woodford and was really fun. please return splendour to byron.

regards, susan carroll

P2829	Project Website Submission	29/10/2010	Online Submission from Karen Charlesworth of PC Floorsanding (object)	I object to Splendour/Parklands proposal due to travel obligations I have with my children to the grandparents between Pottsville and Ocean Shores on a weekly basis and holiday time due to my work committments and this would serve as a massive inconvenience not to mention the excessive amount of people, traffic issues and hold ups, noise pollution, partying and trouble to locals around neighbouring areas including alcohol and trash, abuse to public places, not to forget the wildlife will also be threatened. Name: Karen Charlesworth Organisation: PC Floorsanding Address: 30 Kellehers Road Pottsville 2489 IP Address: - 120.146.65.77 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2830	Project Website Submission	29/10/2010	Online Submission from Kerry Purnell (support)	The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â€œout of boundsâ€ to protect identified areas of importance. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

BYRON BAY IS THE HOME OF SPLENDOUR - PLEASE BRING IT BACK :)

P2833	Project Website Submission	29/10/2010	Online Submission from Ella Doonan (support)	Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

P2835	Project Website Submission	29/10/2010	Online Submission from EMMA DEGASPERI (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Bring it back to Byron! Name: EMMA DEGASPERI Address: 36 lancewood cct robina IP Address: icegallery.lnk.customer.wh1.gco.allinteractive.com.au - 180.178.123.62 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2836 Project
Website
Submission 29/10/2010 Online Submission from Ryan
Bullivant (support)

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives.

With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative.

P2837 Project
Website
Submission 29/10/2010 Online Submission from Emily
Harvey (support)

It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we don't have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our state. We must support this application.

P2839	Project Website Submission	29/10/2010	Online Submission from Mark Watson (object)	I live nearby the site. On a very narrow, windy country road, which will also be used as a short cut to and from the site, creating a very dangerous situation, this is our only way to get off our property in case of emergency, or to just go out for the day.. -I object to this development mainly on the size and scope of operations. -We will lose our lifestyle as the noise and crowds will destroy our normal activities, like going shopping on a Saturday morning. -Our road will be blocked by the queues' trying to access the site. (poor local road infrastructure for so many people to queue) -The noise is horrendous from this type of music. (Will there be noise shut off devices in case the noise exceeds a certain dB level.) The type of noise (music) played carries for miles into the hills. We cannot sleep when these activities are carried out. We believe the smaller events on this application will allow unlimited numbers of these "DOOF" parties. The noise is horrendous and disturbs not only the animals but we humans as well. - Our safety will be compromised when thousands of young people, a lot drunk and drugged will be looking for somewhere to sleep when the music finishes. (will the police be there to test these people for drugs and alcohol??, so they cannot drive.) There are only limited camp sites and the nearest accommodation is miles away. We are scared by this situation as our lives and property will be at risk. Will the police be able to protect us, when drunks try to get onto our property. NO, The police will not be able to get here.. There is a large truck

stop nearby(Yelgun) and it will certainly be where the party continues after the music finishes, on site, of a night. Once again the noise at our Home will be horrendous. We will be too scared to leave our homes. Our rural lifestyle will be destroyed.

-The local wild life will suffer as it already has with the new highway. This type of loud music really disturbs the wildlife. I have chooks and they suffer terribly when this type of music is played. Even from a distance, the resonating boom, boom, boom is rather disturbing.

-This is an industrial scale festival site that will do more harm than good. Our family and our neighbours are scared by the possibility of this on our front door- and of course it will destroy our land values. Who would want to live where one cannot feel safe or access basic conveniences for most of the year..

P2840	Project Website Submission	29/10/2010	Online Submission from Kimberley Levick (support)

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

Holding events requires a sound understanding of a whole range of logistical and safety

aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

P2841	Project Website Submission	29/10/2010	Online Submission from Zoe Goodin (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning.

The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands.

All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector.

P2842	Project Website Submission	28/10/2010	Online Submission from Janessa Ellaway (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal. Name: Janessa Ellaway Address: 5/105 Alderley Ave, Alderley 4051 IP Address: 123-2-12-199.static.dsl.dodo.com.au - 123.2.12.199 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2843	Project Website Submission	28/10/2010	Online Submission from Tanya Baggerson (support)	The North Byron Parklands has gone to great lengths to protect and enhance the biodiversity values of the site. This is shown by the Parklands group developing a environmental, health and safety management manual to identify, manage and monitor all the identified potential ecological risks. The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. Splendour in the Grass is one of those rare experiences where young and old(er) can come together, in the same space and time to enjoy the same things. The eight times I have been to Splendour in the Grass have been some of the most heartwarming weekends of my year. Most people are at their best and feed off each others love of music, the outdoors and environment. It is a very positive for a community if it encourages such an event. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the 'Splendid Initiative' offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. P2844	Project Website Submission	28/10/2010	Online Submission from Raven Dover (support)

Hi, I'm a local in Federal and would love to see Splendor back in Byron Bay, I don't see how Blue's and roots can stay if Splendor cant? I support that Splendor be brought back to Byron Bay, its the only decent music festival in the country! Im also a local business and this helps us. Other reasons I would like it back are below.

Regards,

Raven Dover

? Economy

North Byron Parklands will inject \$192.6 million annually into the national economy (total multiplier effect) when operating at capacity (RPS Group 2010).

? Employment

North Byron Parklands will create up to 210 full time equivalent jobs.

? Community Grants

The North Byron Parklands Community Grants Program will commence with the first major event held. It will distribute over \$100,000 annually to local community groups when North Byron Parklands is operating at capacity.

? Culture

- North Byron Parklands supports the cultural tourism and creative arts industries.
- The venue will provide a home for creative arts and musical expression in the Northern Rivers.

? Social benefits

- Cultural events add to quality of life.
- Events generate intangible benefits such as improved social cohesion, lifestyle improvement, appreciation of diversity and increased creativity.
- North Byron Parklands provides an ethically and responsibly run nature based venue to facilitate gatherings of Australians of all ages.

? Opportunities for young people

- The proposal provides training and jobs for young people in fields which are difficult to access in regional areas ? such as event management, cultural heritage management etc.
- Young people will be encouraged to get involved in the organisation, hosting and coordination of events to learn new skills necessary to gain work in the creative arts and music industries.

? Environment

- The event usage proposed is in grazed pasturelands covering less than 50% of the overall 660 acre site, leaving the majority for habitat use and bush regeneration.
- The proposal involves increasing the size and function of the Marshalls Ridge wildlife corridor.
- The proposal involves transferring approximately 28 hectares of bushland to expand the Billinudgel Nature Reserve.
- The proposal will provide opportunities to work with bush regenerators, universities and TAFE colleges to repair currently degraded land.
- The vegetation management plan will increase connectivity of the currently fragmented forest blocks across the site. This means it will be easier for animals to move across the 660 acre site.

? Tourism

The tourism industry, directly and indirectly, is a major employer and contributor to the economy of the Northern Rivers and a diversity of events throughout the year is a vital part of the tourism mix.

? Creative industries

- The creative arts sector contributes over \$190 million to the local economy.

- The region has a long history of hosting events. This has seen the creative industries sector become a strong regional employer and significant income generator. - The proposal will ensure that Byron and the Northern Rivers region retains and attracts artists of all disciplines. These communities have been declining in Byron Bay in particular.

P2845	Project Website Submission	28/10/2010	Online Submission from Bija Nicolson (object)	I think this is an inappropriate site for such a large scale event. Name: Bija Nicolson Address: 31 Jacaranda Ave East Lismore IP Address: adsl-syd-2-19.ozonline.com.au - 202.173.193.19 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2846	Project Website Submission	28/10/2010	Online Submission from Angela Brinkley (support)	Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local

jobs.

P2847	Project Website Submission	28/10/2010	Online Submission from Renae Ellaway (support)	This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. The North Byron Parklands sounds really interesting and exciting. Please support the local community and keep splendour in its home of Byron. Name: Renae Ellaway Address: 30 Firelight Street Sunnybank Hills Queensland 4109 IP Address: - 120.17.220.185 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2848	Project Website Submission	28/10/2010	Online Submission from Doug Hamersley (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Name: Doug Hamersley Address: 117a Campbell St, Surrey Hills IP Address: proxy-web-prd-ext-1.ucc.usyd.edu.au - 129.78.32.21 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2849	Project Website Submission	28/10/2010	Online Submission from Karen Heazlewood (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

P2851	Project Website Submission	28/10/2010	Online Submission from Kymberley Browne (support)	What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

Letâ€™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ€™s get on with the job of creating exciting training and employment opportunities for our young people.

P2852	Project Website Submission	28/10/2010	Online Submission from Chris Brown of N/A (support)	Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application. North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community. Name: Chris Brown Organisation: N/A Address: 2/84 Lytton Rd East Brisbane 4169 QLD IP Address: 220-245-19-147.static.tpgi.com.au - 220.245.19.147 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2853	Project Website Submission	28/10/2010	Online Submission from Tom Hain (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers.

One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives.

P2854	Project Website Submission	28/10/2010	Online Submission from Hannah Brophy (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably. I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is approved by local government. P2857	Project Website Submission	28/10/2010	Online Submission from Kirsten Tidswell (support)	Splendour belongs in Byron!!!!!! Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime. Having a world class sustainable event venue at the Parklands site will put The Northern Rivers on the map as a leader in sustainable venue developments. This will also aid local educational institutes such as Southern Cross University in environmental related courses by having a world class example in the area.

Name: Kirsten Tidswell

P2858	Project Website Submission	28/10/2010	Online Submission from Samantha watson (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. Events are really important for young people today. Coming together is not just about getting drunk and partying. Itâ€™s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

P2859	Project Website Submission	28/10/2010	Online Submission from Anna Petts (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids. North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

P2860	Project Website Submission	28/10/2010	Online Submission from James Cuthbert (object)

I have very serious concerns about the Proposed Parklands Yelgun Festival Site.

Having lived in this area for over 30 years, I am positive that this site is, without question, totally unsuitable as a venue with the potential for 30,000 people to attend on a daily basis.

The north of the shire (ie Ocean Shores etc) has the highest full-time population in the shire.

Basic facilities are the norm and it seems that a Freeway By-pass therefore allows huge numbers of people to swamp the northern suburbs with little or no infrastructure present. The site is unsuitable because it is very low lying and invariably 'goes under' regularly. Personal experience tells me that this area is rarely NOT wet underfoot. This area was heavily sprayed with poisons which are now banned.

How can such an approval be given by someone sitting in an office in Macquarie St, when residents, locals and council all agree that this development is definitely the worse use for this area, with the locals being the ones to lose out and have the 'Party Central' lobbed in our yards regularly.

Many other locations are available with far suitable sites.

Unfortunately the Splendour people paid top (future festival moneyspinner) price for degraded and abused land which now requires minimal impact landuses to rejuvenate.

I have met very few people in the area who support this development.

As state voters, this type of Government Determination, flying in the face of residents real concerns, only distances State Labour from ordinary people.

This Government Intervention smacks clearly as a case of potential investigation to

determine if the State Government has acted improperly in this matter and continues to attempt to erode the Local Council's right to approve what must only be approved by careful and transparent consultation with all those who are to be directly concerned.

P2861	Project Website Submission	28/10/2010	Online Submission from Charlotte Chaouka of Student (support)

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunities and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.

I strongly support bringing this event back home where it belongs. Not only is it great for business, the people have a wonderful time here, it is something we all look forward to having a break ourselves to go to the music festival. What you don't know is we work hard seven days a week and having our places full for this festival means we get a long deserved break so we can go and relax and enjoy this festival without worrying about staying in waiting for travellers to come in and maybe fill our rooms. This was the only time of the year I could actually lock up and have a break along with my family. This site at Yelgun is perfect, well set up and very well run, I was actually surprised how well it was organised. At first I was anti support until I realised I never got a break last festival and I never realised how well it was organised. Please consider bring it back home, thank you Margaret and staff

This site at Yelgun is perfect, well set up and very well run, I was actually surprised how well it was organised. At first I was anti support until I realised I never got a break last festival and I never realised how well it was organised. Please consider bringing it back home, thank you Margaret and staff Name: margaret campbell Organisation: p.p.motel Address: 1 Orana Road Ocean Shores IP Address: cpe-58-165-211-114.nsw.bigpond.net.au - 58.165.211.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2864	Project Website Submission	28/10/2010	Online Submission from Michael Ginns ()	I'm sorry to say that I don't think that Splendour should stay at Byron. I've been to the last 3 events and found that the most enjoyable one was at Woodford. The 2 times at Byron, I witnessed openly hostile residents along Belongil Rd. And they had every right to act that way. I would have reacted in the same way if I was to have people throwing their empty alcoholic beverages in my front yard at any opportunity, while I'm standing there. Or pissing/vomiting (or worse) in my yard. I can't imagine the level of anger or frustration these people must experience over that weekend. Unless you're a business owner in the Byron region who is in either, the hotel/ motel, caravan park, liquor retailer, backpacker, resort, hospitality, fast food/ take away, then they get little benefit of having their town swamped with some people who have little respect for residents. The other thing about Byron, is that it's an overpriced area. For me to go to Splendour this year and stay at Caboolture, was at least a third cheaper than staying in the Byron region. Byron has become a victim of its own makings. I felt that this year's event, transport wise, was outstanding, very well organised. The control of alcohol within the event, as well as, the camping ground, as great, or as well as you could

expect. The 2 events at Byron that I was at, I've witnessed an all out assault of binge drinking to excess, on the Saturday, with Sunday being a little more subdued.

I have to commend this year's level of security. Their quick response to the crowd situation before Florence and The Machine, was highly commendable, plus some punters finding a way around the fence up the hill, was also quick and measures taken to halt it was done very well.

Other than that, Splendour in the grass, is one of my highlights of the year that I dearly enjoy going to. It's good to see it evolve, year by year.

P2867	Project Website Submission	28/10/2010	Online Submission from Kieran Welch (support)	Please allow Splendour in the Grass to operate out of their desired venue, North Byron Parklands. People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it. One of the most significant benefits for the environment coming out of this application is the

proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

P2868	Project Website Submission	28/10/2010	Online Submission from Kate Ryan of University (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is \$192.6 million annually.

With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great way of retaining our young professionals and aspiring professionals.

Having it at this location allows for more australians to get out of the cities and experience some of australia's beautiful coastline, whilst stimulating the local economy.

P2870	Project Website Submission	28/10/2010	Online Submission from Tom Slater (support)	Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application. The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. As a potential user of the site and long-time patron/supporter of Splendour in the Grass, I

really hope it can be returned to Byron Bay Shire. The setting is the best I've experienced and the micro-economy that the festival brings with it is surely of immense benefit to the business and accommodation providers in the area.

I hope to see this application succeed and that the diligent and worthy efforts of its champions are recognised as the genuinely caring works of some very talented and dedicated people.

P2871	Project Website Submission	28/10/2010	Online Submission from Takaya Honda (support)

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy.

If we consider the important contributions to the region made by tourism such as income

generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunities and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.

P2872	Project Website Submission	28/10/2010	Online Submission from Monique Satchell of n/a (support)	Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project.

There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

Sincerely

Monique Satchell

P2873	Project Website Submission	28/10/2010	Online Submission from Kimba Collins (support)

While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low.

North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region.

This proposal is so important for the Northern Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce.

This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

I have worked and attended Splendour in the grass for the last 9 years. It is always an

exciting and positive experience each year, with happy, friendly like minded people in a happy, friendly community. Over the years we have come to know, love and appreciate several of the local Byron businesses and towns folk. Many business owners, in my eyes, seem to relish the vibe and joy of having such a busy boost to their economy and spirits in the midst of winter, as do I.

Please consider that Splendour and all its dedicated organizers, staff and patrons have not only the best interest of the festival and community at heart, but also the livelihood and sustainability of the environment in its best interests.

Yours truly,

P2876	Project Website Submission	28/10/2010	Online Submission from melissa warren (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy.

Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime.

P2877	Project Website Submission	28/10/2010	Online Submission from James Devoy (support)

If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase

opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering.

P2878	Project Website Submission	27/10/2010	Online Submission from candice spencer (support)

Give the splendees what they want! Splendour is the most iconic festival in Australia along with Big Day Out, it would be an absolute tragedy to lose such an awesome festival along with it's amazing atmosphere in Byron Bay!!

One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation's environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.

The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species.

Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world's best environmental practice.

Bring Splendour home to the Northern Rivers! Let's look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them.

P2879	Project Website Submission	27/10/2010	Online Submission from Christian Hack (support)	Letâs get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâs get on with the job of creating exciting training and employment opportunities for our young people. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature. The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? P2881	Project Website Submission	27/10/2010	Online Submission from Carol Raishbrook (support)	A place where people can get together and enjoy the beauty that Byron Bay has to offer. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Name: Carol Raishbrook Address: 6/45 Groom Street, Gordon Park QLD 4031 IP Address: cpe-123-211-46-204.lnse3.cha.bigpond.net.au - 123.211.46.204 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2882	Project Website Submission	27/10/2010	Online Submission from Lindsey Weissert of Small Fish Business Coaching (support)	Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. Itâ™s a fantastic opportunity for us all. North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. Name: Lindsey Weissert Organisation: Small Fish Business Coaching Address: 9/6 Electra Close Byron Bay, NSW 2481 IP Address: cpe-124-184-13-215.lns10.cht.bigpond.net.au - 124.184.13.215 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

Submission 27/10/2010 Online Submission from Matt
Mulcahy (support)

The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts.

I would definitely apply for a job at the North Byron Parklands and know that it will lay my employment path out. This is the opportunity that I have always hoped Byron Bay would offer.

Letâ€™s look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment.

North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community.

Website
Submission 27/10/2010 Online Submission from Becky
Boysen (support)

The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings.

North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

P2885	Project Website Submission	27/10/2010	Online Submission from Elle Morgan (object)	I strongly object to the Parklands site Development application for events. My main concerns are noise pollution, fauna and plant destruction on site and to local surrounding area, loss of local amenity, number and size of festivals planned each year. Our local area does not need this amount of people and our local Councils - Byron and Tweed along with ratepayers cannot afford to pick up the bill for the care and maintenance of local amenities. Its our local area and our families and not just party time for those from other areas. I am not against music and it seems Byron already has designated festival site at Tyagarah - I believe all festivals should use this site and not have 2 main major festival sites in such a small area. Please listen to local people with local interests and not bow to big developments. Name: Elle Morgan Address: 9 Cudgera Avenue, Pottsville 2489 IP Address: c-59-101-109-212.syd.connect.net.au - 59.101.109.212 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2886	Project Website Submission	27/10/2010	Online Submission from natalie george (support)	12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review will be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events. If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful and well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. Byron is the greatest location for this festival. On the 5 occasions I've attended the festival I've enjoyed myself thoroughly and continued to stay for a week after to relax in such a beautiful, friendly and interesting community. I don't see myself making such a large trip for a holiday if the incentive of the festival isn't also there. Name: natalie george Address: 12 Burraborang Rd Ruse, NSW IP Address: - 120.146.75.229

P2888	Project Website Submission	27/10/2010	Online Submission from kelly atkins of waterforwater (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. Byron Shire Council has always longer for a permanent event site in its LGA, particularly

now that the existing sites are either no longer available or are too inadequate to deal with world class events. The Blues Fest have bought a site which they intend to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would be such a shame for the NSW government not to approve it.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing an environmentally sustainable area for cultural events and a gathering place for young people.

P2890	Project Website Submission	27/10/2010	Online Submission from Patricia Schmid Speck (object)	Being a residents and property owners of Byron Bay, we feel that there is already more than enough partying going on in town with intoxicated people, many of them behaving very offensively and littering town, beaches and national parks. Byron Bay should preserve its natural treasures and encourage a different and more sophisticated type of tourism instead and more interesting high-class cultural events. We strongly object this proposed project of "cultural events". Please decide against it in the interest of Byron Bay! Thank you! Patricia Schmid Name: Patricia Schmid Speck Address: 15 Ironbark Avenue 2481 Byron Bay IP Address: cpe-124-179-61-241.lns3.clt.bigpond.net.au - 124.179.61.241 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2891	Project Website Submission	27/10/2010	Online Submission from Jake Vale (support)	The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions' economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. There is current trend on The Northern Rivers for young adults to move to major cities such as Sydney and Melbourne soon after finishing school. North Byron Parklands provides incentives for the youth to remain in the area by creating new and exciting employment opportunities, such as event management, live sound engineering, and even a career in music!

The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

P2893	Project Website Submission	27/10/2010	Online Submission from Brodie Edwards (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity.

What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

The North Byron Parklands sounds really interesting and exciting.

P2897	Project Website Submission	27/10/2010	Online Submission from Jeff Harrison (object)	I live in the Sunrise residential area nearby to Belongil Fields where the applicants have hosted the "Splendour" music festivals in past years. During those festivals the attendant crowds trashed the surrounding residential area. Empty alcoholic beverage containers littered the streets, shopping trolleys were used inappropriately and discarded on verges, and noisy, irresponsible crowds roamed at night. The festival organizers (applicants) promised a "local resident telephone hot-line" intended to address any issues like these, but it was mostly unattended during the festival. Given the poor past performance of the applicant to address the local impacts of their festivals I object to this application. However, if the Department subsequently approves the application, I implore the Department to attach stringent environmental and social impact measures to the project and back them up with severe sanctions. Submission 27/10/2010 Online Submission from Penny
Calvert (support)

There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses.

Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area.

P2901	Project Website Submission	27/10/2010	Online Submission from April Anfruns (support)	The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments. Submission 27/10/2010 Online Submission from Pamela
Gray of Private (object)

I oppose the development of this festival site in Byron Shire on environmental and social grounds. I truly feel that tourism has had a large enough impact on the township of Byron bay, without seeping out into the rural areas as well.

P2903	Project Website Submission	27/10/2010	Online Submission from Lauren Kerr (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is \$192.6 million annually. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. It's a fantastic opportunity for us all. Name: Lauren Kerr Address: 6/26 Raby Rd, Coorparoo, QLD, 4151 IP Address: proxy0.jkmrc.uq.edu.au - 130.102.20.3 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2904	Project Website Submission	27/10/2010	Online Submission from Matt Armstrong of Technical Writer (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. Name: Matt Armstrong Organisation: Technical Writer Address: 24 Campbell Street, Collingwood, Victoria, 3066 IP Address: - 202.146.6.236 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2905	Project Website Submission	27/10/2010	Online Submission from Gemma Baxter (support)	Businesses like North Byron Parklands generate much needed jobs for our area. Currently, there is a lack of employment opportunities australia wide and any business that provides jobs to locals should be approved to operate. The festival also improves the livelihood of many businesses within the area, bringing in large profits to both accommodation and hospitality services. The festival also acts as a tourism booster -people travel from all over australia to splendour in the grass and experience our little patch of beauty and like many, they will be inspired to

return, bringing continual tourism revenue.

As a Kingscliff local, and splendour in the grass attendee and supporter, I see no reason that the festival should not go ahead at the new grounds. The north coast of new south wales has undergone tremendous destruction in the form of mass seaside OVER development in the form of council approved Salt, Casuarina etc. If these developments which annihilate thousands of native trees and leave endemic species without homes can go ahead, I see no comparison between the environmental impact Splendour in the grass poses.

P2906	Project Website Submission	27/10/2010	Online Submission from John Mester (object)	Dear Director, I am opposed to this commercial development because I am fearful of the impacts it will have on our community. Our small shire already has one permanent festival site and cannot sustain another. We have already suffered the impacts of unfettered holiday letting and think that Vomit in the Grass will exacerbate this problem enormously. As a Labour voter of nearly 50 years I am disturbed by the prospect of the State Government overriding the community and flogging their interests to the highest bidder. Yours faithfully, John Mester Name: John Mester Address: 12 North Head Rd New Brighton 2483 IP Address: 112-213-162-208.bb.ispone.net.au - 112.213.162.208 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2907	Project Website Submission	27/10/2010	Online Submission from Denise Stammers of none (support)	Cultural Events Site Yelgun 090028 I wish to support North Byron Parklands.I am a resident of twenty five years with three family numbers who have attended the splendor concert every year since it started but note this year 2010 as it was held in QLD.We are asking you to support this site so once again events will once again will be held in our local shire it is very unfair that our youth and families should have to travel long distanceds to attend concert and shows.Thank You Name: Denise Stammers Organisation: none Address: 11 Mundurra Ave Ocean Shores NSW 2483 IP Address: cpe-121-216-213-101.lnse3.ken.bigpond.net.au - 121.216.213.101 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2908	Project Website Submission	27/10/2010	Online Submission from chee yow of Chinatown FOod (support)	Byron Bay shire is amongst other concern, a holiday destination and by promoting event such as Splendour, it would be conducive to the community's prosperity, promoting Byron Bay as an attractive destination and by having splendour, we are ensure of an organisation that would be ecologically responsible. The parklands should be used for a sustainable cultural arts and event venue OR it may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

I am completely in support of the proposal and would make Splendour in the Grass an event I will go to and my family and friends will go to as well.

P2909	Project Website Submission	27/10/2010	Online Submission from Danielle Buhagiar (support)

To Whom It Mat Concern,

I am writing to express my support for the development of the Cultural Events Site in Yelgun, 09_0028.

I am a long-time visitor to the Northern NSW coast and believe that this development will offer a unique new attraction to the region. I have attended many past music festivals at the Belongil site in Byron Bay and have enjoyed them immensely. This new site will offer an even better festival experience, for visitors and locals.

From my experience the music festivals held in and around Byron Bay are hugely beneficial to local businesses (as is all tourism to the area). The festivals also offer great opportunities to young people in the area, in terms of work and training.

I have looked at the development plan and I'm impressed by the environmental initiatives built in, for example:

- The event usage proposed is in grazed pasturelands covering less than 50% of the overall 660 acre site, leaving the majority for habitat use and bush regeneration.
- The proposal involves increasing the size and function of the Marshalls Ridge wildlife corridor.
- The proposal involves transferring approximately 28 hectares of bushland to expand the Billinudgel Nature Reserve.
- The proposal will provide opportunities to work with bush regenerators, universities and TAFE colleges to repair currently degraded land.
- The vegetation management plan will increase connectivity of the currently fragmented forest blocks across the site. This means it will be easier for animals to move across the 660 acre site.

I hope that the development application is approved and that the cultural events site can be created as planned.

P2910	Project Website Submission	27/10/2010	Online Submission from Matt Moore of just me (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ€™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Whatâ€™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this.

Save us from dark ages Queensland liquor licensing laws! I tried and tried but I COULD

NOT GET DRUNK at the last festival! It was heartbreaking :(

P2912	Project Website Submission	27/10/2010	Online Submission from Heather Elmes of Victoria University (support)	Splendour is ONE OF THE GREATEST FESTIVALS Australia has to offer!! As a music business student and live music enthusiast, we need to give this amazing event a HOME! In Byron!!

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

P2913 Project
Website
Submission 27/10/2010 Online Submission from oliver
morton (support)

One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation's environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.

Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community.

P2914	Project Website Submission	27/10/2010	Online Submission from Joel Bobbin of Splendour to Byron (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering.

P2915	Project Website Submission	27/10/2010	Online Submission from Michael Keen (support)

The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home!

The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

P2917	Project Website Submission	27/10/2010	Online Submission from Gavin Grace of Cavalier Homes Northern Rivers Pty Ltd (object)	I would like to lodge my objection to the development of mega festival/mega party site based on the reasons below. My young family and I chose to live in this beautiful part of the country and we cherish the lifestyle, family values and sense of community we have here. This mega development would have numerous negative affects on that which we hold so dear. We beleive The local community and wildlife would suffer greatly with such development

and the the transient nature of the people it is destined to attract.

Local traffic conditions would deteriorate greatly with the large volume of visitors that would be 'bumped' in and out on a daily basis year round.

We also have serious concerns with the standard of visitors attracted to such large mega parties, in our eyes this screams anti-social behaviour, substance abuse, illegal camping, destruction of wildlife habitat, massive amounts of rubbish and negative press for our community and local business.

We strongly beleive the con's would far outweigh the pro's and would be deeply saddened if such development was allowed to proceed.

This style of development is not in the interest of the community and it appears the developer is not prepared to work in with the local Council and what they regard to be acceptable.

In summary, it would be a great shame to sell out such a beautiful part of the country which is open to all that come here to enjoy it for the financial benefit of a few.

Please consider the young families that will suffer with this development.

P2918	Project Website Submission	27/10/2010	Online Submission from Jessica Pearson (support)	While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive. The Northern Rivers region needs to plan ahead for future employment and training opportunities for our young community. We need to offer options to the young members of the community to encourage them to stay in the area. This proposal will provide these incentives. The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. And besides - Byron is simply the best venue for the event! P2919	Project Website Submission	27/10/2010	Online Submission from Isabella Sweaney (support)	North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community. Also i would like to add, being a youth myself, growing up here in the shire has been wonderful. My only criticism was the lack of activities and events available. Kids around here are bored! There are absolutely no events around here for underage kids. It was frustrating and annoying having your favourite band or a band you really liked come into town but only playing at pubs or clubs, which you were not allowed into. Splendour on the other hand is the only event around the shire that permits underage attendance and decent music!! As i turned 'of age' i attended other festivals and it was so clear to me that Splendour was the best by far for it's music, other areas such as the arts and the feeling of community. Walking around Splendour it is almost impossible not to run into someone you know. This is something you don't find anywhere else! Splendour is a huge asset to our community and with the proposal of more events per year it can only get better! P2920 Project
Website
Submission 27/10/2010 Online Submission from shaw
schultejphann (support)

The approval of this proposal will lead to new employment opportunities that may not have previously been offered on the north coast of NSW. New and exciting jobs will boost the youth employment and inspire young adults to remain in the local area after completing study.

The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

The North Byron Parklands idea is inspiring for young people. There is precious little around, particularly in regional areas, which is inspiring for them. The proposal is all about the environment, events, culture and celebration. It's about young people and being young. This is really important.

P2921	Project Website Submission	27/10/2010	Online Submission from Karin Shubitz (object)	We already have one permanent festival site at Tyagarah, we do not need nor want another one. Fauna in our precious Billinudgel Nature Reserve will be under intolerable noise and lighting assault causing disruption of mating and predatory defense senses for vulnerable species. Increased bushfire risk with up 50,000 young and intoxicated people partying on the edge of the reserve Traffic at the Splendour Festival held at Woodford was banked up for over 6km. That will close down Tweed Valley Way all the way back to Brunswick Heads High risk of flooding in parking and camping areas

Brunswick Heads will be transformed into a permanent party town being the closest pub/beach locality to the site

Up to 4 mega festivals per year with crowds projected to rise up to 50,000 or more for each festival plus another 4 festivals of up to 10,000 per day and another unlimited number of smaller events and doof parties will more than double the entire population of Byron Shire several times per year taxing amenities, services, beaches and other public places

A huge increase in the worst type of holiday letting with all night partying coming to a house near you.

Online Submission from David
Dudek (support)

To whom it may concern,

I support the Cultural Events Site Application for the North Byron Parklands site in Yelgun.

As an employee in the hospitality industry for the last 20 months in Byron Bay I have seen the effects of a lower than average tourist and transient worker influx. The place I work will close its doors in mid November due to this. Many businesses in Byron Bay have expressed the difficulties in remaining open in the last year for the very same reason.

I believe this site will attract more tourists which will support the lifeblood of Byron Bay: the businesses in the Byron CBD. Byron Bay is built on tourism.

As a resident of South Golden Beach, the impact this site will have on me, as I pass the proposed entry to get to work in Byron Bay everyday, will be minimal, if it at all will exist. For the employment opportunities this site will generate alone, I wouldn't mind if it did! For the benefits to Byron's businesses I'd put up with a fair bit more!

I support this proposal.

Thank you.

Sincerely,

David Dudek

P2924	Project Website Submission	27/10/2010	Online Submission from Chad Grant (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

P2925	Project Website Submission	27/10/2010	Online Submission from Skye Hoffmann (support)

The approval of this proposal will lead to new employment opportunities that may not have previously been offered on the north coast of NSW. New and exciting jobs will boost the youth employment and inspire young adults to remain in the local area after completing study.

North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all donâ€™t move to cities.

P2926	Project Website Submission	27/10/2010	Online Submission from Caitlin Overell (support)

North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become âœout of boundsâœ to maintain and protect identified cultural areas of importance.

I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved.

We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal.

P2927	Project Website Submission	27/10/2010	Online Submission from ashley bloomer (support)

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but let's create a high season in winter too by utilising North Byron Parklands!

North Byron Parklands has a strong focus on cultural management. This is shown by the proposed cultural centre aimed to provide learning opportunities for staff to build a greater understanding of our local indigenous and non-indigenous ancestry.

P2928	Project Website Submission	27/10/2010	Online Submission from Dave Batty (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation's environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.

The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. It's exactly what we as a community need.

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

P2929	Project Website Submission	26/10/2010	Online Submission from hugh salisbury (support)

The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

P2931 Project
Website
Submission 26/10/2010 Online Submission from Will
Jackson (support)

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

P2932	Project Website Submission	26/10/2010	Online Submission from John Hunter (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. These people actually care about the land they own and the area in which its located and want to foster its environment and its culture. Name: John Hunter Address: Level 1/16 Roma Street Brisbane QLD IP Address: cpe-58-173-162-155.sicz2.woo.bigpond.net.au - 58.173.162.155 Submission for Job: #3210 Cultural Events Site (Project Application)

P2933	Project Website Submission	26/10/2010	Online Submission from Simon Johnson of CBA (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. Name: Simon Johnson Organisation: CBA Address: 201 Sussex Street, Sydney, NSW 2000 IP Address: c122-106-197-37.belrs3.nsw.optusnet.com.au - 122.106.197.37 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2934	Project Website Submission	26/10/2010	Online Submission from Samantha Lim (support)	In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficult. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approve projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. Name: Samantha Lim Address: 106 Bayview Avenue, Earlwood, NSW 2006 IP Address: - 78.146.226.17 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2935	Project Website Submission	26/10/2010	Online Submission from Elizabeth Whittaker (support)	The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we don't have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our state. We must support this application. Name: Elizabeth Whittaker Address: 3/10 Christensen StYeronga QLD4104 IP Address: d110-32-1-236.rdl800.qld.optusnet.com.au - 110.32.1.236 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2936	Project Website Submission	26/10/2010	Online Submission from adam brett of resident (object)	Dear Sir/Madam, I would like to submit my strong objection to this submission for these reasons. 1. The inadequate provision for local traffic to enter oceanshores via Yelgun to access tweed valley way. As a resident of oceanshores this is the only exit from the hwy to access my residence without having to detour sth to brunswick heads (approx. 20klms round trip.). please google this to see for yourself or better still i would be more than happy to make time to show you personally. I am not confident in Parkland's traffic management of this exit from the hwy with regards to residents accessing their homes nor do i think it is a safe exit for traffic backing up one

whole lane for klms on the pacific hwy during events

2. This area of land is located in a sensitive nature corridor and no amount of noise mitigation and barriers is sufficient to prevent disturbance to the local wildlife.

3. The infrastructure of communities in this area (yelgun,oceanshores,brunswick) simply do not have the capacity for influxes of crowds for festivals.

4.tweed valley way is the main road for residents travelling locally to murwillumbah/burringbar and moobal and visa versa to oceanshores/brunswick etc. Traffic flow into the proposed site will severely disrupt local traffic no matter what measures are put in place as it is a single lane road in both directions.

I live here and know the area and appeal to your most careful consideration to this submission. Please realise by visiting the area and placing yourself in the 'residents shoes' objectively that local opposition is strong and warranted.

Yours Sincerely,

Adam Brett

P2937	Project Website Submission	26/10/2010	Online Submission from Ryan Goldsworthy (support)	I am writing to whomever it may concern regarding the North Byron Parklands becoming available as a permanent home for Splendour in the Grass, and other such festivals and gatherings. Having been an attendee to Splendour for the last 6 years, and a worker at the 2010 event, I have been able to see first hand their commitment to nature and preservation of their surrounds. Splendour always rank highly in the annual Festival Awards for 'Greenest Festival' category, and deservedly so. Of all the festivals I attend yearly my vote would have to go to Splendour in the Grass for being the most proactive with regards to looking after the environment before, during and after their event. Tickets are available in Carbon Offset option, which many people choose to buy. Bin-ya-butts are free. Eco-cops are employed to dish out free information. Only recyclable containers are sold at markets within the site. I strongly urge you to grant the North Byron Parklands area to Splendour in the Grass and their associates so that they may continue to provide their high quality events to Australia's youth. These events are an integral part of our country, and put us on the world map for music and lifestyle events. In addition to my views above, I also agree with the following: North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends

are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The p

P2939	Project Website Submission	26/10/2010	Online Submission from Katrina Crombie (support)	For 7 years I have been holidaying in Bryon Bay only for the Splendour in the Grass Festival. I have traveled from Anna Bay 2316 & Nambucca Heads 2448. Every year I have been impressed with the events environmental & noise improvements & continual encouragement in helping festival goers reduce our carbon footprint. I am also happy to give my money to local small businesses in Bryon Bay, Brunswick & Lennox Heads, Billy Nudgel & more. This year I went to Woodford for Splendour in the Grass & the extra space & room was apparent as was the distance the festival was from the Town. This would have alleviated noise complaints & locals would have been happy that there front yards were not destroyed by the "so called unruly behaviour we apparently display". I also asked many fellow festival goers why we could not have Woodford, site, layout, area (space) in Byron Bay?. The answer is we can! if only the Local Council & Govt bodies could focus on the positives of this event. I am not planning to visit Byron Bay this year so that is approx \$2K of revenue you have lost & whilst that does not seem a lot of money if you add that up with other visitors that have by passed Bryon your Local small businesses will be suffering. The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a ?resource centre? where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

P2940	Project Website Submission	26/10/2010	Online Submission from Adam Glanville of RAAF (support)

The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral responsibility to approve it just on employment considerations alone.

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

P2941	Project Website Submission	26/10/2010	Online Submission from Ron Kleindiek of Cafe Latino (support)

Dear Sir or Madam,

I'm writing to you to express my support for the planned ?Cultural Events Site, Yelgun
09_0028?

It is my belief that the North Byron Parklands development will benefit the Northern Rivers
region for the following reasons:

? Economy

I have worked as a food stall operator for the last 7 years and my family and I have
benefited directly from being able to trade at Splendour In The Grass. This has had a flow
on effect due to the fact that we use manly local suppliers.

? Employment

I personally know numerous local people that have been employed by Splendour In The
Grass - not only during the festival, but also before and after. The Northern Rivers region
has a high level of unemployment and so an organization that brings employment is
beneficial for the residents in this area.

? Community Grants

Various community and volunteer organizations have benefited through the grants scheme.
For example the Byron Youth Service and the Rural Fire Service have received grants. Both
organizations are a vital part of our community and provide a great service.

? Culture

Living in regional NSW quite often means that we miss out on cultural events. Normally the
big urban centers get most events and now we have the chance to have them here on our
doorstep. Bring them on!

? Social Benefits

I have made lots of friends at past events and I love working or just going as a punter to events. These events are a chance to meet and bond with people from around the world.

? Opportunities for young people

My son and a group of local high school students had the opportunity to work backstage as part of their Entertainment Industry Studies. It was a very valuable experience, which enhances their chances of future studies and employment. A lot of young people have to leave the area due to the lack of employment. This development would enhance his and a lot of other young people's employment chances.

? Environment

I know the site for the proposed development and have taken part in the bush regeneration of it. As far as I understand North Byron Parklands has been doing a great job in regenerating depleted grassland and enhancing wildlife habitat.

? Conclusion

In my opinion the benefits of the proposed development outweigh the detriments. Not much happens around here! A bit of culture and music would do us a world of good!

Kind Regards

Ron Kleindiek

P2942	Project Website Submission	26/10/2010	Online Submission from Kate Stead (support)	It is very important for both the Australian music industry and the NSW economy to retain the Splendour in the Grass music festival and hold it in the new space close to Byron Bay. I have attended the Splendour festival since 2004. As an event planner I have been consistently impressed with the standards of the organising group and the efforts they make to return value to the community, to drive environmental measures and to make the festival truly sustainable. The development of this new area as a festival site shows they are pro-active in preserving the interests of the residents (in keeping the festival site away from homes) and the interests of the local businesses (in bringing the tourism dollars to the Byron shire). The festival also makes a significant effort to support new and developing artists across a wide range of areas. They were one of the first mainstream festivals to incorporate live theatre and art installations as well as providing performance opportunities to many local artists. I was amazed this year, when the festival went to Qld and am still amazed that there is doubt over approving the North Byron Parklands proposal. Other states have spent millions luring major events to their towns and we in NSW are putting up barriers to one of the most progressive and sustainable organisations and driving them to leave the state.

It just doesn't make sense.

P2943	Project Website Submission	26/10/2010	Online Submission from cyrus wall (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs. Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and

balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It's up to us as adults to decide that we want to support venues that support young people.

P2944	Project Website Submission	26/10/2010	Online Submission from Pip Palmer (support)	I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. Name: Pip Palmer Address: 13 Clifford st South golden beach Nsw IP Address: 110.20.55.64.optusnet.com.au - 110.20.55.64 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2945	Project Website Submission	26/10/2010	Online Submission from Cynthia Rigg (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger.

The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions' economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

P2946	Project Website Submission	26/10/2010	Online Submission from Dave Andren of Schimminger Architects (support)

At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. \$55,000 compared to NSW's average annual income of \$71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need.

The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands

proposal will now serve as a cultural meeting place for all people.

The North Byron Parklands proposal will provide social benefits across the Northern Rivers area. Cultural events are valued by the community as it adds to their quality of life and creates improved social cohesion, lifestyle improvement, diversity, and increased creativity.

P2947	Project Website Submission	26/10/2010	Online Submission from Remy Davignon-Doolan (support)	North Byron Parklands located just north of my local town of New Brighton is a prime location for a festival site. Located at a perfect distance from civilisation it provides easy access for festival goers to enter and leave the site, while also providing enough distance so the sound will not be heard by nearby residents. Festivals such as Splendor in the Grass bring massive benefits to our local economy and tourism. Money and people flock to the area boosting our local businesses Name: Remy Davignon-Doolan Address: New Brighton 2483 IP Address: 205.102.70.115.static.exetel.com.au - 115.70.102.205 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2948	Project Website Submission	26/10/2010	Online Submission from savannah stanojevic (support)	North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately \$192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved! Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. Name: savannah stanojevic Address: 26m Coomburra Cres IP Address: cpe-124-176-86-199.lns4.ken.bigpond.net.au - 124.176.86.199 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2949	Project Website Submission	26/10/2010	Online Submission from Cass Emanuel (support)	The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesnâ€™t proceed then itâ€™s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklandsâ€™ group? No-one. That would be a terrible lost opportunity. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced

soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but let's create a high season in winter too by utilising North Byron Parklands!

I work in an industry that relies on tourism and we really missed Splendour. While I do not attend Splendour, I am for it. I have always found that the vibe in Byron is friendly and happy for these festivals.

Please - Bring it home.

P2950	Project Website Submission	26/10/2010	Online Submission from Sienna Dillon (support)	I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. Bring Splendour home to the Northern Rivers! Letâ€™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site. Name: Sienna Dillon Address: 18 Dalley St Mullumbimby, NSW Australia IP Address: cpe-144-137-70-168.inse5.cht.bigpond.net.au - 144.137.70.168 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2951	Project Website Submission	26/10/2010	Online Submission from Mason gwyther of student (support)	Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but letâ€™s create a high season in winter too by utilising North Byron Parklands! North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it. Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids. Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. byron is the biggest tourism attraction in aus, it was so stupid to take it to woodford, like only woodford should be there cause it suits it so much. P2952 Project
Website
Submission 26/10/2010 Online Submission from Sonny
Johnson (support)

Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers.

All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector.

With up to twenty days of events each year the work experience opportunities for people in the region are very exciting. The bump in and bump out periods provide further work. We need these jobs and the training they provide, from high level event management to ticketing, technical production and traffic management.

P2953 Project
Website
Submission 26/10/2010 Online Submission from Asha
Packshaw (support)

The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

P2955 Project
Website
Submission 26/10/2010 Online Submission from Katie Bell
(support)

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a "sustainable" site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment

the North Byron Parkland have for this site.

With International Sustainable Event Management standards being developed with Australia's input and anticipated for adoption in 2011, to turn down a submission that already strives to reach and potentially exceed the current sustainable event achievements of other Australian festivals would be an error to look back on and regret.

P2956	Project Website Submission	26/10/2010	Online Submission from zoe parsons (support)

This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to.

In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coast's existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas.

P2957	Project Website Submission	26/10/2010	Online Submission from hayden Lewis of school (support)

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home!

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

P2958	Project Website Submission	26/10/2010	Online Submission from Luke Osborne (support)

I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet.

With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me.

P2959	Project Website Submission	26/10/2010	Online Submission from Kate O'Neill (support)

I am writing in support of the proposed cultural events site at Yelgun (09_0028). The local economy of the Byron Bay area desperately needs this site to be approved to welcome back the tourism revenue from the Splendour in the Grass festival attendees. I stopped in Byron overnight on my way to and from Sydney to Woodfordia for the festival this year and spoke to several local business owners who were suffering severely from the temporary relocation of the festival. The new site will allow the Splendour festival to return to its Byron Bay home and allow for many other cultural events to encourage revenue into the local area.

P2960	Project Website Submission	26/10/2010	Online Submission from ally jones (support)	North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. Name: ally jones Address: 10 gilba avenue ocean shores IP Address: cpe-121-217-117-234.inse2.cnt.bigpond.net.au - 121.217.117.234 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2961	Project Website Submission	26/10/2010	Online Submission from ellena shambler (support)	If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way. Name: ellena shambler Address: 9 barkala courth ocean shores 2483 IP Address: c-210-10-163-111.syd.connect.net.au - 210.10.163.111 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2962	Project Website Submission	26/10/2010	Online Submission from Riley Vanderbyl (support)	North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. Name: Riley Vanderbyl Address: 76 Palmwoods RdMullumbimby NSW 2482 IP Address: c-61-69-173-205.syd.connect.net.au - 61.69.173.205 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2963	Project Website Submission	26/10/2010	Online Submission from Mem Rynne (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are

even more detailed and impressive.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region.

P2964	Project Website Submission	26/10/2010	Online Submission from Bill Pyke (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ€™ income. There is no reason why this proposal should not be approved by state government.

The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

P2965	Project Website Submission	26/10/2010	Online Submission from alex hawdon (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised.

The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

splendour should definiatly be kept around in its original area

its an amazing festival and it is a great contribution to our society

P2966	Project Website Submission	26/10/2010	Online Submission from Amanda Williams (support)

The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble.

The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one.

P2967	Project Website Submission	26/10/2010	Online Submission from Kelly Morton of CPR Management (support)

The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment.

For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

Submission 26/10/2010 Online Submission from Emma
Davine (support)

Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times.

The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesn't proceed then it's likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklands group? No-one. That would be a terrible lost opportunity.

P2972	Project Website Submission	26/10/2010	Online Submission from Paige Law (support)	The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation's environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.

With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area.

P2975	Project Website Submission	26/10/2010	Online Submission from Amy Westhorpe (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ€™ economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed.

Byron Bay is known for its culture and events. Don't deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal!

P2976	Project Website Submission	26/10/2010	Online Submission from Jay Paget (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other

environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal.

Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures.

4 Gira Place Ocean Shores 2483 NSW

To Whom It May Concern

I have lived in Byron Shire since 1972 . I strongly disagree with the approval of the North Byron Parklands as a Festival site. This is a very quiet area mostly native forest and coastal scrub land. MANY NATIVE SPECIES live in the area between my house boundary and the NBFS. My 11year old daughter has found a very rare Mitchell Rainforest Snail in land adjacent to our home. These snails are only found in a couple of areas on the North Coast NSW. Wallabies and many birds will be affected by large influx of vehicles and people(reports of up to 50000).

My next concern is the safety of people attending the local nearest beaches. South Golden Beach has one public toilet and one shower and parking for approx 50 cars. These beaches are unattended by lifesavers. The beaches receive large ocean swells by not having protection of Cape Byron. Super rips form and many unofficial rescues take place. In my own experience I have been swept out to sea on two occasions. As I have been surfing for over 40 years my experience and good luck has saved me.

The local area is very low and floods on a regular basis. During these times dangerous floods cross roads cutting of surrounding villages for days at a time. No emergency vehicles have access. The adjacent heath country is also a fire hazard and once lit is difficult to contain. In the last decade of low rain conditions almost every spring bushfires have been started within a few kilometers on festival site. Add 25000-30000 people exploring the local environment. I know of significant sites that will be disturbed.

And yes I will be affected. I left the city in 1972 to live in a quieter more nature friendly environment. I can always move to a less populated area until the next get rich schemer comes a long.

Your government fought to protect this area before the Billinudgel Nature Reserve was gazetted . Keep the Good work don?t approve North Byron Parkland.

Thanks

P2981	Project Website Submission	26/10/2010	Online Submission from Pamela Ditton (object)	Fauna in our precious Billinudgel Nature Reserve will be under intolerable noise and lighting assault causing disruption of mating and predatory defense senses for vulnerable species. * Increased bushfire risk with up 50,000 young and intoxicated people partying on the edge of the reserve * Traffic at the Splendour Festival held at Woodford was banked up for over 6km. That will close down Tweed Valley Way all the way back to Brunswick Heads * High risk of flooding in parking and camping areas * Brunswick Heads will be transformed into a permanent party town being the closest pub/beach locality to the site * Up to 4 mega festivals per year with crowds projected to rise up to 50,000 or more for each festival plus another 4 festivals of up to 10,000 per day and another unlimited number of smaller events and doof parties will more than double the entire population of Byron Shire several times per year taxing amenities, services, beaches and other public places

* A huge increase in the worst type of holiday letting with all night partying coming to a house near you.

P2982	Project Website Submission	26/10/2010	Online Submission from Phoebe Sale (support)	Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one? Letâ€™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ€™s get on with the job of creating exciting training and employment opportunities for our young people. Name: Phoebe Sale Address: 1/8 Murray St Red Hill QLD 4059 IP Address: c122-108-252-9.kelvn3.qld.optusnet.com.au - 122.108.252.9 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2983	Project Website Submission	26/10/2010	Online Submission from Darcy Garlick-Kelly (support)	To whom it may concern, I am a 19 yr at university in Brisbane, but grew up on the North Coast and have now been to 4 consecutive Splendour in the Grass events. They were always the highlight of my year, and I was lucky enough to see some of my favourite bands perform there. The festival seemed to suit the vibe and lifestyle of the Northern Rivers and seemed at home in Byron Bay. However, it was obvious that the Belongil Fields site didnt have the capacity to continue holding such an event. The move to Woodfordia was a good idea, however, after attending Woodford Folk Festival

for the past 5 years, I felt that holding Splendour at the Woodford site took away from the Folk Festival.

Much of the site was changed to compensate for different crowds and I think that if Splendour continues to be held at Woodford, it will ruin the site for other smaller scale festivals.

Please send Splendour back to Byron, the North Byron parklands sight will be perfect for Splendour and will be a great venue.

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

Yours sincerely

Darcy Garlick-Kelly

P2985	Project Website Submission	26/10/2010	Online Submission from Ashley Burke-Smith (support)	I have lived in Suffolk Park for 10 years, I run a home-based business with my wife and my 2 children attend the local primary school. Having watched the comings and goings of Bluesfest and Splendour and other smaller events, I am convinced that the Yelgun proposal is the best possible solution for a festival site and a fantastic opportunity for Byron Shire. For me it meets all of the criteria: 1 - The proposal offers significant economic benefits to the region by allowing a limited number of festivals to feel safe that they can invest in the growth and longevity of their events without the risk of being asked to find a new site each year. This also offers opportunities for local businesses to become long-term suppliers to the event and the contribution to the local economy will be enormous. 2 - Many families find it hard to find consistent employment in Byron Shire - approving this proposal will increase the amount of money flowing into the region, which affects virtually every business - either directly or indirectly. I know a large number of working parents who have had their hours or days reduced because their employer can't afford full time staff - money into the business community = jobs for locals. For many people it is an absolute delight to be able to work in a tourism or entertainment related industry as the alternative could well be the local chicken factory! 3 - Byron Shire has developed a joyous image of cultural diversity. This includes all forms of music, dance, ethnicity, fashion and lifestyle. It is Byron Shire's key 'point of difference' and this image can only be enhanced by protecting a mix of festivals and events. This image contributes to why people from all walks of life visit all year around and not just during at festival time. Many stay and live and this keeps the beautiful cultural mix alive. It is also wonderful that all manner of acts, bands and artists choose to also perform or display their skills locally at smaller venues throughout the shire - this makes cultural diversity open to all and not just festival goers.

4 - Socially there are also benefits on several levels. In a region where there is minimal infrastructure, it is vital to give young people things to do, be involved in and look forward to. Festivals and Events are a major part of the youth calendar and something positive for them to 'get into'. Other age groups benefit too - there are many from all age groups who cannot afford to go to Sydney or Melbourne to see international acts but are able to see them when you come to the shire. On a more day to day level, there are also significant social benefits for low income earners and families who are more able to provide for themselves and loved ones due to improved working hours, wages and opportunities.

5 - To a region that is largely dependant on incoming dollars the opportunities that arise from this proposal are endless. In brief it is a fragile economy at best and the opportunity to engage with major stakeholders, from suppliers to local artists and beyond this proposal offers avenues that would otherwise be closed.

6 - The environment is a hot subject locally (as it should be everywhere). For the record, I am a 'Greenie'. As someone who is passionate about the environment I see a tract of land currently being used for cattle grazing. Cattle are NOT environmentally friendly, it is an extremely poor use of land that has already been cleared. I would rather see this proposal be approved, the cattle removed and festival owners be made to show significant environmental responsibility. There is more than enough margin in their 'budgets' to make it a win win.

7 - In a time of global uncertainty, Byron Shire has, like so many other tourist destinations, seen a major downturn in international visitors. This proposal will result in promoting domestic tourism for years to come. This protects the local economy - and encourages people to spend Australian dollars in Australia! It also encourages acts from around the world to come and spend here too. The contribution to the local area is immeasurable but clearly huge - and should be protected for the good of the community.

8 - Creativity is another celebrated feature of this region - and this proposal enhances it's future. The activity at the proposed site would light up the creative minds of the young and old as well as supporting local creative industries and businesses. One major stakeholder SAE draws creative people from all over the globe - who come, stay for a while, create music, movies and much more. Having these people here opens our minds to greater creative thought as well as allows our local businesses that support them to prosper. This gives local people a much wider choice of materials, tools, instruments, influences and

access to a range of creativity that may be well above what would normally be expected for a community of 10,000 people. How can this be anything but good.

I do hope with all of my heart that this proposal is approved. I have put a great deal of thought into this before posting my submission and in short: it would be a huge loss to all if this opportunity were to leave the shire and a terrible outcome if it were placed anywhere else in the shire - Yelgun is clearly the best option and should be passed without delay.

P2986	Project Website Submission	26/10/2010	Online Submission from Alexander Mackenzie (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of

predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

Finally, the fostering of youth culture is inherently important aspect of any nation's identity. Splendour offers a range of musical acts that enhance understanding of social issues that are important to today's youth. Furthermore, the Festival offers activities that go beyond music, activities that attempt to engage and stimulate. The festival also allows for a collection of like minded individuals to come together and celebrate what makes not only their culture so great, but that also allows them to celebrate the fundamental aspects that make Australia such a great nation.

P2987	Project Website Submission	26/10/2010	Online Submission from Korin Eringa (support)

I have attended several festivals held by different companies in Australia. I have returned to the Splendour in the Grass Festival at Byron Bay on 5 occasions, because I feel this to be one of the superior Australian festivals in every way. There is a concern for the local population and the local environment that is considered by the organisers of this festival that it is encouraging to see.

Every year they go to some trouble to ensure that local artists of every description are given the opportunity to use Splendour to showcase their work to a wider audience than would otherwise be possible. The organisers of the festival make sure that the ongoings over the Splendour weekend have as little a negative impact as possible on the surrounding land and village, and that local residents, should they so desire, can be included in the fun by purchasing locals tickets - whilst the rest of Australia must compete for comparatively a lot

less.

Splendour also gives back directly to the local Byron Bay community in the form of donations and youth encouragement schemes. This allows local youth to stay in the area, whilst receiving some benefits and exposures that were previously only available to youth in the larger cities.

The festival also increases both interest and tourism in the Byron Bay Shire, a thing which I am sure all locals will appreciate brings increased employment and opportunities for all.

I also feel that Splendour in the Grass leads the Australian Festival pack in an environmental sense. Every year they are implementing new initiatives to decrease their impact on the environment, including carbon offset tickets, recycling incentives, and site management techniques.

They have documented and researched a number of strong positives for the new proposed site at North Byron Parklands. Their proposal means that this land will have little to no interruption for 280 days of the year, allowing the native habitat and fauna to flourish in a way that isn't possible with farmed land. Their proposal also means that even when in use, over half of the available site will remain completely unused, again allowing it to flourish naturally.

The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

For these reasons I am strongly in support of the North Byron Parklands site being used for Splendour in the Grass amongst other local arts and community uses. I urge you to listen to

the masses of people who believe this is a very positive thing for North Byron Parklands and the surrounding area, and what is more, will actually protect the site from future degradation and exploitation that might otherwise occur.

Thanks for your time,

Korin Eringa.

P2988	Project Website Submission	26/10/2010	Online Submission from Paul O'Sullivan (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the "coast to hinterland"™ wildlife corridor. The extended "rest"™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. Name: Paul O'Sullivan Address: 16/33 Oxlade Drive New Farm QLD 4005 IP Address: cpe-121-215-243-124.static.qld.bigpond.net.au - 121.215.243.124 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2989	Project Website Submission	26/10/2010	Online Submission from Nathan Smith of Lendlease (support)	The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce. Name: Nathan Smith Organisation: Lendlease Address: 1/9 Coora Pl, Jerrabomberra NSW IP Address: - 202.4.165.40 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2990	Project Website Submission	26/10/2010	Online Submission from Daniel Nsair (support)	North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! A cultural event site such as the one proposed by North Byron Parklands will help develop creative industries on the north coast. Events such as Splendour In The Grass inspire and encourage young adults to be creative and also provide special initiatives such as the young artists program, Splendid. Lets build up the creative industries in the region! Name: Daniel Nsair Address: PO Box 15922 City East 4002 IP Address: c211-31-63-35.kelvn3.qld.optusnet.com.au - 211.31.63.35 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2991	Project Website Submission	26/10/2010	Online Submission from margaret mckey (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without

a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives.

Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

P2992	Project Website Submission	26/10/2010	Online Submission from jessica gatti (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ€™s important to have these opportunities for young people in the region. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. Name: jessica gatti Address: 3 oorama court, ocean reef, perth IP Address: c-59-100-166-162.per.connect.net.au - 59.100.166.162 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2993	Project Website Submission	26/10/2010	Online Submission from Samantha Fraser of MRAEL Limited (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning.

Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, âI learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâTM. (Donna Sue Sanders â Executive Director of the Daytona State Foundation).

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

P2994 Project
Website
Submission 26/10/2010 Online Submission (object)

As I don't have an email address I am using my friends email.....

I do not want my name released for obvious reasons.

1. There is already a permanent festival site at Tyagarah. Why do we need a second site?
2. The type of major events will be extremely noisy which will put enormous pressure on the Billinudgel Nature Reserve which borders this site. It will interrupt with the wildlife with noise and lighting assault causing disruption of mating and predatory defense senses for vulnerable species. This alone should be a reason why this site is totally unacceptable.
3. Increased bushfire risk with up 50,000 young and intoxicated people partying on the edge of the reserve. I have spoken with local fire fighters & some of this site is peat bog. If this catches alight we (the locals) will have to deal with it for months.
4. As the only access to this site is Tweed Valley Way to have a huge influx of cars, etc try to access the site will be a huge strain on our local roads with traffic backed up to Brunswick Heads & Ocean Shores in the south & Murwillumbah in the north.
5. There is high risk of flooding in parking and camping areas. What a mess that will turn out to be if we get any big rains, which this area is very prone to.
6. Towns like Brunswick Heads, Ocean Shores, Mullumbimby & Murwillumbah will be turned into permanent festival towns with 'visitors' partying on & on & on. This is the worst type of holiday letting imaginable.
7. Up to 4 mega festivals per year with crowds projected to rise up to 50,000 or more for each festival plus another 4 festivals of up to 10,000 per day and another unlimited number of smaller events and doof parties will more than double the entire population of Byron Shire several times per year taxing amenities, services, beaches and other public places
8. As to creating jobs this is a falsity. Most of the jobs will be given to the promoters friends & cronies. All real full time employment will be given to people brought into the Shire as they need to employ people with experience. The only jobs created (if any) will be very part time with no real prospects for our local people.

Please put a stop to this greedy money grabbing enterprise disguised as creating a Cultural Center. When has loud drunken drugged up mega crowds been a cultural event? Since greedy rock music promoters have taken control, that's when.

P2995	Project Website Submission	26/10/2010	Online Submission from Robert Fietz (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the "Splendid Initiative" offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. Submission 26/10/2010 Online Submission from Tamsin
McIntosh (support)

I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved.

Events are really important for young people today. Coming together is not just about getting drunk- (for me personally, i am not a drinker) and partying. Itâ€™s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

P2999	Project Website Submission	26/10/2010	Online Submission from Stacey Dines (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral responsibility to approve it just on employment considerations alone.

The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government.

The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

P3000 Project Website Submission
26/10/2010 Online Submission from Sean Calalang of MusicNSW (support)

If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

P3001	Project Website Submission	26/10/2010	Online Submission from rhys newey (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Online Submission from Kate Dyson
(support)

To whom it may concern:

I have worked at the Splendour in the Grass festival over the past five years and cannot speak highly enough of the organisation. I fully support the application for the festival to move permanently to North Byron Parklands.

In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site.

Jess and Paul, apart from their individual successes, run an extremely successful festival each year and go above and beyond to ensure the major event impacts positively on the community through their youth arts program as well as various environmental initiatives.

I am an event manager and I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

I think it would be a major loss for the region to lose such an incredible event that supports cultural tourism and the creative arts industries.

Kind regards

Kate Dyson

P3003	Project Website Submission	26/10/2010	Online Submission from Matt Blanchard (support)

The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view.

The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â€œout of boundsâ€ to protect identified areas of importance.

Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that

generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

P3004	Project Website Submission	26/10/2010	Online Submission from Natalie Goan (support)

It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative.

The North Byron Parklands idea is inspiring for young people. There is precious little around, particularly in regional areas, which is inspiring for them. The proposal is all about the environment, events, culture and celebration. It?s about young people and being young. This is really important.

If you speak to anyone these days, getting and keeping a job is high up on the list. Regional areas generally do not have a range of diversified industries to choose from. Parklands is offering meaningful and interesting work, particularly for young people and should be welcomed with open arms.

P3005	Project Website Submission	26/10/2010	Online Submission from Mandy Nicholls of WhitNic (support)

North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

I have been searching for a career path in Byron for nearly 2 years now, as soon as I heard about this proposal I knew instantly that it could help me and a lot of other people who want to stay in the area but have to think about moving away due to employment limitations.

Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.

P3006	Project Website Submission	26/10/2010	Online Submission from Troy Allingham (support)

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

This proposal will create a cultural breeding ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home!

P3007	Project Website Submission	26/10/2010	Online Submission from Ashlee Sinclair of Teacher ()

The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment.

Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate.

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

P3011	Project Website Submission	26/10/2010	Online Submission from Jackie Alderton (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one. With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light. A business that combines ecology with events and community giving. That's the kind of

business that our young people are looking to for training and experience. Letâ€™s get it approved.

Apart from all the above - I love both Splendour and the Byron Bay area and believe that the two are made for each other. Please bring Splendour home!

Dear fellow Non Splendourers, YOUR MISSING OUT!!!!

I am taking the time to submit this piece because i as a common splendour in the grass fanatic, live, breath and love this festival. Being 20, a music fanatic and a festival head there is no such festival held the way Splendour is. There is no atmosphere in which Splendour brings and there is no such love to life compared to the 3 days spent at Splendour. Byron is known as the home town of Splendour and it certainly adds to the festivals amazing attitude. I come to splendour for the continuing stay i also get out of Byron after the festival is finished. I come for the locals, for the shops, for the atmosphere, for Byron itself.

P3014	Project Website Submission	26/10/2010	Online Submission from Susanne Watson (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

Byron Bay is known for its culture and events. Donâ€™t deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal!

I lived in areas surrounding Byron Bay for many years. The locals love Splendor, it brings hundreds of thousands of dollars to local economy, it introduces people to the far north coast which helps tourism in other regions like Tweed, Ballina and Clarence valley

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

Splendor isnt just a music festival, it is people at their best, people from everywhere, completely different from one another brought together for the same reason, the love of music. If you dont love this Australian icon in Byron it will be a huge injustice to not only the people of Byron but the music lovers of Australia. There is no other place this should be, There is no other festival or event that will be more serious about protecting the environment.

Please support Splendor for Byron.

 Teelow (support)

To whom it may concern,

The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands.

Yours sincerely

Scott Teelow

P3017	Project Website Submission	25/10/2010	Online Submission from Anda Petrapsch (support)

It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning.

The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P3018	Project Website Submission	25/10/2010	Online Submission from David Black of Griffith University (object)	I think we need to carefully consider the ramifications of this project. There are some populations of Aussie icons in decline in the region and without more investment in protecting and preserving natural movement patterns we may lose them. I think I could support this project if there was evidence of creating a net-positive impact of development in the region.

Thank you for your time and if you need to contact me please do not hesitate.

P3022	Project Website Submission	25/10/2010	Online Submission from Kate Kachor of www.elevenmagazine.com.au (support)

Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide.

Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative.

P3023	Project Website Submission	25/10/2010	Online Submission from Jessica Smith (support)

The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunities and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.

With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North Byron Parklands proposal and bringing Splendour in the Grass home!

I believe that the proposed site for Splendour in the Grass will be an amazing site, and many people will benefit from this permanent home for Splendour!

P3024	Project Website Submission	25/10/2010	Online Submission from stefan sargeant (support)	Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. Name: stefan sargeant Address: 1 oakridge close, delahey, victoria, 3037 IP Address: cpe-121-214-161-16.lnse3.lon.bigpond.net.au - 121.214.161.16 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3025	Project Website Submission	25/10/2010	Online Submission from Ashley Davis (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. I would definitely apply for a job at the North Byron Parklands and know that it will lay my employment path out. This is the opportunity that I have always hoped Byron Bay would offer. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality.

As a northern rivers local I also enjoy the experience of having quality entertainment in the northern rivers. Please don't let Queensland steal another event from us

P3026	Project Website Submission	25/10/2010	Online Submission from Mickola Gardiner-Mclver (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised.

Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. Itâ™s a fantastic opportunity for us all.

P3028	Project Website Submission	25/10/2010	Online Submission from Cameron Archer-Jones (support)	To Whom It May Concern,

While much is made of the Marshalls Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities.

Also, how many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade? Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it.

Kind Regards,

Cameron Archer-Jones

P3029	Project Website Submission	25/10/2010	Online Submission from Melissa Johnson (support)	I have been attending this Festival since the very first one day event. I would hate to see this festival disappear from our annual calendar! It is such a wonderful experience. I agree with all of the following statements. The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. North Byron Parklands proposal to rejuvenate the Parklands site has lead to the employment of local indigenous bush regeneration teams to plant thousands of trees across their site. This program is an ecellent way to involve the traditional land owners in the area and helps to restore the site and set the foundations for a sustainable event site. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers.They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me.

P3030	Project Website Submission	25/10/2010	Online Submission from Campbell Mason of My own business (support)

North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive.

Also, the atmosphere at Byron is indescribable. So, please, bring it back to its home. I live in Queensland, but would much rather go to Byron than Woodford.

P3031	Project Website Submission	25/10/2010	Online Submission from Brendan Peterkin (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward.

North Byron Parklands sounds like a great idea. We would definitely attend and stay on for up to a week utilising the tourism facilities of the Shire. Without the drawback of the festival we would choose other holiday destinations.

P3032	Project Website Submission	25/10/2010	Online Submission from Julie Davies (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devices, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

Why wouldn't we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal.

P3033	Project Website Submission	25/10/2010	Online Submission from JESSICA ASTOR (support)	I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved! North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead. I love this event and have been going for the last 7 years. The most recent event in Woodford was not the same. It did not have the same feel as a Byron Shire event. Name: JESSICA ASTOR Address: 83 Cutter Street, Richmond, 3121 IP Address: 203-206-186-144.perm.iinet.net.au - 203.206.186.144 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3034	Project Website Submission	25/10/2010	Online Submission from Gary Cook of Private (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. Bring Splendour home to Byron. Regards Gary Cook Name: Gary Cook Organisation: Private Address: 16 Aspect Court Sale Vic 3850 IP Address: 203-129-21-200.cust.aussiebb.net - 203.129.21.200 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3035	Project Website Submission	25/10/2010	Online Submission from Benjamin Merretz of private (support)	Dear Sir/Madam, I have made my pilgramige north to attended Splendor twice now and have been totally impressed by the standard of visitor to the event but mostly by the event organisers and the fantastic facilities they provide. 99% of the punters who attend have the same strong good feelings for the environment and we all want to maintain the absolute beauty which we would love to surround ourselves whilst listening to supurb music. In saying that, North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region. The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful. I hope you will thouroughly review all the evidence and strongly encourage you to vote towards letting this amazing music and cultural arts festival, which brings so much happiness to so many people, be a part of the future for so many more people to enjoy.

Warm regards,

Ben Merretz

P3036	Project Website Submission	25/10/2010	Online Submission from Kat Green (support)	It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklandsâs environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity.

Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide.

P3037	Project Website Submission	25/10/2010	Online Submission from donna everitt (support)

The Marshallâs Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities.

The approval of this proposal will lead to new employment opportunities that may not have

previously been offered on the north coast of NSW. New and exciting jobs will boost the youth employment and inspire young adults to remain in the local area after completing study.

From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application.

Bring Splendour home to the Northern Rivers! Letâs look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them.

P3038 Project
Website
Submission 25/10/2010 Online Submission from Cecily
Lambert (support)

The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered.

One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It's up to us as adults to decide that we want to support venues that support young people.

P3039	Project Website Submission	25/10/2010	Online Submission from Charles Butler (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the "coast to hinterland"™ wildlife corridor. The extended "rest"™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together. Splendour is fast becoming an Australian cultural icon and Byron Bay best promotes the unique experience it seeks to create

P3040	Project Website Submission	25/10/2010	Online Submission from Chris Smith (support)	I have been to almost every festival in Australia, including 8 Splendours, and it is by far the most well planned and enviromentally friendly festival of the lot. Apart from the extra environmental upgrades the area would receive surely there is huge economical benefits for the Byron shire to have this festival return home, Every bed is booked out and every shop and restaraunt full. this can only be a good thing for local business and in turn the local community.

As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we don?t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application.

P3041	Project Website Submission	25/10/2010	Online Submission from Natalie Parker (support)

When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve.

This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue.

North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

P3042	Project Website Submission	25/10/2010	Online Submission from Jessica Buntrock of n/a (support)

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

I've been a supporter of this festival for a long time. There are not many festival organisations that care this much about the land, and the people and animals which inhabit it. They are doing whatever they can to not only make this a fun event, but a safe and harmonious one for all involved for both the short and long term duration of the event. This event not only has a positive effect on the people, but a positive effect on the Byron Shire economy, employing local people who are already located in one of the highest unemployment areas in Australia, and giving all local retail and hospitality businesses a much needed boost. The organisers of this event are passionate, dedicated, focussed and love this land and it's people, which is proved in their proposal and long-term committed focus for this event and surrounding projects.

Submission

25/10/2010 Online Submission from Jess
Ferguson of . (support)

To whom it may concern,

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home!

Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

P3045	Project Website Submission	25/10/2010	Online Submission from Christine Symons (support)

As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive.

In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA's expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

On a personal note, it's my annual pilgrimage to Byron Shire - I usually spend a few days in the area either before or after the event. The proposed new splendour site looks amazing. While this year's Splendour event at Woodfordia was great, that site really should remain special for the annual Folk Fest and Dreaming events.

P3046	Project Website Submission	25/10/2010	Online Submission from Jenni Fleming (support)

I believe that the proposed development of the North Byron Parklands site will be a positive step to both the site itself and also to the Byron Bay area. The proposal will be a positive step for the environment and the local economy.

The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal.

Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community.

P3048	Project Website Submission	25/10/2010	Online Submission from Simon Cherry (support)	The approval of this proposal will lead to new employment opportunities that may not have previously been offered on the north coast of NSW. New and exciting jobs will boost the youth employment and inspire young adults to remain in the local area after completing study. Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. Name: Simon Cherry Address: 2 Casuarina drive Banora point IP Address: - 120.156.177.26 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3049	Project Website Submission	25/10/2010	Online Submission from Evan Davis of Village Sounds (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce.

Online Submission from Daniel
Rawsthorne (support)

Dear State Government,

I have been attending Splendour in the Grass at Byron Bay for 6 years. I have always been impressed with the organisers respectful approach to the environment and local community.

i believe this is a very worthwhile venture and have faith that the organisers will continue their great work.

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

Regards,

Daniel.

P3052	Project Website Submission	25/10/2010	Online Submission from Dylan Waters (support)

While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal.

The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities.

P3053	Project Website Submission	25/10/2010	Online Submission from Alex Orgo (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved

because the positive economic impacts are so significant.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region.

P3054	Project Website Submission	25/10/2010	Online Submission from belinda pinchen (support)	Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

C'mon N.S.W. lets not lose another event to another state!

P3055	Project Website Submission	25/10/2010	Online Submission from Belinda Orgo (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region. It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

Submission

25/10/2010 Online Submission from Lily Rose
Dambelli (support)

To whom it may concern,

Please give Splendour in the grass it's new permanent home!!!!

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys book.

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis

alone.

If there were more opportunities for new and interesting jobs in Byron Bay, I believe there would be less of my friends moving away from the area.

Kind Regards,

Lily Rose

Bourke (support)

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet.

North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it!

Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal.

P3060	Project Website Submission	25/10/2010	Online Submission from Luke Rodely of FBi 94.5 (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. As soon as I started reading about this proposal I had an instant realization of the benefits North Byron Parklands would bring to our local economy but also to my family. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. P3062	Project Website Submission	25/10/2010	Online Submission from Millie Webster of School (support)

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids.

Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating

growth in the area. This proposal needs to be approved.

North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities.

P3063	Project Website Submission	25/10/2010	Online Submission from Tessa Campbell ()

The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunities and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.

North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the

Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

Splendour In The Grass is a well organised, sustainable, quality event and North Byron Parklands is the perfect location!

P3064	Project Website Submission	25/10/2010	Online Submission from Caroline Boyd of Norton Rose (support)	Byron Bay is famed for its open mindedness, beauty, environmental awareness and creativity. Splendour in the Grass is the epitome of all of these characteristics and even more. It is a world class festival and deserves this world class destination. Byron and Splendour are a perfect match. If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime. The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment. With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. Caroline Boyd,

Norton Rose (Climate Change Division).

Fantacular (other)

Hi,

Splendour needs a home and this is probably it. Unfortunately the bastard organisers love charging admission/camping prices that make gigantic festivals in Europe that are much better in every way look damn cheap. Should you approve their application? Probably, but with tickets costing around \$500 it doesn't seem like people will have much money left over to spend in your town, and only the richest of the rich byron shire folk will be able to afford to go. So why should you bother?? I am not really sure.

Decide what you want, don't let this flood of submissions they are sending influence you.

Warm regards,

Dan

P3066	Project Website Submission	25/10/2010	Online Submission from Drew Mansfield (support)	North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. Byron Bay needs a home for events such as Splendour In The Grass. Major events such as this enrich the community not only with the tourism dollar but also through cultural association. Name: Drew Mansfield Address: 247 Maitland RdMayfield NSW 2304 IP Address: dsl-202-173-184-128.nsw.westnet.com.au - 202.173.184.128 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3067	Project Website Submission	25/10/2010	Online Submission from Kate Lyle (support)	The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â" young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P3069	Project Website Submission	25/10/2010	Online Submission from Rose Glasser of University of Queensland (support)	North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all don't move to cities.

With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The

archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

P3070	Project Website Submission	25/10/2010	Online Submission from Luke Bayly (support)	If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments. North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

P3072	Project Website Submission	25/10/2010	Online Submission from Simone Oliver-Smith of Student (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Name: Simone Oliver-Smith Organisation: Student Address: 45 Forsythe St, Glebe NSW IP Address: - 115.186.228.9 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3073	Project Website Submission	25/10/2010	Online Submission from Aletha McHalick of NW Magazine (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

Online Submission from Laura
Naismith (support)

To whom it may concern,

In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue.

I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved.

Faithfully,

Laura Naismith

P3075 Project
Website
Submission 25/10/2010 Online Submission from Lauren
Miller (support)

One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive.

How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

I have personally attended music festivals in Byron Bay for the last 8 years now, and I believe that from my experiences of staying in the Byron Bay Shire the majority of local residents are very supportive of festival tourism and the boost that it brings to local businesses. It would be a true shame if the community sense and element of festivals was taken away from the Byron Bay Shire.

Thank you for considering my submission.

Yours sincerely,

Lauren Miller

P3076	Project Website Submission	25/10/2010	Online Submission from Adam Brown of Department of Health and Ageing (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficulty. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approval projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. P3077	Project Website Submission	25/10/2010	Online Submission from Carol Slater of Carol Slater Photography (support)	The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. Name: Carol Slater Organisation: Carol Slater Photography

P3078	Project Website Submission	25/10/2010	Online Submission from Sally Blyth (support)	Why wouldn't we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal. The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. P3080	Project Website Submission	25/10/2010	Online Submission from Jackie Drennen (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Too many people are forced to look outside Byron for employment opportunities. The North Byron Parklands proposal offers ample opportunities and will surely make the locals very happy. Splendour will bring enormous amounts of income to the town of Byron Bay and it's occupants and businesses. Name: Jackie Drennen Address: 27 Matthews Street Toowoomba Q 4350 IP Address: 220-244-247-215.tpgi.com.au - 220.244.247.215

P3081	Project Website Submission	25/10/2010	Online Submission from Thomas Nash (support)	Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available. The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat

and consolidation of fragmented forest blocks. These are very positive outcomes.

P3082	Project Website Submission	25/10/2010	Online Submission from Louis Island (support)

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the "coast to hinterland"™ wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise "downtime"™ will allow the Parklands site to assist the functioning of the adjoining Nature Reserve.

With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise "on-ground" what the currently inaccurate council map purports is in existence. The end result will be a greatly improved

corridor that actually has some functioning capabilities.

P3083	Project Website Submission	25/10/2010	Online Submission from Yael Reed of moshtix (support)	What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Name: Yael Reed Organisation: moshtix Address: Level 23, 175 Liverpool Street, Sydney NSW 2000 IP Address: - 165.69.2.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3084	Project Website Submission	25/10/2010	Online Submission from Stephanie Liew (support)	At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended. The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region.

As a youth of the area I am constantly searching for ways to broaden my horizons. I believe this proposal will offer new opportunities, new jobs, new experiences and new ways to develop.

One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives.

P3085	Project Website Submission	25/10/2010	Online Submission from Glenis Virtue (object)	I strongly oppose the Cultural Events Site Project Application on Tweed Valley Way and Jones Road, Yelgun on the following grounds: 1. Noise generated from these events is in direct line to our home, events site at Yelgun will have no buffer between it and homes at Ocean Shores and sound seems to travel further at night. 2. At present we have converted buses with persons avoiding camp fees living on our Ocean Shores streets, the events planned for this site will bring larger amounts of illegal campers & litter & vandalism. 3. Our access to the freeway & local roads will be in chaos, no trucks or travelers will be able to use the Yelgun Rest Area as it will be full of events campers. 4. Most residents in the area are young families or retirees looking for a peaceful life, most or all of the large events patrons will be young under 25's party goes looking for a good time which might be found at Byron Bay not the quiet Yelgun/Ocean Shores valley or the sleepy villages of Pottsville & Brunswick Heads. 5. Tyagarah already has an approved events centre, is close to Byron Bay, Byron Shire is only a small shire & I do not think we need to have another large events site. 6. I am a descendent of the first pioneers to the Yelgun area & the Marshall family which were the original owners of the events site, have seen many large floods & bush fires at the proposed events area & camp site, this will divert our emergency resources at these times. 7. As a lifetime local to the area it is known to me there is a significant amount of Aboriginal relics & artifacts in the Jones Road area told to me back in the 1960's by Mr. Dan Simpkins former farmer/owner of part of the event site, are these historic items to be destroyed or removed?

8. The size & scale of this proposal is not appropriate for our wildlife or humans in this peaceful valley.

P3086	Project Website Submission	25/10/2010	Online Submission from Penny Valentine (object)

I am writing to inform you that I am 100% opposed to this proposal

I have lived in North Ocean Shores for 18 years. I came to this area for a peaceful lifestyle and if this mega festival site goes ahead I feel, that firstly the quality and the peace and quiet of my life will be severely disrupted.

I am disturbed and very concerned about the massive size of this development.

This is precious, necessary and important wildlife corridor. I understand there are at least 26 threatened species. This is well known to be high quality habitat for koalas. These animals require our protection.

I am very concerned about raising the flood level in north ocean shores as the last big flood,

the flood waters came to 2 cm below my back door.

The thumping noise from the festival will be horrific and incredibly disturbing. The continual noise of trucks moving music equipment, food, sewerage will destroy the quality of my life.

It is devastating to imagine that up to 4 times each year this huge number of up to 50,000 visitors cars & buses will invade our community and create total havoc, with continual traffic jams on the highway. Also the potential illegal parking and camping, littering and general unruly behaviour is something that will be distressing to this area.

So for these reasons I TOTALLY OPPOSE the proposal for this mega festival site at Yelgun.

The splendour festival was held at woodford festival site in Queensland this year. This woodford site is TOTALLY welcoming this festival and is all set up and running in a safe and professional manner. It makes perfect sense to have these mega festivals there, where they are wanted and welcomed.

This mega festival site is NOT WELCOME in our very small Byron Bay community.

We need and are looking for your support to protect us from the detrimental effects a mega festival site would have on our precious community, wildlife & lifestyle.

Please help our community

Yours sincerely

Penny Valentine

Submission 25/10/2010 Online Submission from Liane
Simons of Transition Byron Shire
(object)

Dear Sir/Madam

I object to the North Byron Parklands on the following grounds:

1.The intrusion of 50,000 people - almost twice the population of the entire shire. 2. Up to 8 mega and large festivals and unlimited smaller festivals and doof parties. 3. Traffic backups
4. Nationally significant Billinudgel Nature Reserve under threat. And also because this development does is not in line with the State Govts own planning decisions to protect this unique site

sincerely, Liane Simons

P3093	Project Website Submission	25/10/2010	Online Submission from Jessica Gao (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love.

The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

P3094	Project Website Submission	25/10/2010	Online Submission from Stephanie Alexander (support)	There is a reason why the government agencies including the National Parks and Wildlife services didn't object to this application, it really is in the best interest of everyone. North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. Name: Stephanie Alexander Address: 3 Spencer St, Cowandilla 5033 IP Address: cpe-58-160-139-90.wqzd1.fli.bigpond.net.au - 58.160.139.90 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3095	Project Website Submission	25/10/2010	Online Submission from Jordan Myers of Diageo (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised. Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring. Name: Jordan Myers Organisation: Diageo Address: 37/1 Goodwin Street, Kangaroo Point 4169 IP Address: host238.44.193.203.in-addr.arpa - 203.193.44.238 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3096	Project Website Submission	25/10/2010	Online Submission (object)	I live on my partner's farm approximately 2km as the crow flies from the proposed site. I have taken a guided tour of the site and I strongly object to approval being granted for any Cultural Events (as in the submission) for several reasons. In no particular order my objections are: 1. Noise - I believe the level of 'carry' from any music or organised events would be intrusive even at the distance of 2 kilometres. I understand that the plan is to project the noise northwards (ie away from the nearest residential community of Ocean Shores)

however that points the noise directly at our farm. Often there are illegal 'doofs' held near the beach (2 or more kilometres away) and these are clearly heard by us and keep us awake at nights. The noise of amplified stage acts, announcements and crowd noise at festivals would make living where we do extremely unpleasant. The site owners have now upped their projected size of crowds at major events which will further exacerbate the noise problem.

2. Traffic congestion - the entrance to the festival site is off the Tweed Valley way, which is a local road relied on to gain access to and from the freeway, or further down to Brunswick Heads. Having been to Woodford Folk Festival, and having heard of this year's traffic jams at the Woodford site when Splendour in the Grass was held there, I imagine that the queues of cars trying to enter the festival site would cause huge tailbacks onto the north/south freeway (causing delays and danger) as well as blocking our local access. Additionally, I foresee that there would be problems with vehicles travelling from Queensland perhaps down the coast road and causing further traffic jams on the coast road, and Woooyung Road, which connects to the Tweed Valley Way. Additionally, I would expect that there would also be vehicles who get lost, or try and take shortcuts, who would try and find the way to the festival site via our Hulls Road, which is a No Through Road, and who would then try and force their way over paddocks or on private roads. Our farming livelihoods require the easy access over local roads of machinery (cane harvestors and haulout units, tractors) and vehicles (sugarmill trucks transporting cane, diesel delivery, cattle trucks, motor bikes etc) which could be seriously impeded by the traffic jams associated with events. During the sugarcane harvesting season (July-December) the harvesting vehicles in our area need to be able to move between our valley and Mullumbimby, by travelling along the Tweed Valley Way. Who will bear the cost of the extra time involved in traffic delays caused by festivals (harvesting can't be planned to 'avoid' certain days - they harvest when the weather is right and as the sugar mill needs the cane)?

3. Nuisance of illegal camping - our valley (which neighbours the site) is full of working farms and I can imagine that there will be people who try and camp illegally on farms, causing damage to crops, fences, or disturbing cattle and/or causing environmental damage.

4. I can see no financial benefit to our local area whatsoever to have the event held at Yelgun. The site owners intend to control all the accommodation and food sales. Very few attendees of events will be accommodated in towns within Byron Shire, or even in the Tweed Shire in which we live. It is ridiculous to imagine that our local villages of Mooball, Yelgun, Billinudgel or Crabbes Creek will see any increase in trade but will have to endure

the hassle of the traffic, noise and attendant problems many times per year if the venue gets approval.

5. Environmental degradation/flooding - many parts of the site go underwater during regular flood events - sometimes several times per year. Besides the environmental damage and concerns regarding animals/birds (more knowledgeable objections will come from others) the site will suffer continued degradation from traffic over often-flooded areas.

For personal reasons I do not wish my name and address to be made available to the Proponent, the authorities or on the Department's website.

P3099	Project Website Submission	25/10/2010	Online Submission from Clare Firth (support)	The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. Name: Clare Firth Address: 56 Harbison Cr Wannissa ACT IP Address: stratf2.lnk.telstra.net - 203.45.241.133 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3100	Project Website Submission	25/10/2010	Online Submission from Harley Evans of Moshtix (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisationâs like North Byron Parklands to provide much needed jobs. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisationâs like North Byron Parklands to provide much needed jobs.

The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisations like North Byron Parklands to provide much needed jobs.

It is very exciting to see a proposal of this sort in the Byron Shire. North Byron Parklands will see a rise in employment opportunities for residents, a boost in sales in local businesses, and an influx of cultural events. This development will make the north coast a definite stop on the tourist map for years to come. Let's get behind it!

Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce.

P3101	Project Website Submission	25/10/2010	Online Submission from sally dlask (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible. The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. Name: sally dlask Address: 1/54 Rajah Rd, ocean shores 2483 NSW IP Address: wisp1-143.hayters.linknet.com.au - 202.162.111.143 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3102	Project Website Submission	25/10/2010	Online Submission from Renee Johnston (support)	North Byron Parklands has a strong focus on cultural management. This is shown by the proposed cultural centre aimed to provide learning opportunities for staff to build a greater understanding of our local indigenous and non-indigenous ancestry.

North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead.

When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve.

The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands.

P3103 Project
Website
Submission 25/10/2010 Online Submission from Damien
McDermid (support)

The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation.

I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved!

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

Submission 25/10/2010 Online Submission from Craig
Steele (support)

The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation.

In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force.

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

P3108	Project Website Submission	25/10/2010	Online Submission from Samantha Hudson (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment.

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

Name: Samantha Hudson

P3109	Project Website Submission	25/10/2010	Online Submission from Averil Robinson (support)	The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species. North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. Name: Averil Robinson Address: 3 Hottentot crescent Mullumbimby 2482 nsw IP Address: c-61-68-100-24.hay.connect.net.au - 61.68.100.24 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3110	Project Website Submission	25/10/2010	Online Submission from Rosie Connolly (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it.

The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. The Parklands is also highly accessible from Byron, therefore contributing to the tourism industry of Byron,

Locals have spoken out in support for Splendour at Parklands - so why not?

P3111	Project Website Submission	25/10/2010	Online Submission from Tom Berry of Frigid Air Pty Limited (support)	At 54 I'm a relatively senior person throwing my support behind the Parklands proposal. Being a Splendour attendee for numerous years I found the Woodford site enjoyable but noticed the huge drop in younger (25 and down) people at this year's concert. I attribute this not just to the cost of getting there and camping but also the extra time travelling which is a major consideration for high school students, uni students and young workers with precarious employment. Our area has a vast number of youth for which this event HAD become a must attend. Neither of my kids (18 Name: Tom Berry Organisation: Frigid Air Pty Limited Address: 62 Killarney Cresc Lennox Head IP Address: cpe-124-187-135-242.lns15.ken.bigpond.net.au - 124.187.135.242 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3112	Project Website Submission	25/10/2010	Online Submission from Sally Gunn (support)	In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in

the area.

With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devices, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing.

P3113	Project Website Submission	25/10/2010	Online Submission from sarah Thomas (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. P3116	Project Website Submission	25/10/2010	Online Submission from samantha tedman (support)	The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. Whatâ€™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Name: samantha tedman Address: 17 verna cl.Armidale NSW 2350 IP Address: 122-149-228-52.static.dsl.dodo.com.au - 122.149.228.52 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3117	Project Website Submission	25/10/2010	Online Submission from Rebecca Moss (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view.

Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

P3121	Project Website Submission	25/10/2010	Online Submission from Tom Ware of Groundwork ()	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all

of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering.

I attended Splendour in the Grass this year whilst studying in Australia at Queensland University of Technology in Brisbane as an exchange student from England. I studied a Planning Studies Degree and Masters and in my time at QUT have a good understanding of plann

P3122 Project
Website
Submission 25/10/2010 Online Submission from John
Patterson (support)

Hello,

Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

Thank you, and Let's bring Splendour back to where it belongs!

John Patterson.

P3124	Project Website Submission	24/10/2010	Online Submission from Shannan Robinson (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being Name: Shannan Robinson Address: Highland Park, QLD IP Address: cpe-60-228-184-15.lns6.woo.bigpond.net.au - 60.228.184.15 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3125	Project Website Submission	24/10/2010	Online Submission from Natasha Glazenburg of being awesome (support)	It would be a shame to see this proposal turned down, it doesnât take much to see that the North Byron Parklands proposal has so much to offer. It would be a shame to see this proposal turned down, it doesnât take much to see that the North Byron Parklands proposal has so much to offer. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

Please bring splendour home, it belongs in byron bay, it doesnt feel right to take it away from its home!

P3126	Project Website Submission	24/10/2010	Online Submission from Renee Hanson (support)

The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record

only comes about through effective, well planned event policies and procedures.

The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P3128	Project Website Submission	24/10/2010	Online Submission from Giovanni Campolo-Arcidiaco (support)	I support bringing the Splendour in the Grass festival back to a more accessible location. The organisers clearly know how to put and hold together this event. It would be short-sighted to not give to SITG a chance to thrive. This year line-up had some great overseas artist, which can only help Australian's reputation to pull together a great outdoor event. Keep up the good work. Kind Regards. Giovanni Name: Giovanni Campolo-Arcidiaco Address: Woolloomooloo - NSW IP Address: ppp121-44-43-225.lns20.syd6.internode.on.net - 121.44.43.225 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3129	Project Website Submission	24/10/2010	Online Submission from Malcolm McLennan of None (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. \$55,000 compared to NSW's average annual income of \$71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. P3132	Project Website Submission	24/10/2010	Online Submission from Michael Sylvester (support)

North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual.

Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

P3133	Project Website Submission	24/10/2010	Online Submission from Mel Schulz (support)	The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

Letâ€™s look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment.

The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

Name: Mel Schulz

P3134	Project Website Submission	24/10/2010	Online Submission from alana russell of flight centre (support)	The whole reason Splendour has been so popular is due to where its located. The surrounds of Byron Bay suit this festival to a tee so if you take it away it will just become "another festival". Our business's also struggled this winter with some even having to close down all because of taking one festival away.. and why was it taken away?Money!!! Well money ruins alot Name: alana russell Organisation: flight centre Address: 2/1 alison ave, lennox head 2478 IP Address: - 121.91.71.220 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3135	Project Website Submission	24/10/2010	Online Submission from Jamie Marshall of Multiple organisations (support)	Having personally worked and lived in the area nearly my whole life I believe that we may not see the complete damage for the loss of Splendour for many more years to come, the loss of jobs that now cannot be supported through out our quieter periods of autumn and winter. I myself now the effect of being told that there is no work for me for the next 4 months. Just the fact that Splendour was created in Byron Bay should be enough of a reason to bring it home but NO, the 'loud minority' with to much time and quite possibly in the wrong age bracket to fully enjoy what Splendour brings to our area. Please bring Splendour in the grass back home to BYRON BAY! Name: Jamie Marshall Organisation: Multiple organisations Address: 16 Dehnga Place, Suffolk Park 2481 IP Address: cpe-124-183-161-121.lns16.ken.bigpond.net.au - 124.183.161.121 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3136	Project Website Submission	24/10/2010	Online Submission from Phoebe Collibee (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning. Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy.

North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal.

P3137	Project Website Submission	24/10/2010	Online Submission from Matthew Cuthbertson of Solander Agencies Pty Ltd (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

The opportunity to showcase the stunning nature in the Byron region through a sustainable

event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ€™s show the way Australia. Bring Splendour home!

Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P3138	Project Website Submission	24/10/2010	Online Submission from Damon Escott of Head Pictures (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region's creative industries, providing world class training and work experience opportunities. Name: Damon Escott Organisation: Head Pictures Address: 38 Elliott Street, Clayfield 4011 IP Address: 60-242-250-70.static.tpgi.com.au - 60.242.250.70 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3139	Project Website Submission	24/10/2010	Online Submission from Nick Leonardos (support)	In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. Just put it there, you know the benefits outway the costs! :) Name: Nick Leonardos Address: 68 Little Lane, Lane Cove, NSW, Australia 2066 IP Address: - 120.156.101.202 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3140	Project Website Submission	24/10/2010	Online Submission from Krystle Guy (support)	On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives.

North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management.

I have been to Splendour at Byron Bay for the past 4 years and have never had a problem with the site.

I recently went to the Splendour this year held at Woodfordia, Woodford and did not think that it was up to the standards of Byron. It took hours just to enter the site and when inside none of the people working there knew anything about the site. It took 2hours to find the campsite that my friends were at because none of the workers could point me in the right direction.

When inside the festival, there was not enough room for the amount of people in the festival site. When a set would finish at the main stage, because of the large amount of people leaving for another tent it became hard to move around and dangerous. Not to mention that not all people wanting to see an act at the main stage were locked out because there was not enough space to hold them, this has never happened at the Byron Site.

I think bringing Splendour in the grass back to the Byron Shire is a great idea as basically everyone knows where Byron Bay is because of the great tourism they get there and it is easy to get to. As well that it will boost the Byron Shire in economy.

Splendour in the grass is in need of a bigger site as there is a huge want and need fo

P3141	Project Website Submission	24/10/2010	Online Submission from Rose Taylor-Tornow (support)

This is a wonderful opportunity for a brilliant, well organised festival, to be a part if the Byron Shire community and to not support it would be a long term mistake. Please consider the positive outcomes and opportunities that have and will continue to arise from this festival and the brilliant colour and life of the area.

North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences.

The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to.

P3143	Project Website Submission	24/10/2010	Online Submission from Adam Marsden of Dakota Media (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy.

P3144	Project Website Submission	24/10/2010	Online Submission from Brenton Jones of NA (support)	Splendour in the Grass is a cultural must for the youth of today. We often over look what this means socially to the youth of now. Our parents were giving opportunites like this and i hate to see a few people stand in the way of our opportunity to create memories for ourselves. The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

P3145	Project Website Submission	24/10/2010	Online Submission from Liz Freeland (support)

To whom it may concern,

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring.

Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about

identifying and managing ecological issues.

Regards,

Liz Freeland

P3146	Project Website Submission	24/10/2010	Online Submission from Edwina James of none (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world's best environmental practice.

A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands!

P3151	Project Website Submission	24/10/2010	Online Submission from Tanya Ali of St George Girls High School (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community.

P3152	Project Website Submission	24/10/2010	Online Submission from Nathan Flanagan (support)	I have grown up around the Byron and Tweed Shires and have been to 5 Splendours and a 3 Blues and Roots. These festivals help make the region what it is! I am currently living in Canada and Byron is well known over here and a large part of this is due to Canadians travelling oz for a year and hearing about this amazing festival, Splendour.....It would be criminal to take it away! I think the old "move next to an airport or race track and try and have it shut down cause its to noisy" syndrome has a similar tone to the vocal group members.....You can't move somewhere and try and change it! Splendour is not Splendour without the Bron Shire.....

Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

Splendour in Byron for life!

P3153	Project Website Submission	24/10/2010	Online Submission from vanessa thompson (object)

I object to this submission on the basis that the 50'000 festival goers will not have sufficient facilities in our local area. Byron already has one permanent site at Tyagarah, we do not need another one. I don't want the expected traffic in our small local area, I prefer Brunswick to attract the family tourists, we already have Byron as a party town, we don't need it in Brunswick and Ocean shores as well.

P3154	Project Website Submission	24/10/2010	Online Submission from Sophie Kemp (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. Name: Sophie Kemp Address: 12 Dorsal Drive, Birkdale IP Address: cpe-58-173-169-50.sicz2.woo.bigpond.net.au - 58.173.169.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3155	Project Website Submission	24/10/2010	Online Submission from troy miller of resident (support)	Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome. While much is made about the supposed wildlife corridor in and around the North Byron

Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue.

P3156	Project Website Submission	24/10/2010	Online Submission from Lauren Macready (support)	BRING SPLENDOUR HOME!! North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations. Name: Lauren Macready Address: 127 Georges River Crescent Oyster Bay NSW 2225 IP Address: syd-adsl2-39.idx.com.au - 210.56.71.39 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3157	Project Website Submission	24/10/2010	Online Submission from Matt Bell of N/A (support)	The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Byron Bay is known for its culture and events. Donâ€™t deprive the town of such a tremendous opportunity. Business will thrive, local tourism will benefit and accommodation facilities will be bulging. Sounds ideal! Splendour means BYRON. Period. P3158	Project Website Submission	24/10/2010	Online Submission from Stephanie Foster (support)	I was really disappointed when I discovered that Splendour in the Grass would not be held in Byron Bay this year as I could not afford to travel up to Queensland. I feel that the location in Byron Bay is more central on the coast and therefore more people are able to travel to and enjoy the festival. Splendour is an amazing event for live music in Australia and deserves a permanent home in such a beautiful location. We draw acts from all over the world so we should bring them to a location which shows off what Australia has to offer! This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map. P3159 Project
 Website
 Submission

24/10/2010 Online Submission from Charlie
 Driver (support)

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

P3160	Project Website Submission	24/10/2010	Online Submission from Katy Wood (support)

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative.

P3163	Project Website Submission	24/10/2010	Online Submission from Sammy Brown (support)	The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site.

Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

P3165	Project Website Submission	24/10/2010	Online Submission from Cherie Casey (support)	Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. Submission

24/10/2010 Online Submission from Kate
Nancarrow (support)

Hello there,

I have been to Splendour in the Grass for the last 2 years and it is a well run festival and you can tell the operators care about the land the festival is on. In Byron 2008 they provided portable ashtrays for smokers, encouraged recycling by offering a buy back system when you take cans for recycling, this helped with a massive clean up as well.

In regards to jobs, if you have an influx of 10,000 people jobs are going to be created!

I know that we stay an extra day after the festival, lazing at the beautiful beach, eating at the many fine food places Byron has to offer.

Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate.

North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

I would really like to see Splendour come back to Byron Bay. When you think about it the festival will go ahead, do you want the tourism dollars to stay local or would you prefer it to go somewhere else?

And its only for 3 days. for those who dont like the music festival could use it as an excuse to have a 3 day holiday!!

P3167	Project Website Submission	24/10/2010	Online Submission from Lewis Hladik (support)

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

P3168	Project Website Submission	24/10/2010	Online Submission from Ella Kinowski of Student (support)

It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers

region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

P3169	Project Website Submission	24/10/2010	Online Submission from Beverly Sweeney (object)	This is totally the wrong site for festivals of this kind, being next to Billinudgel Nature Reserve. I fear that some festival goers in party mood will spill over into this area especially as it is on the way to the beach. Any lighting of fires would be disastrous. How can the state justify this when it contravenes its own planning decisions to protect this area? Amongst other things traffic created massive problems in Byron Bay. The planned channeling of traffic into Brunswick Valley Way to the proposed site will create access problems for those of us who live in this northern part of the Shire. In heavy rain the site has been completely flooded. This will create chaos for festival goers and the neighborhood as people try to get out of the site.

Are there going to be people keeping an eye on festival goers who may be under the influence and tempted to swim in the ocean?

I have no problem with music festivals as such although I don't relish the thought of being kept awake. But the thought of four mega festivals here plus 4 more with 10,000 participants, each year is too much. Like many others we moved to this area because of the peaceful and harmonious lifestyle. The area of North Ocean Shores is growing in population. The majority of people are retired or with young families.

This proposal is benefiting the few at the expense of the community and the environment.

P3171	Project Website Submission	24/10/2010	Online Submission from Rachael Hubble (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that

generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

As a youth of the area I am constantly searching for ways to broaden my horizons. I believe this proposal will offer new opportunities, new jobs, new experiences and new ways to develop.

P3172	Project Website Submission	24/10/2010	Online Submission from Matt Cash of Mantra Group (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses. Bring Splendour Back to Byron! Name: Matt Cash Organisation: Mantra Group Address: 11/5 Summerlea Grove Hawthorn, VIC IP Address: - 115.128.6.195 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3173	Project Website Submission	24/10/2010	Online Submission from Andrew Rothery (support)	Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner.

While much is made of the Marshallâ€™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

Thereâ€™s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others.

Website
Submission 24/10/2010 Online Submission from Emma
Waters (object)

I am writing to object to the above proposal for a permanent festival site at Yelgun. Byron already has a permanent site at Tyagarah -we do not need another one. The effects of having this site will be widespread - partying, traffic, noise, plus threats to local wildlife (I thought the state government had decided to protect this site??) I have seen how trashed Byron bay gets during festivals when I lived there and moved further north to get away from this kind of atmosphere. Residents of these areas live here because it is quiet and away from crowds. Brunswick heads would become a party town and holiday rentals to festival goers will disturb local residents. We just want peace and quiet - please leave us and our land alone.

P3176	Project Website Submission	24/10/2010	Online Submission from Anika Montgomery (support)	I will preface this by saying that I have attended Splendour in the Grass numerous times in its Byron Bay location. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. KEEP THE PROFITS IN NSW, GUYS!!!!!!!!!!!!!!! Name: Anika Montgomery Address: 34 Margaret St Newtown NSW 2042 IP Address: 115-64-47-44.static.tpgi.com.au - 115.64.47.44 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3177	Project Website Submission	24/10/2010	Online Submission from Olley Nathan (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available. Name: Olley Nathan Address: Po Box 6311, South Lismore, 2480 IP Address: cpe-121-217-137-214.inse2.cht.bigpond.net.au - 121.217.137.214 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3178	Project Website Submission	24/10/2010	Online Submission from Dean Hall of University (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. In relation to event management there is no standard manual that an event operator can

refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site.

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble.

P3181	Project Website Submission	24/10/2010	Online Submission from Laura Swinstead (support)	The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. Events are really important for young people today. Coming together is not just about getting drunk and partying. Itâ€™s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

P3182	Project Website Submission	24/10/2010	Online Submission from Hallie Barratt (support)

BRING SPLENDOUR BACK!!

Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing.

As someone who has attended the festival every year that I have been in the area, I know how Splendour is received by the locals. The humble little festival that began back in 1999 (when tickets were \$45!!) has come a very long way for a very good reason! Many of my friends who were in the position (financially) made the trek to Woodford for the last Splendour and said they wouldnt do it again....BRING SPLENDOUR BACK TO ITS ROOTS!!!

P3183	Project Website Submission	24/10/2010	Online Submission from Caitlyn Fisher (support)

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

P3184	Project Website Submission	24/10/2010	Online Submission from Dave Chenery (support)	North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. Festivals around the world act as tourist attractions, it puts not just the town but the surrounding region on the tourist map. Festivals shouldnt be limited to capital cities. it adds an important element to the fabric of society and culture. Dont let this be lost to another state. The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan

to plant a significant number of native trees to achieve this.

Parklife, Field Day, Good Vibrations in Sydney all utilise botanical garden grounds for these festivals. Privately owned parkland can be a valuable contribution to greenbelts.

P3185	Project Website Submission	24/10/2010	Online Submission from Jessica Eaton (support)	With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. BRING SPLENDOUR HOME! Name: Jessica Eaton Address: 9 Gibla Street Mandurah IP Address: ppp121-45-240-78.ins20.per2.internode.on.net - 121.45.240.78 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3186	Project Website Submission	23/10/2010	Online Submission from Gina Jones (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North

Coast of NSW needs a development of this nature and it should be approved by the NSW government.

I have attended this event several times when it was situated in Byron Bay. I found the locals to be very welcoming, transport very efficient and the variety of accomadation fantastic. I did not attend this event while up in Queensland due to there was only one major accomadation with transport difficult and long. Please approve this proposal as the event will be missed greatly at the original setting.

P3187	Project Website Submission	23/10/2010	Online Submission from Tanya Hogg (support)	This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities. Name: Tanya Hogg Address: 54 Cowells Lane, Ermington. NSW. 2115 IP Address: cpe-58-168-8-143.lns3.clt.bigpond.net.au - 58.168.8.143 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3188	Project Website Submission	23/10/2010	Online Submission from Angela Norton (support)	This is a fantastic proposal. It will have less impact compared with past Splendours in Byron as it has 3 times the space of Woodford and the past Byron facilities. Also largely an improvement because this site has room for camping it will take the stress of the Byron Town traffic it-self (though the business will still receive much income from the visitors this festival attracts) I have no hesitation in recommending this and it would be a great disappointment not to have this proposal approved nor the festival continue in this gorgeous part of the world! The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a "sustainable" site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application. The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble. Name: Angela Norton Address: 1/37 Lindon St, Dutton Park, QLD 4102 IP Address: 60-241-215-224.static.tpgi.com.au - 60.241.215.224

P3189	Project Website Submission	23/10/2010	Online Submission from Caitlyn Fuller of - (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. If there were more opportunities for new and interesting jobs in Byron Bay, I believe there would be less of my friends moving away from the area.

P3190 Project
 Website
 Submission 23/10/2010 Online Submission (support)

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. It's exactly what we as a community need.

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. These opportunities offered to the young community are truly invaluable to our region.

I do not want my name to be made available to the Proponent, the authorities, or on the Department's website

P3191	Project Website Submission	23/10/2010	Online Submission from Mark Walters (support)

Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

P3192	Project Website Submission	23/10/2010	Online Submission from Carmela Salom (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the "sustainable" development basket. The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately \$55,000 compared with \$71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. My son is very keen to apply to North Byron Parklands for work. I would much rather have him work on this project here than lose him to the city. Please approve this proposal, it's important for our young people and our community. Name: Carmela Salom Address: 3 Wabba St, Marayong, NSW 2148 IP Address: d220-239-137-183.bla801.nsw.optusnet.com.au - 220.239.137.183 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P3193 Project
Website
Submission 23/10/2010 Online Submission (object)

****please do not include my name in this submission**** i object on grounds that this is/near a wildlife and nature reserve; the 10s of thousands of visitors will not respect this fact and festivals these days cater for all needs, so they will not inject money into the community. the roads around this area are bad enough in terms of potholes and traffic, let alone having all the additional traffic for each event and the additional wear and tear - who will pay for this? the ratepayers - great, we are already stretched. the area for the festival parking floods. and we don't want 8 mega and large festivals and unlimited smaller festivals and doofs in our shire - that could mean a festival each month of the year. please do not pass this application.

P3194 Project
Website
Submission 23/10/2010 Online Submission from Michael
Geraghty (support)

Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

P3195	Project Website Submission	23/10/2010	Online Submission from Kellie de Haas (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue.

I would definitely apply for a job at the North Byron Parklands and know that it will lay my employment path out. This is the opportunity that I have always hoped Byron Bay would offer.

While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.

Thereâ€™s not as much employment opportunities as people think around Byron Bay, the

majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others.

P3196	Project Website Submission	23/10/2010	Online Submission from Alessia Willmott of Life Without Barriers (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area.

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.

I trust you will take the time to consider my submission.

Warm regards,

Alessia Willmott.

Website
Submission 23/10/2010 Online Submission from Robert
Freeestone of Self (object)

I strongly object to this proposal on the grounds that this huge influx of partygoers will severely impact the adjacent areas by way of noise, severe disruption of local transport, illegal holiday lets, disturbance to native flora and fauna in Billinudgel Nature Reserve. This proposal will double the population of the whole of Byron Shire which cannot maintain roads and infrastructure as is.

Byron Shire already has one permanent festival site and does not need another.

P3198 Project
Website
Submission 23/10/2010 Online Submission from Lisa
McCosker (support)

The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands.

Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

And Splendour in the Grass pretty much is the most amazing three days of each and every year. To establish a home for the festival- and the possibility of having many more cultural events- would be the icing on a very very tasty cake!

P3199 Project
Website
Submission 23/10/2010 Online Submission from Karina
Leys (support)

The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a "sustainable" site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

The establishment of the North Byron Parklands will be great for Byron Bay - increasing employment opportunities for management and maintenance of the event and venue, but also creating another draw card to get people into the area. People will surely fall in love with such a beautiful spot and come back as tourists throughout the year. I think this is a really important benefit for this region.

The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. We should welcome people to our place and share our sustainable values and environmentally considerate living with them - people can learn through events like Splendour in the Grass!

If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community.

P3200	Project Website Submission	23/10/2010	Online Submission from James Scannell (support)

Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward.

Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area.

Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

P3201	Project Website Submission	23/10/2010	Online Submission from Brooke McCallum (support)

North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region's creative industries, providing world class training and work experience opportunities.

Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy.

The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view.

P3204	Project Website Submission	23/10/2010	Online Submission from Rachael Waugh (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a "resource centre"™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience.

P3205	Project Website Submission	23/10/2010	Online Submission from Brady Clarke (support)

Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal.

Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

I find great delight knowing that competent Event Managers will be involved with all the events held at North Byron Parklands, ensuring that we have a lot of great experiences if this proposal goes through.

I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

P3206	Project Website Submission	23/10/2010	Online Submission from Nikita Oakden (support)

North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

A lot of my friends are moving outside of Byron Bay to bigger and better opportunities. It would be great if we had those opportunities offered to us closer to home.

P3207	Project Website Submission	23/10/2010	Online Submission from Blaine Thomas Watson of NINELIVES GALLERY (support)

Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer.

The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger.

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

The real question is why would North Byron Parklands proposal not be approved? I can only

see positives to such a development.

P3208	Project Website Submission	23/10/2010	Online Submission from nash core (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community.

P3209	Project Website Submission	23/10/2010	Online Submission from Richard Seaglove of Glynt Productions (support)

North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual.

Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring.

While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction,

the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

Wilson (support)

With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

Submission 23/10/2010 Online Submission from Nicole
Woods (support)

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

The North Byron Parklands idea is inspiring for young people. There is precious little around, particularly in regional areas, which is inspiring for them. The proposal is all about the environment, events, culture and celebration. It's about young people and being young. This is really important.

P3212	Project Website Submission	23/10/2010	Online Submission from alice floyd (support)	In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficult. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approve projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. P3213 Project
Website
Submission 23/10/2010 Online Submission from Kelly
Greenhalgh (support)

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region.

In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coast's existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas.

The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.

As a resident of South Golden Beach for the entirety of my life, a true local of the Byron Shire, my family and I consider Splendour In The Grass in the Byron shire one of the highlights of our year. One of the most exciting events of the year by far.

To me, and my family and friends, the reasons to BRING SPLENDOUR HOME are a lot more worthy than the reasons to keep it away.

I will conclude with BRING SPLENDOUR HOME!!!!

Website
Submission 23/10/2010 Online Submission from Andrew
Lovett (support)

The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts.

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

P3216	Project Website Submission	23/10/2010	Online Submission from chris degenhardt of Caldera Environment Centre (object)	We already have one permanent festival site at Tyagarah, and that is enough. Fauna in our precious Billinudgel Nature Reserve will be under intolerable noise and lighting assault causing disruption of mating and predatory defense senses for vulnerable species. Increased bushfire risk will be a problem with up 50,000 young and intoxicated people partying on the edge of the reserve. The risk of fire is too great. Traffic at the Splendour Festival held at Woodford was banked up for over 6km. That will close down Tweed Valley Way all the way back to Brunswick Heads. Slowing down traffic in this way will reflect very badly on the planning commission. People who live in this area know there is a high risk of flooding in parking and camping areas. Brunswick Heads will be transformed into a permanent party town being the closest pub/beach locality to the site. Is this what the locals who moved their for peace and quiet, want? Have you asked them? Up to 4 mega festivals per year with crowds projected to rise up to 50,000 or more for each festival plus another 4 festivals of up to 10,000 per day and another unlimited number of smaller events and doof parties will more than double the entire population of Byron Shire several times per year taxing amenities, services, beaches and other public places. Is the

infrastructure being put into place to cater for this invasion. Who has to foot the bill?

* A huge increase in the worst type of holiday letting with all night partying coming to a house near you.

P3217	Project Website Submission	23/10/2010	Online Submission from Katie Wade ()	Splendour in the grass is an iconic music festival that belongs in Byron Bay. I attended the first ever festival and have continued to go each year. The festival brings in money to local businesses and attracts vibrant people from all around world. The byron shire is splendour's home and is part of it's identify. The new Parklands site is much larger and is removed away from the inner CBD. I cannot see any reason why locals would have a problem with the festival at it's new site.

While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low.

If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands.

Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

In recent times visitor day trips to the northern rivers has been declining. Coupled with a downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of

P3218	Project Website Submission	23/10/2010	Online Submission from Sheridan Knell (support)

My name is Sheridan and I am 100% behind bringing Splendour in the Grass home to the Byron Shire where it belongs!!! I have worked in the tourism and hospitality industry for 7 years and see the economic benefits of events such as splendour. The Splendour in the Grass team are also very aware of the possible impact the event would have on the environment and do everything in their power to control and stop any negative impact!!! This festival is important to the tourism and local economy of Byron and surrounding areas.

If you were to analyse the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful and well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

I think that events like this help people grow, experience North Byron Parklands and all that our area has to offer. The North Byron Parklands proposal would definitely be a growing experience for me.

To finish off, I have attended the event for several years and thoroughly enjoy the festival - it is one of the best in the world! Don't take it away from us!

Good luck Splendour I support you - fingers crossed! Come home soon! :)

P3219	Project Website Submission	23/10/2010	Online Submission from Kate Haysom (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. Name: Kate Haysom Address: 49 College Cres PARKVILLE VIC 3052 IP Address: francis2.ormond.unimelb.edu.au.189.17.203.in-addr.arpa - 203.17.189.150 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3220	Project Website Submission	23/10/2010	Online Submission from Troy Reynolds (support)	Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application. With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses. Name: Troy Reynolds Address: 177 North Rocks RdNorth Rocks 2151NSW Australia IP Address: c122-106-162-8.carlnfd1.nsw.optusnet.com.au - 122.106.162.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3221	Project Website Submission	23/10/2010	Online Submission from Zac Halabe (support)	Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site.

Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government.

North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community.

P3226	Project Website Submission	23/10/2010	Online Submission from Hugh Rutledge (support)	Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site. North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. Name: Hugh Rutledge Address: 24a Westley Street, Ferntree Gully VIC IP Address: proxy02.mel.iprimus.net.au - 210.50.228.5 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3227	Project Website Submission	23/10/2010	Online Submission from Natasha Habjan (support)	It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parkland's environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the 'Splendid Initiative' offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. Name: Natasha Habjan Address: 294 Springvale Road Donvale 3111 IP Address: cpe-58-165-28-125.vic.bigpond.net.au - 58.165.28.125 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3228	Project Website Submission	23/10/2010	Online Submission from Ross Braund ()	I strongly object to the proposal by North Byron Parklands for the permanent festival site at Yelgun. The very reason the majority of people moved to this area and in particular the northern part of the shire was the peace, tranquility and beauty of the local area and this will be totally changed forever if this proposal is allowed to proceed. I am not against festival per se and enjoy going to the Blues Festival however, this sensitive site is totally inappropriate to sustain the volume and size of events being planned. The blues Festival is once a year, Parklands are proposed almost monthly events. I travel on Tweed Valley Way almost daily, mainly for the beautiful scenery and lack of traffic, rather than using the Pacific Highway and for a large part of the year this area is effectively being shut down and inconvenencing a large section of the community. The fragility of this site is totally unacceptable for the scale of development proposed. Name: Ross Braund Address: 32 River Street, New Brighton NSW 2483 IP Address: c-61-68-28-40.hay.connect.net.au - 61.68.28.40 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3229	Project Website Submission	23/10/2010	Online Submission from Ann Morgan of private ()	As a close resident to the proposed North Byron Parklands site I object strongly to their application to establish an event site at Yelgun. My reasons are as follows: The huge amount of party people in our neighbourhood at the time of events - our shire cannot support its 1 million or more visitors a year now - let alone adding more for loud party events. Usually these visitors do not want to contribute to our society as they only have one purpose in mind. Too many festivals and too many people are being requested in this application in a very unsuitable site. Byron already has Blues Festival site at Tyagarah. We do not need another - Splendor could be held at Tyagarah or Woodford with less environment damage and disruption to our shire. Billinudgel Nature Reserve will be under threat of noise, artificial lights and too many humans. Brunswick Valley Way traffic would be intolerable and no traffic movement from our homes. The site is a flood plain during periods of the year. Emergency services would be held up with traffic. Brunswick Heads the closest town could not sustain the amount of people.

As New Brighton resident we would have our suburb trashed by too many people - also North Ocean Shores, South Golden Beach and Mullumbimby.

To conclude, this site and this proposal are not wanted in this fragile area - people from all over Australia especially Queensland can party in their own area rather than Byron

P3230	Project Website Submission	23/10/2010	Online Submission from Luke Walford of Home owner (object)

I am a local home owner positioned in close proximity to this projects event site with 4 young children. My concerns surround turning the Ocean Shores and greater Brunswick area into a party haven and the environmental influences both social and natural that will have on my kids growing up and area in general. I choose South Golden Beach to live as it was relatively free of crime, pubs, abusive party goers, and the drug culture. I also do not wish here concerts invading my precious down time with my family, nor expose my family to the likelihood of drunken or drug affect drivers and party goers prowling around the neighbour and behaving destructively at all hours (as with Byron Bay). The risks this project poses on my family and the community at large are not acceptable and irresponsible and something our quite family friendly community should just not have to endure.

Byron Bay got rid of the Splendor & Blues Festival due to problems they created and reputation the town developed such as trash tourist town open for exploitation and

disrespect. So why move the problem to the Ocean Shores area.

Surely there are more effective ways to stimulate a regional economy than large scale, dirty concerts that adversely impact the community.

I implore you Director General not to allow North Byron Parklands submission to proceed due to the unnecessary adverse risks it places on my family and broader community at large.

Regards

Luke

P3233	Project Website Submission	23/10/2010	Online Submission from Leon McLean (support)	To whom it may concern, I am writing to you, as a born and bred Mullumbimby (Byron Shire) local, in support of the North Byron Parklands proposal. North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times.

Please don't let the vocal few ruin a great thing that the majority of Byron Shire residents want.

Regards

Leon McLean

P3234	Project Website Submission	23/10/2010	Online Submission from Callum Parker (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: Callum Parker Address: 22 Denman St Exeter 5019 IP Address: c-61-68-239-134.ade.connect.net.au - 61.68.239.134 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3235	Project Website Submission	23/10/2010	Online Submission from Nicole Coutts (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be

approving projects of this nature.

Being young it's important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available.

P3236	Project Website Submission	22/10/2010	Online Submission from Renee Moody (support)

While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low.

The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the "coast to hinterland" wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise "downtime" will allow the Parklands site to assist the functioning of the adjoining Nature Reserve.

As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble.

P3238	Project Website Submission	22/10/2010	Online Submission from Simon Kay of Analyst (support)	I have seen what has happened to the local Woodford environment and this has been in my opinion a very positive outcome for the local region's environment and economy. This type of festival oriented conservation I think will yeild considerable benefites. The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Name: Simon Kay Organisation: Analyst Address: 21 Guthrie St Paddington Qld 4064 IP Address: 60-241-215-224.static.tpgi.com.au - 60.241.215.224 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3239	Project Website Submission	22/10/2010	Online Submission from David Pedler (support)	As a seasoned festival goer who has attended festivals all over the world, one of the things that stands out about Splendour is both it's commitment to the environment and supporting the local community. It is a festival unique not just to Australia but also the world and is one which Byron Bay should be proud to have developed and rightfully hold as it's own. %0A%0AHaving been to Splendour and experienced first hand the influx of youth into the town, I can appreciate that many of the local residents would not be so keen on the festival returning as a huge amount of people do decend on the town. However, the old Belongil fields site left the majority of attendees staying in the town itself rather than on the actual campsite. Surely one of the key benefits then is that the new site will remove the majority of the 'undesired' impact on the town (i.e. cleaning up the town afterwards etc.) by having the entire population able to camp on site at a location further away from Byron. This is the

situation with the Falls festival in Lorne and Lorne certainly does not deal with the same level of intrusion of a mass population the way Byron previously did. %0A%0APlease support this submission for the new site, it is a truly special festival known for it's ongoing deisre to look after the environment and support the local community. Splendour should be held proudly in the Byron Shire, so please bring it home.

P3240	Project Website Submission	22/10/2010	Online Submission from SHANE FAGG of Recall (support)

I would like to say what an incredible experience Splendour in the Grass was. I have friends who have been going to each one and I have always wanted to go, but due to family commitments have only been able to attend one.

Wow! It has been the highlight of my year and I am still regular thinking of it. I can't begin to explain how amazing the event was - not just music but so much more. The atmosphere was phenomenal. Not one fight or similar incident in 3 days. Just happy, engaged people all wanting to have fun. Magnificent!

I think it would be fantastic for Splendour to have a home that they can grow and develop to suit their needs and provide this stunning experience for people for years to come.

The flow on effects to the local area I'm sure would be significant and the responsible way they run the entire event could leave you confident in the outcomes and benefits that the community would receive.

Please support this submission.

P3241	Project Website Submission	22/10/2010	Online Submission from Marzanne Gouws (support)	If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region. Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ€™s important to have these opportunities for young people in the region. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures.

Bring Splendour Home, not just for the positive influence it has on local employment opportunities and the preservation of valuable land, but bring it home for it's ability to establish a collective conscience of harmony, peace and celebration among diverse groups, peoples and music lovers all over the nation.

P3242	Project Website Submission	22/10/2010	Online Submission from David Lewis of ABC (support)

While much is made of the Marshallâ€™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities.

Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna

across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities.

P3243	Project Website Submission	22/10/2010	Online Submission from Hannah Black (support)

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort

on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.

i went to Splendour this year in Woodford and it was spectacular, we stopped in to Byron on our way home and got talking to a lot of locals and staff around the town. Bring Splendour back to its rightful township and give the people of Byron the business they deserve!

P3244	Project Website Submission	22/10/2010	Online Submission from Raven Hodgson (support)	North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. \$55,000 compared to NSWâ€™s average annual income of \$71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need.

i just really love the vibe Byron brings to splendour aswell!

P3247	Project Website Submission	22/10/2010	Online Submission from kate esslemont (support)	Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome. In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet. The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. Name: kate esslemont Address: 17 derby street, townsville QLD IP Address: cpe-124-186-134-87.lns10.woo.bigpond.net.au - 124.186.134.87 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3248	Project Website Submission	22/10/2010	Online Submission from Marina Cid (support)	There is no place like home and Byron Bay, Belongil Fields is the home of Splendour, culturally and historically. This festival and the line-up it continually achieves places it as one of the sort after events around the world. The exposure is great for its location and it has also assisted in aiding the reputation of Australia as being a strong breeding ground for live music.

Moving Splendour is like shutting down Graceland.

The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

I have been going to Splendour since 2001. This year's event in QLD lacked the facilities of a great venue with housing, cafes and shops close by.

Spendour is a great Australian event. Please treat it with the respect and love it has grown to love and foster the arts in the place that made it great.

There's no place like home.

P3249	Project Website Submission	22/10/2010	Online Submission from Kelly Rowan (support)

North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved.

I love Byron venues!!!!

P3250	Project Website Submission	22/10/2010	Online Submission from Isaac Harding of THIS YOUTHS CULTURE (support)	Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

P3251	Project Website Submission	22/10/2010	Online Submission from Michael Kapr (support)	The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species. Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. Name: Michael Kapr Address: 12 Hillslope Rd, Newport Beach, NSW 2106 IP Address: r220-101-141-244.cpe.unwired.net.au - 220.101.141.244 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3252	Project Website Submission	22/10/2010	Online Submission from Thomas Grant of student (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. Many people worry about financially providing for themselves and their families and rightly

so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring.

The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great way of retaining our young professionals and aspiring professionals.

P3253	Project Website Submission	22/10/2010	Online Submission from Calum Phillips of student (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ€™ economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is approved by local government.

P3254	Project Website Submission	22/10/2010	Online Submission from Nathan Wheatley of Skoap Media (support)

Please consider the application for the relocation of Splendour in the Grass to the North Byron Parklands location. Byron shire has a long and rich history of showcasing and supporting amazing local and international talent through Splendour in the Grass and the Blues and Roots festival. I hope that Byron can continue to play host to what has become one of the most successful music festivals in the world in the years to come.

Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.

P3255	Project Website Submission	22/10/2010	Online Submission from Nathan McNeill of n/a (support)

It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning.

Splendour is a highlight for many music and culture lovers across Australia and the world. Splendour should make a new home at Woodfordia in Queensland as this is a far superior venue. The hills, lakes and rivers makes this venue stand out. The camping grounds are unsurpassed by any other venue featuring exemplary facilities.

Thanks for the debate, but it is clear where Splendour in the Grass belongs. At home in Woodfordia.

Thank you.

P3257	Project Website Submission	22/10/2010	Online Submission from Glenn Nelson (support)

For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers.

Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing.

The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to

P3258	Project Website Submission	22/10/2010	Online Submission from Merryn Kiss (support)

The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region.

Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

The Northern Rivers region needs to plan ahead for future employment and training opportunities for our young community. We need to offer options to the young members of the community to encourage them to stay in the area. This proposal will provide these incentives.

The Department would be hard pressed to list other proposals such as the North Byron

Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

P3259	Project Website Submission	22/10/2010	Online Submission from Brielle Kiss (support)	From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. It's a fantastic opportunity for us all.

Not only have the North Byron Parklands organisation developed what must be considered world's best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. P3260	Project Website Submission	22/10/2010	Online Submission from brendan mortensen (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

North Byron Parklands will provide training? and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

P3263	Project Website Submission	22/10/2010	Online Submission from Elizabeth Bale (support)	Not only have the North Byron Parklands organisation developed what must be considered worlds best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisations like North Byron Parklands to provide much needed jobs. Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

As a previous resident of the Northern Rivers (for 21 years) and fitting in to the demographic of people who attend events such as Splendour there is really not alot for younger people to do in the region so it gives them a chance to attend an event without the added transport and accommodation costs involved with travelling to an event of a similar nature held elsewhere. I myself have attended Splendour over the years it was in Byron and whilst it might attract a large number of people to the region for the one weekend it really is only one weekend at a time of year which surrounding businesses would normally never have the opportunity to earn as much income. It has in my experience been well organised and created as little impact on the local region in terms of inconvenience that I believe possible. It would be ashame for the region and its residents in this demographic sector to miss such an opportunity in future years.

P3264	Project Website Submission	22/10/2010	Online Submission from Lauren Forster (support)

When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land.

If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

This is a fantastic spot for a festival. Most locals enjoy the atmosphere and a change of pace in the area for the weekend. It would be a shame to permanently lose such a great festival from the region.

P3265	Project Website Submission	22/10/2010	Online Submission from Kelly Williams (support)

Hi Splendour In The Grass people!

Please please please support the new location for Splendour!

Splendour is the best music festival of the year! Compared to all the other festivals, Splendour provides a relaxed vibe in which everyone is there purely for the music. The original location in Byron is no longer available, and the new spot at Woodford was great but can't be used again. The new site that is being proposed sounds like it would suit Splendour perfectly.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see

some excellent environmental outcomes arising from this development. I am very supportive of their approach.

Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but let's create a high season in winter too by utilising North Byron Parklands!

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

Therefore, I really think that the new location for Splendour should be the go ahead!

My year would not be the same without Splendour In The Grass!!

Submission

22/10/2010 Online Submission from Sean
Bowmaker of Teacher (support)

It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events.

I have been searching for a career opportunity close to home since finishing my HSC, this proposal sounds like exactly what I am after. Please approve the North Byron Parklands.

As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce.

P3268	Project Website Submission	22/10/2010	Online Submission from Greg Isaacson (support)

The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community.

P3271	Project Website Submission	22/10/2010	Online Submission from esta armenio (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring. Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. To whom it may concern,

Please accept this submission to 'Bring Splendour Home' to North Byron Parklands. Please see below for spendid reasons:

In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented.

Too many people are forced to look outside Byron for employment opportunities. The North Byron Parklands proposal offers ample opportunities and will surely make the locals very happy.

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands!

Thanks you

The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the 'sustainable' development basket.

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the 'sustainable' development basket.

With the recent global financial crisis many businesses in the area were hit hard. Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals.

I and the majority of my friends have been to Spelndour 9 out of 10 years and we absolutly love it. There is no other event like this and it would be a dam shame to see it end.PLEASE LET COMON SENSE PREVAIL, YU KNOW YOU WANT TOO.LET THE KIDS HAVE THEIR FUN YO!

P3278	Project Website Submission	22/10/2010	Online Submission from Delia O'Hara (support)

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community.

One of the many environmental programs to be undertaken by North Byron Parklands is the

staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives.

The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together.

P3279	Project Website Submission	22/10/2010	Online Submission from Kieran Rooney (support)

While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal.

Most of the businesses within the Northern Rivers and Byron Shire are sole traders and do not offer any employment opportunities to the community. Bringing Splendour in the Grass festival back to Byron Bay would result in North Byron Parklands offering many new employment opportunities for the residents in the region.

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

PLEASE DON'T LET THIS AMAZING FESTIVAL DIE.

P3280	Project Website Submission	22/10/2010	Online Submission from Brenton West (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy. Name: Brenton West Address: 32 Salvado Drive Pacific Pines IP Address: cpe-58-170-41-218.lns3.cha.bigpond.net.au - 58.170.41.218 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3281	Project Website Submission	22/10/2010	Online Submission from Talitha Philpott-Smith (support)	North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the

RTA's expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

As a youth of the area I am constantly searching for ways to broaden my horizons. I believe this proposal will offer new opportunities, new jobs, new experiences and new ways to develop.

Online Submission from Anna
Kennedy of Love Police (support)

To Whom It May Concern,

As a worker in the music industry this event effects my work and social life. A large new site in Byron Bay, NSW is a great advantage to my company and myself.

Many of the workers that we employ for the festival have, in recent years, been residents of the Byron Bay shire. While the influx of people for the weekend of the festival is an advantage for the local shops and services, it also affects a great many of people that work leading up to and during the event.

The advantages of using this great new sustainable site in Byron is that there is an increase of tourism in the quieter winter months - for less than one week . If this site is sold off the outcome is unknown and the land may be bought by developers that will increase the influx of people all year round.

The minority of people that are opposed to the venue should not be keeping the thousands of people, both residents of Byron and non-locals, that enjoy and benefit from this event.

Thanks and regards,

Anna Kennedy

Submission 22/10/2010 Online Submission from dean
johnston of blackdogsurfing
(support)

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth.

P3285	Project Website Submission	22/10/2010	Online Submission from dominique haenzi of blackdogsurfing (support)	If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably. Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but letâ€™s create a high season in winter too by utilising North Byron Parklands! Name: dominique haenzi Organisation: blackdogsurfing Address: 21 scott street2481 byron bay IP Address: 252.15.233.220.static.exetel.com.au - 220.233.15.252 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3286	Project Website Submission	22/10/2010	Online Submission from tim kelly (support)	Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times.

P3288	Project Website Submission	22/10/2010	Online Submission from chris Aplin (support)	The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! Name: chris Aplin Address: po box 3024 west hobart tasmania 7000 IP Address: cpe-139-168-54-210.vic.bigpond.net.au - 139.168.54.210 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3289	Project Website Submission	22/10/2010	Online Submission from Debra McNamara (support)	The Marshall's Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a 'resource centre' where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community. Name: Debra McNamara Address: 31 Oates Parade Northgate Qld 4014 IP Address: - 115.131.31.96 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P3290	Project Website Submission	22/10/2010	Online Submission from Max White (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

BRING IT BACK!

P3291 Project
Website
Submission

22/10/2010 Online Submission from Stephen
Day of UniSA (support)

Dear NSW Department of Planning

The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures.

As an education student, i'm obviously very interested and concerned with education not only amongst residents of Adelaide, but the whole of Australia. For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

Sincerely,

Stephen Day

P3292	Project Website Submission	22/10/2010	Online Submission from Adam mcarthur (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

P3294	Project Website Submission	22/10/2010	Online Submission from Todd Smith of Byron Bay Captured Pty Ltd (support)	As a local spring water start up business located in Byron Shire, we have already suffered a loss this year by missing out on a massive order of Spring Water for Splendour. We lost this order because we were not able to provide a competitive quote due to the distance of Woodford from Byron. If Splendour was to re-locate back to Byron Shire I am confident that we would be successful in our bid to supply water to this event and others to be held at North Byron Parklands. Getting the Splendour business will enable us to expand our operation, which will directly and in-directly increase employment to our area. Please consider my submission and if you would to discuss further contact myself on 0413 878 558. Regards, Todd Smith Managing Director Name: Todd Smith Organisation: Byron Bay Captured Pty Ltd Address: 155 Stewarts Rd, Clunes, NSW 2480 IP Address: 220.253-243-225.nsw.netspace.net.au - 220.253.243.225 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3295	Project Website Submission	22/10/2010	Online Submission from Susan O'Keefe (support)	I'm a splendour Pioneer... and have been to every Splendour except the first and the last! Bring it back to Byron Bay! P3296	Project Website Submission	22/10/2010	Online Submission from Ethan Slegers of Student (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coast's existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW

government.

P3297	Project Website Submission	22/10/2010	Online Submission from Emma Peterson (support)

Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

As well as attracting valuable tourist traffic during this slower time of year, it keeps available to the local community a festival that was born and raised in the area. Splendour is a festival enjoyed by so many Byron Shire residents and to have it moved out of the area feels like a family member's been forcibly removed from the home. So many residents that have enjoyed Splendour year on year, simply couldn't make it this year due to the location change. The isolated Woodford site - while beautiful in its own right and perfect for the festivals it currently hosts - is simply not the right location for Splendour.

P3298	Project Website Submission	22/10/2010	Online Submission from Phil Crowley (support)

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region.

The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It's up to us as adults to decide that we want to support venues that support young people.

Byron is the natural home of Splendour. The Splendid people love Byron and respect the locals and the local environment. It seems that the organisers are taking mighty steps to ensure that all stakeholder concerns are addressed and the relevant approvals should be made and this event and the broader plan be allowed to proceed.

Phil Crowley.

P3299	Project Website Submission	22/10/2010	Online Submission from Megan Hunt (support)	Short and to the point. I support the approval of the North Byron Parklands proposal because; - It seeks to reunite and revegetate a significant wildlife corridor in a sustainable fashion. - The applicants have shown supreme willingness to work in a consultative fashion with local stakeholders to ensure use that is environmentally, economically and culturally viable. - The part time, part time use for cultural events will provide much needed stimulus for the local economy. A strong Aussie dollar = less overseas tourism. Areas such as Cairns that have framed their tourism industry around overseas travellers now have some of the highest unemployment rates in the country. Any proposal that attracts local tourism ongoing needs support. It is not just the revenue generated from the specific event but more significant is the repeat independent travel as festival goers "discover the area". Name: Megan Hunt Address: 1304./42 Elizabeth St, Surry Hills 2010 IP Address: 210-84-59-78.dyn.iinet.net.au - 210.84.59.78 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3300	Project Website Submission	22/10/2010	Online Submission from Tom Tschui (support)	All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector.

Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved.

There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy.

P3302	Project Website Submission	22/10/2010	Online Submission from Natalie Boden (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application.

North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities!

P3303	Project Website Submission	22/10/2010	Online Submission from Bronwyn Miles (support)	Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

P3305	Project Website Submission	22/10/2010	Online Submission from Dennis Ensor of Resident of North Ocean Shores for 15 years (object)	I am a retired Police Officer who was stationed at Brunswick Heads for nine years. The Ocean Shores area does not have the infrastructure to handle large crowds associated with music festivals. The excessive consumption of alcohol and drugs along with large crowds will cause massive traffic, environmental and social problems. The impact of such big crowds into such a small coastal area will mean chaos for everyone who lives here. Name: Dennis Ensor Organisation: Resident of North Ocean Shores for 15 years Address: 14 Natan Court, North Ocean Shores IP Address: 17.53.70.115.static.exetel.com.au - 115.70.53.17 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3306	Project Website Submission	22/10/2010	Online Submission from Jessica Edgar (support)	Splendour In The Grass has been the most impressive festival I have ever attended, and it wasn't because of the amazing music. Splendour organisers ensured that everything they did was as environmentally friendly as it could be, and I've never seen a festival with such an earthy vibe! Other festivals I have been to unfortunately do not take this approach but Splendour has proven over it's many years that it is able to fix minimal damage and comply with the strict rules they are given. The festival will create work, bring people to the area as tourists who may stay on longer when they see the beautiful area and with the tourism sector not being at it's best, the economic benefits both direct and indirect should be very welcome. Bring Splendour to Byron! Name: Jessica Edgar Address: 18 Ironbark Court KenningtonVictoria 3550 IP Address: 115-64-117-177.static.tpgi.com.au - 115.64.117.177 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3307	Project Website Submission	22/10/2010	Online Submission from mary smith (support)	I want the thing to happen. There is a lot of NIMBYISM locally. They havent even been to a prior festival. They havent seen how well the organisers do it all. How streamlined the traffic management etc the rubbish and the involvement of a variety of aspects-like local art exhibition on site. All this stuff about sensitive envtal and sacred land happens all the time everywhere these days. I am sure they will do their best to do right by ALL these points to bend over to please the people but also to do the right thing. When its all up and running they will all go there and attend the conferences and activities and will even be booking it to hold their own gigs you wait and see. I have seen opposition to everything new for 20 years like the Beach Hotel when it was on the drawing board and soon the protestors were attending gigs there and taking their visitors there for lunch. It is an excellent venue. Now Byron at Byron in the middle of a swamp has done the right thing envtally and wins awards as best OZ resort etc The people complaining about this new one havent even listened to

anything that is said to explain how it will be. They imagine horror stories. Huge crowds. Traffic. Noise. There will be none. It all points west and its over a hill. They wont hear a thing. People do not all come at once. The traffic comes and goes for the duration. At Woodford the thousands are not noticeable because over the duration that is the total--when we talk big numbers--but there is a lot of defraying as people come and go. It will NOT impact as adversely as people fear. They forget they were young once. They think it is not contributing to local economy. It will. It always does. Even if no goers spend money here the committee will and already have poured money into our charities in the big figures. If they jump thru all your hoops then they should be allowed to continue on since they have come so far and let them prove themselves. They can have tours and show the dissenters if they care to see. The dissenter with a lot of money put a 1 page ad in the Byron News showing flooded paddock on the land. Well so what. Lots of developers have had to deal with that and just do what has to be done ofcourse and do drainage and fill or whatever--(I am not a builder) I am sure the organisers know about everything that needs work. It is in their interests to know ofcourse. They are not stupid. They are not going to spend all that they have already and then say oops--they wouldve been aware from the start. The Blues Fest land (now up and running) was shown as underwater as well in all the scare campaign leading up to approval. If Blues Fest let all their punters get bogged they would lose punters and money so ofcourse they prepare the land so it is all hunky dory and life goes on. I am not a personal friend of the Splendor mob. I dont even know what they look like if I passed them in the street. I am 60 years old. And its not all young ones at these festivals. Its a lot of varied ages up to any age. Its people festivals, not just young and drunken rock fests like when I was young. There are always the few yobbos incidents the media jump on that give the whole thing a bad name. But out of the thousands of safe responsible punters of all ages it is miniscule. And security and St Johns are right there.

P3309	Project Website Submission	22/10/2010	Online Submission from Dougal McLauchlan (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together. Please approve this project, it really sounds exciting for various reasons, arts, employment and cultural awareness. How fantastic! Name: Dougal McLauchlan Address: 12 Richard Street, Andergrove, 4740 IP Address: dsl-202-173-151-13.qld.westnet.com.au - 202.173.151.13 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3310	Project Website Submission	22/10/2010	Online Submission from Brook Cameron (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. Name: Brook Cameron Address: 16 Green Street Booval Qld 4304 IP Address: 203-58-8-94.static.tpgi.com.au - 203.58.8.94 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3311	Project Website Submission	22/10/2010	Online Submission from Skye Nevin of Eleven (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.

The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

Please take this submission seriously as The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

P3312	Project Website Submission	22/10/2010	Online Submission from Caitlin de Wit (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the ?Splendid Initiative? offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice.

P3313	Project Website Submission	22/10/2010	Online Submission from Alice Conway (support)

Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region.

The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P3315 Project
Website
Submission 22/10/2010 Online Submission from Joe
Constable (support)

Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner.

I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved.

With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status.

P3316	Project Website Submission	22/10/2010	Online Submission from Aasha Tozer of Afends Pty Ltd (support)	The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. Name: Aasha Tozer Organisation: Afends Pty Ltd Address: 2/6 Lawson Street Byron Bay NSW 2481 IP Address: cpe-121-216-229-46.inse3.ken.bigpond.net.au - 121.216.229.46 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3317	Project Website Submission	22/10/2010	Online Submission from Shannon Hore (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions? economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. If we want to maintain a vibrant creative culture in our region we need to support proposals such as this. North Byron Parklands sustainable event space is a perfect way to sustain and encourage our local creative culture. Name: Shannon Hore Address: 3/12 Morris Street, Paddington QLD 4064 IP Address: d58-111-76-246.rdl800.qld.optusnet.com.au - 58.111.76.246 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3318	Project Website Submission	22/10/2010	Online Submission from Doncia Leung of moshtix (support)	I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering. Name: Doncia Leung Organisation: moshtix Address: Level 23, 175 Liverpool St, Sydney IP Address: - 165.69.2.3 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3319	Project Website Submission	22/10/2010	Online Submission from Christopher Hicks of none (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home. Name: Christopher Hicks Organisation: none Address: 48 Carnarvon Street Yarrowarra NSW 2233 IP Address: proxy-web-prd-ext-2.ucc.usyd.edu.au - 129.78.32.22 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3320	Project Website Submission	22/10/2010	Online Submission from Sam Shoobirdge (support)	to home. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions? economies. P3321	Project Website Submission	22/10/2010	Online Submission from Peta McConachie of Munky.com.au (support)	A place where people can get together and enjoy the beauty that Byron Bay has to offer. Bring Splendour home to the Northern Rivers! Letâ™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site.

It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised.

P3322	Project Website Submission	22/10/2010	Online Submission from Darren Wolsey of News Digital Media (support)	Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful. Name: Darren Wolsey Organisation: News Digital Media Address: 175 Liverpool St, Sydney NSW 2000 IP Address: - 165.69.2.1 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3323	Project Website Submission	22/10/2010	Online Submission from Yanni Brown (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting

together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times.

North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers

region. Bring on the variety and the possibilities!

SPLENDOUR IN THE GRASS SHOULD BE AT BYRON BECAUSE IT REPRESENTS WHAT BYRON IS! :)

P3324	Project Website Submission	22/10/2010	Online Submission from Pat Bredhauer (support)	North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. Name: Pat Bredhauer Address: PO Box 307 Coolum Beach Qld 4573 IP Address: mail.lepcolourprinters.com.au - 203.45.175.222 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3325	Project Website Submission	22/10/2010	Online Submission from Catherine Adams-Acton (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I

cannot see any sensible reason why it should not be approved.

Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer?

Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire.

P3327	Project Website Submission	22/10/2010	Online Submission from Aaryn Bonomi of CondonTreasure (support)	One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature. North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. I have not lived in the area for the past 1.5 years, however was born and raised in the area living there for the first 22 years of my life. The site chosen is a great piece of land and the environmental programs documented will keep it that way. Name: Aaryn Bonomi Organisation: CondonTreasure Address: 19 McEwan Street, Roma, QLD, 4455 IP Address: mail.condontreasure.com.au - 124.148.8.26 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3328	Project Website Submission	22/10/2010	Online Submission from Shauna Crimean (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

Online Submission from Bethany
Leong (support)

To Whom it May Concern,

From what I have read of the plans for The Parklands, I welcome the establishment of a cultural event site for the region.

The Parklands site has the opportunity host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

The rehabilitation already done to the area is, in my mind, a good indication of what can continue to be done in the future, and the owners seem committed to achieving this.

Yours sincerely,

Bethany Leong

P3330	Project Website Submission	22/10/2010	Online Submission from Caitlin Furze (support)	Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events.

P3331	Project Website Submission	22/10/2010	Online Submission from Jason Gray (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ€™s show the way Australia. Bring Splendour home!

North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

P3335	Project Website Submission	22/10/2010	Online Submission from hannah carey (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. Byron deserves to be showcased at the humble music capital....keep splendor in Byron... Online Submission from Holly
Galbraith (support)

To whom it may concern,

I am a full time resident & rate payer of the Byron Shire, have lived in the region for over ten year and wholeheartedly support Splendour in the Grass festival and the North Byron Parklands being a permanent festival & events venue.

North Byron Parklands have undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

From an economic contributor to the region view point, I, as former Sales & Marketing Manager of The Byron at Byron Resort in Byron Bay, very much felt the downturn in business when the shire did not host Splendour in 2010 and know that festival & events are of major importance to this shire and many regional areas across Australia.

Finally from a cultural breeding ground perspective alone we must get the proposal approved. It is a fabulous exciting vision and we are very lucky that Australia creates events of this standard and these should be encouraged and embraced.

I cannot express enough the important of these events to the shire, to regional Australia, to the arts and to a generation and generations to come.

Please think very seriously about the implications of not approving this site for festival & events.

I would happily be contacted anytime for further comment.

Kind regards

Holly Galbraith

P3337	Project Website Submission	22/10/2010	Online Submission from Bernadette Westcott of UWS (support)	I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events.

Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing

we need to raise awareness and have society appreciate what nature has on offer.

P3338	Project Website Submission	22/10/2010	Online Submission from Kim Jarmyn (support)

The Marshallâ€™s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities.

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ€™ income. There is no reason why this proposal should not be approved by state government.

North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region's creative industries, providing world class training and work experience opportunities.

P3345	Project Website Submission	22/10/2010	Online Submission from Joseph Cobbledick (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. Name: Joseph Cobbledick Address: 12 Pinner Court Shepparton, Victoria 3630 IP Address: arthur.mit.csu.edu.au - 137.166.4.130 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3346	Project Website Submission	22/10/2010	Online Submission from Jacinda Tyson (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. All along the NSW coastline tourism businesses provide employment and income to

hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector.

We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events.

P3347 Project
Website
Submission 22/10/2010 Online Submission from Chris
Coen (support)

North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

P3348	Project Website Submission	22/10/2010	Online Submission from Maya Clemmensen of Maurie (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. Name: Maya Clemmensen Organisation: Maurie Address: 68 Clarke St Narrabeen NSW 2101 IP Address: 60-241-69-160.static.tpgi.com.au - 60.241.69.160 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3349	Project Website Submission	22/10/2010	Online Submission from Liam McGorry (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. \$55,000 compared to NSW's average annual income of \$71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit

significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together.

P3350	Project Website Submission	22/10/2010	Online Submission from Phillip Woodward (support)	People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site. Name: Phillip Woodward Address: 104 Fletcher pde Bardon qld IP Address: c211-31-48-137.kelvn3.qld.optusnet.com.au - 211.31.48.137 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3351	Project Website Submission	22/10/2010	Online Submission from Andrew Olrich (support)	The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. I have been to many SplendourintheGrass festivals and I feel deeply about ensuring this great event continues where it belongs. Every year there is always amazing focus on making the people aware and active in preserving the environment. It is obvious that this much planning and consideration has been put into selecting this land. I feel that the Byron shire is one of the most beautiful areas in Australia and that it should be taken care of. I can't think of any other event or festival that could take greater care of its surrounds and locals like the Splendour people do. The people who don't think they will obviously have not been and seen for themselves how much this festival benefits the local community. Its not just about music, the arts and cultural experience is also a major reason why Splendour is so special to so many. PLEASE allow this unique Australian event to continue where it belongs...Home. P3354	Project Website Submission	22/10/2010	Online Submission from Sallyanne Elliott (support)	The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts.

North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region's creative industries, providing world class training and work experience opportunities.

P3358	Project Website Submission	22/10/2010	Online Submission from Tulsi Jackson (support)

From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

Byron Shire and the wider northern rivers region has been a fast growing area for the creative industries sector. Huge numbers of people have moved into the region with expectations of finding work in this sector and more than ever there is a need to ensure that projects that directly and indirectly benefit this growing sector are supported. The Parklands proposal if approved will become a dominant force in expanding the creative industries sector and will provide substantial job opportunities.

As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed

with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

I find great delight knowing that competent Event Managers will be involved with all the events held at North Byron Parklands, ensuring that we have a lot of great experiences if this proposal goes through.

P3359	Project Website Submission	22/10/2010	Online Submission from Alex Boromisa (support)

How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it.

It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is

protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative.

With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area.

It would be a shame to see this proposal turned down, it doesn't take much to see that the North Byron Parklands proposal has so much to offer.

P3361	Project Website Submission	22/10/2010	Online Submission from Bec Dann (support)	While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive. Name: Bec Dann Address: PO Box 707 Dickson ACT 2602 IP Address: 220-245-60-149.static.tpgi.com.au - 220.245.60.149 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3362	Project Website Submission	22/10/2010	Online Submission from Billie Minogue (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. Most of the businesses within the Northern Rivers and Byron Shire are sole traders and do not offer any employment opportunities to the community. Bringing Splendour in the Grass festival back to Byron Bay would result in North Byron Parklands offering many new employment opportunities for the residents in the region.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

Splendour in the Grass belongs in Byron Bay, it has the best vibe out of any festival I have ever been to and I am working in the festival industry so I have been to many over the years. It not only compliments the beauty and serenity of the landscapes in Byron but it also reflects the people of Byron Bay and their holistic lifestyle. Forcing the festival to set up anywhere else would ruin and ultimately force the festival to change their style that has been created and adapted over the past ten years.

P3363	Project Website Submission	22/10/2010	Online Submission from Jack Rooney (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. PLEASE BRING SPLENDOUR HOME! Name: Jack Rooney Address: 5 Whittell Cres, Florey ACT IP Address: 203-217-54-88.dyn.iinet.net.au - 203.217.54.88 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3364	Project Website Submission	22/10/2010	Online Submission from Jake Tobin of iJazzIndustries (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved.

The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development.

I can honestly say that over my last 8 years of attending festivals, splendor is the one i can never refuse, the overall vibe is completely different to any other event as the organisers are constantly hitting u with information and basic practices to help the environment ie butt bins being handed out to every patron and so forth.

To turn down this opportunity to influence so many people on how to better treat the environment would be an absolute travesty and you the government would be shooting yourself in the foot, think long and hard on this one my office bound betters for it is in the best interests of our beautiful area to keep this festival in its spiritual home.

P3365	Project Website Submission	22/10/2010	Online Submission from Chris Williams (support)	This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. Name: Chris Williams Address: 26/36 Vernon TerraceTeneriffe, QLD, 4005 IP Address: haines8.lnk.telstra.net - 203.45.214.140 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3366	Project Website Submission	22/10/2010	Online Submission from Ben Mackay (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs.

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P3367	Project Website Submission	22/10/2010	Online Submission from amy freshwater (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay. Name: amy freshwater Address: 34 mill hill rd bondi junction IP Address: d110-33-106-133.mas800.nsw.optusnet.com.au - 110.33.106.133 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3368	Project Website Submission	22/10/2010	Online Submission from Maddison Bailey (support)	North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. Byron Bay is known for its culture and events. Don't deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal! Name: Maddison Bailey Address: 20 Seiberi Close Blackheath IP Address: cityof195.lnk.telstra.net - 203.45.101.232 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3369	Project Website Submission	22/10/2010	Online Submission from mitch hill of Polaroid Fame (support)	Polaroid Fame had the pleasure of representing the local indie music community at Splendour 2009, an experience that will be etched in our minds and hearts for the rest of our lives. We want to see the festive remain so that many others in our situation get the same opportunity. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

P3370	Project Website Submission	22/10/2010	Online Submission from Narelle McLean (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal.

I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

Lets think with our heads, and listen to the community as a whole this festival is not just about making money, it promotes environmental causes and always has. People in Byron love the festival. It brings in revenue into the Byron shire in what is normally a down time for the area in terms of dollars.

Bring Splendour home....

P3371	Project Website Submission	22/10/2010	Online Submission from Chantal Wieseler of Zacalu Zoo (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. One of the most significant environmental controls being put in place by North Byron

Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great way of retaining our young professionals and aspiring professionals.

P3372	Project Website Submission	22/10/2010	Online Submission from Daniel Adamson (support)	It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. Name: Daniel Adamson Address: 6 Coopers Road Toowoomba IP Address: 203-214-105-66.dyn.iinet.net.au - 203.214.105.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3373	Project Website Submission	22/10/2010	Online Submission from Lisa Foukes (support)	The Marshallâ€™s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the regionâ€™s economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. Byron is the best place for it... It also gives Byron an oppotunity to show what its made of.... Beach, lifestyle and and just its general atmosphere always brings a smile to my face :)

P3374	Project Website Submission	22/10/2010	Online Submission from Hannah Green (support)

The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process.

The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become "out of bounds" to protect identified areas of importance.

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about

environmental management.

Letâ™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ™s get on with the job of creating exciting training and employment opportunities for our young people.

P3375	Project Website Submission	22/10/2010	Online Submission from kim dickson (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands! Name: kim dickson Address: 50 bass avenue killarney vale nsw 2261 IP Address: marsau.lnk.telstra.net - 203.45.169.142 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3376	Project Website Submission	22/10/2010	Online Submission from kim parry (support)	I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. Name: kim parry Address: 17 rhaps court bunderim 4556 IP Address: 122-149-62-226.static.dsl.dodo.com.au - 122.149.62.226 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3377	Project Website Submission	22/10/2010	Online Submission from tim blanshard (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands.

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It's up to us as adults to decide that we want to support venues that support young people.

Name: tim blanshard

P3378	Project Website Submission	22/10/2010	Online Submission from iain reynolds (object)	I am against this development. The site is in the next valley to ours and our local village, Billinudgel, would be the closest to the proposed site. There are simply no services close to the site to cater for such large numbers of people, plus the events will have a detrimental effect on the local wildlife which is supposed to be protected. These events should be held closer to Byron Bay which could do with the extra business. Please refuse this application ! Name: iain reynolds Address: Chinamans Hill Road, Middle Pocket, NSW, 2483 IP Address: d220-236-91-69.dsl.nsw.optusnet.com.au - 220.236.91.69 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3379	Project Website Submission	22/10/2010	Online Submission from michelle larder (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning. If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime. North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead.

P3380	Project Website Submission	22/10/2010	Online Submission from Daniel Lawrence (support)

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas.

A business that combines ecology with events and community giving. That's the kind of business that our young people are looking to for training and experience. Let's get it approved.

This is a great event that brings together a peaceful group of people who love music. I have many great memories from this festival, I always want to go. And I spend a lot of money on local business there, so keep Splendour in byron please.

P3381	Project Website Submission	22/10/2010	Online Submission from Jaya Breen (support)	The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the 'coast to hinterland' wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise 'downtime' will allow the Parklands site to assist the functioning of the adjoining Nature Reserve.

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

Local people worked hard in the past to make this an iconic Australian event.

P3382	Project Website Submission	22/10/2010	Online Submission from Lizzy Lockton (support)

With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

Whatâ€™s important for Byron is the culture and celebration, its very important to our

community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this.

P3383	Project Website Submission	22/10/2010	Online Submission from Elizabeth Murphy (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status.

North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

Splendour in the Grass is a wonderful event, bringing people and artists together from across the world. My Splendour experiences have been incredible. Further, the promotion of sustainable living and environment protection that is seen throughout the festival educates the many festival goers of the enormous problems. Bring Splendour home.

P3385	Project Website Submission	22/10/2010	Online Submission from Cameron McLaren of J.e.m. (support)	All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia. Please allow this long running fixture of the Northern Rivers Events calendar to continue as the organisers intend Thankyou Name: Cameron McLaren Organisation: J.e.m. Address: 144 Semaphore Rd ExeterSA IP Address: 203-213-23-208.static.tpgi.com.au - 203.213.23.208 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3386	Project Website Submission	22/10/2010	Online Submission from Aden chrystal of bondall (support)	The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local business? income. There is no reason why this proposal should not be approved by state government. Name: Aden chrystal Organisation: bondall Address: 3 brindal close, bicton, western australia IP Address: bondal.lnk.telstra.net - 120.151.129.117 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3387	Project Website Submission	22/10/2010	Online Submission from Peta Murray (support)	With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs. If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime. Byron Bay is known for its culture and events. Donâ€™t deprive our town of such a

tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal!

P3388	Project Website Submission	22/10/2010	Online Submission from Dave Ceylon (support)

North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy.

I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

P3390	Project Website Submission	22/10/2010	Online Submission from Katy Taylor (support)	Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land.

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

P3391	Project Website Submission	22/10/2010	Online Submission from Chris McCabe (support)

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community.

We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events.

P3392	Project Website Submission	22/10/2010	Online Submission from Jasmin Sommerfeld (support)	This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences.

The Byron Shire needs a new venue to host large events such as Splendour and the Blues and Roots festivals. While the town is a great place to hold these festivals, the infrastructure - namely the road access - is lacking. I find it very frustrating that there is only two roads in and out of the town, one of which was not in very good condition last time I drove on it. There is also not enough camping options available for the Splendour event, and after attending international festivals such as Glastonbury and Roskilde, I believe on-site camping is an integral part of the festival atmosphere and experience.

P3393	Project Website Submission	22/10/2010	Online Submission from Alistair Knox (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Name: Alistair Knox Address: 6 Buckinbah Place Lilli Pilli IP Address: 110-175-167-83.static.tpgi.com.au - 110.175.167.83 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3394	Project Website Submission	22/10/2010	Online Submission from billeigh Waaha (support)	I have had the some of the best times of my life at Splendour in the Grass in Byron Bay. I fell in love and then three years later went back and he found me again. We fell in love again for another three days then it was time to go home. If the festival is in at Byron again, there is a great chance I will be third time a charm (or a ring!) Also, I am from Melbourne and I come up to Byron with a troop from Melbs. We are courtious of the environment and of the locals, we are great festival goers and always make sure people are having fun responsibly. Please bring it back to BYRON WE LOVE YOU! P3395	Project Website Submission	22/10/2010	Online Submission from Micaela Nisbet (support)	We must not let Splendour be moved to QLD! Think of the tourism dollars that will be moved along with it! The Byron Shire is Splendour's traditional and cultural home and Woodford could never compare. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. I have known the Splendour crew for some time and can wholeheartedly say they are an extremely conscionable bunch. I trust that they have strategies in place with regards to wildlife conservation and soil degradation on the proposed site. Bring Splendour home! Name: Micaela Nisbet Address: 12 Shirley St, Byron Bay, 2481 IP Address: 5ac258be.bb.sky.com - 90.194.88.190 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3396	Project Website Submission	22/10/2010	Online Submission from William Ho (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. P3397	Project Website Submission	21/10/2010	Online Submission from Paula Lay of n/a (support)	Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. Name: Paula Lay Organisation: n/a Address: 6/434 Illawarra Rd, MARRICKVILLE, NSW 2204 IP Address: 60-240-92-64.tpgi.com.au - 60.240.92.64 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3398	Project Website Submission	21/10/2010	Online Submission from James Gill (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff. Name: James Gill Address: 4 Notley Way West Wallsend IP Address: cpe-138-130-114-140.lns4.cnt.bigpond.net.au - 138.130.114.140 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3399 Project Website Submission 21/10/2010 Online Submission (support)

The offer to expand the wildlife corridor is actually increasing the ecological capacity of the region, as opposed to diminishing it. This action is benefiting the environment, and increasing net-positive, sustainable development. The introduction of additional nature cannot in any way be viewed as negative. Also, the use of only a fraction of the site, for only a very small percentage of the year is one of the most beneficial uses of the land that could be found. The majority of the property will remain untouched. This option is much better to an alternative that would run for longer, and much better to major development of such land, such as the rezoning for residential housing that is occurring at the previous Splendour in the Grass site.

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

I do not want my name to be made available to the Proponent, these authorities, or on the Department's website.

P3400 Project Website Submission 21/10/2010 Online Submission (support)

Dear Sir/Madam,

In regards to the music festival Splendour in the Grass being returned to Byron, I agree with the following points.

Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

The Marshall's Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities.

The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

Please do not make my name available to the Proponent, these authorities, or on the Department's website. Thank you.

P3401	Project Website Submission	21/10/2010	Online Submission from Katie Cameron (support)	North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. Name: Katie Cameron Address: 35 Manning St Milton, Qld, 4064. IP Address: 124-148-35-63.dyn.iinet.net.au - 124.148.35.63 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3402	Project Website Submission	21/10/2010	Online Submission from Tasman Coupe (support)	While much is made of the Marshallâ€™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities. While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such

as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

Kind regards

Tasman Coupe

P3404	Project Website Submission	21/10/2010	Online Submission from Jessica Hogan (support)	Byron Bay is known for its culture and events. Donâ™t deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal! Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job

opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force.

P3405	Project Website Submission	21/10/2010	Online Submission from Leila Geise of NA (support)	The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available.

While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

I'm a long time Splendour in the Grass attendee (8 years). Woodford this year, as much as it was a fun time, did not feel like home. I can 100% relate to the desire to 'Bring Splendour Home'. I don't often get to travel to Byron Bay but my annual trip for Splendour is a time I cherish and love, the energy and atmosphere that Byron presents. I understand that residents may get annoyed with the busy traffic and I cannot speak for the thousands of other ticket buyers but myself and my friends have nothing but love and respect for all the Byron has to offer

P3406	Project Website Submission	21/10/2010	Online Submission from Bianca Ritchie (support)

To Whom it May Concern,

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of

environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

P3407	Project Website Submission	21/10/2010	Online Submission from zannita burgess (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a 'sustainable' site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. Byron Bay is known for its culture and events. Don't deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal! Name: zannita burgess Address: 15 Brewster crt petrie IP Address: cpe-121-223-100-155.inse2.woo.bigpond.net.au - 121.223.100.155 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3408	Project Website Submission	21/10/2010	Online Submission from andrew sampson (support)	Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. Name: andrew sampson Address: 7 sturdee st new lambton 2305 IP Address: 218-215-61-126.people.net.au - 218.215.61.126 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3409	Project Website Submission	21/10/2010	Online Submission from Kirra Pendergast of Lached and Loaded Pty Ltd (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes

ahead it will be a very positive thing for the NSW north coast.

There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that don't require employees. North Byron Parklands will provide many new jobs for the young people in the community.

P3410 Project
Website
Submission 21/10/2010 Online Submission from Jana
Nicholson (support)

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community. They also add valuable exposure to young and upcoming artists, musician and performers. An event such as Splendour allows people to expose their views to an audience that they may not be usually exposed to.

North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

P3411	Project Website Submission	21/10/2010	Online Submission from Barb Presti (support)	Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry. Name: Barb Presti Address: 6 Glen Ayr Ave Yowie Bay NSW 2228 IP Address: cpe-138-130-66-37.lns1.clt.bigpond.net.au - 138.130.66.37 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3412	Project Website Submission	21/10/2010	Online Submission from Rebekah Pollard (support)	Splendour is not just a music festival - it is a part of people's lives, artists and fans alike. I think Byron and Belongil should be proud to host an event where people from all over come together to have fun, join in music and hedonism and enjoy the most special moment which is seeing your favourite artist perform live. In these times of disparity and seclusion, a festival which welcomes and embraces all and promotes a vibe of acceptance is a breath of fresh air - a break from modern society - and THAT is Byron! The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, let's show the way Australia. Bring Splendour home! As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence

that the environment will be more than adequately protected.

There?s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others.

P3413	Project Website Submission	21/10/2010	Online Submission from Matt O'Reilly (support)	North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

P3415	Project Website Submission	21/10/2010	Online Submission from Nathan Ballard (support)	Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce

impacts and make this a leading sustainable outdoor event venue.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â€” young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P3417	Project Website Submission	21/10/2010	Online Submission from Joel Fleming of Climate Friendly (support)	Splendour in the Grass has been for many years the most environmentally responsible concert in Australia and one of the leaders in the world. It is the first concert event to offset their emissions using renewable energy. They also use biodiesel powered generators. Further they enable the concert goers to contribute funds towards renewable energy to compensate for the attendees travel emissions and have actively worked to educate concert goers about environmental responsibility. I have been to the concert a number of times with my son, who was 8 -9 years old at the time. Throughout the event he was entirely safe with a friendly, happy and safe environment.

It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative.

This is a green and positive event which is the type of event that NSW needs.

I would urge you to support this event.

P3418	Project Website Submission	21/10/2010	Online Submission from Shaylah griffith (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ€™ income. There is no reason why this proposal should not be approved by state government. The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs. In turn with all of this, how can our shire reject the profit that will benefit our small businesses (with encouraging small businesses to operate) they need splendours support for income. As we have rejected this year the QLD PREMIER OF THE STATE has openly admitted all the benefits Name: Shaylah griffith Address: 80 Tweed St Brunswick Heads NSW 2483 IP Address: cpe-121-216-196-92.lnse3.ken.bigpond.net.au - 121.216.196.92 Submission for Job: #3210 Cultural Events Site (Project Application)

P3419	Project Website Submission	21/10/2010	Online Submission from Tegan Goodey (support)

The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts.

Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one.

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

P3421	Project Website Submission	21/10/2010	Online Submission from Che Bishop (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation's environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

Name: Che Bishop

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3422	Project Website Submission	21/10/2010	Online Submission from Annabelle Morris of NA (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devices, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing.

The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing.

North Byron Parklands would provide many opportunities for young people to gain

experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

PLEASE BRING SPLENDOUR BACK TO BYRON!!!!!!

Thanks

Annabelle

P3426	Project Website Submission	21/10/2010	Online Submission from Ariel Smith (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, ?I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a community?. (Donna Sue Sanders ? Executive Director of the Daytona State Foundation). Name: Ariel Smith Address: 3 Rampage street Coomera Waters 4209 IP Address: cpe-123-100-141-139.pivit.net.au - 123.100.141.139 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3427	Project Website Submission	21/10/2010	Online Submission from Craig McNamara (support)	Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. Name: Craig McNamara Address: 3/268 Longueville Rd Lane Cove NSW 2066 IP Address: 124-149-47-245.dyn.iinet.net.au - 124.149.47.245 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3428	Project Website Submission	21/10/2010	Online Submission from Aimie Rigas of ACP Magazines (support)	To whom it may concern, I am writing to you to confess my love for the Splendour in the grass festival, and my sincere wish for it to gain a permanent home. Not only have the North Byron Parklands organisation developed what must be considered worldâ€™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco

Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.

Kind regards,

Aimie Rigas

giomataris (support)

Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire.

Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire.

One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive.

i have the pleasure of going to the last 5 splendour's and definatley the ones in byron were by far the best.

P3430	Project Website Submission	21/10/2010	Online Submission from Cassandra Cuddy (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the ?sustainable? development basket.

North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future.

With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.

P3431	Project Website Submission	21/10/2010	Online Submission from simon shah (support)	In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site.

Having read the North Byron Parklands submission and attended an event in the past I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. I'm sure the site will be well looked after and little disruption to locals will occur during event time. It looks like a great location for events.

P3432	Project Website Submission	21/10/2010	Online Submission from Cathy Pace (support)	The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the 'coast to hinterland' wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise 'downtime' will allow the Parklands site to assist the functioning of the adjoining Nature Reserve.

It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region.

The above is all worth and i truly believe it while at the same time I think Splendour in the Grass is the BEST festival in the country. I love it and it deserves its own space

P3433	Project Website Submission	21/10/2010	Online Submission from Rennie Loewenthal (object)	As a local resident of South Golden Beach one of my concerns is about the traffic and how it will be fed to the proposed site. Being so close to such a small community is going to cause huge disruption with no benefit to the people who live here. The festival organisers will benefit tremendously of course but the rest of the shire is only inconvenienced at best and at worst our peaceful community will be irreversibly changed. What about the nature reserve? The photograph of the 4 teenage girls with drinks in their hands in Byron News paper last week showed it all. This is splendour. Do we want this? Name: Rennie Loewenthal Address: Shearwater Steiner School Left Bank Rd Mullumbimby IP Address: cpe-58-166-91-121.inse5.cht.bigpond.net.au - 58.166.91.121 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3434	Project Website Submission	21/10/2010	Online Submission from Cameron Reed (support)	The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

P3435	Project Website Submission	21/10/2010	Online Submission from Annabel Hyles (support)	Whatâ€™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone. Name: Annabel Hyles Address: Woodlands, 660 Hoskinstown Rd, Bungendore NSW 2621 IP Address: - 203.39.145.173 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3436	Project Website Submission	21/10/2010	Online Submission from jason dillaway (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guysâ€™ book. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima

Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love.

P3437	Project Website Submission	21/10/2010	Online Submission from Ralph Johnston (object)	My main concern is the impact on wildlife and local domestic population. The expected 50,000 is 6 times the local population. There is no public transport or public facilities for approx 5kms. We are a small community of 8000 people living in Ocean Shores that borders on the development. The wildlife corridor of Billinudgel Nature Reserve is exposed to a real threat from development. This will certainly alter the relaxed ambience of our seaside community of Brunswick Heads. In my experience most festivals provide onsite services and facilities with little advantage to the local community. Name: Ralph Johnston Address: 8 Clifford St South Golden Beach IP Address: cpe-58-166-91-121.inse5.cht.bigpond.net.au - 58.166.91.121 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3438	Project Website Submission	21/10/2010	Online Submission from Kaylene Chamberlain (object)	I have previously objected to this DA and do so even more strongly now as the applicants appear to be asking for even more than they did in the first, defeated, DA. I object for the following reasons: * The proposed site is adjacent to the Billinudgel Nature Reserve which will suffer from noise and lighting pollution and have an increased fire risk. * The proposed site is relatively isolated which will mean that festival goers will have to drive to local townships of Ocean Shores, Brunswick Heads, Mullumbimby and Potts Point in order to do shopping etc. This will greatly increase local traffic with potentially hazardous driving. * The local beaches are often dangerous with no life saving provisions at New Brighton,

SGB and Wooyung.

* Traffic will be a major concern for the residents of Ocean Shores, New Brighton, SGB and Brunswick Heads, particularly as the DA suggests that traffic will be directed to Brunswick Heads and along the local access road in the event of a traffic bank up on the freeway. One has only to recall the bank up of traffic from Byron Bay to north of Shara Boulevard at Festival time before the freeway was built. It will be the same with Splendour at Yelgun

* the proposed parking and camping areas are in a flood prone area

* Brunswick Heads will be transformed into a permanent party town being the closest pub/beach locality to the site.

* Up to 4 mega festivals per year with crowds projected to rise up to 50,000 or more for each festival plus another 4 festivals of up to 10,000 per day and another unlimited number of smaller events and doof parties will more than double the entire population of Byron Shire several times per year taxing amenities, services, beaches and other public places

* Ocean Shores will experience the same problems with holiday lettings as is the case in Byron.

Overall the location of a mega festival site on the doorstep of a suburb like Ocean Shores will greatly affect the amenity of the area. I would urge Council to consider the interests of the local and reject this DA application

P3439	Project Website Submission	21/10/2010	Online Submission from Lynda McGahey of Bunzl (support)

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

P3440 Project
Website
Submission 21/10/2010 Online Submission from Marc
Reiffel (support)

It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklands' environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity.

Too many people are forced to look outside Byron for employment opportunities. The North Byron Parklands proposal offers ample opportunities and will surely make the locals very happy.

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community.

P3441	Project Website Submission	21/10/2010	Online Submission from Fiona Barnes (support)

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

Splendour is the BEST festival ever, so it should be able to have it's own grounds. And it is the most eco-friendly festival I've ever been to!

P3442	Project Website Submission	21/10/2010	Online Submission from Jerry Rides (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status.

This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences.

The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures.

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

P3443	Project Website Submission	21/10/2010	Online Submission from Nicole Guillon of - (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. Letâs™s look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment. Name: Nicole Guillon Organisation: - Address: 14 Sandalwood Avenue, Woodlands, 6018, W.A, Australia IP Address: 203-173-31-85.dyn.iinet.net.au - 203.173.31.85 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3444	Project Website Submission	21/10/2010	Online Submission from bronwyn thompson (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is

vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â€” young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P3445	Project Website Submission	21/10/2010	Online Submission from Ann Leggo (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devices, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing.

We have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project.

Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.?????

The care and effort that Splendour promoters have shown in the past in like no other festival that I have attended. Attention to the community and environmental protection is high on their priority list. Safety for event attendees and also the local community is also very well considered. In the beautiful surroundings of Byron Bay Splendour just can't be Splendour until it is back in Northern NSW and I am a Queenslander so saying this is not easy.

P3446 Project
Website
Submission

21/10/2010 Online Submission from matthew
Miller (support)

With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble.

P3447	Project Website Submission	21/10/2010	Online Submission from Jacob Davidson (support)	The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local business? income. There is no reason why this proposal should not be approved by state government. One of the sole reasons Byron Bay was put on the map not only nationally, but internationally, was due to the publicity received when Splendour in the Grass came to town. Such a big event draws many people to this wonderful part of the North Coast of NSW. Declining such an application will only take a chunk of tourism out of NSW and damage regional small business in the area! Name: Jacob Davidson Address: 13 Morella Place, Castle Cove NSW 2069 IP Address: cpe-124-183-188-177.lns17.ken.bigpond.net.au - 124.183.188.177 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3448	Project Website Submission	21/10/2010	Online Submission from Allison Prasser (support)	Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal. I love visiting Byron Bay and have been during the Splendour weekend twice and also at other times of the year. There is no doubt that during the Splenour In The Grass weekend the population doubles and this is a boon for the traders. Splendour In The Grass at Byron is a world class festival. Name: Allison Prasser Address: 74 Kirkwood AveSeaford Vic 3198 IP Address: cpe-124-180-106-81.lns10.lon.bigpond.net.au - 124.180.106.81 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3449	Project Website Submission	21/10/2010	Online Submission from John Schmidt (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? Name: John Schmidt Address: 7 Cochran street Lismore NSW 2480 IP Address: 121-200-215-166.ip.linearg.net - 121.200.215.166 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3450	Project Website Submission	21/10/2010	Online Submission from Anthony Peterson (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

P3451	Project Website Submission	21/10/2010	Online Submission from joel beclu (object)	I think that it is over doing it as we do have already an event site at Tyagarah and that money would be better spend making this site more safe and efficient and hassel free for resident, that trying to built a new one in this difficult financial time. I understand that promises are made to make it the best possible for residents in the area, but it is going to affect the peace and the wild life we like so much around here. I know that I am only one member of this society, but I think that I would be considering moving out if it should come ahead. Thank you for you interest. Name: joel beclu Address: 25 Hardy Av ocean shores north 2483 IP Address: cpe-203-51-107-123.lns11.cht.bigpond.net.au - 203.51.107.123 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3452	Project Website Submission	21/10/2010	Online Submission from Zoe Allaway (support)	To whom it may concern, I attended the Splendour in The Grass 2010 Music Festival in Woodfordia Queensland. It was the most well-organised, fun, clean, safe and generally amazing festival I have ever attended. Being quite a festival fiend this is saying a lot. Although the premises at Woodford was ample, it was not easily accessible, very spread out and not quite big enough to accomodate the 30,000 attendees. The town of Woodford sold out of general supplies, particularly gumboots, throughout the 3 days and in such a short period would at no other time experience such a profitable margin. The cash flow was enormous as people always require supplies so why would this not aid Byron Bay.

The site at North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a quality venue for young people in our region.

North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other

P3453	Project Website Submission	21/10/2010	Online Submission from renee kneller (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures. Let?s look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment. Let?s get the creative juices flowing in the Northern Rivers. Bring Splendour home, let?s get on with the job of creating exciting training and employment opportunities for our young people. Name: renee kneller Address: 5 magenta drive coolum beach IP Address: cpe-121-223-84-55.inse2.woo.bigpond.net.au - 121.223.84.55 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P3454	Project Website Submission	21/10/2010	Online Submission from Telia Kneller of Splendour in the grass (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. I think that events like this help people grow, experience North Byron Parklands and all that our area has to offer. The North Byron Parklands proposal would definitely be a growing experience for me.

P3455	Project Website Submission	21/10/2010	Online Submission from Kristy Turnbull (support)

Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal.

I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet.

The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development.

P3456	Project Website Submission	21/10/2010	Online Submission from Kim Mihaljevic (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coast's existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas.

Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

P3457	Project Website Submission	21/10/2010	Online Submission from kelsey Phillips (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth will be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a "resource centre"™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. BYRON was the best splendour in the grass i have ever been too!! Name: kelsey Phillips Address: unit 6, 13-15 illawong street, chevron island QLD 4217 IP Address: d122-107-4-222.rdl4.qld.optusnet.com.au - 122.107.4.222 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3458	Project Website Submission	21/10/2010	Online Submission from Sophie Rallings (support)	North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: Sophie Rallings Address: 166 Acanthus Ave Burleigh Waters IP Address: d58-106-22-139.rdl801.qld.optusnet.com.au - 58.106.22.139 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3459	Project Website Submission	21/10/2010	Online Submission from Meggen Matthews-Frederick (support)	As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force. Name: Meggen Matthews-Frederick Address: 233 Eukey Rd Stanthorpe QLD, 4380 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3460	Project Website Submission	21/10/2010	Online Submission from Oren Shemesh (object)	Please hold this project ! We live in a peaceful, quiet, green and ecological place, please do not ruin our little peace of heaven. Byron already has one permanent festival site at Tyagarah. We do not need another one. The nature reserve at Billinudgel will be under threat. The wildlife will suffer from noise light and pollution. There is already a state government decision to protect this unique area. Thanks a lot Name: Oren Shemesh Address: 28 Rangal Rd. Ocean Shores, NSW IP Address: 123-243-245-89.tpgi.com.au - 123.243.245.89 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3461	Project Website Submission	21/10/2010	Online Submission from Dolit Gliksman (object)	Hi, We live in a peaceful, quiet, green and ecological place, please do not ruin our little peace of heaven. Byron already has one permanent festival site at Tyagarah. We do not need another one. Name: Dolit Gliksman Address: 28 Rangal Rd. Ocean Shores, NSW IP Address: 123-243-245-89.tpgi.com.au - 123.243.245.89 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3462	Project Website Submission	21/10/2010	Online Submission from Tamara Jones (support)	Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations. The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the âsustainableâ development

basket.

With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.

I live close by and would love to see a local event come back to the area to sustain business, tourism, and employment in the area.

P3463	Project Website Submission	21/10/2010	Online Submission from Libby Gardiner (support)	Splendour in the Grass needs a new permanent home, and the site at Byron Bay would be perfect! Not only is it more accessible for keen music goers like myself, it's location and site size will attract many more music lovers, bringing more business to the community and allowing the chance for more brilliant bands to come to the festival. Not only are festival goers going to enjoy the ease of access to the location at Byron, but they will do wonders for the local businesses. In addition, the Parklands proposal will see a vegetation rehabilitation program that will result in the planting of thousands of trees, not only important to carbon offset the journey of festival goers, but to ensure the rehabilitation of the wildlife corridor which has been seriously neglected and degraded in the past. Furthermore, Splendour will provide job opportunities in regard to this program, further boosting the community.

Many think Splendour is just for young people, but its definitely an all ages event where young and old alike can gather and bond over music. The Splendour festival 2010 had one of the most impressive lineups of the year, second only to the enormous established festivals of Britain, offering a serious music experience to all music lovers.

Splendour in the grass was the best experience of my life, and I'm without a doubt going to make it my annual festival. If Splendour had it's own place, it would be, I'm sure, even better than it was this year! What is there to lose? Nothing! Let Splendour have it's home! Byron Parklands are the ideal location for Splendour.

P3464	Project Website Submission	21/10/2010	Online Submission from Amber Shadlow (support)	As soon as I started reading about this proposal I had an instant realization of the benefits North Byron Parklands would bring to our local economy but also to my family. After living in byron bay for 20 years and having to move interstate to work i am surprised that this kind of event is being veto-ed? Name: Amber Shadlow Address: 6 union street taringa qld 4068 IP Address: 123-2-30-196.static.dsl.dodo.com.au - 123.2.30.196 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3465	Project Website Submission	21/10/2010	Online Submission from Gary Kent (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of

stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world's best environmental practice.

P3466	Project Website Submission	21/10/2010	Online Submission from Lauren McIvor of laurenmcivor@gmail.com (support)	Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

Splendour is one of the nations best loved festivals in one of the nations most beautiful

areas. The Byron area offers the perfect combination of beach and town life enabling patrons of the festival to gain a lot more from their weekend experience.

That the organisers have had many years experience putting on Splendour in Byron Bay, I feel confident that all will be done to make this new home for splendour environmentally sound and I wel rounded experience for all envolved.

P3467	Project Website Submission	21/10/2010	Online Submission from Chloe Swan (support)

The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. Itâ™s exactly what we as a community need.

With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise âœœon-groundâœœ what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities.

You only have to look around the Byron community when a festival or an event takes place

to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling.

P3468	Project Website Submission	21/10/2010	Online Submission from Sarah Phelan (support)

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble.

While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible.

P3470	Project Website Submission	21/10/2010	Online Submission from cameron priem (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the 'Splendid Initiative' offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. Name: cameron priem Address: PO Box 1427 Springwood, QLD, 4127 IP Address: 203-206-143-38.perm.iinet.net.au - 203.206.143.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3471	Project Website Submission	21/10/2010	Online Submission from Jared Bruning (support)	Splendour in the Grass is an amazing mix of music, arts, food and culture that places on strong emphasis on the environment which is what the Byron region is all about. North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire. I'm in full support of the proposal to have Splendour move to North Byron Name: Jared Bruning Address: 2/42 Shakespeare St Coorparoo QLD 4151 IP Address: - 115.131.38.116 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3472 Project
Website
Submission 21/10/2010 Online Submission from Emily
Hetherington of University of
Queensland (support)

To whom it may concern,

We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it.

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

Events are really important for young people today. Coming together is not just about getting drunk and partying. It's about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

Sincerely

Emily Hetherington

P3474	Project Website Submission	21/10/2010	Online Submission from Sean Singh of Luna Magazine (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome.

Splendour in the Grass organisers have made the effort to evaluate the event BEFORE it begins, in terms of its impact on the environment. Very few other events will evaluate this impact beforehand, and will rather do a reflective post-event evaluation. If preservation is the goal, then Splendour is one of the few events that can utilise the space in a manner appropriate to the preservation of the environment, in terms of aesthetics, and the importance of the flora and fauna!

The crowds that Splendour attracts too, are as a majority environmentally aware, and I can say almost without doubt that I saw almost no intentional environmental abuse whilst there (and there were native animals and plants all over both the camping site and the actual event site).

Splendour goes out of its way to ensure minimal environmental impact. Considering how quickly it sells out and the abundance of people that it attracts, this can only help NSW economy, and help the tourism of the Byron shire- all whilst helping maintain the local environment.

P3475	Project Website Submission	21/10/2010	Online Submission from Sy Milman of Dip Cafe (support)	A region that has been built on alternative lifestyles and also entertainment would be compromised by a politically based restrictive movement against such things as the music festivals and cultural activities that bring such diversity and obvious economic benefit to the community at large as every external dollar brought into the northern rivers is then spread equally throughout the community. To lose Splendour would be such a significant loss to the community, visitors and businesses. Name: Sy Milman Organisation: Dip Cafe Address: 774 Friday Hut Road Possum Creek NSW 2479 IP Address: 114.72.251.132.optusnet.com.au - 114.72.251.132 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3476	Project Website Submission	21/10/2010	Online Submission from Monroe Sorrentino (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north

coast and North Byron Parklands should be approved because it will be a major employer in the area.

How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands.

P3477	Project Website Submission	21/10/2010	Online Submission from Andrew Gordon (support)

The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â€œsustainableâ€ development basket.

When you consider that the North Byron Parklands team has planted over 7,000 trees

across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land.

Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead.

P3478	Project Website Submission	21/10/2010	Online Submission from gary wright (support)	North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important. Name: gary wright Address: 7 glen court, worongary qld 4213 IP Address: cpe-124-185-139-81.lns10.cha.bigpond.net.au - 124.185.139.81 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3479	Project Website Submission	21/10/2010	Online Submission from Robbie Hill (support)	The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably. North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative

industries. This alliance will provide the community with world class training and work experience opportunities.

P3480	Project Website Submission	21/10/2010	Online Submission from Jessica Lilly (support)

I am currently a student at Griffith University in Brisbane, Queensland studying Event Management and International Tourism.

Having grown up in the area i have realised how truly beautiful it is and how lucky I was to be brought up there. Keeping Splendour in the Grass in Byron Bay I believe is one of the best ways to support the local economy and keep the tourism dollars flowing in. Splendour has provided a positive and desirable reputation of the Byron shire and surrounding areas on both a national and international level.

Part of the reason I decided to attend university and the majors I have chosen of Event Management and International Tourism is the result of being exposed to the wonderful events that North Coast of NSW can showcase, mainly Splendour in the Grass. It would be such a shame to see it moved permanently to a different location, when it was one of the reasons behind why I am so inspired and dedicated to my studies.

There have obviously been many great reasons as to why to keep Splendour in the Grass in

Byron Bay, such as investing money into a bigger location and providing environmental sustainability for the new venue. However, the most important part I believe is the motivation it can provide for the young people through witnessing the success of local events, such as Splendour. It can encourage them to become involved in positive involvement in the local community and if they set their minds to it, can also be successful in any paths they choose (even if they believe coming from a smaller town can hinder their opportunities).

P3484	Project Website Submission	21/10/2010	Online Submission from Susan Bignell of individual resident (object)	I STRONGLY OBJECT to this proposal. I moved here from Melbourne a year ago for the peace and quiet and nature - now I find a proposal to bring in huge crowds 5 times a year plus other events. Compared to Victoria the infrastructure here is very poor - it can not even sustain the current population let alone thousands of weekend/festival trippers. They will be a threat to the very few nature reserves here. These events should be held well away from residential populations such as Woodford in Queensland. Its just outrageous that it is even considered! And the main argument is materialistic -the so called benefits of the money it will bring. When will this culture learn to value other things above money? There is already a

huge festival here and numerous back packers and tourists bringing social problems via alcohol . If this proposal gets the go ahead it will be the beginning of the end for this shire - the very qualities that bring residents and tourists to this area will no longer exist. It will also be so disrespectful to the residents who live here , pay rates and work for the community - their wishes will be ignored for the sake of festival organizers + their profits...What is more important ? The people who live here or a few entrepreneurs wanting to exploit the area for their own gain?

P3485	Project Website Submission	21/10/2010	Online Submission from Sophie Dixon (support)

Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â" young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

Finding the tourist dollar is becoming more difficult than drawing blood from a stone. 'Cultural' Tourism is what the punters want - and there is no better drawcard for this tourist dollar than locations like Byron Bay with its history of environmental awareness and Festivals like Splendour - with its blend of social conscience and international renown. Any opportunity to put these things together, environment, harmonious social interaction and international pedigree would be grabbed by both hands by anyone savvy enough to recognise the dollar signs. I hope that NSW is clever enough to see the incredible potential - now and for years to come.

P3486	Project Website Submission	21/10/2010	Online Submission from alasdair shurman (support)

Understandably all residents of the Byron Shire will be concerned and vocal about their area. A particular minority have been especially determined to voice their opinions that are not in support of furthering the Splendour experience in the shire, and that group is certainly entitled to that perspective. However given the extent and transparency of the Splendour team's proposal it is clear that they only have the interest of the public in mind. They are clearly not engaged in some sort of cover up that aims to turn Byron into a yearly party mecca. Rather they are providing a safe, eco-mindful and sustainable festival that brings nothing but positive exposure to the town. I work with young people in the shire and the general consensus is that they feel their choices are undermined by the council when it comes to the issue of the festivals. They have suggested that many of the older generations moved here (not all of course as there are many who long time shire residents) under the lure of a free-thinking community that encouraged the expression of the arts. To be told that a festival of such high quality can not be held in the area is taken as an insult and a contradiction of these people initial motivations in the area.

Please consider the positives of Splendour returning to Byron.

Thanks.

P3487	Project Website Submission	21/10/2010	Online Submission from Baalachi Villalobos (support)

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

P3488 Project
 Website
 Submission

21/10/2010 Online Submission from Sarah
 Brydson (support)

The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that.

The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment?

P3489 Project
Website
Submission 21/10/2010 Online Submission from Daniel
Denton of none (support)

It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being

With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise âœœon-groundâœœ what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities.

A lot of my friends are moving outside of Byron Bay to bigger and better opportunities. It would be great if we had those opportunities offered to us closer to home.

P3490	Project Website Submission	21/10/2010	Online Submission from jonno howell of Byron Bay Live (support)

To NSW Department of Planning,

Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal.

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

As a small business owner, I suffered financially this year due to the temporary movement of Splendour to Brisbane. Bring it Back!

Please consider the North Byron Parklands proposal

P3491	Project Website Submission	21/10/2010	Online Submission from Janis Murillo (support)

The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a "sustainable" site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government.

The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

Bring Splendour back home to Byron, it's the only place for it to be...

Cheers...

P3492 Project
Website
Submission 21/10/2010 Online Submission from Syndi
McKewen (support)

It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region.

It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me.

P3494	Project Website Submission	21/10/2010	Online Submission from Araluen Grady (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling.

P3495	Project Website Submission	21/10/2010	Online Submission from John Watson (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial. P3496	Project Website Submission	21/10/2010	Online Submission from Caroline Desmond of Consultant (support)	The proposal put forward has genuine integrity behind it. There is the commitment to work with the local community to make it work for everybody - the individual communities and towns in the nearby area, the businesses and the residents. North Byron Parklands has shown that they do and will take responsibility for this project's place in the community. I am a consultant with the project. When it was first suggested to me that I consider working with the project I was at first apprehensive. A part of me believed some of the biased and misleading commentary in local media. Fortunately I gave the project the benefit of the doubt and have come to know the team to be highly ethical and moral individuals who take great care in their work. When a project of this magnitude is proposed it has implications for the surrounding community. From my experience the majority of the surrounding community support the proposal or at least think that, on balance, it should go ahead. I have spoken with hundreds of individuals and groups. The North Byron Parklands team will ensure that the project is of benefit to the local community. They will listen to any local concerns and actively work to address any concerns. There is no valid reason why this project should not be approved. Please allow this for the benefit and future of the Northern Rivers region. As a mother I ask this, as a professional I ask this and as somebody who needs cultural

events in my life I ask this.

Thank you.

Sincerely

Caroline Desmond

P3497	Project Website Submission	21/10/2010	Online Submission from Amy Hawkins of Student (support)	The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. Splendour weekend in Byron is my favourite weekend of the year, not only for the festivals, but I get to relax for a few days in Byron, shop in the boutiques, and enjoy a nice lunch Name: Amy Hawkins Organisation: Student Address: 67 Whelan Avenue Chipping Norton NSW 2170 IP Address: cpe-58-172-19-246.lcz1.clt.bigpond.net.au - 58.172.19.246 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3498	Project Website Submission	21/10/2010	Online Submission from Nicholas Fergus (support)	North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldn't go ahead. North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for

use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

P3499	Project Website Submission	21/10/2010	Online Submission from Megan Hodsdon (support)	Bring Splendour back to Byron! The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone...Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display and increase tourism and appreciation for this beautiful area in the future. I say yes, to this proposal. Name: Megan Hodsdon Address: 16 Frobisher StAshgrove QLD 4060 IP Address: c122-108-252-168.kelvn3.qld.optusnet.com.au - 122.108.252.168 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3500	Project Website Submission	21/10/2010	Online Submission from Ben Daley (support)	One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner.

As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

P3501	Project Website Submission	21/10/2010	Online Submission from Paul Heard (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. \$55,000 compared to NSW's average annual income of \$71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy.

P3504	Project Website Submission	21/10/2010	Online Submission from Meran Bull-Watkins (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community. As a local youth and music enthusiast, I really treasure the three amazing and unforgettable days which Splendour allows us to enjoy! It is such a privilege to see some of my favourite

bands and most talented Australian and world-wide acts in the area which I grew up in. Not many people get that opportunity and I can honestly those three days are what keep me going through the year!

Although this year's Splendour was admittedly AMAZING, the whole palaver of finding lifts, camping equipment etc and getting it all to Woodfordia was really stressful and it put a lot of people off.

I really hope that Splendour can stay in Byron Bay, it really is a great way to get publicity about our little town out there into the world.

Please, please, please accept the proposal!

P3505	Project Website Submission	21/10/2010	Online Submission from Amelia Axford (support)

The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ€™s show the way Australia. Bring Splendour home!

In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA's expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

P3506	Project Website Submission	21/10/2010	Online Submission from Liam Morgan (support)	With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light. Name: Liam Morgan Address: 2 The Promenade IP Address: cpe-124-186-182-16.lns6.woo.bigpond.net.au - 124.186.182.16 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3507	Project Website Submission	21/10/2010	Online Submission from Brooke Riley (support)	The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest

rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

P3508	Project Website Submission	21/10/2010	Online Submission from Michelle Davie of N/A (support)	With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity.

The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

Splendour is one of the most relaxed yet engaging festivals that allows people of all ages to experience some of the most amazing music acts and talents in Australia. It is some that is rare in these days. The people who go to Splendour respect the locals and locality, as well as each other.

I think no other area has the opportunity to benefit so well from holding the Splendour festival than North Byron. There is an opportunity for people from around Australia to come and visit Byron and see what a beautiful place it is. The economic benefit of the festival, and the ongoing benefit of tourism to the area is something that Byron should not turn away from. Splendour is taking measures to ensure that the festival is environmentally friendly as well.%0

P3509	Project Website Submission	21/10/2010	Online Submission from Jenna Leighton (support)	There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth. Splendour in the grass is an amazingly well organised festival which gives young people from all over Australia (and the world) an opportunity to come together and enjoy the parts of life that are sometimes taken for granted and the chance to escape from their busy hectic lives for just a few days - music, goodtimes, good company and the amazing natural landscapes of the world around us! Name: Jenna Leighton Address: 40 Sassafras Street Perth Tasmania Australia IP Address: cpe-58-169-67-38.lns4.bat.bigpond.net.au - 58.169.67.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3510	Project Website Submission	21/10/2010	Online Submission from Bianca Flanagan (support)	Not only have the North Byron Parklands organisation developed what must be considered world's best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best

practice, if not worldâ€™s best environmental practice.

P3511	Project Website Submission	21/10/2010	Online Submission from Alex Semmens (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. Name: Alex Semmens Address: 40 Corveth Street Thuringowa CentralTownsville QLD 4817 IP Address: cpe-123-211-103-127.lnse4.cha.bigpond.net.au - 123.211.103.127 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3512	Project Website Submission	21/10/2010	Online Submission from Mark Spillane of Bespoke Touring (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

P3513	Project Website Submission	21/10/2010	Online Submission from Tony Kocek (support)

It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being

When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared

pasture land.

P3514	Project Website Submission	21/10/2010	Online Submission from Tim Mullaly of emitch (support)	North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands.

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

Thanks for allowing us to share our thoughts with you.

Kind regards,

Tim

P3515	Project Website Submission	21/10/2010	Online Submission from Michelle Laing (support)

The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment?

Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area.

With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer?

P3517	Project Website Submission	21/10/2010	Online Submission from Rachel Churchland (support)	Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. Name: Rachel Churchland Address: 1/48 Alma Road, Clayfield Q 4011 IP Address: d58-106-23-214.rdl801.qld.optusnet.com.au - 58.106.23.214 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3518	Project Website Submission	21/10/2010	Online Submission from Kylie Cox (support)	Lets bring Splendour back home... It is a positive event that brings so much to the region. In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force. The Byron and surrounding areas in the last twenty years have survived on the back of

tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported.

Lets bring this event back to its rightful home in the Byron shire. Our friends at Splendour are committed to the environment and the festival provides a huge boost to local economy.

Thankyou,

Kylie Cox

P3520	Project Website Submission	21/10/2010	Online Submission from Alana Daniell (support)

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

My very first Splendour in the Grass was in 2008, and held at Byron Bay. From experiencing both sides of the venues - The Belongil fields, and Woodfordia - I have come to a conclusion that nothing beats the original home of Splendour (Byron Bay). The ambience, atmosphere and location are incredible - and make the whole festival absolutely SPLENDID.

It is a very chilled location, with a magical touch.

It is easier to find accommodation in Byron Bay, than it is at Woodford - as not everyone is a fan of camping!

I do believe that re-creating a venue at Byron Bay will do very well..the space will be huge, accommodation will not be scarce, and the atmosphere will be amazing! X

P3522	Project Website Submission	21/10/2010	Online Submission from Dominic Trinajstic (support)

Personally, from living in Byron for 2 years, Splendour in the Grass was as much a cultural event as it was a music festival. It brought people of all different cultures to celebrate not just with music, but with all kinds of art.

The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

Whilst it became less and less feasible to hold the festival at it's previous site, there is no doubt that festival belonged in the Byron Shire - after all, the Byron Shire's economy is very tourist-reliant, and, as is stated above, it strongly benefits all the local businesses in Byron Bay (which, thankfully, doesn't include many multi-national chain stores - they are, almost all, completely local businesses).

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

Thank you for your time

P3523	Project Website Submission	21/10/2010	Online Submission from Doug Barclay (support)

Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal.

Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one.

Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

Whatâ€™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this.

P3524	Project Website Submission	21/10/2010	Online Submission from jade rogers of m'dore surfclub (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, ?I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a community?. (Donna Sue Sanders ? Executive Director of the Daytona State Foundation).

With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are h

P3525	Project Website Submission	21/10/2010	Online Submission from Melanie Doyle (support)

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region's creative industries, providing world class training and work experience opportunities.

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

P3527	Project Website Submission	21/10/2010	Online Submission from Luke Crowe of Health Supply Network (support)	While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. Let's look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment.

P3528	Project Website Submission	21/10/2010	Online Submission from rhiannon dew (support)	In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue.

Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward.

The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development.

P3529	Project Website Submission	21/10/2010	Online Submission from Benjamin Hannam of Glass Towers (support)	Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community. The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events.

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

P3530	Project Website Submission	21/10/2010	Online Submission from Luke Mather of Rees Pritchard Accountants (support)	In relation to employment and wages the Byron local government area has one of the State's lowest average wages, around \$31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. Name: Luke Mather Organisation: Rees Pritchard Accountants Address: 36 Wrightson Ave, Bar Beach, NSW, 2300 IP Address: remote.reespritchard.com.au - 203.45.254.225 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3531	Project Website Submission	21/10/2010	Online Submission from Kelly McCaffrey (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. Name: Kelly McCaffrey Address: 119 Beaconsfield Pde Albert Park VIC 3206 IP Address: cpe-58-161-37-89.sqlml1.lon.bigpond.net.au - 58.161.37.89 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3532	Project Website Submission	21/10/2010	Online Submission from Ian & Carolyn Keith (other)	I wish to lodge an objection to the proposal by North Byron Parklands for approval to conduct music festivals etc at Yelgun. The proposal as advertised is far in excess of any plans originally submitted to Byron Council. The intention is to obtain approval for events catering for up to 50000 people per event for up to 12 days per year, up to 10000 people per event for up to 4 days per year and other smaller events. The number of days quoted apply to the entertainment only and do not include the time required setting up and pulling the event down. A new highway was constructed in this area to divert traffic away from the local residential area but this proposal intends to put all of the traffic back onto the old highway causing major congestion and hindering the local residents from free access to and from our area on the only road available for this purpose.

It has also been quoted that the RTA, if approval is granted, intend to barricade a major exit from the Pacific Highway thereby forcing all traffic wishing to attend a concert through residential areas. Why should we have to suffer so that a private company can make huge profits and what benefits do we receive? none.

The noise from the Splendour in the Grass, when it was held in Byron Bay, could be heard up to 12 kilometers away but the residential areas near this proposed site are only about 2 kilometers away. Do we have to also have to put up with noise till 1am or 2 am for an extended period of time and be deprived of our quiet enjoyment of our properties?

The area intended to be used for car parking and camping was underwater in the recent rains and we usually experience very wet conditions when this festival is held so why would anyone want to conduct such events in a flood area or are there to be further plans submitted for other works that we are not being told about?

The site in question is an area designated as being a wildlife corridor and adjoins a Nature Reserve but no care is being paid to the animals, birds etc that live on or near the site. The Land & Environment Court has already rejected the site as not being suitable so what has changed and why is your Department now being asked to grant an approval that the local residents have already indicated that we do not want here? It is trusted that the Department will listen to reason, reject the application and take notice of those of us who have to live here.

Yours faithfully

Ian Keith

P3535	Project Website Submission	21/10/2010	Online Submission from Bernard Dalton (support)	I am in my early 40's but still love and appreciate modern alternative music. I have attended 5 or 6 Splendours. I did not attend Splendour this year (2010) because I did not want to camp at the festival. Previously, at our 'mature' age we hire an apartment in the town of Byron and enjoy the festival this way - we can do things at our own pace.. Splendour should be returned to its home in Byron IMMEDIATELY!! - I mean it. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one

considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments.

P3536	Project Website Submission	21/10/2010	Online Submission from Lisa Wickbold (support)

Living in the beautiful Northern Rivers, I can say Splendour in the Grass has always been a highly anticipated, highly regarded event. The event's reputation for leading the way with environmental causes and minimal impact to the community is exemplary and fully lend my support to bringing Splendour in the Grass back to the Byron Shire, particularly at North Byron Parklands.

Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental

audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward.

When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

Sincerely

Lisa Wickbold

P3537	Project Website Submission	21/10/2010	Online Submission from Rick Bridgman of Twobble Enterprises (support)

The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.

The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being

P3539	Project Website Submission	21/10/2010	Online Submission from oliver regan (support)	The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. What's important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Name: oliver regan Address: 5 kurrajong court east ballina IP Address: d220-236-220-28.dsl.nsw.optusnet.com.au - 220.236.220.28 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3540	Project Website Submission	21/10/2010	Online Submission from rhea cunningham of foodpro helping your bsuniness grow (support)	The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this.

Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring.

One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

Website
Submission 21/10/2010 Online Submission from David
Saltzer (support)

While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal.

North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldnâ€™t go ahead.

P3542	Project Website Submission	21/10/2010	Online Submission from Harmony Lewis (support)	I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. Name: Harmony Lewis Address: 5 Cowper Place Barden Ridge IP Address: 220-245-93-129.static.tpgi.com.au - 220.245.93.129 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3543	Project Website Submission	21/10/2010	Online Submission from Elias Harrak (support)	Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. I also believe that having the festival in Byron will be easier for commuters to travel to the festival. I'm from Victoria and the drive to and from Victoria was long and exhausting, it will benefit those who commute from Victoria and South Australia to have the festival in Byron. Name: Elias Harrak Address: 171 Bakers Rd, Dandenong North. Victoria 3175 IP Address: c122-107-253-150.eburwd9.vic.optusnet.com.au - 122.107.253.150 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3544	Project Website Submission	21/10/2010	Online Submission from Gaenor Walker (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc. Name: Gaenor Walker Address: 32/158 Woogaroo St, Forest Lake, QLD, 4078 IP Address: 203-206-170-95.perm.iinet.net.au - 203.206.170.95 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3545	Project Website Submission	21/10/2010	Online Submission from veleta newman of qford (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses. Name: veleta newman Organisation: qford Address: 31 oringa streetshailer park qld 4128 IP Address: mail.qford.com.au - 125.7.43.58 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3546	Project Website Submission	21/10/2010	Online Submission from Catherine Webster (support)	The North Byron Parklands idea is inspiring for young people. There is precious little around, particularly in regional areas, which is inspiring for them. The proposal is all about the environment, events, culture and celebration. It's about young people and being young. This is really important. Name: Catherine Webster Address: 197 carrington rd, coogee IP Address: - 149.171.104.216 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3547	Project Website Submission	21/10/2010	Online Submission from Matthew McCormack (support)	As a West Australian I have done the journey twice to Splendour in the Grass. Once in 2007 to see Australia's premier festival to Byron Bay. Again I did the journey with friends in 2010, this time to the Woodford site. My experience was great, but still totally different. My 2007 experience was filled with a short bus through glorious country side from Gold Coast Air Port to Byron Bay. Along the way viewing the colours and hills, quite a different sight to home (Perth). With very little effort we arrived in town, visiting the sites and sounds. Even meeting a few friendly locals along the way. Our 2010 experience in Woodford was a bit different. We traveled from Brisbane Airport to Caboolture on the most expensive and long train known to man. We arrived in the rain, a scene reminiscent of Jurassic Park. We didn't let this bother us as we were so excited for the bands and experience. Our days involved huge treks, hot days and cold nights. One day in particular we spent 4hrs going in and out of town to get boots. Under any other circumstance (that mild inebriation) this would have been very frustrating.

Organization was not a factor, in what made transport difficult. Simply too many people, driving on single lane roads, with no slip lanes or additional entry points were the problems. My comments are not intending to just be 'Splendour was better in Byron', but it's hard to avoid the point. The security team responsible for the exit strategy of Splendour in 2010 was flawless. As far as I am aware very few people missed flights, despite having very early departures.

So why should Splendour come home to Byron:

While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas.

Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

My Additional Thoughts:

- Access: Much easier for travellers to get to and from Festival - Town - Airport
- Accomodation: Very little need for residents to put people up in farms, like they did in Woodford.
- Monetary: Due to access to town, a huge amount of money would be made by local industry.
- Green: Festival goer's have a positive attitude towards the environment, especially in the case of Southbound, Splendour, Falls, Lorne and Meredith festivals. We aren't asking for

Byron to host a Big Day Out or Parklife.

- 2010: This festival promoted a huge amount of local business internally (shops, stalls, food outlets).

If the issue is the cost to the environment / community, Splendour in the Grass would need to be willing to offset this. Byron Bay as a community should consider whether it lost out on tourism income in 2010, and what this money could have gone towards in terms of benefiting the community.

For any more comments or a proper documentation of the 2007 and 2010 festivals feel free to email me at matthew.mccormack@westnet.com.au.

Online Submission from Claire
Parken (support)

ATTN: NSW Department of Planning

I would like to express my support for the North Byron Parklands Project.

The North Byron Parklands Project will impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of the proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

Given the level of expertise of the event operators that own the North Byron Parklands, it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner.

Finally, I believe the proposal will ensure that the Byron Bay area continues to offer a celebration of its unique culture to the wider community.

P3549	Project Website Submission	21/10/2010	Online Submission from nick stillman (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality.

This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

P3550	Project Website Submission	21/10/2010	Online Submission from Katie Sparkes (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region's creative industries, providing world class training and work experience opportunities. Name: Katie Sparkes Address: 2/13 McCauley St, Thirroul, NSW, 2515 IP Address: - 203.49.160.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3551	Project Website Submission	21/10/2010	Online Submission from John Chandler of Queensland Health (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy.

In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue.

P3552	Project Website Submission	21/10/2010	Online Submission from Alison Giles ()

To whom it may concern,

I had the absolute pleasue of attending Splendour in the Grass in 2008 in Byron Bay. I thank you in advance for reading my sprawling, but non the less valid submission in favour of Byron Bay and Splendour in the Grass - a match made in heaven:

I wish i had the time to write about ALL the reasons for holding Splendour in the Grass in Byron, but one main reason will hopefully get your attention:

Whilst i was in Byron for splendour - do you know what i did? I stayed in a Privately

operated beach house accomodation in Byron by a Byron Bay born and raised couple, i ate at wonderful little cafes owned and operated by locals, i shopped in the lovely little boutique shops who were staffed by Byron locals, i used Byron Bay's own transportation facilities to get about whilst in Byron, and do you know what else??? I brought my friends along, who all did the same!!!

Since then i have been back and forth to Byron Bay, frequenting the little spots and shops i came to love whilst at Splendour in the Grass in 2008 - and MORE! And ill keep doing so!

What a fabulous oppertunity for the tourism industry and the locals alike up there in the most beautiful spot in the world! I believe the Splendour creates jobs for the locals who are all passionate with the Byron Bay area - how can this be a bad thing??!!

Not only do the patrons bring business to Byron, but the planning and holding of an event (which is WORLD FAMOUS ill have you know! I have toured the US and they know about it there - can you believe it!!) such a Splendour in the Grass creates jobs and employment as well.

This reason alone is why Splendour in the Grass SHOULD be held in BYRON BAY!

There is a huge potential to harness young and old people alike's talent and hard work to create an industry!

So i say "here here" t

P3553 Project
Website
Submission

21/10/2010 Online Submission from Virginia
Lennard (support)

North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy.

P3554	Project Website Submission	21/10/2010	Online Submission from Amy Barnett (support)

Letâ™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ™s get on with the job of creating exciting training and employment opportunities for our young people.

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

Splendour belongs in Byron, it was extremely missed this year by many of the local residents and also by those who travel to bryon not only for the festival but get to experience Byrons beauty whilst there. Byron has excelent facilities for camping and other

accommodation bringing alot of income for not only the local businesses in byron bt also surrounding areas including lennox and ballina. i sadly missed splendour this year due to its move from byron up to woodford. i was wishing to make it home for the couple of days due to my recent move to brisbane and would have loved to see not only the awesome line up but my friends and family whilst down there. Splendour belongs in byron and should be brought back home!!!

P3557 Project
Website
Submission 21/10/2010 Online Submission from PAUL
WILKS (support)

Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

(support)

Re: Festival Site in Byron Shire.

22/10/2010

Hi

I'm for this site.

I am a 48 year old husband & father. I live in Brunswick Heads about 5 km? from the site.

I think it will be good for the area & the people. There are a lot of people here & in Mullumbimby & across Byron Shire who get work at these festivals. It's great to see them with some funds & stories to tell. The market stall holders talk about the upcoming festivals as though it's Christmas. They are a lot of work for them & is one of the few times they receive just rewards. This money gets spent here on living.

I've only put in this submission as I got in my letterbox, a flyer from ?The coalition for Festival Sanity?. I have never heard of them. Sounds like one person. The name seems a total misnomer. The address is one of the furthest north in Ocean Shores. It seems that this is a flyer of self interest & hidden agendas. Maybe they're thinking they live the closest & so this must stop. It seems there place is away as to be not so impacted. I feel festival sanity would be to approve the proposal.

The points on the flyer I disagree with in entirety. He states that the proposal flies in the face of the State Governments own planning decisions to protect this unique site.

I tend to think that a part time site for these events could be what's needed. I do not have concerns about disturbances to wildlife or damage to the environment. I feel confident that animals would move away over the slow build up to the festival & move back if need be. I don't believe there would be an exponential increase in road kill, or damage to the site.

I know local people who work at & go to these festivals. They are all good caring people. I also have known interstate & met international people who come to the region for these events. This is a bonus to have these friends visit.

I go to, perhaps, 1 a year. I have never felt threatened, had people express this to me or seen acts of violence. I have heard of isolated incidents & seen security expel people. The alcohol at these events is not overly concerning. I think they are well policed. I also have faith in the older patrons helping out the younger ones with guidance when needed.

The flyer also states that Brunswick Heads, my town, would be transformed into a permanent party town. This did not occur to me & I do not share this concern.

I am certainly not all doom & gloom for the people, visitors & the young people of our society. I feel that a lot of benefit will come from this. It seems to me an opportunity worth going for. Don't forget the art & entertainment.

I love living here & sharing this area with others is ok by me. Not the "shut the gates, I'm here now" mentality. If this is to be approved or rejected, I won't lose any sleep.

I have not campaigned either way or been contacted by anyone campaigning for this.

Good Luck.

P3559	Project Website Submission	21/10/2010	Online Submission from Peta Ballis (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ€™s show the way Australia. Bring Splendour home! Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

P3560	Project Website Submission	21/10/2010	Online Submission from Joel Moore (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

P3561	Project Website Submission	21/10/2010	Online Submission from Katherine Bridge (support)

The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this.

North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands.

P3562	Project Website Submission	21/10/2010	Online Submission from Jessica Thomson ()

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue.

With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.

Byron Bay is an amazing town. And having been to Splendour at Byron and Woodford, I can say that the spirit that the town brings to the festival is unbeatable. The research and

P3565 Project
Website
Submission 21/10/2010 Online Submission from Liz
Whitbread (support)

The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported.

North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

Events are really important for young people today. Coming together is not just about getting drunk and partying. It's about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

P3566 Project
Website
Submission 21/10/2010 Online Submission from Angela
Collins of the nobodies (support)

From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understorey of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understorey to regrow and which will provide habitat for many vertebrate creatures.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking,

and create a sense of community.

P3567	Project Website Submission	21/10/2010	Online Submission from Frazer Watson (support)

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve.

P3568	Project Website Submission	21/10/2010	Online Submission from maria paterson (object)

I strongly object to the Spendour in the Grass festival site proposal.

We are long term residents of this area, having raised a family here. living in many different areas of the Byron Shire. I object to the Splendour in the Grass festival on the following grounds.

Natural habitat and flora fauna

This area we live in, Brunswick Heads, Ocean Shores, and Yelgun is one of the most fragile and ecologically diverse in the shire, with many of the last populations of species endemic to this area, We even have the Mitchell rainforest Snail in our backyard, which is 1km from the Festival site. The wildlife corridor that runs through Jones road at the festival site, is extremely important to the survival of a lot of the species of this area. Development in this shire has cut off many of these natural corridors and housing populations cutting into the natural areas. I have seen everthing from Koalas ,swamp wallabies, regent bower birds and other species in this area. The Billinudgel nature reserve was formed because of its high conservation status in this state. The area in question has a 7K habitat zoning, which should not have any development of this scale near it. The effects of this population moving through the reserve which has a trail leading from Jones rd to the beach.

Social impact & infrastructure

Ocean Shores is a family friendly small community. We are very different to Byron Bay and its transient party nature, we raise our children here and don't have holiday house rentals on every st. We have a low key holiday rental area on the beach and South Golden and New Brighton. The effects that a population of mainly younger adults will have on this quiet residential area will be horrendous. We know how splendour effected residents at Sunrise beach estate in Byron when splendour was there and that was only 17,000 patrons, this proposal will allow a 35,000 with a max of 50,000 eventually. Where will all these people stay.? The answer, local Neighbourhoods people will rent their houses out, and they wont be legal, they already have that problem in Byron with party goers in residential streets making it impossible for people to lead their daily lives. Vans will be parked in any space they can, sth golden beach being the most obvious where there is a couple of toilets and a shower. Not everyone can stay in Bryon.

We do not have the amenities to cope with this size population. There will be overspills everywhere. So not only do we have the chance that our houses next door will be rented out to party goers, but our kids will be confronted by the drug and booze fest in our streets as well, and yes we have seen this in Byron Bay when splendour was on. You cannot account for the behaviour of 35,000 young adults.

Saftey

How are you going to protect the lives of all those young adults at the most dangerous beach in the shire, South Golden Beach, we have one lifesaver on duty at Christmas!

Where the trail come out of Billinudgel nature reserve from the festival site is about 1km north of Sth Golden Beach, There is no patrols up there..

I do not want to see this development at this site, it is totally unsuitable and goes against the zoning and protections of this land. It has much more value in its conservation status, please do not approve this.

P3569	Project Website Submission	21/10/2010	Online Submission from Anne Reynolds (support)

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

P3570	Project Website Submission	21/10/2010	Online Submission from James Menzies (support)

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book.

The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

P3571	Project Website Submission	21/10/2010	Online Submission from allira wyles (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.

P3572	Project Website Submission	21/10/2010	Online Submission from Oscar Clark-Ryan (support)

The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

P3576	Project Website Submission	21/10/2010	Online Submission from Jake Roden (support)	On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

Tourism is very important to the north shore, and without it, I doubt that Byron and the

surrounding areas would be the place they are today. It's not just the jobs that tourism creates, but also the influx of income (and different cultures!) that is vital to the development of local economies.

Not to mention that the 'Splendour in the Grass' festival is an iconic part of Byron's recent cultural history and integral to the development of the local music scene. It would be a shame to lose that to other, more willing, areas.

P3577	Project Website Submission	21/10/2010	Online Submission from Jessica Cameron (support)	So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. Name: Jessica Cameron Address: 210 James Street, New Farm, QLD IP Address: 175.32.250.252.optusnet.com.au - 175.32.250.252 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3578	Project Website Submission	21/10/2010	Online Submission from Bridget Rusk (support)	To Whom it May Concern, I am writing to show my support of the North Byron Parklands proposal. As someone who works in the Australian music industry, and a supporter of the arts, I believe this proposed site represents a major step forward in our cultural arts scene. The creative arts sector contributes over \$190 million to the local economy. This region has a long history of hosting events and has seen the creative industries sector become a strong regional employer and significant income generator. This proposal will ensure that the Byron and Northern Rivers region retains and attracts artists of all disciplines. These communities have been declining in Byron Bay in particular.

The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade and, in my opinion, are the most environmentally and socially conscious festival organisers in the country. Holding events requires a sound understanding of a whole range of logistical and safety aspects. This team have a long history in successfully managing important event aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

I sincerely hope you approve this proposal. Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands.

Thank you for your time.

Kind Regards,

Bridget Rusk

P3582	Project Website Submission	21/10/2010	Online Submission from Lara Keating (support)	There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that donâ€™t require employees. North Byron Parklands will provide many new jobs for the young people in the community. There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that donâ€™t require employees. North Byron Parklands will provide many new jobs for the young people in the community.

I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

Bring splendour back to where it should be for both Byron Shire and for the growth of Splendour!

P3584 Project Website Submission
21/10/2010 Online Submission from Shelley Tregea (support)

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P3586 Project
Website
Submission 21/10/2010 Online Submission from Tess
Laughton (support)

As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

I attended Splendour 2009 and it was one of the cleanest/tidiest festivals I have attended. I have no doubt that Splendour organisers will work with the Byron Parklands to ensure it stays true to protecting the environment.

P.s I also had the best weekend of my life that weekend and would hate to see Splendour lost!

P3587	Project Website Submission	21/10/2010	Online Submission from Fearghal Shannon (support)	I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.

P3588	Project Website Submission	21/10/2010	Online Submission from Leanne Comino of Somerville House (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. Please bring it back. Its so much easier to go to and so many of my friends will go again if its in this loaction. P3590	Project Website Submission	21/10/2010	Online Submission from Matthew Burns (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ€™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â€œI learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ€™. (Donna Sue Sanders â€œ Executive Director of the Daytona State Foundation).

There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals.

P3591 Project
Website
Submission 21/10/2010 Online Submission from Mitchell
Thomas (support)

With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative.

Most of the businesses within the Northern Rivers and Byron Shire are sole traders and do not offer any employment opportunities to the community. Bringing Splendour in the Grass festival back to Byron Bay would result in North Byron Parklands offering many new employment opportunities for the residents in the region.

The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

Splendour belongs in Byron Bay, it started there and there is no reason it shouldn't continue to take place there. You can argue that Splendour is a part of Byron Bay or Byron Bay is a part of Splendour but either way, the two go hand in hand together and Splendour should be returned to it's rightful home.

P3592	Project Website Submission	21/10/2010	Online Submission from Warren Swanston (support)

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

Too many people are forced to look outside Byron for employment opportunities. The North Byron Parklands proposal offers ample opportunities and will surely make the locals very happy.

How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it.

People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love.

Australia needs a sense of youth culture, and this is a great promotion of this. This

commitment from Gov't will be reflected with youth appreciation of govt, it will also have longer term effects on tourism and the economy. The youth of Australia needs music!!

P3593	Project Website Submission	21/10/2010	Online Submission from Lucinda Mithen (support)

To Whome this should concern,

I have been to the Splendour in the Grass Festival several times in the past years. I am an "older" fan of this festival and believe it should continue. I have observed the "younger" crowd and find them well behaved and conscientious. Everyone comes to the Byron Shire for different reasons but the Splendour festival brings music lovers together. This is a winter festival that many people look forward to and helps us break up the winter blues. The festival also exposes younger people to the Byron Shire and to eco-friendly concepts. This is a Good Thing!

While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.

Please allow the North Byron Parklands to become the new home of the Splendour in the Grass Festival. It really is important.

P3594	Project Website Submission	21/10/2010	Online Submission from Sharda Strathearn (support)

Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire.

With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light.

We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal.

P3597	Project Website Submission	21/10/2010	Online Submission from Mark Strugar of Scene Magazine/Junior Magazine (support)	North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more

than 25 nest boxes for resident fauna.

One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives.

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

P3598	Project Website Submission	21/10/2010	Online Submission from Rachel Murphy (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a "resource centre"™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It's up to us as adults to decide that we want to support venues that support young people. Name: Rachel Murphy Address: 54 Petsch Creek Road Tallebudgera Valley 4228 QLD IP Address: proxy5.eq.edu.au - 203.10.121.84 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P3599	Project Website Submission	21/10/2010	Online Submission from Melissa Chenery of John Watson Management (support)	This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site. Name: Melissa Chenery Organisation: John Watson Management Address: 46 Buckingham Street Surry Hills NSW 2010 IP Address: cpe-58-173-20-236.bmzq1.clt.bigpond.net.au - 58.173.20.236 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3600	Project Website Submission	21/10/2010	Online Submission from michelle CABLE (support)	The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region. Name: michelle CABLE Address: 10a knotts close grafton nsw IP Address: - 121.217.109.21 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3601	Project Website Submission	21/10/2010	Online Submission from Duncan McBride (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible. Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal. There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that donâ€™t require employees. North Byron Parklands will provide many new jobs for the young people in the community. Name: Duncan McBride Address: 2/7 Anzac Parade, Burleigh Heads. Qld 4220 IP Address: stratu3.lnk.telstra.net - 120.151.57.153 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P3602	Project Website Submission	21/10/2010	Online Submission from Joshua Anderson (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home. Name: Joshua Anderson Address: 52 Wakefield St, Kensington, 3031 IP Address: unknown.net.reach.com - 134.159.131.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P3603 Project
Website
Submission 21/10/2010 Online Submission from Scott
Anderson (support)

The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported.

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

P3604	Project Website Submission	21/10/2010	Online Submission from Heidi Jenkins of Brock Harcourts (support)

North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

Submission 21/10/2010 Online Submission from Mary
Lunardi of Stall Holder (support)

Hello.

Splendour In The Grass is a wonderful Event. As a stall holder I have only attended once and that was this year. I did not make much money but this 52 year old had a wonderful time and my 2 daughters have enjoyed this event many times.

I would like it to have its own Home on the site North of Byron Bay.

Woodford is a fantastic place and I have been on that site 15 times as a stall holder and a punter.

But for Splendour, I do feel that it is a different Festival and the money to be brought into the area and the employment on this bigger site is important for Northan New South Wales.

Over the past 15 Years I have been to many Festivals. Rainbow Serpent in Vic has acquired a lease for 15 years for its event and boy o boy what a fab site that one is.

So You Have My thoughts on this Issue.

Please Allow Splendour to have its own Home.

Regards.

Mary Lunardi.

ps. I have not made any political donations. ever.

P3606	Project Website Submission	21/10/2010	Online Submission from jade k (support)	The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this. While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all

of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

P3607	Project Website Submission	21/10/2010	Online Submission from Matthew Whitingbird (support)	Splendour in the grass doesn't deserve to be approved for any space for a festival. The festival is always oversold, under-resourced, they don't give ticket buyers the option for single day tickets. This means you have to fork out \$300 for a 3 day ticket when you only want to be there one day. It is a scam and they are scumbags hiding under the guise of being cool. Splendour and JJJ sell the splendour cool image to young adults with credit cards and these adults are being taken for a ride. If you allow Splendour to come back to Byron it should be on the condition that they invest more in infrastructure and administration at the festival for the benefit of ticket holders as well as a significantly larger investment for the benefit of the environment. These scumbags definitely test out how much you love music, because they put the ticket holders through the ringer. Thanks for your time. P3608 Project
Website
Submission 21/10/2010 Online Submission from Emily
Jones (support)

Not only have the North Byron Parklands organisation developed what must be considered worldâ€™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food

and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events.

P3609	Project Website Submission	21/10/2010	Online Submission from Adam Lane of gea (support)	Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy.

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

P3610	Project Website Submission	21/10/2010	Online Submission from Daniel Weinert (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region's economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. Name: Daniel Weinert Address: 40 Solveig Crescent Kareela, NSW 2232 IP Address: cpe-58-172-249-218.cqzo1.cht.bigpond.net.au - 58.172.249.218 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3611	Project Website Submission	21/10/2010	Online Submission from AMANDA KERSTEN of KM MERCHANDISE (support)	The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the

region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

P3612	Project Website Submission	21/10/2010	Online Submission from lizzie cater (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view.

The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region.

North Byron Parklands have conservatively projected that their three major events each

year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal.

P3616	Project Website Submission	21/10/2010	Online Submission from Judy Atkins (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive.

The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that.

P3617	Project Website Submission	21/10/2010	Online Submission from Matthew Knight (support)	One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed.

Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

P3618	Project Website Submission	21/10/2010	Online Submission from Fleur Montgomery of North Shore Gym (support)

The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue.

With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light.

There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that don't require employees. North Byron Parklands will provide many new jobs for the young people in the community.

Please bring splendour home !!!!

P3619	Project Website Submission	21/10/2010	Online Submission from Jessica Grant (support)

The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment?

Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron.

The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. P3620	Project Website Submission	21/10/2010	Online Submission from Kyle Bright of ? (support)	In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

P3621	Project Website Submission	21/10/2010	Online Submission from Sarah Hart (support)	The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire. Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy.

P3622	Project Website Submission	21/10/2010	Online Submission from Gemma Gordon (support)

With up to twenty days of events each year the work experience opportunities for people in the region are very exciting. The bump in and bump out periods provide further work. We need these jobs and the training they provide, from high level event management to ticketing, technical production and traffic management.

There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses.

The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region.

P3623	Project Website Submission	21/10/2010	Online Submission from David McGruther (support)

To whom it may concern,

As a regular patron to Splendour in the Grass, I would like to express my support for the move to North Byron Parklands. I know that I love to travel to the region every year.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world's best environmental practice.

The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

Kind Regards,

David

P3624	Project Website Submission	21/10/2010	Online Submission from Leeroy Sharp (support)	All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. Name: Leeroy Sharp Address: 25 Amber drive, Lennox Head IP Address: cpe-124-176-122-12.lns8.ken.bigpond.net.au - 124.176.122.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3625	Project Website Submission	21/10/2010	Online Submission from Haydn Johnston (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. Additionally, have spent time in other countries and have expereinced being on specific Event sites, they are not only in tune with their environs but also geared to ensure maximum safety and enjoyment by the people attending, and this i feel is very important, so many

Festival Entertainment sites are adapted to suit the purpose of a music festival, which only, in the end benefits no one, site nor patron.

P3627	Project Website Submission	21/10/2010	Online Submission from Paul Baker (support)	North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead.

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

The North Byron Parklands proposal is a fantastic idea offering various ways to boost and

maximize our local economy.

I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet.

P3629	Project Website Submission	21/10/2010	Online Submission from Mitchell Feltscheer (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. Name: Mitchell Feltscheer Address: 120 Anzac Ave Collaroy NSW 2097 IP Address: c122-106-199-87.belrs3.nsw.optusnet.com.au - 122.106.199.87 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3630	Project Website Submission	21/10/2010	Online Submission from Amy Williams (support)	Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. Name: Amy Williams Address: 1 Chatswood Court Oakden SA IP Address: pulteney-pix.border.net.adelaide.edu.au - 192.43.227.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3631	Project Website Submission	21/10/2010	Online Submission from Cas Bitton (support)	Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

P3635	Project Website Submission	21/10/2010	Online Submission from Alexander Cusack (support)	With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â€” young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P3636	Project Website Submission	21/10/2010	Online Submission from Yun Bond (support)

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

People in Byron Bay are very focused on supporting and interacting within society. Enjoying

and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love.

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

P3637	Project Website Submission	21/10/2010	Online Submission from Alice Harris (support)	Whatâ€™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. Bring Splendour home! Name: Alice Harris Address: 31/31 Langport Parade, Mudgeeraba, QLD IP Address: 52.166-27-211.dynamic.dsl.brs.iprimus.net.au - 211.27.166.52 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3638	Project Website Submission	21/10/2010	Online Submission from Natalie Douglas (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guysâ€™ book. With respect to the mapped wildlife corridor it should be pointed out that many parts of it

identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise 'on-ground' what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities.

The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

P3639	Project Website Submission	21/10/2010	Online Submission from Bree Woodhouse of Bradfield and Scott Lawyers (support)

One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive.

Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project.

Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

21/10/2010 Online Submission from Avril
Keanan (support)

The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead.

Splendour in the Grass has a history with the Byron region which it seems a shame to ignore. In addition there are many other music festivals which would not care this much about the space they are using. The environment itself is a part of the festival. It seems a shame not to grant them use of the land and instead give it to others who may not care for the area as much.

P3647	Project Website Submission	21/10/2010	Online Submission from Simon Cox (support)	The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. Name: Simon Cox Address: 49 Mott St Gaythorne QLD 4051 IP Address: ramkesd003-e.ra.rockwell.com - 205.175.240.251 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3648	Project Website Submission	21/10/2010	Online Submission from Roy Giles of retired (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far

between.Â Â Â Â Â

You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling.

P3649 Project
 Website
 Submission

21/10/2010 Online Submission (object)

This proposal is a massive exercise in greed and disrespect for the people who live here and our precious environment. What happened to the State Government's own planning decisions to protect this site? Noise, artificial lighting and human intrusion represent the virtual destruction of the Bilinudgel Nature Reserve.

When you consider that one mega-festival will bring 50,000 party people into the shire (twice the shire's entire population), and up to four mega-festivals are being proposed per year, add to that another four of 10,000 per day, plus unlimited numbers of smaller events, the overload pressure on amenities, beaches, public places, emergency services is completely unacceptable. Byron Shire already has a permanent festival site at Tyagarah; another one is unsustainable and surperfluous.

If the Splendour Festival held at Woodford 2010 had traffic backed up for over 6 km, one can expect that Brunswick Valley Way will be closed down. As the closest pub and beach location to this site, Brunswick Heads will also be swallowed up in this so-called "progress", which means inevitable degradation of both natural environment and human quality of life. Those who promote this kind of development obviously don't give a damn about either, and care nothing for community or social well-being.

Those who own their own homes are starting to sell up, as the writing is on the wall. As a refugee from the madness of Sydney, where the lowest common denominator of human behaviour seems to be quite acceptable, I have come to love this area for its healing peaceful nature; it has been my sanctuary. If mindless greed is allowed to prevail, yet again, all the people who care will be forced to leave, rather than watch as this crass development slowly but surely rips the soul out of the place.

For all of these reasons I am voicing my strongest objection to this development, which is most deeply felt.

(I do not want my name to be made available to the Proponent, interested authorities, or on the Department's website)

P3652	Project Website Submission	21/10/2010	Online Submission from Phil Smith (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

P3653	Project Website Submission	21/10/2010	Online Submission from Meghann Crocker (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead.

P3656	Project Website Submission	21/10/2010	Online Submission from Nikki Magill (support)	North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a quality venue for young people in our region. In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA's expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures. So, why else should Splendour be allowed to flourish and grow at the North Byron Parklands? The future of Byron Bay. Tourism, employment, community benefits, flora, fauna and fun! Need we say more? Name: Nikki Magill Address: PO Box 3060 TARRAGINDI Q 4121 IP Address: cpe-121-222-38-98.inse1.cha.bigpond.net.au - 121.222.38.98 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P3659 Project Website Submission 21/10/2010 Online Submission from Jacob Foran of Mr.Foran (support)

Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward.

If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that with a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region's tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

P3660	Project Website Submission	21/10/2010	Online Submission from Bernadette Jolley (support)	We need to host internationally recognised events to attract artists, to attract tourists and to improve Australia's image overseas. At the moment, it seems that Australians will support heavy burning of fossil fuels for motor racing, reclaim land and build sports stadia, but not support a sustainable development for music and the arts. It is hard enough for artists in Australia - we need to get behind them and show all Australians that "culture" is not summed up by "Aussie Aussie Aussie, oi oi oi".

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives.

Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a 'resource centre' where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

North Byron

P3661	Project Website Submission	21/10/2010	Online Submission from Michelle` Neal (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guys' book. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. Name: Michelle` Neal Address: 20 James Milne Dve, Croydon VIC 3136 IP Address: c114-77-109-11.chirn2.vic.optusnet.com.au - 114.77.109.11 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3662	Project Website Submission	21/10/2010	Online Submission from Caroline Cree (object)	I wish to strongly object to this project on the grounds that the Brunswick/Ocean Shores area is a residential area and it would become something of a "party town" should this be allowed to go ahead. We do not have the facilities or infra structure to cope with even the small influx we have over the holiday period little own the ongoing influx of festival goers! The Byron Shire already has a festival site and I feel that any festivals proposed for this area should be held at the Tyagarah site as it would be more equipped to deal with the influx! The noise and polution from this proposed site would be extreme and destroy the Billinudgel Nature Reserve! Name: Caroline Cree Address: 1a Kooringa Court, Ocean Shores 2483 IP Address: cpe-58-165-211-187.nsw.bigpond.net.au - 58.165.211.187 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3663	Project Website Submission	21/10/2010	Online Submission from Tony Perna (support)	The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ€™ income. There is no reason why this proposal should not be approved by state government. The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Name: Tony Perna Address: 9/109-111 Crown Rd, Queenscliff, NSW, 2096 IP Address: specia19.lnk.telstra.net - 165.228.157.146 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3664	Project Website Submission	21/10/2010	Online Submission from Amelia Ioannides of student (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ€™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the â€™coast to hinterlandâ€™ wildlife corridor. The project

results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise â€˜downtimeâ€™ will allow the Parklands site to assist the functioning of the adjoining Nature Reserve.

From a cultural breeding ground perspective alone we must get the proposal approved. Itâ€™s a fabulous exciting vision and we are very lucky that this proposal is before us.

P3665 Project
Website
Submission 21/10/2010 Online Submission from John
Aitchison (support)

Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

P3666	Project Website Submission	21/10/2010	Online Submission from Kathy Yeo (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth.

P3672	Project Website Submission	21/10/2010	Online Submission from Krystle Sturgess ()	As a festival punter for over 14 years, i have watched the massive growth of the industry. I have been lucky to experience a plethora of festivals ranging from Big Day out, Parklife, and splendour over the past six or so years attending three, two at Byron and one at Woodford. I have also attended about 8 Woodford folk festivals as i am from the Sunshine Coast. On comparison I feel that Splendour In The Grass should return to Byron. Two amazing sites such as Woodford and Byron hold a sacred respect and conscious approach to the environment. A greater appreciation and education comes from such a festival. Yes it?s about music and camping but the crew at Splendour has produced the best festival experience ever. What other festival has created so much environmental awareness as Splendour has. I feel SPLENDOUR makes it all about the natural environment and helps create the environmental awareness the greater communities are in need of. Furthermore as an artist I admire the vibe of Byron and the creative energy that is inspired from that region. The parklands not only provide a haven for the greater community to be emerged within a sustainable environment the arts community potentially benefits greatly too. The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

How many times have we heard of organisations saying that they have incorporated environmental

P3673	Project Website Submission	21/10/2010	Online Submission from Kate Donovan (support)

To Whom It May Concern,

It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events.

With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

Yours Sincerely,

Kate Donovan

P3674	Project Website Submission	21/10/2010	Online Submission from Clancy Noakes (support)	Tourism is so often the lifeblood of regional areas, and as such, any proposal which would see a significant and predictable rise in tourism to any regional area should be cherished and cultivated. Splendour in the Grass is not only one of Australia's largest festivals, but also one of the most environmentally responsible, and its return to the Byron region would be immeasurably beneficial to the area.

Understanding the probable impacts of the Parklands proposal is best assisted by looking at similar undertakings worldwide. For example, ?I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With

time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a community?. (Donna Sue Sanders ? Executive Director of the Daytona State Foundation).

The investigation of the issues surrounding the impact of a music festival undertaken by the Daytona State Foundation, should give The Department a solid starting point in their assessment of the Parklands proposal.

Regular festival and music events appearing at the North Byron Parklands would provide a sustainable platform form all manner of business and employment opportunities, that at this stage could only be dreamed of.

Plans by festival organisers to increase the level of wildlife habitat and natural bushland at the site, coupled with the minuscule number of actual event days should only further demonstrate the long-term benefits for the environment, community and region in general, if the Parklands proposal is approved.

Thank you for your consideration.

P3675 Project
Website
Submission 21/10/2010 Online Submission from sara
Beecher (support)

North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

A business that combines ecology with events and community giving. That's the kind of business that our young people are looking to for training and experience. Let's get it approved.

Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal.

P3676	Project Website Submission	21/10/2010	Online Submission from Michelle Durham (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations. A business that combines ecology with events and community giving. That?s the kind of business that our young people are looking to for training and experience. Let?s get it approved.

P3681	Project Website Submission	21/10/2010	Online Submission from Imogen Smith (support)	Splendour in the Grass has become an institution in progression, positive social and environmental change and most importantly is wholly associated with amazing experiences of its attendees. For the Byron Shire to be associated with such an event should surely be considered an honour. The Splendour in the Grass organisers group have shown to Australia, over the past 10 years, that they are entirely committed to creating Australias best festival, birnging the worlds best progressive music, a vibrant and unique crowd of proud Australians and memories to last a lifetime. I wholly believe that to have Splendour in the Grass held in a custom built location that would be available for other cultural events can only benefit the name and the economy of the Byron Shire and surrounding region. To reject such an application would show a lack of understanding about the way in which Australians choose to live, the quality of lifestyle we honour and the integrity of our people. Submission

21/10/2010 Online Submission from emma
mulkearns (support)

We have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P3683	Project Website Submission	21/10/2010	Online Submission from damien Grimsey (support)	If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime. The Marshallâ€™s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. Name: damien Grimsey Address: PO Box 1095 Southport QLD 4215 IP Address: cpe-124-186-234-66.lns8.woo.bigpond.net.au - 124.186.234.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3684	Project Website Submission	21/10/2010	Online Submission from Christopher Peck of Splendour Goer! (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisations like North Byron Parklands to provide much needed jobs.

P3685	Project Website Submission	21/10/2010	Online Submission from Larissa Tyson (support)

Please bring Splendor home to Byron! I have been going to Splendor since it first started. I now bring my family to Splendor. It is like a tradition and although it was good in 2010 - there is nothing like Bryon Bay. It is unique. It is great for families and has great access. The locals are wonderful and I imagine the economic benefits last a year or more. The environmental improvements that are planned will last into the future for my familys' family to enjoy, not to mention the flora and fauna.

The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor

venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

P3686	Project Website Submission	21/10/2010	Online Submission from Dougall Pennefather of Backpackers Inn (support)

To Whom it may Concern,

We are a Backpackers hostel in Byron Bay that would like to submit our support for Splendour in the Grass to be brought back to Byron Bay.

This is a festival that has always appeared in the middle of our quiet season and provided a major boost to the business and employees during what is described as a hard period. The week guarantees us 100% occupancy and therefore alot of hours of work to the 15 local staff employed here, this can only filter down to all these families. All those customers spend at the local businesses which in turn provides much needed relief (a stepping stone as such) until the summer season begins. It is so necessary to so many businesses in a seasonal town.

This year our business has been rocked by the follow on affect of the global financial crisis

(far less backpackers travelling to Australia and Byron Bay), an extremely high Aussie dollar and that coupled with a World football Cup in South Africa. The figures have been rocked back to that of 1998 this winter. But rates, electricity and wages are through the roof. Then BAM!, no Splendour this year on top of all that - what a heavy blow!! No wonder so many local businesses have gone bankrupt and shut up shop. Only to see these franchise conglomerates take over our town. Our fragile economy needs Splendour in the Grass back.

Isn't Byron Bay built on travellers and music festivals, right back to the Aquarius Festival in the 70's, young people flocking here to listen to great music. Lets not kill the culture - lets embrace it. These guests that come for a week are always the happiest and most responsible compared to a weekend warrior hitting our town for one night or the Schoolies that crash into town in November.

With all the elections lately and governments pandering to the mining industry it is like tourism has been ignored. NSW is the premier state with so much to offer, yet QLD, NT, and Victoria are all campaigning hard and taking our slice of the tourism market. Lets win back some great events which involves whats beautiful about our region, so many stunning sites to see in this area. The Parklands site is magnificent and a breath of fresh air to see so much care put into making it a nature friendly environment.

One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive.

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

I can only hope who makes this decision will think about the working locals and consider some of my points.

Please bring back Splendour to Byron Bay. And please help save NSW tourism, it is a great state.

Yours Sincerely

Dougall Pennefather

P3687 Project
Website
Submission 21/10/2010 Online Submission from Sarah
Grant (support)

The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing.

Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer?

P3688	Project Website Submission	21/10/2010	Online Submission from Heather O'Brien of Mammoth Merchandise (support)

North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 50 years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of re-vegetation.

P3689	Project Website Submission	21/10/2010	Online Submission from Cristi Springer (support)

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

The future of Byron Bay. Employment, community benefits, fun. Need we say more?

With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

Letâ€™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ€™s get on with the job of creating exciting training and employment opportunities for our young people.

P3690	Project Website Submission	21/10/2010	Online Submission from Leila Fairley (support)

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

P3691	Project Website Submission	21/10/2010	Online Submission from Jack Lambrock (support)	Whatâ€™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. One of the most significant benefits for the environment coming out of this application is the proponentâ€™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Name: Jack Lambrock Address: Brisbane, QLD IP Address: c220-239-65-10.fitzg3.qld.optusnet.com.au - 220.239.65.10 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3692	Project Website Submission	21/10/2010	Online Submission from Alyce Petersen (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the regionâ€™s creative industries, providing world class training and work experience opportunities. Name: Alyce Petersen Address: 23 Carbine Close, Smithfield 4878 IP Address: thetru2447.lnk.telstra.net - 120.151.58.30 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P3693	Project Website Submission	21/10/2010	Online Submission from Mikaela Kremer (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives. With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a

potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light.

Letâ€™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ€™s get on with the job of creating exciting training and employment opportunities for our young people.

P3694	Project Website Submission	21/10/2010	Online Submission from Dean Sandaver (support)

Byron is the home of Splendour. The promoters have worked tirelessly to ensure the event has developed a reputation as environmentally-friendly and the noise of very few shouldn't ruin the fun of the many thousands that adore this event.

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

Currently many things are conspiring against the tourism industry, particularly the very

strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

P3695	Project Website Submission	21/10/2010	Online Submission from Adam Sutherland (support)

The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this.

The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately \$55,000 compared with \$71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

I find it reprehensible that a small group of vocal residence can hold the rest of the state, and majority of local people to ransom, over what will be 12 days out of the year. There is always complaints about people moving from regional areas to find work, that means this community gets smaller.

I have to say I have loved visiting Byron Bay for both Splendour in the Grass, and just for a general visit for over 10 years now, and I would love to continue doing so.

Please consider allowing them to run Splendour at this permanent site.

P3696	Project Website Submission	21/10/2010	Online Submission from Emily Brodie (support)

To Whom It May Concern,

Please help to Bring Splendour Home. By allowing this organisation to set up permanent home in the North Byron Parklands you will see major benefits to the local environment and economy. This is supported by the information below:

- It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be

encouraged.

- The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions' economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed.

- We have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project.

You will not regret the decision to Bring Splendour Home!

P3697	Project Website Submission	21/10/2010	Online Submission from Shannon Rawding (support)	The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. Name: Shannon Rawding Address: 142 Blackwood St, Mitchelton Qld 4053 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3698	Project Website Submission	21/10/2010	Online Submission from Erin McCrickard of Patron (support)	Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

I have been to 3 Splendour in the grass festivals, 2 of which were in Byron Bay. Coming from Tasmania, its amazing to experience the vibrancy and excitement in Byron Bay's atmosphere for the duration of the festival. Byron is such a beautiful place and it would be a real shame if the thousands of young people that flock to Splendour each year, didn't get to experience this beauty. My friends and I love Splendour and Byron Bay. It really is the best 3 days of our year and Byron Bay is its home. Please allow Splendour to return to its home!

P3699	Project Website Submission	21/10/2010	Online Submission from kirsty medynski of eleven music (support)	North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important. Name: kirsty medynski Organisation: eleven music Address: 46 buckingham street, surry hills nsw 2010 IP Address: eleven1.lnk.telstra.net - 203.45.133.97 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3700	Project Website Submission	21/10/2010	Online Submission from Sofii McKenzie (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not worldâ€™s best environmental practice. North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora

surveys conducted at the site than housing, industrial estate, and quarries assessments.

I support Splendour In The Grass's application for a permanent home in the North Byron Parklands.

P3701	Project Website Submission	21/10/2010	Online Submission from Simon Wever (support)

One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed.

The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events.

Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing.

I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me.

Splendour in the Grass is undoubtedly the most well organised festival in Australia, it sets the benchmark. Such an event is surely an asset to the Byron Bay area.

Regards,

Simon

P3704	Project Website Submission	21/10/2010	Online Submission from Andrew Bates (support)	Being young it's important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available. There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase. Last year it was such a hassle getting into woodford, it literally took hours and hours of crawling along the highway, byron is FAR better equipped to deal with this amount of people, it's actually closer for me to go to woodford but that's how bad it was! Name: Andrew Bates Address: 8 Petit Court, Sinnamon Park, 4073 IP Address: cpe-121-223-87-183.inse2.woo.bigpond.net.au - 121.223.87.183 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3705	Project Website Submission	21/10/2010	Online Submission from Nerissa Nalder (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a "sustainable" site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region. The future of Byron Bay - Employment, community benefits, greater international recognition, fun. Need we say more?

North Byron Parklands benefits not only those who attend festival/events there, but the whole community. In regards to Splendour in the Grass - it is held during a time of the year when a large majority of local businesses need the income it generates to sustain them through the quieter winter months and keep a lot of locals in employment.

What a wonderful festival - I have attended every single Splendour festival and have watch in amazement it's evolution to the highly professional festival experience it has become. Besides the awe-inspiring musical acts they manage to attract year in, year out - What is quite evident is the level of planning and concern, which has gone into creating environmentally sustainable practices to ensure the minimal impact on the area where the festival is held and the surrounding area. It is something that should be praised. - Organisers have created an environment where festival goers are constantly made aware of the need for res

P3706	Project Website Submission	21/10/2010	Online Submission from Rob Ooge (support)	With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area.

With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community.

P3707	Project Website Submission	21/10/2010	Online Submission from jacob bisshop of student (support)

Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project.

Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one.

The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative

industries. This alliance will provide the community with world class training and work experience opportunities.

P3708	Project Website Submission	21/10/2010	Online Submission from Grace McNatty (support)	Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. Name: Grace McNatty Address: 50 Moncks Spur Road, Redcliffs Christchurch, New Zealand 8014 IP Address: - 202.36.179.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3709	Project Website Submission	21/10/2010	Online Submission from Ilee Rahman (support)	North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it. Name: Ilee Rahman Address: 6/ 453 Montague Road,West End,4101 QLD Australia IP Address: d58-106-17-4.rdl801.qld.optusnet.com.au - 58.106.17.4 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3710	Project Website Submission	21/10/2010	Online Submission from Regina Muller (support)	Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

P3711	Project Website Submission	21/10/2010	Online Submission from Mitchell Smith (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Name: Mitchell Smith Address: 8/36 bonython street QLD 4030 IP Address: d114-78-5-247.rdl800.qld.optusnet.com.au - 114.78.5.247 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3712	Project Website Submission	21/10/2010	Online Submission from Bethany Koulyras (support)	North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen. The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay. Name: Bethany Koulyras Address: 16 Willfox St Condell Park IP Address: c211-30-125-213.rivrw2.nsw.optusnet.com.au - 211.30.125.213 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3713	Project Website Submission	21/10/2010	Online Submission from Ben Ryan of Student (support)	Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about \$130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people. Name: Ben Ryan Organisation: Student Address: 10 See Street Kingsford 2032 NSW IP Address: - 129.94.206.176 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3714	Project Website Submission	21/10/2010	Online Submission from Nicole Ng (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ€™ income. There is no reason why this proposal should not be approved by state government. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people. P3715 Project
Website
Submission 21/10/2010 Online Submission from Chris
Halliday of Building Designer
(support)

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region.

P3717	Project Website Submission	21/10/2010	Online Submission from Kate Morgan of RACQ (support)

Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

P3718	Project Website Submission	21/10/2010	Online Submission from Jae Stephens (support)

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

P3719	Project Website Submission	21/10/2010	Online Submission from Trinity Johnston (support)	Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

P3721	Project Website Submission	21/10/2010	Online Submission from Rosie Robinson (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. Name: Rosie Robinson Address: 9/35 Durham St St Lucia Q 4067 IP Address: 124-148-48-123.dyn.iinet.net.au - 124.148.48.123 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3722	Project Website Submission	21/10/2010	Online Submission from Kate Ven (support)	The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region?s creative industries, providing world class training and work experience opportunities. The Marshall?s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. Name: Kate Ven Address: 16 Fitzroy cl, St Johns Park, NSW, 2176 IP Address: d110-32-251-185.bla800.nsw.optusnet.com.au - 110.32.251.185 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3723	Project Website Submission	21/10/2010	Online Submission from Georgia Wade (support)	With the recent global financial crisis many businesses in the area were hit hard. Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals. The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. Letâ€™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ€™s get on with the job of creating exciting training and employment opportunities for our young people. Name: Georgia Wade Address: Racecourse Road, Ascot IP Address: 124-254-86-131-static.bb.ispone.net.au - 124.254.86.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3724	Project Website Submission	21/10/2010	Online Submission from Timothy Maggs of tmaggs (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. Name: Timothy Maggs Organisation: tmaggs Address: PO Box 1341 Noosaville 4566 Queensland IP Address: ppp118-208-65-25.lns20.bne4.internode.on.net - 118.208.65.25 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3725	Project Website Submission	21/10/2010	Online Submission from ben lewis of austin health (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a 'resource centre' where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P3726	Project Website Submission	21/10/2010	Online Submission from Kane Baker (support)	A business that combines ecology with events and community giving. That's the kind of business that our young people are looking to for training and experience. Let's get it approved. I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. P3727	Project Website Submission	21/10/2010	Online Submission from Lyssa Trompf of Boundary Sounds (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the âsustainableâ development basket. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ income. There is no reason why this proposal should not be approved by state government. Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal.

P3728	Project Website Submission	21/10/2010	Online Submission from kate herford of APRA (support)

North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ€™s important to have these opportunities for young people in the region.

The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this.

P3730	Project Website Submission	21/10/2010	Online Submission from Jai Mitchell (support)	Splendour in The Grass is a very significant festival within youth culture, and has remained relevant for it's whole 10 years. The festivals ongoing inclusion of young local acts has been an absolutely priceless boost to the Northern NSW music industry. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. Name: Jai Mitchell Address: 126 Sunshine Pde, Miami, QLD 4220 IP Address: clever5.lnk.telstra.net - 203.45.168.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3731	Project Website Submission	21/10/2010	Online Submission from Rob Russell of N/A (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P3732	Project Website Submission	21/10/2010	Online Submission from Stephen Brown (support)

As an Australian citizen and a proud supporter of local music I feel it very important to put forward my submission. I may be using statements that were prewritten but as an environmental management student with my studies and work through the Queensland government I find them to be extremely accurate. Sustainability is a key aspect of this proposal which allows for festival activities to go ahead with careful planning of the site keeping rejuvenation in check. The following statments outline further reasons of why this proposal should go ahead.

While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. Also for the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

I hope that this submission has been of help and I hope for your consideration in this matter.

Kind Regards,

Stephen Brown

P3733	Project Website Submission	21/10/2010	Online Submission from Gerry Bull of triple j (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. Name: Gerry Bull Organisation: triple j Address: triple j Level 6ABC Building700 Harris Street UltimoNSW 2007 IP Address: - 203.2.218.132 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3734	Project Website Submission	21/10/2010	Online Submission from Liam Brodie (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devices, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

P3735	Project Website Submission	21/10/2010	Online Submission from Leigh Treweek of Street Press Australia (support)	How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. Name: Leigh Treweek Organisation: Street Press Australia Address: 2 Bond Street Abbotsford, Victoria IP Address: street4.lnk.telstra.net - 165.228.72.26 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3736	Project Website Submission	21/10/2010	Online Submission from Jessyca Bosscha (support)	We have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project. Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing. Name: Jessyca Bosscha Address: 33 Park St Evans Head 2473 IP Address: - 120.154.155.195 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3737	Project Website Submission	21/10/2010	Online Submission from Hannah Torney (support)	The Marshall's Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. P3738	Project Website Submission	21/10/2010	Online Submission from Aymee Ling (support)	North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent

considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

Thereâ€™s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others.

P3739	Project Website Submission	21/10/2010	Online Submission from Lidia Maguire (support)

There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase.

Letâ€™s look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment.

One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed.

P3742	Project Website Submission	21/10/2010	Online Submission from Stephanie Woodbridge (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. Splendour in the Grass has provided a lot of mentorship and training opportunities for young

people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, it's important to have these opportunities for young people in the region.

P3743	Project Website Submission	21/10/2010	Online Submission from Jake French of Student (support)

Byron Shire will always be the spiritual home of Splendour in the Grass, and the Byron facilities always ensure a spectacular festival experience for all that attend. Through tourism and other factors, the community benefits greatly from the festival, and that surely outweighs the minor inconvenience of cleanup and possible property damage.

The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become "out of bounds" to protect identified areas of importance.

There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses.

P3744	Project Website Submission	21/10/2010	Online Submission from Ryan Behn (support)	With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. Whatâ€™s important for Byron is the culture and celebration, its very important to our

community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this.

P3745	Project Website Submission	21/10/2010	Online Submission from Jodie Watson (support)

The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp.

The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.

I think it is important to have a clean, safe, beautiful environment for people to go to and

attend festivals at and have good, clean fun while appreciating live music, local culture and talent..

North Byron to be Splendours Home!!!!

P3746	Project Website Submission	21/10/2010	Online Submission from Jaclyn Hayward (support)

It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.

In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA's expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It's up to us as adults to decide that we want to support venues that support young people.

P3747	Project Website Submission	21/10/2010	Online Submission from rhiannon pauley (support)

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world's best environmental practice.

P3748	Project Website Submission	21/10/2010	Online Submission from Lyn Jeffery of motherhood ()	Please bring Splendour home to Byron! It belongs here. It was born here and it has lived here for nine years and I have had the pleasure of attending every day of every year. I made the travel to its temporary place this year and although I found it pleasant - it wasn't the same. It belongs in the Byron Shire. As a local to the Byron area - although I live in the Ballina Shire, I can say with all honesty how much music festivals belong in this area. I have been attending festivals in this area since I was 15 years of age - at the Fowlers Lane Festivals. There was no way that the old Festivals took into account what Splendour in the Grass takes into account or put back into the community what Splendour in the Grass puts back into the Community. It was greatly missed this year at Byron by the people of Byron and Ballina and Lennox Head and all little areas around here. The amount of revenue it brings to the community was noticeably missed by the people. North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological re

P3749	Project Website Submission	21/10/2010	Online Submission from john Baillie Jnr of Dananananaykroyd (support)

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids.

How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it.

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

P3752	Project Website Submission	21/10/2010	Online Submission from Noni Kuhner (support)	The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions? economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! Not only that, but Splendour in the Grass is a huge boon for New South Wales as a whole, with people from all over the country making the pilgrimage to Byron for the festival, passing through a number of nearby towns as well. This year it headed north to Woodford in Queensland, making it harder for New South Wales residents to attend, and also taking potential tourism revenue away from not just the Byron area, but also a number of towns around it. P3753 Project
Website
Submission 21/10/2010 Online Submission from Dave
Baird-Watson (support)

I am a local and have been supporting large and small festivals for many years now and we need the opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ€™s show the way Australia. Bring Splendour home!

One of the most significant benefits for the environment coming out of this application is the proponentâ€™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

Please Look favorably left and right

P3754	Project Website Submission	21/10/2010	Online Submission from Tim Cashmere of Undercover Media (support)	The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together. With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise âœœon-groundâœœ what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities. The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for

planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

P3755	Project Website Submission	21/10/2010	Online Submission from stephen smith (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together. Name: stephen smith Address: 29 fairview drive,kingaroy,QLD IP Address: 122-149-150-54.dynamic.dsl.bean.com.au - 122.149.150.54 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3756	Project Website Submission	21/10/2010	Online Submission from Rina Ferris of Ferris Davies PRM (support)	When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear

trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

P3757	Project Website Submission	21/10/2010	Online Submission from Melissa Tickle of None (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation's environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay. P3758	Project Website Submission	21/10/2010	Online Submission from Lee Cody of private (support)	While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. The Byron Shire and Northern Rivers region is home to an aging community with a high proportion of retirees. This means many young people are leaving the area to seek education and employment opportunities elsewhere. North Byron Parklands would help provide employment for many of these young people, thus giving them a reason to stay in the area. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

P3759	Project Website Submission	21/10/2010	Online Submission from Maree Hamblion of EMI Music Publishing (support)

The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species.

Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a "resource centre"™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

P3760	Project Website Submission	21/10/2010	Online Submission from Julia Sanderson (support)	The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. Name: Julia Sanderson Address: 4/33 Paragon Street, Yeronga 4104 IP Address: - 203.32.220.31 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3761	Project Website Submission	21/10/2010	Online Submission from Nicholas Findlay (support)	With the recent global financial crisis many businesses in the area were hit hard. Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals. From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application. Name: Nicholas Findlay Address: 23 Middle St Marrickville 2204 IP Address: - 203.2.218.132 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3762	Project Website Submission	21/10/2010	Online Submission from Alexandra Catherine Tuffin (support)	One of the most significant benefits for the environment coming out of this application is the proponent's willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be

approved to operate.

I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me.

Regards

Alexandra Tuffin

P3763	Project Website Submission	21/10/2010	Online Submission from Darren Gill of TUSK (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community.

It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region.

From a cultural breeding ground perspective alone we must get the proposal approved. Itâ€™s a fabulous exciting vision and we are very lucky that this proposal is before us.

P3764	Project Website Submission	21/10/2010	Online Submission from Natalie Worth of Realestate (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

Let's look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment.

There's not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others.

21/10/2010 Online Submission from Sam
Cunliffe of CBS Interactive (support)

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

21/10/2010 Online Submission from Jessica
Smith (support)

The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

P3767	Project Website Submission	21/10/2010	Online Submission from Catherine Helliwell (support)	Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

It not only provides this outlet for young people, but also allows them to contribute to the community and society by taking part as a volunteer or by being employed. I myself started out working at Splendor in the Grass in 2006, I had to much fun at the festival I decided to come back the following 2 years. As it moved to Woodford I found transport and communication issues with trying to gain employment and work as a volunteer. please bring this festival back to Byron, it has bought so much positive publicity to the town and everyone always has such a great time.

Cheers

Submission 21/10/2010 Online Submission from Luke
Wallace (support)

It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love.

P3770	Project Website Submission	21/10/2010	Online Submission from Jazmin Kellerman (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light. P3774	Project Website Submission	21/10/2010	Online Submission from Sophie Hodgson (support)	The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. Name: Sophie Hodgson Address: 5/15 Rosa St Oatley, NSW 2223 IP Address: 60-242-114-68.static.tpgi.com.au - 60.242.114.68 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3775	Project Website Submission	21/10/2010	Online Submission from Reece Tully (support)	This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved.

The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

P3776	Project Website Submission	21/10/2010	Online Submission from Rhys Duggan of St Lukes Anglican Church Miranda (support)	The Marshall's Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local business? income. There is no reason why this proposal should not be approved by state government. What's important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Name: Rhys Duggan Organisation: St Lukes Anglican Church Miranda Address: 11-93 Evelyn St, Sylvania, NSW, 2224 IP Address: 27-33-63-208.tpgi.com.au - 27.33.63.208 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3777	Project Website Submission	21/10/2010	Online Submission from Ralph Moore of NA (support)	I write in support of the proposal by the North Byron Parklands group to establish a permanent event facility at their site in Byron Shire (Yelgun). I have been involved with this group since 2006, both in Byron Shire, and most recently at Woodford in Queensland. I have been most impressed by the professional approach taken by the team in all aspects of the events they have produced over that time. I believe the future of the land in question is far better assured with this proposal, than with

what else could occur there, ie housing development being one example.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

Having a world class facility like North Byron Parklands in the Byron Shire is a wonderful opportunity. Any place in Australia would welcome that.

P3778	Project Website Submission	21/10/2010	Online Submission from Michelle Dick of Sydney Opera House (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately \$55,000 compared with \$71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region. I am a devotee of live music and festivals. I am the Tourism Marketing Manager for Sydney Opera House. I have been visiting the Byron Shire since 1994 for various festivals. I advocate Splendour returning to its original home. Name: Michelle Dick Organisation: Sydney Opera House Address: 1/48-50 Curlewis St Bondi NSW 2026 IP Address: - 203.32.178.20 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3779	Project Website Submission	21/10/2010	Online Submission from Daniel Cassidy (support)	The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this. In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth. It is widely recognised the privately owned and managed land is often the safest way of protecting valuable wildlife habitats. The management of NBSP are conscious, well meaning people with a vision for the land which extends for 500 years. If we let them bring their vision to this land then generations to come will benefit and prosper from having such a wonderful creative space in our shire. Let sanity prevail and bring Splendour home to North Byron Shire Parklands. Dan Cassidy

P3780	Project Website Submission	21/10/2010	Online Submission from Johanne McDonald of Pumpkin Patch (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regions? economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

P3781	Project Website Submission	21/10/2010	Online Submission from Alice McClymont of UNSW (support)

It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklands environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity.

Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one.

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

P3782	Project Website Submission	21/10/2010	Online Submission from Justin Camara (support)

The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands.

The North Byron Parklands sounds really interesting and exciting.

P3783	Project Website Submission	21/10/2010	Online Submission from Ken Dwyer (support)	This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

From a cultural breeding ground perspective alone we must get the proposal approved. It's a fabulous exciting vision and we are very lucky that this proposal is before us.

P3784	Project Website Submission	21/10/2010	Online Submission from Sherilyn Thomson of Private (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â€œresource centreâ€™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

P3785	Project Website Submission	21/10/2010	Online Submission from Fiona Macrae (support)

North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.

21/10/2010 Online Submission from Allison
Bywater (support)

It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being

If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

A business that combines ecology with events and community giving. Thatâ€™s the kind of business that our young people are looking to for training and experience. Letâ€™s get it approved.

Splendour 2010 was my first Splendour, and I hope it will not be my last. It was so well organised and looked after. It was an amazing experience that I think would have been made that little bit better, had I not had to travel all the way to Queensland. Byron is a beautiful piece of Australia, and I know that organisers will ensure it's beauty is not tainted by the festival. I think it is a fantastic opportunity for Byron to host Splendour. Think of the amount of people who will be injecting money into the local community.

Let Splendour come back to Byron!!!!

P3789	Project Website Submission	21/10/2010	Online Submission from David Harte (support)

North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but let's create a high season in winter too by utilising North Byron Parklands!

P3790 Project
Website
Submission 21/10/2010 Online Submission from Sam
Byrnes of RTA (support)

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

P3791	Project Website Submission	21/10/2010	Online Submission from Stephen Gaggin (support)	The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. As soon as I started reading about this proposal I had an instant realization of the benefits North Byron Parklands would bring to our local economy but also to my family. Being young it's important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available. Name: Stephen Gaggin Address: 44 Howard St, Paddington, Brisbane 4069 IP Address: proxy6.eq.edu.au - 203.10.121.85 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3792	Project Website Submission	21/10/2010	Online Submission from Dashedle Bailey of - (support)	The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boom for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future.

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

Online Submission from Matthew
Farrow (support)

To whom it may concern,

Splendour must return to its home, for the following reasons:

A permanent and tailored site will surely allow the organisers to implement positive sustainability and environmental initiatives.

The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become "out of bounds" to protect identified areas of importance.

Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

A business that combines ecology with events and community giving. That's the kind of business that our young people are looking to for training and experience. Let's get it approved.

Regards

P3795	Project Website Submission	21/10/2010	Online Submission from Luke Latsinos (support)	The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. as well as this splendour in the grass is a great festival and we all love it at byron bay. i think the majority of people that come for the festival do the right thing by the local community as well and i for one would love to see the festival stay in byron for years to come Luke Latsinos Name: Luke Latsinos Address: 121 upper street tamworth nsw 2340 IP Address: dslb-092-075-165-123.pools.arcor-ip.net - 92.75.165.123 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3796	Project Website Submission	21/10/2010	Online Submission from Stephen McKeever (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisation?s like North Byron Parklands to provide much needed jobs.

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities.

P3798	Project Website Submission	21/10/2010	Online Submission from Sharna Bennett (support)	Please bring Splendour Home. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs. Name: Sharna Bennett Address: 58 Clarence St Grafton IP Address: 60-240-12-249.tpgi.com.au - 60.240.12.249 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P3799	Project Website Submission	21/10/2010	Online Submission from Nikita Bond (support)	Byron Bay is such a beautiful place to travel to and without Splendour, I may of never discovered it. I look forward to visiting this beautiful beachside community again. All the locals I've met have been very welcoming, helpful and kind. Splendour is very eco friendly, most punters I know pay the carbon offset on their tickets. Also, recycling is a big deal!! We all collect our mess and put it in the bins. The bits that do get missed get cleaned up by Splendour crew very quickly. Name: Nikita Bond Address: 3/17 Gold StreetMackay QLD 4740 IP Address: 122.110.75.63.optusnet.com.au - 122.110.75.63 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P3800	Project Website Submission	21/10/2010	Online Submission from Glenn-Maree Smirh (support)	Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

I have personally attended Splendour In The Grass for 5 years in a row now and the last one at Woodford, as much as i loved it, it wasn't the same. Splendour In The Grass belongs to Byron Bay and the surrounding shires. It makes so much money for the area and the support for the festival is amazing

Bring such an amazing icon home. Even though I am from Mount Isa, in inland North Queensland, I love this festival and it truly belongs in Byron Bay. So many are willing to make the trip/hike just to attend up an iconic Aussie Festival .

So please get it back to its home town of Byron Bay, coz thats where the splendour goes will truly be happy.

P3801	Project Website Submission	21/10/2010	Online Submission from Monique Wharton (support)

North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures

designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment.

While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas.

Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing.

P3802	Project Website Submission	21/10/2010	Online Submission from luke rutland (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficult. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approve projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy.

Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal.

P3803	Project Website Submission	21/10/2010	Online Submission from Jeremy Sykes (support)	As a splendour veteran having attended all 10 years the festival has been held I have witnessed the growth and changes this yearly pilgrimage has brought to those who attend the festival and those people living in the area. The benefits of the growth in tourism and hence employment in the area are obvious as the festival is one of a kind, being very relaxed and having a great community feel which visitors take away and share with friends and family. This in turn brings more people to the area for holidays as they wish to experience the chilled atmosphere of that little part of the world. More visitors, more jobs, more money for an area where it can be difficult for youth to find a job. I myself grew up in a rural area and know first hand the hardships faced by young people where there is very little incentive to stay as the larger metropolitan areas become very attractive. This bleeds those areas of young people and the decline of small townships can be brought about very quickly where the population is ageing with few younger people to replace those that have retired from the workforce or those that leave these areas for the same reasons young people do. These towns die a slow death. I know, my home town has been doing that since before I left many years ago. Essentially young people are cheap labour compared to older tertiary qualified adults, you won't see doctors and lawyers flipping burgers or manning the concierge desk of the local resort. Splendour will be splendid wherever it is held but it won't feel like splendour proper unless it returns home to the Byron Shire. Culturally the Northern Rivers area feels like a retirement village and a vibrant festival celebrating music and youth culture showcases the area's beautiful landscape and natural wonders to a whole raft of people who would not visit the area if it wasn't for the festival. Each year I have attended to festival I have witnessed the effort and commitment the organisers have input towards the environment and the local culture. Splendour was, to my knowledge, the first festival in Australia to encourage recycling and the promotion of environmental awareness. The ever present Eco Cops and programs such as Bin Your Butt, Carbon Offset tickets and rewards for returning empty drink containers to the point of purchase, thus reducing litter, showcase the effort made to reduce the impact of the festival. Every year in the lead up to the festival I see the arts and culture competitions and the promotion of young artists. These efforts can only help develop young artists and broaden the experiences of those festival goers who otherwise would not encounter such wonderful sights and sounds. Now in my mid thirties I must make my voice heard and express the desire for those younger than me to experience Splendour in all its wonderful chilled out grooviness. If only

for the youth of the area and the young artists who are able to showcase their talents, approve this application and support those organisations that support the young people who are the key to ongoing sustainable growth and prosperity of the Northern Rivers Shire.

QUIT MESSING AROUND THE KIDS AND BRING SPLENDOUR HOME NOW!

P3804	Project Website Submission	21/10/2010	Online Submission from Kate Speakman (support)	The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together. The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it. Online Submission from Nathan
Graham (support)

To Whom it may Concern,

The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment.

Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide.

Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

As a resident of the Northern Rivers over the last 5 years I have had the pleasure of experiencing Splendour in the grass on 4 seperate occasions, and it is festivals such as this that give the Byron area part of its charm. Please bring splendour back home!

Regards,

Nathan Graham

 Submission 21/10/2010 Online Submission from George
 Cressey (support)

Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site.

We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events.

It would be great for Splendour to have a permanent home. I have attended the festival three times, both as a punter and as a worker and can honestly say it is one of the best festivals I have been to. There is a massive emphasis on the environment, from recycling empty drinks cans and bottles to being able to carbon offset your ticket.

P3807	Project Website Submission	21/10/2010	Online Submission from Samantha Preston (support)	North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

The North Byron Parklands idea is inspiring for young people. There is precious little around, particularly in regional areas, which is inspiring for them. The proposal is all about the environment, events, culture and celebration. It's about young people and being young. This is really important.

P3808	Project Website Submission	21/10/2010	Online Submission from Angela Ponsford (support)

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldn't go ahead.

P3809	Project Website Submission	21/10/2010	Online Submission from Julie To (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

P3811	Project Website Submission	21/10/2010	Online Submission from Allan Malcolm ()	Splendour has been and always will be an icon for music and people culture, full of love and creativity that inspires good health and dreams realised. A unique blend of spirit and craftsmanship that provides life changing moments and a great respect that can never be put into words. For Splendour to establish a home base that is forever centred in such a beautiful land will only result in the growing of this an the growth of the following: The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesn?t proceed then it?s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklands? group? No-one. That would be a terrible lost opportunity. Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will

greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community.

It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region.

Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so
