

Case No. 113517

7 July 2009

Mr Andrew Coleman
Senior Project Manager
Meriton Apartments Pty Ltd
Level 11, 528 Kent Street
Sydney NSW 2000

Dear Andrew

RE: Warriewood STP Odour Mitigation Works-Stage A

I refer to your email enquiry of 2 July 2009 requesting further information to confirm results or action undertaken by Sydney Water in regard to Level 3 odour impact assessment and management relating to the above site.

I would confirm Sydney Water has carried out a preliminary assessment of the predicted odour impacts of the Warriewood STP. This was undertaken following the commissioning and operation of the Stage A odour control works using the AUSPLUME atmospheric dispersion model. The results indicated the required odour reductions had been achieved.

A further detailed odour study of the Warriewood STP will be undertaken by Sydney Water in the summer of 2009/2010 to provide the final assessment of the odour impacts from the site.

The condition placed on your proposed development by Pittwater Council to satisfy a Level 3 odour impact assessment would require a CALPUFF atmospheric dispersion programme to be carried out. This will require Meriton to engage the services of an appropriate consultant, at its cost, to carry out the CALPUFF modelling.

Sydney Water can provide all current modelling inputs to any consultant engaged by Meriton to deliver their report for the Level 3 odour impact assessment.

Should you have any further questions, please contact me on 8849 4113.

Yours sincerely

Brian Malligan
Senior DSR, Development Operations
