The remaining significant trees in the school ground shore must be saved.

There is no way that they will be destroyed.

There must be proper planning to the new buildings for Shore Grammar school, impact having on the environment. We must think long-term concern on Climate Change and is essential to provide enough oxygen to the environment by having as much trees remaining.

We can't afford to destroy these beautiful historic Mortan-Figtrees. They the most precious trees, that must not be invaded

I put in my last comment to help save the significant Mortan Bay- Fig tree on the Graywaith site. Also to support the preservation of the historic sandstone Graywaith building.

The last to help drawing your attention is to think sustainable living.

To think long-term benefit to the environment on sustainability.

Important educate for the forth coming generation.

Yours Sincerely, Paul Vonwiller
