the project number 10\_0127 and 10\_0128

My name is Hoai Tan Ly and I live in 55 Weaver St Erskine Park

I OBJECT to the decision of building industrial estate along to ropes creek.. I live on the other side facing clear view of the creek. Our neighborhood can hear the m4 in the morning , Eastern creek on the race week, hear Minchinbury industrial estate. people who live in Stclair and Erskine Park who live near all those factories all ready built complaints about noise coming out of those factories such as trucks reversing and generator pumps and exhaust fans going 24/7. In the day time when you go out to those site you would not here those noises because its just get drown out by other noises but at night that's when you here them most..

I am not a 9-5 worker , I work shifts work and comes home at night , sleeping is difficult, when noise is about. I dont drown myself in Alcohol like most people in Erskine Park to go to sleep.

If this plan goes ahead council should ask developer to put up noise suppression wall ( like on m4 ) on the boundary of estate and subsidies to residence who live on the other side of boundary to sound proof their homes.

I bought my house here six years ago and thought there would not be any development on the other side due to it being crown land..
