Hon. Tony Kelly  
Minister for Planning

Dear Minister,

I would like to draw your attention to the current Development Application and Concept Plan that Shore School has lodged with the Development of Planning.

This application of such a large scale development in a residential area should be refused for many reasons including the following-

- lack of community consultation
- failure to comply with the Director-General's requirements
- failure to respect neighbouring land uses
- buildings too high , too big and out of character
- estimated noise levels too high
- lack of public benefit

This site has been a matter of great public interest for many years , I request that you , the Minister hold a public enquiry under the Environmental Planning and Assessment Act before making any decision and let the community voice be heard.

Yours sincerely,  
Angela Arnold
