Subject: Graythwaite Site Proposed Development

To whom it may concern:

We are the owners of Kialoa and have just been made aware that in the noise attenuation section of the submission there is reference to us having a private agreement with the school over the terraces and noise coming therefrom. We would like to have registered that whilst we have an open relationship with Shore we are no different to other neighbours of the school and would expect the same consideration be given during assessment of noise from the terraces and the school generally. To our knowledge there is no agreement formal or otherwise which would suggest that we be excluded.

Yours faithfully

Tony and Robyn Maxwell
