Dear Mr Coleman,

RE: 14 -18 Boondah St Warriewood

I refer to your company email of 7th January 2010 concerning the proposed supply of electricity to the 590 x 2 bed multi-residential units at the above address and wish to confirm that EnergyAustralia has the infrastructure to provide supply to this development.

All costs associated with the provision of electricity supply to this development will be chargeable to the developer in accordance with our Network Supply documents ES8, ES9 and ES10. In accordance with these documents this work will be contestable and can be carried out by the developer's own accredited service provider.

Pittwater Council development consent conditions require that the developer reach agreement with EnergyAustralia on the costs associated with the undergrounding of electrical mains along the development property boundary.

Please advise EnergyAustralia when the project has reached the development approval stage and EnergyAustralia's contestable group will then provide further advice on the contestable process.

Regards

Jason Kenton
