P1240	Project Website Submission	07/11/2010	Online Submission from john mcauliffe of Dutch Poffertjes (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area. How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

P1241	Project Website Submission	07/11/2010	Online Submission from Samuel Clark (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising â□˜down timeâ□™ between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve this application. North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth! P1242	Project Website Submission	07/11/2010	Online Submission from Amanda Berry (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being Most of the businesses within the Northern Rivers and Byron Shire are sole traders and do not offer any employment opportunities to the community. Bringing Splendour in the Grass festival back to Byron Bay would result in North Byron Parklands offering many new employment opportunities for the residents in the region. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

The North Byron Parklands idea is inspiring for young people. There is precious little around, particularly in regional areas, which is inspiring

P1243	Project Website Submission	07/11/2010	Online Submission from greg mckay (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. Name: greg mckay Address: 1/8 princess street, fairfield IP Address: - 203.27.62.92 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1244	Project Website Submission	07/11/2010	Online Submission from Megan Maitland (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the regionâ□™s creative industries, providing world class training and work experience opportunities. Name: Megan Maitland Address: 5 Executive Drive Burleigh Heads QLD IP Address: cpe-121-222-100-134.lnse2.cha.bigpond.net.au - 121.222.100.134 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1245	Project Website Submission	07/11/2010	Online Submission from Jeff Ramsden (support)

The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment.

I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

P1246	Project Website Submission	07/11/2010	Online Submission from JAZE PINK of PINK CATERING (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application. Name: JAZE PINK Organisation: PINK CATERING Address: 163 STATION ROAD,BETHANIA, QLD 4205 IP Address: 124-150-111-125.dyn.iinet.net.au - 124.150.111.125 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1247	Project Website Submission	07/11/2010	Online Submission from Cameron Zigliotto (support)	Byron is much better, near the coast and better set up. woodford was too much walking. P1248	Project Website Submission	07/11/2010	Online Submission from Kira Wright (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. It would be a shame to see this proposal turned down, it doesnâ□™t take much to see that the North Byron Parklands proposal has so much to offer.

P1252	Project Website Submission	07/11/2010	Online Submission from Samone Wear (support)

Please take our submissions seriously:

1. Splendour is more than a rock/music festival. It is an opportunity to visit, live and breath another states way of life. I have travelled from SA many times to be part of the Byron Shire lifestyle and enjoy the experience very much. In 2010 I came home to Adelaide and booked my daughter (9years) a trip into Byron so she can also feel the harmonious feeling Byron Shire provides a tourist.

2. I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs.

3. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities.

When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guy?s book.

Thank you for the opportunity to share, Regards Samone Wear

P1253	Project Website Submission	07/11/2010	Online Submission from Laura Gohery (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. Letâ□™s look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment. P1254	Project Website Submission	07/11/2010	Online Submission from Martina Nimac (support)	Byron Bay has always and will always be Splendour's spiritual home, as a person who discovered the beauty of this town through the pilgrimage to this festival i feel that it's return to it's natural home can far outweigh the negative impacts on the environment or the minimal disruption to the towns people, in the grand scheme of things one week in a year isn't a lot. This festivals runs for 3 days, and brings with it tourism to the region and jobs to the regions youth, yes we are using your parklands which has environmental impacts but the splendour team are committed to environmental conservation and regeneration so hand in hand we can preserve the natural beauty of this place. Taking the festival away from this amazing place is taking away people from discovering the beauty of such a place and the amazing humanity that ensues in an event such as this. Sure splendour did work at Woodford however it was nothing like it was in Byron, other venues just don't compare to the magic of a town like Byron Bay or the venues in Byron Bay. Splendour must return to it's home to ensure this event can run as amazingly as the first time i went to it. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity

				pass the region by would be a crime. More tourism equates to more money into to the town for community projects and increases in employment.
				The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as Byron Bay can really benefit youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. As a young person and someone who looks forward to this event every year i am inspired by the beautiful people i meet and the music is a celebration of freedom and life. Byron Bay will always be Splendour's home, it just needs a permanent home, not a temporary one Byron Parklands is the perfect venue, it just needs to be approved. Bring Splendour home!
				Name: Martina Nimac Address: 59 blackman parade Unanderra NSW IP Address: 220-253-179-91.nsw.netspace.net.au - 220.253.179.91 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1255	Project Website Submission	07/11/2010	Online Submission from Arie Iavi of ETNIX (support)	One of the most significant benefits for the environment coming out of this application is the proponentâ™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.
				North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers

region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

On all fronts, traffic, noise, ecology, flooding, safety, etc North Byron Parklands has demonstrated it has assessed all significant risks and put in place measures to manage all issues. Most more traditional developments do not even come close to the level of risk assessment undertaken by North Byron Parklands.

North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community.

THANKS

With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! Name: guy hillier Address: 65 glen ct, clagiraba 4211 IP Address: cpe-124-186-244-169.lns8.woo.bigpond.net.au - 124.186.244.169 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1259	Project Website Submission	07/11/2010	Online Submission from Rachael Biffen (support)	The North Byron Parklands Proposal will support the future of the Splendour in the Grass festival which in turn promotes economical and cultural growth in the Byron Bay area. Name: Rachael Biffen Address: 7 Trebor Lane, North Perth. WA 6006 IP Address: 175.102-26-211.dynamic.dsl.pth.iprimus.net.au - 211.26.102.175 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1260	Project Website Submission	07/11/2010	Online Submission from Jo LOEWENTHAL of Alice Blu (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. As soon as I started reading about this proposal I had an instant realization of the benefits North Byron Parklands would bring to our local economy but also to my family. North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldnâ□™t go ahead.

P1261	Project Website Submission	07/11/2010	Online Submission from Sam Lawrie (support)	The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light. Whatâ□™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Name: Sam Lawrie Address: 20 Neil st, Bundeena 2230 IP Address: ppp121-44-36-46.lns20.syd6.internode.on.net - 121.44.36.46 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1262	Project Website Submission	07/11/2010	Online Submission from Terry Pitt of Byron Bay Taxis (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption.

Byron Shire's economy is built on tourisim and events such as this one. As a major provider of personal transport the loss of this festival is a very real impact on our business and related sub-contractor drivers.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

We at Byron Bay Taxis ,Xcede Coach charters and airport shuttles give our unequivical support to this proposal.

P1263	Project Website Submission	07/11/2010	Online Submission from Kaidrick Flinders-Smith of Byron Visitor Centre (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book. We have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project. Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â The young people on the Northern Rivers deserve to have a festival that they can be proud of, a festival that they religiously attend, and a festival that is held in a environmental sound and sustainable venue. I fully support the North Byron Parklands proposal.

P1266	Project Website Submission	07/11/2010	Online Submission from Maddie Buhagiar (support)	In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force. I think that events like this help people grow, experience North Byron Parklands and all that our area has to offer. The North Byron Parklands proposal would definitely be a growing experience for me. Name: Maddie Buhagiar Address: 3 Oak IP Address: cpe-121-218-172-5.lnse4.cht.bigpond.net.au - 121.218.172.5 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1267	Project Website Submission	07/11/2010	Online Submission from Elise O'Ryan of AECOM (support)	The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. Name: Elise O'Ryan Organisation: AECOM Address: 84 Kensington Terrace, Toowng, 4066 QLD IP Address: ip-203-56-22-126.mel1.au.aecom.com - 203.56.22.126 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1268	Project Website Submission	07/11/2010	Online Submission from Suzanne Cox (object)	Putting a cultural event site in this location and of this size is really not OK!! This is an intrusion on our quality of life. I have been living in this region for over 16 years in locations Yelgun, South Golden Beach and now Ocean Shores. I have chosen to live in this area because it is not touristy. This is a mega event site and more suited to a city. It is too close to our small regional community and in so many ways, not to mention the impact it will have on our much valued Billinudgel Nature Reserve. Brunswick Heads is a peaceful, tranquil town that peaks in summer for families on low-key holidays. There have already been many issues with party-goers in Byron Bay and the impact and transformation of the town over the years and I do not want to see this happening to Brunswick Heads (the closest town to the

site) nor to Ocean Shores/South Golden Beach residential community. There is already a lack of affordable housing in the region, many people have in fact moved from Byron Bay to Ocean Shores because Byron Bay has become so unaffordable to live in due to less homes being available to rent on a long term basis as they are earmarked for holiday letting. We cannot afford to have this happen in Ocean Shores/South Golden Beach. The impact of holiday letting in Byron Bay has also meant major disruptions to the quality of life for neighbours in residential areas of the Byron Bay township and I do not want to see this happen to our community in the north of the Shire. Don't be mistaken - not everyone will want to camp on site. I know people who attended Splendour in the Grass when it was in Byron Bay and they don't like camping, but love the festival so they share the rent of a house with 10 or more people in Byron Bay and go back to their rental property to party on after the event. I do not want to see this happening in our small regional community. We are not a tourist area but a small community of people who have chose to live here for the quality of life it gives us. A mega festival site that has 4 mega festivals plus many other festivals and cultural events planned is just way over the top and too much pressure to be putting on our small regional community. This is not sustainable development!!

P1269	Project Website Submission	07/11/2010	Online Submission from Jordi Blomeley of Psybusspace Mobile Cafe (support)	Splendour In The Grass is an amazing festival that provides fantastic, quality entertainment plus funding to up and coming as well as established musical and visual artists from all over the country and indeed the world. It also provides enormous employment and trading opportunities for many small businesses in the area and also from around the country in the form of festival caterers such as myself and many of my colleagues. The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development, especially with the event so committed to it's positive environmental contribution in the area. Sincerely, Jordi Blomeley Name: Jordi Blomeley Organisation: Psybusspace Mobile Cafe Address: 23 Park Avenue, Rosebud West, Victoria, 3940 IP Address: cpe-121-217-155-226.lnse2.cht.bigpond.net.au - 121.217.155.226 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1270	Project Website Submission	07/11/2010	Online Submission from Rebecca Rhall (support)	North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures. The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region.

				After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve this application. Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer? Name: Rebecca Rhall Address: PO Box 1402BURLEIGH HEADS QLD 4220 IP Address: sharpy.dsl.onthenet.net - 203.22.124.148 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1271	Project Website Submission	07/11/2010	Online Submission from Brett Atkins of Atglynn Developments Pty Ltd (support)	While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low. North Byron Parklands has provided employment opportunities for local indigenous people through the planting of over seven thousand native trees across the site. The Madhima Gulgan rainforest regeneration team has also built and implemented over 25 nest boxes for local wildlife across the site.

				The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to.
				The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.
				Name: Brett Atkins Organisation: Atglynn Developments Pty Ltd Address: 19 Wells Street, Adamstown, NSW 2289
				IP Address: cpe-58-166-98-10.lnse5.cht.bigpond.net.au - 58.166.98.10

P1272	Project Website Submission	07/11/2010	Online Submission from Chrys McGlynn of Life's About Choices (support)	While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.
				North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region.

Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â

North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all donâ□™t move to cities.

P1273	Project Website Submission	07/11/2010	Online Submission from Peter Vobr (object)	I am a resident of North Ocean Shores that will be directly effected by the proposed festival site. I live with my family 1.8km from the site in a presently nice, quiet and peaceful part of Australia. I understand that there will be numerous events planned for this site which myself and my family will be directly impacted upon. The reason we moved to this area was for peace and quiet and a coastal community lifestyle. The festival site will shatter the ammenity of our area by higth noise, thousands of people flooding the area on a very regular basis, possible crime rate increase and festival goers camping out in cars all over our area similarly to the problems that occur in Byron Bay during events. I cannot see any positives for our community when a company holds events and destroys my and our way of life for the sake of making money. Therefore I am totally opposed to the Festival parklands proceeding. Name: Peter Vobr Address: 23 Palmer Avenue, North Ocean Shores, 2483 IP Address: - 202.3.65.73 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1274	Project Website Submission	07/11/2010	Online Submission from ophir biran of Sunmoon taichi (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided

an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

The economic value of creative industries for the region is estimated to be $190 million with the indutry having a job growth rate of 100% over the past decade. Lets bring Splendour in the Grass home, back to the the Byron Shire and develop our creative industires further to provide new and exciting job opportunities for the youth in the future.

P1275	Project Website Submission	07/11/2010	Online Submission from Malcolm Drysdale (support)	The northern rivers regional environment, events, culture and celebration is the best reason to go ahead with this proposal. Splendour in the Grass also offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, interpersonal skills and event management. Splendour in the Grass also offers work to hundreds of extremely talented musicians, live sound engineers, and event managers. This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create many new jobs, attract more visitors, encourage more cultural events, and bring the community together. North Byron Parkland events are not only for the youth, they're for the whole community, young and old. Events can bring much needed economic support to the region as well as rejuvenating the relationships with our elders and our juniors. Name: Malcolm Drysdale Address: 6 Jarvis Street, Clunes, NSW, Australia, 2480 IP Address: ppp121-44-230-48.lns20.syd7.internode.on.net - 121.44.230.48 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1276	Project Website Submission	07/11/2010	Online Submission from Ayla Caughey (support)	It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ□™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. Name: Ayla Caughey Address: 5 Azolla place Byron Bay IP Address: - 192.148.117.79 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1277	Project Website Submission	07/11/2010	Online Submission from Kate Heath (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet. The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. Why wouldnâ□™t we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal. Name: Kate Heath Address: 154 Rae St Melbs IP Address: 124-168-122-55.dyn.iinet.net.au - 124.168.122.55 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1278	Project Website Submission	07/11/2010	Online Submission from Mary Lunardi of Stall Holder (support)	As a Stall Holder and a small one at that, Events like Splendour gives me the opportunity to sell my homemade clothing range that is made from recycled materials to the many visitors that attend the event. It blows me away when I have also sold in Vic and Qld and I am recognized. Not bad for a small fry..Giving the Splendour its own land to hold its own event will bring so much employment of may types to the Byron shire, infrastructure, water, water tanks, roads, trees, toilet blocks, drains..etc etc my gosh, many years of future employment for so many people of various ages. I am 52 and bust my guts to get to Splendour be it as a stall holder or a patron. The more land allocated to events like Splendour, Woodford Folk Fest, Rainbow Serpent, Peats Ridge, etc etc Imagine if there were non of the Above! Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about $130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organizations. Name: Mary Lunardi

P1280	Project Website Submission	07/11/2010	Online Submission from Afnan Fassy of Sukltans Kitchen (support)	There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. Name: Afnan Fassy Organisation: Sukltans Kitchen Address: 9 Dewsbury St, Middle Park. 4074 IP Address: 60-241-102-38.static.tpgi.com.au - 60.241.102.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1281	Project Website Submission	07/11/2010	Online Submission from katrina porteus of kporteus holiday service (support)	This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative. The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species. Name: katrina porteus Organisation: kporteus holiday service Address: Newrybar

P1282	Project Website Submission	07/11/2010	Online Submission from Jennie Bacon (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved! Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth.

P1284	Project Website Submission	07/11/2010	Online Submission from Nicola Barnes (support)	Thereâ□™s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others. While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all. There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase. Name: Nicola Barnes Address: 1 Rosewood Place, North Bundaberg 4670 IP Address: 115-64-197-193.static.tpgi.com.au - 115.64.197.193 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1285	Project Website Submission	06/11/2010	Online Submission from Natalie Doyle (support)	So many people I know gain so much enjoyment from listening to live music. It seems to form an important part of our cultural expression within our society, however it appears to be on the wane in this country. To reverse this trend we need more venues that are sustainable such as that being proposed by North Byron Parkland It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunites and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events. Name: Natalie Doyle Address: 1/28 Browne StNew Farm QLD 4005 IP Address: 203-219-238-95.static.tpgi.com.au - 203.219.238.95 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1286	Project Website Submission	06/11/2010	Online Submission from Jodi Ruckley of Our Place on Earth (support)	To whom it may concern, Splendour in the grass has been an important cultural event for the byron bay area for many years. It has attracted tourists from far and wide which is so important for local businesses. Its a great opportunity to show the cultural and sustainable ways of living unique to this region and I truly hope the event will stay in our local region. North Byron Parklands seems ideal. I can be contacted on 0416 142 019 if you have any questions. Thanks, Jodi Name: Jodi Ruckley Organisation: Our Place on Earth Address: Unit 1a 84 Targo Rd Girraween NSW 2145 IP Address: dsl-220-253-79-11.nsw.netspace.net.au - 220.253.79.11 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1287	Project Website Submission	06/11/2010	Online Submission from Jillianne Norris (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. Members of our family have been regular attendees of Splendor In The Grass from the very first one 10 years ago at Byron to this year at Woodford, We know the Byron area well , and were 2 of the original pioneer families of the Gold Coast Beenleigh area over 160 years ago, generations of our family have holiday and lived in the area , and understand the importance of preserving the area for future generations AND WOULD NOT SUPPORT

ANY THING DETRIMENTAL TO THE AREA .

For the first time ever last splendor the whole family attended together at Woodford, we have a second business in vintage clothing and furniture at the Paddington Antique Center in Brisbane and in 2010 were were vendors for the first time at the festival selling vintage clothing , My husband ,and I and our 4 daughter had a very successful weekend in sales and family enjoyment , in fact we agreed that it was one of the best weeks of our lives for fun and family time,and cant wait for the next year , and perhaps bring even more family MEMBERS.

On a personal level it was fantastic , but also in a professional level what I would like to make note is that I was very impressed with some the conditions in my original application to be a vendor there , I had to submit a plan of my area , with detailed description of my stock , I had to agree not to use plastic bags , and give a explanation of how I would care for the environment and commit to recycling and explain how I would do this , safety was a priority, I was to have public liability insurance , and have all electrical appliances and leads tagged . I have been involved in many fairs and markets over the years , but have to say this was the MOST WELL ORGANIZED AND CARING EVENT I HAVE WORKED IN ..AND HAVE NO QUALMS IN RECOMMENDING AND SUPPORTING .the submission ...THANKS JILLIANNE and Paul NORRIS ..BIZARRE STYLE VINTAGE DECOR AND FASHION ..0439735951

P1288	Project Website Submission	06/11/2010	Online Submission from Enrique Alarcon (support)	The North Byron Parklands has gone to great lengths to protect and enhance the biodiversity values of the site. This is shown by the Parklands group developing a environmental, health and safety management manual to identify, manage and monitor all the identified potential ecological risks. Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy. Splendour has become part of the culture of Australia, being an expression of music, art and youth; at the same time, it also represents the yearnings of younger generations to become more active in their communities and to achieve to great lengths economic prosperity and freedom of expression. Name: Enrique Alarcon Address: 42 Jansz Cres, Griffith ACT IP Address: iccache01.anu.edu.au - 130.56.71.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1289	Project Website Submission	06/11/2010	Online Submission from Fushia Saulwick (support)	For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers. Name: Fushia Saulwick Address: 21 Reckleben St. Castlemaine VIC 3450 IP Address: 112-213-142-150.bb.ispone.net.au - 112.213.142.150 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1290	Project Website Submission	06/11/2010	Online Submission from Toni Murray (support)

It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management.

North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community.

P1296	Project Website Submission	06/11/2010	Online Submission from Nick Wall of Dr.Moose T-Shirts (support)	I have been in business for 15 years in Byron Bay. I speak to everyone I can about there feelings with this festival and everyone wants it home. The festival gives not only a welcome boost to the slow economy we desperately need over quiet winter months but it gives to the whole community. Employment, donations to charities, not for profit groups and schools for our kids all benefit hugely and to lose this support would be just wrong on so many levels. I would also love to be visiting this festival over many many years to come and in turn take my young children for future generations to enjoy and have the memories of such an incredible weekend of music and just good energy. No-one in Byron wants to see us lose this festival and we as a town so heavily rely on this festival to help out the whole community like they in return want us to provide a beautiful town and shire to host our visitors.

				Please do the right thing and bring Splendour home to it rightful and original birth place. P1298	Project Website Submission	06/11/2010	Online Submission from Beate Sommer (support)	We should all be getting behind such an exciting project which offers businesses and the community a range of important social and economic benefits. The beauty of this application is that it also strongly supports the environment. This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together. I strongly support the application put forward by North Byron Parklands to establish a much needed outdoor music and arts venue. The government should approve this project as soon as practicable. Having read the North Byron Parklands application I cannot think of another proposed outdoor venue that has put so much effort into the identification and management of a range of issues. Surely this proposal must be approved on its merits Name: Beate Sommer Address:

P1300	Project Website Submission	06/11/2010	Online Submission from Jocelyn Leigh (support)	There is a reason why the government agencies including the National Parks and Wildlife services didn?t object to this application, it really is in the best interest of everyone. The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. These opportunities offered to the young community are truly invaluable to our region. In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. P1301	Project Website Submission	06/11/2010	Online Submission from Geoff Carleton (support)

With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative.

I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region.

If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

P1302	Project Website Submission	06/11/2010	Online Submission from Jeremy Sheaffe (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it. Splendour IN The Grass and other music events are where I get most of my family's annual income, spending a month away recently for the event was heart-breaking and difficult for us all. This event, and the others suggested will allow me and many, many others to continue to work in our chosen field in the area where we have grown up. It would be resolutely unjustifiable if a small number of 'squeaky wheels', many of whom are only relatively recently settled in our region force me and my family to have to look out of the region for work. Thank you Name: Jeremy Sheaffe Address: 93 Main St Clunes NSW 2480

P1303	Project Website Submission	06/11/2010	Online Submission from Joanne Burchall (support)	The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. Name: Joanne Burchall Address: 38 shelly beach road east ballina IP Address: ppp121-44-55-102.lns20.syd6.internode.on.net - 121.44.55.102 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1304	Project Website Submission	06/11/2010	Online Submission from Andrea Watkins (support)	It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklandâ□™s environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. If you speak to anyone these days, getting and keeping a job is high up on the list. Regional areas generally do not have a range of diversified industries to choose from. Parklands is offering meaningful and interesting work, particularly for young people and should be welcomed with open arms. Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application. Name: Andrea Watkins Address: 23 Fairfowl St Dulwich Hill NSW 2203 IP Address: 122.110.62.199.optusnet.com.au - 122.110.62.199 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1305	Project Website Submission	06/11/2010	Online Submission from natasha skuban (support)	The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. Name: natasha skuban Address: 49 second ave berala nsw 2141 IP Address: cpe-58-172-120-108.ldqc1.cht.bigpond.net.au - 58.172.120.108 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1306	Project Website Submission	06/11/2010	Online Submission from Kristopher Ayres of KpA Design and Construction (support)	I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. Name: Kristopher Ayres Organisation: KpA Design and Construction Address: 11 Shirley Lane, Byron Bay, N.S.W. 2481 IP Address: - 120.17.202.13 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1307	Project Website Submission	06/11/2010	Online Submission from stuart hoy (support)	Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone. Byron Shire Council has always longer for a permanent event site in its LGA, particularly now that the existing sites are either no longer available or are two inadequate to deal with world class events. The Blues Fest have bought a site which they intent to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would such a shame for the NSW government not to approve it. We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events. Name: stuart hoy Address: 16 avenue street coffs harbour IP Address: 203.35.233.220.static.exetel.com.au - 220.233.35.203 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1308	Project Website Submission	06/11/2010	Online Submission from Helena Michalak of Student (support)	Dear NSW Department of Planning, If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. I've attended many Splendours and it's not quite the same since it's not at Bryon Bay anymore! Bring Splendour home! Yours sincerely, Helena Michalak Name: Helena Michalak Organisation: Student Address: 60 Hawbridge St, Carseldine, Q 4034 IP Address: cpe-24-193-13-82.nyc.res.rr.com - 24.193.13.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1309	Project Website Submission	06/11/2010	Online Submission from Lee Savage of nil (support)	The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisation?s like North Byron Parklands to provide much needed jobs. We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level! North Byron Parkland events are not only for the youth, they?re for the whole community, young and old. Events can rejuvenate and reconnect us with our elders and our juniors. Name: Lee Savage Organisation: nil Address: forest lake IP Address: 203-214-114-82.dyn.iinet.net.au - 203.214.114.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1310	Project Website Submission	06/11/2010	Online Submission from Maia Cookson of private (support)	Having grown up in the Byron shire i understand how important environmental issues are to the community. The splendour team have always been so involved and so supportive of keeping a healthy environment and holding events that have the least environmental impact. Splendour brings thousands of dollars to the local economy, my parents who own a small business in Byron really suffered from the impact of not having one of their best weekends of trading this year. It is so important for me to bring splendour home. Name: Maia Cookson Organisation: private Address: 201 The Pocket Rd, Billinudgel, NSW 2483 IP Address: d58-110-14-69.per16.wa.optusnet.com.au - 58.110.14.69 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1311	Project Website Submission	06/11/2010	Online Submission from Tyler Shilling (support)	Hi there, I am in full support of the North Byron Parklands proposal. North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site.

North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

Please bring Splendour in the Grass back to its rightful home , and to an amazing new site with endless possibilities and an extraordinary ecological plan.

Sincerely,

Tyler Shilling

P1312	Project Website Submission	06/11/2010	Online Submission from stephanie petrou (support)	One of the most significant benefits for the environment coming out of this application is the proponentâ™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Name: stephanie petrou Address: 17 redgum pl, suffolk pk, Byron bay, 2481, nsw IP Address: 252.108.70.115.static.exetel.com.au - 115.70.108.252 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1313	Project Website Submission	06/11/2010	Online Submission from Johannes Weiley (support)	The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ™ economies. The proposed North Byron

Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed.

The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

I really can't see the point of taking away splendour. The positives outweigh the negatives without doubt. The old hippy Byron Bay is gone, there is no point in trying to hold onto that old image. However, stripping the community of Splendour will only further destroy the vitality and energy of the community.

Regards,

Johannes Weiley

P1314	Project Website Submission	06/11/2010	Online Submission from Jamie Uren of Site (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together. There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals. Name: Jamie Uren Organisation: Site Address: Po Box 1217, Lismore, NSW, 2480 IP Address: c58-107-244-129.mirnd3.nsw.optusnet.com.au - 58.107.244.129 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

The beauty of this application is that it also strongly supports the environment. The Byron Shire and Northern Rivers region is home to an aging community with a high proportion of retirees. This means many young people are leaving the area to seek education and employment opportunities elsewhere. North Byron Parklands would help provide employment for many of these young people, thus giving them a reason to stay in the area. So many people I know gain so much enjoyment from listening to live music. It seems to form an important part of our cultural expression within our society, however it appears to be on the wane in this country. To reverse this trend we need more venues that are sustainable such as that being proposed by North Byron Parkland North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community. Name: Jason Fosse Address:

				31 Brantwood St. Sans Souci NSW 2219 IP Address: c122-106-38-37.rivrw1.nsw.optusnet.com.au - 122.106.38.37 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1316	Project Website Submission	06/11/2010	Online Submission from Jason Waterford of Nab (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coastâ□™s existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas. One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive. Having a world class sustainable event site will encourage the youth be become more creative, help them build towards a career in a creative industry and boost creative industries in on the Northern Rivers.

Having a world class sustainable event site will encourage the youth be become more creative, help them build towards a career in a creative industry and boost creative industries in on the Northern Rivers.

Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy.

P1319	Project Website Submission	06/11/2010	Online Submission from aaron millar (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing. Most of the businesses within the Northern Rivers and Byron Shire are sole traders and do not offer any employment opportunities to the community. Bringing Splendour in the Grass festival back to Byron Bay would result in North Byron Parklands offering many new employment opportunities for the residents in the region. The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy.

P1320	Project Website Submission	06/11/2010	Online Submission from Emma Wilkinson of Viva magazine (support)	Name: aaron millar Address: 251 hawken drv St Lucia 4067 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guy?s book. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved! In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. These opportunities offered to the young community are truly invaluable to our region.

				Name: Emma Wilkinson Organisation: Viva magazine Address: Viva magazine Manchester England IP Address: pool4-188.dyn.winshop.com.au - 121.50.222.188 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1321	Project Website Submission	06/11/2010	Online Submission from Connor Benfield (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

Thank you for your time.

Regards,

Connor Benfield

P1322	Project Website Submission	06/11/2010	Online Submission from Karly Huber (support)	Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Name: Karly Huber Address: 406/32 Surf Parade, Broadbeach, QLD 4218 IP Address: - 115.131.22.170 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1323	Project Website Submission	06/11/2010	Online Submission from Malcolm Baker (support)	While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. This proposal will create a cultural breading ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home! Name: Malcolm Baker Address: 46 Elliot Road Clunes NSW IP Address: 203-217-17-41.perm.iinet.net.au - 203.217.17.41 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1324	Project Website Submission	06/11/2010	Online Submission from Rebecca Ryan (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. The local government must get behind the North Byron Parklands proposal and bring Splendour in the Grass back to the Byron Shire area. The Byron shire needs the tourism, the culture and the job opprotunities that will come from this development. Lets get behind it! The North Byron Parklands will deliver a range of social benefits particularly in the form of the proposed community grants program. This initiative will see up to $100,000 a year ploughed back into the local community.If we rationally consider that the proposed North Byron Parklands venue will only be in operation for a number of weeks a year plus bump in and out then one can see that the environment will be rested for most of the year and the community will reap the benefits but not the downside of a venue that operates all year long. Name: Rebecca Ryan Address: 152 Gap Creek Road, Brookfield, Brisbane, Queensland IP Address: cpe-121-223-99-184.lnse2.woo.bigpond.net.au - 121.223.99.184 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1325	Project Website Submission	06/11/2010	Online Submission from Glenn Wright of Vitamin Records (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. With the recent global financial crisis many businesses in the area were hit hard. Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. P1326	Project Website Submission	06/11/2010	Online Submission from Kate O'loughlin (support)

I live in the northern part of Byron Shire, I will be affected by anything that decides to go on in the north byron parklands.

I love splndor and what it brings to the shire, it was sorely missed in 2010 when it wasn't there, I am also a local business owner and see the benefit for local businesses.

However I cannot agree to the amount of time they will use the land for in reality it will be once a month, there will be huge trucks and massive traffic. I went to wooford splendour 2010 and the impact that the traffic had on that little town was hug, I am ok with that once a year but to have that happen several times a year, in my view is unsustainable. I get that the land will be free 285 days a year and thats great but unless its in a big chunck of time how will the wildlife have time to settle before the next installment comes.

Yes I would love t have splendour back in the shire and it is a wonderful festival, but the greed of cashing in with more festivals , and "cookie cutting" the experience is unrealistic for an area such as North Byron Parklands.

thank you for allowing my say.

P1327	Project Website Submission	06/11/2010	Online Submission from susanna zito (support)	There is a real need to reverse the current trend of closing music and artistic venues around the State of NSW. Music and arts are so important to the health and vibrancy of a community and I urge you to approve the North Byron parklands venue. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. Name: susanna zito Address: 6 giaour st

P1328	Project Website Submission	06/11/2010	Online Submission from Cameron BIrd (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. Letâ□™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ□™s get on with the job of creating exciting training and employment opportunities for our young people. Name: Cameron BIrd Address: Kerr St Fitzroy

P1329	Project Website Submission	06/11/2010	Online Submission from David Hanigan (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area. Name: David Hanigan Address: 12 Clarence RdLondon ChiswickW43as IP Address: 85-210-33-163.dynamic.dsl.as9105.com - 85.210.33.163 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1330	Project Website Submission	06/11/2010	Online Submission from Asia Armstrong (support)	As a born and bred resident of the Byron Shire (particularly north Byron Shire - New Brighton) I firmly support the proposed Splendour in the Grass site at Yelgun. I am aware of the negative responses to this proposal and some of them are compelling, however the overwhelming positive response from the Splendour team is far more persuasive. There will always be festivals and there will always be those who dont enjoy the atmosphere and increased crowds that they bring. But music or cultural festivals are such an important positive part of a lot of peoples lives and should not be taken away due to a few unhappy non-attendees. The long-term plan for the land at Yelgun is far more sustainable than many could hope for, the organisers are trying really hard to appease all sectors of society and should be applauded rather than slandered. There are plenty of events that go on around the country without such fore thought and public discussion! Let's promote the community, cultural and artistic minded nature that this shire was once renowned for and allow the next generations to kick back and enjoy a world class festival in beautiful surrounds. These 'youths' that are so easy to dismiss as out of control drug induced partiers are just someone else's children, and could as easily be your own. Let's not be too old to understand they just want a good time too (like we have all enjoyed in our youth!) These festivals are predominately about the music for most attendees, not just about getting out of it as anti-splendour propaganda would suggest. The Byron Shire risks becoming just another overpriced tourist zone if it continues to

abandon cultural events such as this one. Lets maintain the diversity in our community that has encouraged and attracted people from all over the world to visit our unique region.

Bring Splendour back to Byron Shire!

P1333	Project Website Submission	06/11/2010	Online Submission from Aeden Pittendreigh (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Name: Aeden Pittendreigh Address: 11 Glanmire St Paddington 4064 Queensland IP Address: 87.115.239.164.btebb.pcl-ag03.dyn.plus.net - 87.115.239.164 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1334	Project Website Submission	06/11/2010	Online Submission from Jody Whelan (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. So many people I know gain so much enjoyment from listening to live music. It seems to form an important part of our cultural expression within our society, however it appears to be on the wane in this country. To reverse this trend we need more venues that are sustainable such as that being proposed by North Byron Parkland The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of

				archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. Name: Jody Whelan Address: 27 Felix st Lutwyche 4030 IP Address: - 202.124.75.11 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1335	Project Website Submission	06/11/2010	Online Submission from Chinthi Jayasekera of james cook uni (support)	With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. This proposal of North Byron Parklands must be approved by local government. Having a

sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together.

North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management.

P1338	Project Website Submission	06/11/2010	Online Submission from Claire Perryn (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing.

P1340	Project Website Submission	05/11/2010	Online Submission from Ky Curran of dwdc designs (support)	There is a reason why the government agencies including the National Parks and Wildlife services didnâ□™t object to this application, it really is in the best interest of everyone. The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a

massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

My son is very keen to apply to North Byron Parklands for work. I would much rather have him work on this project here than lose him to the city. Please approve this proposal, itâ□™s important for our young people and our community.

P1341	Project Website Submission	05/11/2010	Online Submission from Elliot Crain of 1969 (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Just do it! Name: Elliot Crain Organisation: 1969 Address: 20 Enford Street, Hillcrest4118, QLD IP Address: cpe-58-174-148-222.mjcz1.woo.bigpond.net.au - 58.174.148.222 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1342	Project Website Submission	05/11/2010	Online Submission from Nick O'Byrne of AIR (Australian Independent Record Labels Association) (support)	To whom it may concern, I write concerning Splendour In The Grass' application to the NSW Department of planning to return the venue to its rightful home at its new site at North Byron Parklands. AIR is a national peak body which facilitates the development (both artistically and financially) of small and medium sized enterprise in the Australian Music Industry. AIR aim's to ensure the Australian Music Industry adopts best business practices, taking into account environmental, economic, social and cultural outcomes. AIR wholeheartedly supports Splendour In The Grass' move to their new site at North Byron Parklands Splendour In The Grass has a proven record of environmentally sustainable events management at Belongil Fields and Woodford in Queensland. There is no doubt that the event itself has significant economic benefits to the local shire. The well managed influx of tourists surrounding the event will inject millions into the local economy. Also, in my capacity of founding board member of Music Victoria (The Victorian Music Industry Association) I can say that Byron's ability to host such an event is the envy of many regions around the country. Finally, Splendour's support of Australian arts culture, local music and outcomes beyond the event itself are invaluable to the Australian music industry and provide a unique and practically priceless forum for both established and fledgling artists from around the country. Kind Regards

				Nick O'Byrne
P1343	Project Website Submission	05/11/2010	Online Submission from Bianca Thompson (support)	Name: Nick O'Byrne Organisation: AIR (Australian Independent Record Labels Association) Address: 437 Spencer St West Melbourne 3003 IP Address: ppp121-44-48-10.lns20.syd6.internode.on.net - 121.44.48.10 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. There are not very many opportunities in the far north coast for professional event

				management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals. From a personal level. Splendour in The Grass is something I've grown up with. I'm living overseas at the moment but I've rearranged travel just so I don't miss out. Don't take our traditions away from us please. Name: Bianca Thompson Address: 83 Pembroke Street Carina 4152 Brisbane QLD IP Address: customer7664.pool1.croydon-gln2000-bas0001.orangehomedsl.co.uk - 91.104.93.247 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1344	Project Website Submission	05/11/2010	Online Submission from Amanda Bowers (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing.

The North Byron Parklands will deliver a range of social benefits particularly in the form of the proposed community grants program. This initiative will see up to $100,000 a year ploughed back into the local community.

If we rationally consider that the proposed North Byron Parklands venue will only be in operation for a number of weeks a year plus bump in and out then one can see that the environment will be rested for most of the year and the community will reap the benefits but not the downside of a venue that operates all year long.

My partner and I have attended seven years of Splendour in the Grass at Belongil Feilds in Byron Bay. Even though we are local to Brisbane, when it was moved to Woodfordia closer to Brisbane for 2010, we were extremely nostalgic of Belongil Feilids. Despite Woodfordia being a beautiful and appropriate venue for Spledour, we missed being amongst the beautiful Byron surroundings. I value the contribution to Byron Bay and its surrounds and urge the department of NSW to take Splendour back to the festival's home site.

P1345	Project Website Submission	05/11/2010	Online Submission from Juan Carlos Araque (support)	The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. Name: Juan Carlos Araque Address: Unit 3 / 516 Mowbray Rd, Lane Cove North NSW 2066 IP Address: 115-64-23-169.static.tpgi.com.au - 115.64.23.169 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1346	Project Website Submission	05/11/2010	Online Submission from Stephanie Thoo (support)	I went to splendour in the grass 2009 and i had a blast! byron is a great site...not too far away from the town, but far enough that theres enough space. the reason i did not attend splendour this year is that i did not like the site it was at. i believe that splendour would bring great tourism and job opportunities to the local community as well as provide the ideal setting for australias best festival! Name: Stephanie Thoo Address: 17 tennant st torrens pk 5062 IP Address: - 115.131.192.99 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1347	Project Website Submission	05/11/2010	Online Submission from Stacey Puddepha (support)	To whom it may concern, Bring Splendour home to Byron Bay! Byron Bay is the heart and soul of Splendour in the Grass and forms an integral part of the festival's vibe. Not only that, but the festival injects more jobs and money into the local community as well as giving back to the community by way of charity to local organisations. It's important that the organisers local view and sensitivity to the surrounding environment is taken into consideration. Not only do they plan to regenerate what was on site previously but will work to ensure that the health, diversity and productivity of the environment is enhanced for the benefit of future generations. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported.

Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â□œresource centreâ□™ where materials can be stored and used again and again for other events.

Although the size of the events that could occur at Parklands may reach 50,000 people which, compared to other large events in Australia, is quite conservative, North Byron Parklands will only host events that fit into the appropriate and sustainable parameters.

I think, that based on the above points there is no basis for anything but a positive response to the campaign to bring Splendour in the Grass back to Byron.

Please consider the above points and do the right thing. Byron is where Splendour belongs.

Kind Regards,

Stacey Puddepha

P1348	Project Website Submission	05/11/2010	Online Submission from Caroline Forbes of Axiom College (support)	North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community. Regional communities rely on the ability to retain youth involvement in order to create sustainable growth through new business enterprises. I am actively involved through my profession in assisting a number of regional councils in developing programs specifically aimed at maintaining youth engagement and their ongoing contribution to local economies. Splendour allows the Byron Bay region to showcase all that it has to offer to the rest of the nation. Name: Caroline Forbes Organisation: Axiom College Address: 19 Elfreda Street, Alderley QLD 4051 IP Address: 114.73.51.230.optusnet.com.au - 114.73.51.230 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1349	Project Website Submission	05/11/2010	Online Submission from Gemma O'BRien (support)	The North Byron Parklands has gone to great lengths to protect and enhance the biodiversity values of the site. This is shown by the Parklands group developing a environmental, health and safety management manual to identify, manage and monitor all the identified potential ecological risks. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth.

Please do not make a huge mistake.

Let Byron bay be the home for Splendour in the Grass.

P1350	Project Website Submission	05/11/2010	Online Submission from Catherine Naidoo (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcomed by these businesses. Name: Catherine Naidoo Address: PO Box 2060Coffs Harbour NSW 2450 IP Address: - 129.94.102.213 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1351	Project Website Submission	05/11/2010	Online Submission from Wendy Wallis (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates

against adverse impact upon flora and fauna species.

Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

I support Splendour in the grass as it supports the economy of our town and the good people within it.

The organisers year after year have left our streets clean, donated to a great many local organisations and given us a world class event.

We are extremely unhappy to see it moved from it's current location, however still see the need to hold such an event at a more structured and purpose built site.

This new site would be a benefit not only to us, but our children who will undoubtedly (I hope), be a participant in such a wonderful event.

BRING SPLENDOUR HOME!!!

P1352	Project Website Submission	05/11/2010	Online Submission from Glen Wallis of Byron Hire ()	The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this. The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become ?out of bounds? to protect identified areas of importance. There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses. My son is very keen to apply to North Byron Parklands for work. I would much rather have him work on this project here than lose him to the city. Please approve this proposal, it?s important for our young people and our community. The good people at Splendour InThe Grass have been instrumental in delivering Byron Bay the calibre of event that deserves our town.

I am proud to stand behind the organisers that have not only supported my business but the wider community for a very many years.

They are a model of just how large events should be implemented and have shown this time after time.

Please at least give them the opportunity to show you the level of professionalism they ad

P1353	Project Website Submission	05/11/2010	Online Submission from Rachel Harwood (support)	As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesnâ™t proceed then itâ™s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklandsâ™ group? No-one. That would be a terrible lost opportunity. Name: Rachel Harwood Address: po box 8416Gold Coast Mail Centre9726 IP Address: cpe-58-169-177-10.lns5.cha.bigpond.net.au - 58.169.177.10 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1354	Project Website Submission	05/11/2010	Online Submission from Brett Nossiter of DMG Radio (support)	12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review with be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events. In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coastâ□™s existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. Having worked closely with the event organisers over the years I know from personal experience the importance they place on sustainable environmental practices, support for the local community and making a positive contribution to creative Name: Brett Nossiter Organisation: DMG Radio Address: 323/88 Macquarie St Teneriffe, QLD4005 IP Address: 203-214-82-168.dyn.iinet.net.au - 203.214.82.168 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1355	Project Website Submission	05/11/2010	Online Submission from melinda howarth (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. The northern rivers area over the past 20 years has been built on the back of the creative arts industry, so it is vital that the government support this industry by promptly approving the North Byron Parklands project. Musicians and artists are finding it harder to earn a living by way of live performances because so many venues are being closed down around the country. It is time the government supported this industry and one way of showing this support is by approving the North Byron Parklands venue. The North Byron Parklands will deliver a range of social benefits particularly in the form of the proposed community grants program. This initiative will see up to $100,000 a year ploughed back into the local community.

If we rationally consider that the proposed North Byron Parklands venue will only be in operation for a number of weeks a year plus bump in and out then one can see that the environment will be rested for most of the year and the community will reap the benefits but not the downside of a venue that operates all year long.

P1356	Project Website Submission	05/11/2010	Online Submission from Sonja Macfarlane (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. Name: Sonja Macfarlane Address: PO Box 75 Buderim Qld 4556 IP Address: 91-242.1-85.cust.bluewin.ch - 85.1.242.91 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1357	Project Website Submission	05/11/2010	Online Submission from Doug May of Sound Center (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket. With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity. In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed

north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTAâ™s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

The North Byron Parklands will deliver a range of social benefits particularly in the form of the proposed community grants program. This initiative will see up to $100,000 a year ploughed back into the local community.

If we rationally consider that the proposed North Byron Parklands venue will only be in operation for a number of weeks a year plus bump in and out then one can see that the environment will be rested for most of the year and the community will reap the benefits but not the downside of a venue that operates all year long.

P1358	Project Website Submission	05/11/2010	Online Submission from Shannon Dixon of penguin productions (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities. The two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism. You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. Name: Shannon Dixon Organisation: penguin productions Address: 75 karingi st ettalong IP Address: cpe-58-168-80-144.lns5.ken.bigpond.net.au - 58.168.80.144 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1359	Project Website Submission	05/11/2010	Online Submission from michael sganzerla (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. Everyone I know enjoys attending and listening to music so when an opportunity comes along to built a superior and sustainable live music and arts venue it is really important that governments seize the moment and approve it. North Byron Parklands is one such opportunity. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses. Name: michael sganzerla Address: 13/86 Ogden St Townsville 4810 IP Address: - 202.167.15.163 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

				https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1360	Project Website Submission	05/11/2010	Online Submission from Amanda Jennings (support)	In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. P1361	Project Website Submission	05/11/2010	Online Submission from carolina jensen of merivale (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guy?s book.

North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved!

Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry.

The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development.

P1362	Project Website Submission	05/11/2010	Online Submission from Trish COULTON of The Wax Room (support)	To The Byron Shire Coulncil, The Wax Room has always supported Splendour In The Grass, and will continue to support Splendour In the Grass. And this is why because when you take a business out of Byron your not just taking away the tourists that come with this event to Byron Bay, you are taking away for me - my regular Byron Bay clients who support my business all year round. Be Positive and remember this is a outcome that not only effects enviromental issues but a community that needs sustaining. Regards, Trish Coulton Name: Trish COULTON Organisation: The Wax Room Address: Shop 5/4 Bay Lane, Byron Bay 2481 IP Address: host86-176-94-188.range86-176.btcentralplus.com - 86.176.94.188 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1363	Project Website Submission	05/11/2010	Online Submission from Heather Henderson (support)	North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the chance to work on such a project. The government needs to take into account the generation of employment this proposal will create. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all don?t move to cities. P1364	Project Website Submission	05/11/2010	Online Submission from Paul Anthony Jones (support)	I was born in Lismore and live most of my life in and around Byron Bay with the exception of studying in Sydney and Melbourne and working for a few years in those cities and overseas in London, Tokyo and Rome. The North Byron Parklands proposal has important social, cultural, educational and economic value to our region. Properly instigated and managed, this proposal will engender positive future benefits for youth and the environment. Impacts will need to be measured and future expansion carefully considered to maintain a balance. Most who work in the creative industries will celebrate a positive outcome for the proposal further enhancing the regions burgeoning status as a creative centre. The failure of this proposal will put more pressure on expansion of alternative development industries such as housing to support the local economy which I believe will have greater impacts. Please support this proposal. Thank you, Paul Jones AIA architect Name: Paul Anthony Jones Address: 62 Butler Street Byron Bay NSW IP Address: 124-169-130-183.dyn.iinet.net.au - 124.169.130.183 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1365	Project Website Submission	05/11/2010	Online Submission from cordellier watson (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. North Byron Parklands will provide trainingÂ and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training. P1368	Project Website Submission	05/11/2010	Online Submission from Hannah Morrissey (support)	North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a quality venue for young people in our region. Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve.

P1371	Project Website Submission	05/11/2010	Online Submission from Tarryn Morris of The Red SHoe Collective (support)	North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring.

				As a youth of the area I am constantly searching for ways to broaden my horizons. I believe this proposal will offer new opportunities, new jobs, new experiences and new ways to develop. Name: Tarryn Morris Organisation: The Red SHoe Collective Address: 16 Gordon ST , Petersham , NSW , 2049 IP Address: 203-206-237-143.perm.iinet.net.au - 203.206.237.143 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1372	Project Website Submission	05/11/2010	Online Submission from melissa warren (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the region?s economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality.

P1374	Project Website Submission	05/11/2010	Online Submission from jessica bowman (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. The approval of the North Byron Parklands proposal will benefit the local creative industries and lead to a new wave of new and interesting jobs for the youth in the area. Letâ□™s build the local industry and make The Byron Shire a hub for creative individuals. Name: jessica bowman Address: 22 Lee Anne Cres, Bundoora, VIC IP Address: - 120.17.205.103 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1375	Project Website Submission	05/11/2010	Online Submission from Liam Haug of None (support)	I believe that Splendour In The Grass should return to North Byron Shire as it injects cash into local businesses which depend on making a large percentage of yearly income from the festival required to stay economically afloat in the region. This festival creates jobs in an area with poor employment prospects. The proposed site makes sense as the demand for music festivals are getting higher and higher every year. This means more mouths to feed and more crafts to be sold. Woodford is based in the Sunshine Coast which is in my opinion, not too short of cash. Qld already has its share of festivals but the one that Rock and Rollers respect and love the most is Splendour as it always commits to bringing artists that punters actually want to see. There is no other music festival in the Brisbane Metro/North Byron Shire that hosts the best music and the opportunity to camp for 3 days, creating a magical vibe and meet a real community of friendly music lovers alike. Please do the right thing and bring Splendour home. The North Byron Shire need the money more in their community than the big smoke does. Sincerely, Liam Haug. P1376	Project Website Submission	05/11/2010	Online Submission from sally king (support)	The economic value of creative industries for the region is estimated to be $190 million with the indutry having a job growth rate of 100% over the past decade. Lets bring Splendour in the Grass home, back to the the Byron Shire and develop our creative industires further to provide new and exciting job opportunities for the youth in the future. Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs. Name: sally king Address: 29 greer st bardon q 4065 IP Address: c211-31-48-152.kelvn3.qld.optusnet.com.au - 211.31.48.152

				Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1377	Project Website Submission	05/11/2010	Online Submission from Brooke Gransden (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. It would be a shame to see this proposal turned down, it doesn?t take much to see that the North Byron Parklands proposal has so much to offer. Name: Brooke Gransden Address: Bathurst NSW IP Address: - 120.158.227.76 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1378	Project Website Submission	05/11/2010	Online Submission from Simone Nischel of na (support)	Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management. ps: I think you should have facebook link on the bottom of this page! Name: Simone Nischel Organisation: na Address: 3 Coachwood Court IP Address: cpe-121-217-170-232.lnse2.cht.bigpond.net.au - 121.217.170.232 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1379	Project Website Submission	05/11/2010	Online Submission from Ben Speight (support)	Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. Name: Ben Speight Address: 44 Gregory St, Taringa, Qld 4068 IP Address: 115-64-197-193.static.tpgi.com.au - 115.64.197.193 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1380	Project Website Submission	05/11/2010	Online Submission from Johnny Abegg of JCA (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â□˜I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of

life improves along with the chance to attract and retain young, innovative people to a communityâ□™. (Donna Sue Sanders â□“ Executive Director of the Daytona State Foundation).

North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community.

The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience.

P1381	Project Website Submission	05/11/2010	Online Submission from Natalie Frkovic (support)	The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth. Name: Natalie Frkovic Address: 27 Edgar Street, Maroubra, NSW, 2035 IP Address: - 120.152.96.91 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1382	Project Website Submission	05/11/2010	Online Submission from Callum Glasby (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site.

				North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: Callum Glasby Address: 7 Merritt St Flinders View QLD IP Address: cpe-121-215-220-27.lns7.woo.bigpond.net.au - 121.215.220.27 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1383	Project Website Submission	05/11/2010	Online Submission from Cyndi Harris (support)	What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. In relation to environmental management one of the biggest impacts on fauna in this region

				is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. In relation to employment and wages the Byron local government area has one of the Stateâ□™s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. Name: Cyndi Harris Address: 6 Palm-Lily Crescent Bangalow NSW 2479 IP Address: cpe-124-187-180-27.lns17.cht.bigpond.net.au - 124.187.180.27 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1384	Project Website Submission	05/11/2010	Online Submission from Jeremy Stones of ONE (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. Itâ□™s exactly what we as a community need.

In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTAâ□™s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love.

P1385	Project Website Submission	05/11/2010	Online Submission from Matthew Lunney (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning. The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! AND ITS THE BEST FESTIVAL IN AUSTRALIA PLEASE DO NOT DESTROY IT!!!!!!!!!!!!!!!!!! Name: Matthew Lunney Address: 23 Glengariff Cl CHUWAR 4306 QLD IP Address: mail2.emergency.qld.gov.au - 131.242.134.237 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1386	Project Website Submission	05/11/2010	Online Submission from Joellene Carney (support)	These types of festivals encourage diverse cultural and age groups to feel a sense of community and national spirit. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. Name: Joellene Carney Address: Mid North Coast IP Address: - 203.123.119.158 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1387	Project Website Submission	05/11/2010	Online Submission from Michael Beasley of Local (support)	Bring back a Byron tradition and ignore the vocal minority anti everything freaks. Lets export them instead! Name: Michael Beasley Organisation: Local Address: 1 Bryce StSuffolk Park IP Address: 112-213-154-1.bb.ispone.net.au - 112.213.154.1 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1388	Project Website Submission	05/11/2010	Online Submission from Trudi Fitzgerald of KidzKlub (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ□™ economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our

				regions youth.
				Name: Trudi Fitzgerald Organisation: KidzKlub Address: 10 Muskwood place bangalow IP Address: cpe-121-218-208-177.lnse4.cht.bigpond.net.au - 121.218.208.177 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1389	Project Website Submission	05/11/2010	Online Submission from catherine sutherland (support)	We should all be getting behind such an exciting project which offers businesses and the community a range of important social and economic benefits. The beauty of this application is that it also strongly supports the environment. The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. Having a world class sustainable event site will encourage the youth be become more

				creative, help them build towards a career in a creative industry and boost creative industries in on the Northern Rivers.
				Name: catherine sutherland Address: 20 Lyndhurst St Richmond VIC 3121 IP Address: c220-239-201-253.richm3.vic.optusnet.com.au - 220.239.201.253 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1390	Project Website Submission	05/11/2010	Online Submission from Fiona Hunter (support)	One of the most significant benefits for the environment coming out of this application is the proponentâ□™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the

economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ□™s important to have these opportunities for young people in the region.

P1391	Project Website Submission	05/11/2010	Online Submission from Sally Krantz of Flight Centre (support)	In my community I know of more than a dozen people who will gain from the approval of this application. From part time work to gaining new business this project represents an excellent opportunity to strengthen the local economy. Parklands ensures that the site area and the adjoining sites are protected by maximising ?down time? between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. Name: Sally Krantz Organisation: Flight Centre Address: 24/133 Moray Street, New Farm qld 4005 IP Address: cbnel217.au.flitech.net - 203.160.2.130 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1392	Project Website Submission	05/11/2010	Online Submission from Amelia Kelly (support)	The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesnâ□™t proceed then itâ□™s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklandsâ□™ group? No-one. That would be a terrible lost opportunity. Name: Amelia Kelly Address: 2/520 Crown StSurry Hills NSW 2010 IP Address: mail.mca.com.au - 210.185.73.90 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1393	Project Website Submission	05/11/2010	Online Submission from Mimi Kelly of MCA (support)	This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ□™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. Name: Mimi Kelly Organisation: MCA Address: 140 George St Sydney, NSW 2000 IP Address: mail.mca.com.au - 210.185.73.90 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1394	Project Website Submission	05/11/2010	Online Submission from Nella van Veenendaal (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate.

				With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. Whatâ□™s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Name: Nella van Veenendaal Address: p.o box 6255 Alexandria NSW 2015 IP Address: - 203.196.59.108 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1395	Project Website Submission	05/11/2010	Online Submission from Ryan McLeod of RYANMCLEOD (support)	The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does

not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing.

P1396	Project Website Submission	05/11/2010	Online Submission from Cameron Peters (support)	If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. Name: Cameron Peters Address: 9 Semillon Court Tweed Heads South IP Address: cpe-124-185-145-61.lns5.cha.bigpond.net.au - 124.185.145.61 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1397	Project Website Submission	05/11/2010	Online Submission from Shyla Bauer (support)	I travel to byron annually to attend splendour and the beautiful surrounding areas and was heartbroken when it was moved to north of brisbane last year. While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. Itâ□™s exactly what we as a community need. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. P1398	Project Website Submission	05/11/2010	Online Submission from Chris Ashton (support)	Byron Bay is a tourist destination known for its beautiful location, artistic community and internationally renowned music festivals. Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. I believe the overwhelming majority of residents in the Byron Bay area should not be disadvantaged as a result of the actions of a minority. The Byron Shire Council has been anti tourism for many years now, and the shire is now starting to feel the pain. Please don't let this continue. Byron is famous for its festivals. This year another Byron icon, the Blues n Root Music Festival, was awarded Australian Event of the Year Award. Let Splendour have

				a chance to shine! Thank you. Name: Chris Ashton Address: 40 Mountain View Dr, Goonellabah 2480 IP Address: - 203.39.136.200 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1399	Project Website Submission	05/11/2010	Online Submission from Dylan Thomas (support)	I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. Personally, I feel that visitors to this festival feel as strongly about nature as those who oppose it may. Often to achieve a sense of connection with the land one must travel hours inland to locations away from the prying eyes of suburban protests and unwanted persons.

				Wouldn't it be great if we could achieve that while keeping the festival within our community while helping to further stimulate the economy? Name: Dylan Thomas Address: 8 Bottlebrush Drive Pottsville NSW 2489 IP Address: mail.rickyrichards.com.au - 60.240.41.19 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1400	Project Website Submission	05/11/2010	Online Submission from Tara Kelly (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. Itâ□™s exactly what we as a community need. It is very exciting to see a proposal of this sort in the Byron Shire. North Byron Parklands will see a rise in employment opportunities for residents, a boost in sales in local businessâ□™, and a influx of cultural events. This development will make the north coast a definite stop on the tourist map for years to come. Lets get behind it! If we want to maintain a vibrant creative culture in our region we need to support proposals such as this. North Byron Parklands sustainable event space is a perfect way to sustain and encourage our local creatuve culture.

P1401	Project Website Submission	05/11/2010	Online Submission from Rob Fraser of Byron Bay Esssential Oils Pty Ltd (support)	Name: Tara Kelly Address: 122 Alcorn Street, Suffolk Park NSW 2481 IP Address: d211-31-241-48.dsl.nsw.optusnet.com.au - 211.31.241.48 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I am a local landholder and rate payer in the shire - in fact we own and farm the property next door to the Blues and Roots Festival site in Tyagarah. I can say from direct observation that a properly run festival is a benefit to the community, to wildlife and to the reputation of the greater Byron area. Splendour should return to the Byron area and Yelgun seems to me to be an excellent site. The arguments put up by the small group of "blockers" are mendacious, self-centred and rely on ridiculous assumptions. I have watched the Tea Tree Farm at Tyagarah be transformed into a model multiple land use environment. There are workable wildlife corridors networked through productive paddocks and park like public areas. I can think of no better sustainable land use example anywhere. In the first test event this year there were none of the traffic problems that dogged Belongil - and the locals (ie me) were not inconvenienced one iota. The noise was no worse than that of a B double roaring down the highway with a gentle south westerly blowing. No drunken yobs - no loss of amenity. Just a quite satisfaction in being a part of something with an international flavour. Having followed the increasingly shrill and entrenched arguments play out in the local papers I urge the Palnning Committee to put a stop to the squabble. Please adjudicate on this quickly and allow a perfectly sensible event to proceed.

P1402	Project Website Submission	05/11/2010	Online Submission from Harry Hanson (support)	Name: Rob Fraser Organisation: Byron Bay Esssential Oils Pty Ltd Address: 10 Hyram CrTyagarah 2481 NSW IP Address: gromit.zcard.com.au - 218.214.74.85 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc. North Byron Parklands will provide trainingÂ and work experience opportunities that will be

extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

P1403	Project Website Submission	05/11/2010	Online Submission from Robert Geisel (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising ?down time? between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Name: Robert Geisel Address: PO Box 8206 G.C.M.C. Bundall 9726 Qld. IP Address: cpe-124-185-82-48.lns3.cha.bigpond.net.au - 124.185.82.48 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1404	Project Website Submission	05/11/2010	Online Submission from Nicolette van Wijngaarden of Unique Estates (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire. North Byron Parkland events are not only for the youth, they?re for the whole community, young and old. Events can rejuvenate and reconnect us with our elders and our juniors. Name: Nicolette van Wijngaarden Organisation: Unique Estates Address: 126 Coolamon Scenic Drive, Coorabell, NSW, 2479 IP Address: cpe-60-229-252-204.static.nsw.bigpond.net.au - 60.229.252.204 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1405	Project Website Submission	05/11/2010	Online Submission from Nancy Hromin of Strike Zone (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisation?s like North Byron Parklands to provide much needed jobs. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. Name: Nancy Hromin Organisation: Strike Zone Address: 14 Flood st Clovelly 2031 IP Address: 58.108.189.184.optusnet.com.au - 58.108.189.184 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1406	Project Website Submission	05/11/2010	Online Submission from Nigel Smith (support)	The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. P1407	Project Website Submission	05/11/2010	Online Submission from Will Noble of Interested Citizen of Planet Earth (support)	Dear NSW Dept of Planning The North Byron Parklands Project will impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community. Yours faithfully Will Noble Name: Will Noble Organisation: Interested Citizen of Planet Earth Address: 78 Frederick Street, Sydenham NSW 2044 IP Address: noblew2.lnk.telstra.net - 165.228.11.206

P1408	Project Website Submission	05/11/2010	Online Submission from Danielle O'Byrne (support)	Splendour in the grass has a long standing tradition being held in Byron Bay and it would be a shame for this to be broken. The location of Splendour in Woodfordia this year was fabulous - such an amazing venue however if this cannot be permanent the festival really should go back to Byron. It needs a permanent home to build the tradition and ensure that there is a requirement to the land and nature surrounding the site during the rest of the year. The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

				This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments.
				Name: Danielle O'Byrne Address: 5 holyrood street hampton, Vic 3188 IP Address: mail.linenhouse.com.au - 116.240.192.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1409	Project Website Submission	05/11/2010	Online Submission from Jo Dillamore of Community Engine (support)	North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the region?s creative industries, providing world class training and work experience opportunities.
				Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area.
				North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

P1410	Project Website Submission	05/11/2010	Online Submission from Hayden Cox (support)	Name: Jo Dillamore Organisation: Community Engine Address: 15 Hogan Street, Balgowlah Heights, NSW 2093 IP Address: mx.communityengine.com - 210.215.89.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. In relation to employment and wages the Byron local government area has one of the Stateâ□™s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities.

P1411	Project Website Submission	05/11/2010	Online Submission from Dianne McFarland (support)	Name: Hayden Cox Address: 32/14 Polo Ave, Mona Vale, NSW 2103 IP Address: - 120.159.32.89 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. Name: Dianne McFarland

P1414	Project Website Submission	05/11/2010	Online Submission from Liesl Thomas of KPMG (support)	The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. We really need this to get the go ahead. My friends and I love events in Byron and would definitely attend events at North Byron Parklands. The Splendour in the Grass festival is a fun loving, young crowd that respect the environment and the festival surroundings. In past years I have seen minimal destruction of local environment and local areas and have seen the Byron area fill with locals and visitors alike to celebrate these amazing festivals. I hope this goes ahead. P1415	Project Website Submission	05/11/2010	Online Submission from Clancy May of Queensland Fire and Rescue (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs. The North Byron Parklands proposal will provide social benefits across the Northern Rivers area. Cultural events are valued by the community as it adds to their quality of life and creates improved social cohesion, lifestyle improvement, diversity, and increased creativity. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay. Name: Clancy May Organisation: Queensland Fire and Rescue Address: 2/123 Stoneleigh St, LUTWYCHE IP Address: mail2.emergency.qld.gov.au - 131.242.134.237 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1416	Project Website Submission	05/11/2010	Online Submission from Nick Drummond of Adelaide Development Company & UDIA SA EnviroDevelopment Committee ()	To Whom It May Concern, Splendour in the Grass is the most responsible and professionally run large scale event I have ever witnessed. The event organisers have always considered the safety of attendees and the environment as high priorities when conducting their events. One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region. I spoke to a number of local businesses in the Byron Shire in winter 2010 and they were struggling to make ends meet through the quiet winter months due to the loss of Splendour to the area. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

				I urge you to positively consider and approve the permanent move of the Splendour in the Grass festival to the North Byron Name: Nick Drummond Organisation: Adelaide Development Company & UDIA SA EnviroDevelopment Committee Address: 35 Mary Street Unley SA 5061 IP Address: eth429.sa.adsl.internode.on.net - 150.101.226.172 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1417	Project Website Submission	05/11/2010	Online Submission from Amy McKean of ACP magazines (support)	The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

				It would be a shame to see this proposal turned down, it doesnâ□™t take much to see that the North Byron Parklands proposal has so much to offer.
				Name: Amy McKean Organisation: ACP magazines Address: 4 Mccann Rd Rossmore NSW 2557 IP Address: - 115.186.228.9 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1418	Project Website Submission	05/11/2010	Online Submission from Matthew Day of Queensland Fire and Rescue Service (support)	While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.
				North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management.

From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

P1420	Project Website Submission	05/11/2010	Online Submission from Helen Mccabe of Suzuki (support)	For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands. If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a ?resource centre? where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

				Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.
				I just think that as it has been such a popular event and supportive fot he local community, local music acts and bringing top name acts to the revellers, then why is it not being held in its original venue? The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. Name: Shannon Gunn Address: 2/225 Oxley Road, Graceville, QLD, 4075 IP Address: ppp118-208-178-43.lns20.bne4.internode.on.net - 118.208.178.43 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1423	Project Website Submission	05/11/2010	Online Submission from sue blackburn of unsw (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. Itâ□™s up to us as adults to decide that we want to support venues that support young people.

With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. Itâ□™s up to us as adults to decide that we want to support venues that support young people.

P1424	Project Website Submission	05/11/2010	Online Submission from Owen George of GCMAG (support)	As a advertiser turned journalist and Editor for a publication in the last 5 Year's event in Australia have changed to be major staples for smaller community's to expand the tourism grasp attract attention for your community with the exposure such a positive event brings to the area Television Radio and all other medias working towards bringing people to you area for a positive experience they will remember for life i think this would be a great shame to loose such a event !!! We would love to see it back in byron bay but im sure other Areas would be throwing all they can at getting the festival The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. It would a great shame for the Byron Shire to loose the Splendour in the Grass festival. The local community needs the festival, as it offers a huge amount of business for local shop owners, pubs, hotels, motels and camping grounds. Many of these local business will feel great financial pressure if Splendour in the Grass does not return to the region. I Thank you for reading my submission and hope you will have the Festival Back Yours Sincerely Mr Owen George Editor and Chief GCMAG

				P: 0405628585 Name: Owen George Organisation: GCMAG Address: 20 Lakeland Key , Broadbeach Waters , QLD , 4218 IP Address: d58-111-86-185.rdl800.qld.optusnet.com.au - 58.111.86.185 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1425	Project Website Submission	05/11/2010	Online Submission from Michelle Day (support)	I support this application on a number of fronts but particularly on environmental management and social benefits flowing to the community. It is time to support the creative industries which so many people rely on for a living. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

P1426	Project Website Submission	05/11/2010	Online Submission from Louis Westgarth (support)	Name: Michelle Day Address: 197 Haly Street, Kingaroy, Qld IP Address: - 202.125.98.5 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available. P1430	Project Website Submission	05/11/2010	Online Submission from Anna Angel of Frock Paper Scissors Magazine (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! On all fronts, traffic, noise, ecology, flooding, safety, etc North Byron Parklands has demonstrated it has assessed all significant risks and put in place measures to manage all issues. Most more traditional developments do not even come close to the level of risk assessment undertaken by North Byron Parklands.

				I know many Byron residents and especially local business owners who revel in the chance to host such a great festival, and expose their area to the thousands of people that fall in love with it each year. Name: Anna Angel Organisation: Frock Paper Scissors Magazine Address: 1/25 Oriel Rd, Clayfield,QLD, 4011 IP Address: triton-core.net.qut.edu.au - 131.181.251.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1431	Project Website Submission	05/11/2010	Online Submission from Lyn Fleming of GC Bulletin (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. If you speak to anyone these days, getting and keeping a job is high up on the list. Regional areas generally do not have a range of diversified industries to choose from. Parklands is offering meaningful and interesting work, particularly for young people and should be welcomed with open arms. North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

				Name: Lyn Fleming Organisation: GC Bulletin Address: 3 Mibbin Pde Barneys Point. 2486 IP Address: - 165.69.13.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1432	Project Website Submission	05/11/2010	Online Submission from Jessica Dixon (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. Therefore I feel that it would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. Name: Jessica Dixon Address: Vanderbilt ST Eight Mile PlainsQueensland 4113 IP Address: cpe-121-208-117-165.eqmp1.cha.bigpond.net.au - 121.208.117.165

P1433	Project Website Submission	05/11/2010	Online Submission from Alex Casey (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community.

P1434	Project Website Submission	05/11/2010	Online Submission from Rainer Balzat of Dexter Rose (support)	Name: Alex Casey Address: 31 Newman Rd, Moorooka, Qld 4105 IP Address: 124-171-197-186.dyn.iinet.net.au - 124.171.197.186 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become â□œout of boundsâ□□ to maintain and protect identified cultural areas of importance. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. From a cultural breeding ground perspective alone we must get the proposal approved. Itâ□™s a fabulous exciting vision and we are very lucky that this proposal is before us. Name: samantha tedman Address: po box 544 woolgoolga 2456 IP Address: 122-149-228-52.static.dsl.dodo.com.au - 122.149.228.52 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1438	Project Website Submission	05/11/2010	Online Submission from Camilla Freestone (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. Events are a huge part of the Byron Shire calendar and the area has benefited over the

				years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: Camilla Freestone Address: 66 Sunshine Parade, Miami, Gold Coast, QLD IP Address: 122-149-211-60.static.dsl.bean.com.au - 122.149.211.60 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1439	Project Website Submission	05/11/2010	Online Submission from Lucy Corke (support)	While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately $55,000 compared with $71,000) and as such

employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region.

North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth!

P1440	Project Website Submission	05/11/2010	Online Submission from Alison Webb (support)	Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner. Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands. Name: Alison Webb Address: 36 Beatrice Street, Bardon Qld 4065 IP Address: - 115.186.240.94 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1441	Project Website Submission	05/11/2010	Online Submission from Brigitte Cooney (support)

By having a permanent home for the event it enables people to come together at the same time every year at the same venue and creates a community of music , culture and the environment. The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. This proposal will also aid the North Byron Parklands and the local economy .

P1442	Project Website Submission	05/11/2010	Online Submission from Sam Sheriff (support)	In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. Name: Sam Sheriff Address: 14 tingara crt Tewantin 4565 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1443	Project Website Submission	05/11/2010	Online Submission from Ashlee Rush (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure.

I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region.

While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. Itâ□™s up to us as adults to decide that we want to support venues that support young people.

P1444	Project Website Submission	05/11/2010	Online Submission from Shane Winterbon (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. Too many people are forced to look outside Byron for employment opportunities. The North Byron Parklands proposal offers ample opportunities and will surely make the locals very happy. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. Name: Shane Winterbon Address: 2/29 Hillview Ave, Moama, NSW, 2731 IP Address: - 153.107.33.155 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1445	Project Website Submission	05/11/2010	Online Submission from Tess Maddison (support)	With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate. Name: Tess Maddison Address: 2/29 Hillview Ave, Moama, NSW, 2731 IP Address: - 153.107.33.155 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1446	Project Website Submission	05/11/2010	Online Submission from Linda Pforr (support)	Too many people are forced to look outside Byron for employment opportunities. The North Byron Parklands proposal offers ample opportunities and will surely make the locals very happy. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. Name: Linda Pforr Address: A33/41 Gotha Street Fortitude Valley QLD 4006 IP Address: - 148.177.193.210 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1447	Project Website Submission	05/11/2010	Online Submission from Damien Collins (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit

				significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers. Name: Damien Collins Address: 178 oceanic drive warana 4575 QLD IP Address: cpe-124-186-139-115.lns10.woo.bigpond.net.au - 124.186.139.115 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1448	Project Website Submission	05/11/2010	Online Submission from Hannah Morris (support)	Its time for our state government to get behind the music and arts industries and support them by helping to provide a much needed sustainable outdoor music and arts venue. Its time to approve North Byron Parklands.I know many people in the creative industries sector that will benefit financially and through greater exposure to their markets if the North Byron Parklands project is approved. In NSW we need more venues so it makes good sense to approve this project. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed.

P1450	Project Website Submission	05/11/2010	Online Submission from Sean Mitchell (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â□œresource centreâ□™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

It would be a shame to see this proposal turned down, it doesnâ□™t take much to see that the North Byron Parklands proposal has so much to offer.

P1451	Project Website Submission	05/11/2010	Online Submission from Adam Whitehead (support)	The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW. Name: Adam Whitehead Address: 1/15 Martins Avenue BondiNSW 2026 IP Address: - 203.28.166.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1452	Project Website Submission	05/11/2010	Online Submission from Monika Fedorczyk (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. Name: Monika Fedorczyk Address: PO Box 171, Robina DC, QLD 4226 IP Address: tbone0002.pacific.net.au - 125.255.81.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1453	Project Website Submission	05/11/2010	Online Submission from Claire Ward (support)	The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. Name: Claire Ward Address: 71 Gaynesford St Mt Gravatt 4122 IP Address: 60-242-2-107.static.tpgi.com.au - 60.242.2.107 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1454	Project Website Submission	05/11/2010	Online Submission from justin jones (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various

				events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.
				Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.
				Name: justin jones Address: 32/44 Moorhouse st O'Connor Canberra IP Address: - 180.95.3.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1455	Project Website Submission	05/11/2010	Online Submission from andy crook of Art Struct (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.
				Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many

large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P1460	Project Website Submission	05/11/2010	Online Submission from Michael Thompson (support)	The economic value of creative industries for the region is estimated to be $190 million with the indutry having a job growth rate of 100% over the past decade. Lets bring Splendour in the Grass home, back to the the Byron Shire and develop our creative industires further to provide new and exciting job opportunities for the youth in the future. Name: Michael Thompson Address: 61 Enoggera tce, RED HILL, 4059 IP Address: 60-241-212-14.static.tpgi.com.au - 60.241.212.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1461	Project Website Submission	05/11/2010	Online Submission from David Mooney of one meaning communicated differently (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful.

				North Byron Parkland events are not only for the youth, theyâ□™re for the whole community, young and old. Events can rejuvenate and reconnect us with our elders and our juniors.
				Splendour in Woodford was great but this site seems much better. Also having splendour away from Byron felt wrong. I trust the organisers as they consistantly run the best music festival in Australia.
				Name: David Mooney Organisation: one meaning communicated differently Address: 165 Belgrave EspSylvania WatersNSW 2224 IP Address: mail2.acli.com.au - 203.63.243.106 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1462	Project Website Submission	05/11/2010	Online Submission from Elodie le merrer (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed.
				The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site.
				Most businesses that operate in Northern NSW do not have anywhere near the level of

sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

Byron Bay is known for its culture and events. Donâ□™t deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal!

P1463	Project Website Submission	05/11/2010	Online Submission from Ashleigh Gill (support)	Splendour in the grass is much more than a music festival, it is the whole experience which Byron bay creates. Although it is a tourist destination, the event brings a lot of revenue for local businesses from Australian's visitors, which is not the case in Woodford. The event organiser's are environmentally minded and I have no doubt that the area will be restored once the festival has finished. Name: Ashleigh Gill Address: 12 Belbowrie rd, Toormina, NSW 2452 IP Address: 110-174-227-186.static.tpgi.com.au - 110.174.227.186 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1464	Project Website Submission	05/11/2010	Online Submission from Yasoda Gonzalez of peace music (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

				Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. Itâ□™s up to us as adults to decide that we want to support venues that support young people.
				Name: Yasoda Gonzalez Organisation: peace music Address: 1105/14 kings cross rd potts point nsw 2011 IP Address: r220-101-138-249.cpe.unwired.net.au - 220.101.138.249 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1465	Project Website Submission	05/11/2010	Online Submission from Duncan Young of RMIT (support)	Splendour is the best run, and most incredible music and arts festival in Australia, bringing in the best lineups year after year. I have attended for the past 4 years, flying all the way from melbourne to have the time of my young life and to think that this is being put in jeopardy is horrifying! The impact of not having this festival would be catastrophic to the music scene all round Australia. Many of the major international acts that have come to Australia in the last 10 years have done so largely because of the pull of this festival, and I owe so much to the organisers for showing me the likes of The Flaming Lips, Bloc Party, Sigur Ros, The Doves, and at least 100 other international bands that I could not have seen without them. To not allow Splendour In The Grass the use of their own land would be a stake in the heart of Australian music (especially due to the fact the 90% of government funding for the arts goes to operatic and classical music) and to even consider it demonstrates the great lack of understanding for youth culture and identity in Australian politics.

				On hands and knees I beg those concerned to bring the premier Australian music festival back to Byron, where it belongs, and to show some consideration for the music loving Australian public. This is not some Gypsy festival, it is Splendour In The Grass, and it deserves a home! Name: Duncan Young Organisation: RMIT Address: 443 Flemington rd North Melbourne 3051 IP Address: - 202.124.88.232 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1466	Project Website Submission	05/11/2010	Online Submission from Melanie Barnes (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

				The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.
				Name: Melanie Barnes Address: 106 Crawford Road Maylands WA 6051 IP Address: - 159.207.172.108 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1467	Project Website Submission	05/11/2010	Online Submission from glen grigor (support)	Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people.
				In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.
				In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building

program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

NSW has a golden opportunity to be a leader in outdoor event venues by approving North Byron Parklands. What will no doubt be an iconic music and artistic venue will be the envy of other states and will no doubt attract events from other states to NSW.

P1468	Project Website Submission	05/11/2010	Online Submission from Madelie Eaves (support)	I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures. Name: Madelie Eaves Address: 30 Harding St Enoggera 4051 IP Address: cpe-58-173-242-108.nmqt1.woo.bigpond.net.au - 58.173.242.108 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1469	Project Website Submission	05/11/2010	Online Submission (support)	Dear Sir/Madam, I am writing in support of the proposed relocation of the Splendour in the Grass music festival back to the NSW North Coast and especially to the new site at Yelgun. I support the relocation for the following reasons. 1) North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures. 2) North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become â□œout of boundsâ□□ to maintain and protect identified cultural areas of importance. 3) Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing. 4) There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city. As a resident of the NSW North Coast I've seen this festival grow into the success that it is today. For this event to stay in Queensland and for us locals to see the potential tourism value of this festival disappear is completely unfair and wrong. I would encourage the NSW Planning Department to reinstate this event back to the North Coast so that the cultural character of this part of the world can continue to shape the future of this festival, of which it already has done for many years already. PLEASE DO NOT DISCLOSE MY NAME ON THE DEPARTMENT OF PLANNING WEBSITE OR IN ANY CASE WHERE THIS SUBMISSION IS DISPLAYED FOR PUBLIC VIEWING OR USE. THANK YOU. P1470	Project Website Submission	05/11/2010	Online Submission from Emma Last of N/A (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. From a cultural breeding ground perspective alone we must get the proposal approved. Itâ□™s a fabulous exciting vision and we are very lucky that this proposal is before us. Name: Emma Last Organisation: N/A Address: 5/11 Ada Street, Taringa Qld 4068 IP Address: 1.40.140.112.optusnet.com.au - 1.40.140.112 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1471	Project Website Submission	05/11/2010	Online Submission from Meghan Achilles (support)	Dear NSW Department of Planning, I am surprised to understand that Splendour in the Grass (SITG) festival are currently not able to use the land that they have purchased for its intended purpose â□“ their annual festival site. As a part-time local (my family has a property in New Brighton) I know just how important this festival is to local business owners. I attended SITG in Byron in 2009, and spoke to a small business owner who runs a bus shuttle company. He is based in Mullumbimby, and hires more buses just for the weekend of Splendour. Splendour brings him the most business of any time in the year â□“ and not allowing the festival to go ahead severely impacts on his business. The local shire is full of small business owners just like this one, who benefit so much from the $18 million that SITG into the local economy. The festival weekend rates as one of the busiest periods alongside Christmas and the New Year. SITG has always had a strong commitment to the environment. Hundreds of thousands of dollars is raised each year through punters purchasing carbon off-set tickets. This in turn helps to ensure the sustainability of the environment â□“ by opening up more funds which can be injected back into the maintenance of the ground outside of festival days. The festival proposes only to use the site over the three days of the festival, then will let it recover and regrow for the remaining 362 days of the year. 12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review with be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events. The fact that anyone would want to harm and hurt the local industry by opposing SITG continue to host their festivals in Byron is unbelievable. This is a fantastic festival, which attracts many people to the Byron shire, who often stay more days beyond the festival, and often revisit at other times of the year. KEEP SPLENDOUR IN BYRON!

P1472	Project Website Submission Plus Attachment	05/11/2010	Online Submission from Nathan Shaw (support)	Name: Meghan Achilles Address: 602/5 Manning St, Potts Point NSW 2011 IP Address: 210-9-152-98.static.rev.msi.net.au - 210.9.152.98 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Hi to local community and government organizations i am pleased to, that hopefully you shall take the time to read my view. With a long support history of myself supporting this amazing cultural event and to see it develop in all areas of support for the community shire of Byron Bay. I am pleased to see that over the 10 years i have attended this event my contribution of funding has been delivered to and around and for this community. With my intended support for the future of this event that is by far leading the way in festival cultural activities as i have traveled afar to many but i always still like to call Byron Home for my annual gathering of friends family. With new initiatives and support for environmental cultural understanding i wish to some day in the near future bring my children to this event as my siblings have done in previous years. Please Save our Culture! The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

P1473	Project Website Submission	05/11/2010	Online Submission from Luke Hancock (support)

The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment.

North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved!

We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level!

P1474	Project Website Submission	05/11/2010	Online Submission from Andrea Nies (support)

Surely it is obvious to the government that NSW needs a permanent sustainable outdoor music event, particularly one located on the far north coast. The application covers all issues and provides a range of solutions. It is now time to approve it.

When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered.

The northern rivers area over the past 20 years has been built on the back of the creative arts industry, so it is vital that the government support this industry by promptly approving the North Byron Parklands project.

Musicians and artists are finding it harder to earn a living by way of live performances because so many venues are being closed down around the country. It is time the government supported this industry and one way of showing this support is by approving the North Byron Parklands venue.

P1475	Project Website Submission	05/11/2010	Online Submission from Liliana Gilbert of Private (support)	There is a reason why the government agencies including the National Parks and Wildlife services didnâ□™t object to this application, it really is in the best interest of everyone. The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. Itâ□™s exactly what we as a community need. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a quality venue for young people in our region. Name: Liliana Gilbert Organisation: Private Address: 2 Musgrave AvenueSouthport Qld 4215 IP Address: d114-78-28-194.rdl800.qld.optusnet.com.au - 114.78.28.194 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1476	Project Website Submission	05/11/2010	Online Submission from Chris Hartley (support)

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger.

I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our region's youth.

After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands proposal 100% . The local government should approve this application.

P1477	Project Website Submission	05/11/2010	Online Submission from Morgan Warnock (support)	The benefits for this site just North of Byron Bay are aplenty. When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. Additionally, the events hosted here year-round will bring an influx of people, adding to the economy and boosting tourism. A major event, Splendour in the Grass, occurs during winter when tourism is low in this area, and many businesses struggle to cover costs. The benefits of such an addition to the area cannot be ignored. Finally, I ask you to think of Woodfordia. The permanent home of the Woodford Folk Festival in Queensland. This site is a perfect example of the success of a permanent setup for a festival, as it is continuously bettering itself and the environment around it. The festival itself, held annually, offers an enormous amount of culture, vibrancy, spirituality, employment and capital, to the little country town of Woodford, and the surrounding area. Residents of Woodford welcome the festival yearly with open arms, and with your support for the project, the North Byron Parklands can achieve the same. Name: Morgan Warnock Address: 19 Kinrade PlaceCarindale, Brisbane, 4152

P1478	Project Website Submission	05/11/2010	Online Submission from Kyle Williams (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

				North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldn?t go ahead.
				Name: Kyle Williams Address: 7/ 25 Whytecliffe Street, Albion, QLD 4010 IP Address: - 123.200.208.157 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1479	Project Website Submission	05/11/2010	Online Submission from Andrew Cameron of none (support)	12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review with be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events. The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services

				objected to the application.
				Events are really important for young people today. Coming together is not just about getting drunk and partying. Itâ™s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.
				Name: Andrew Cameron Organisation: none Address: 11 Castlemaine St Milton Qld IP Address: - 115.131.0.128 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1480	Project Website Submission	05/11/2010	Online Submission from Nicholas Fornasier (support)	The Marshallâ™s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities.
				The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

With up to twenty days of events each year the work experience opportunities for people in the region are very exciting. The bump in and bump out periods provide further work. We need these jobs and the training they provide, from high level event management to ticketing, technical production and traffic management.

P1481	Project Website Submission	05/11/2010	Online Submission from Jessica Radvan (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. Name: Jessica Radvan Address: 100 Orana St Carina QLD 4152 IP Address: c211-31-8-123.rochd5.qld.optusnet.com.au - 211.31.8.123 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1482	Project Website Submission	05/11/2010	Online Submission from Nick Volk of Who (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide.

How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands.

North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community.

P1483	Project Website Submission	05/11/2010	Online Submission from Stephanie Hill (support)	The local government must get behind the North Byron Parklands proposal and bring Splendour in the Grass back to the Byron Shire area. The Byron shire needs the tourism, the culture and the job opprotunities that will come from this development. Lets get behind it! While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible.

				Not only are these important reasons why Splendour should be supported, but the biggest reason is that this festival promotes excellence in contemporary music. Many music venues currently in NSW and Queensland are currently under pressure or closing down. Giving Splendour a permanent home would be a way the NSW department of planning could support the fragile arts sector, while also creating jobs and caring for the environment at the same time.
				Name: Stephanie Hill Address: 31 Birkridge Place The Gap 4061 IP Address: d114-78-45-116.rdl801.qld.optusnet.com.au - 114.78.45.116 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1484	Project Website Submission	05/11/2010	Online Submission from Kate Patterson (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. Splendour is an amazing event, not just the typical festival where people go to write themselves off with drugs and alcohol, but one where people appreciate the local community and the grounds in which the festival is held. Organisers have gone above and beyond to ensure that in holding the event at North Byron Parklands, it will be carried out in

				a sustainable, environmentally-friendly manner that reaps enormous benefits for the local community. It provides travellers with an opportunity to experience and observe the beauty of the North-Coast, enticing them to come back and visit year after year. Bring Splendour back to Byron! Name: Kate Patterson Address: 6 Kingfisher Lane, Kempsey NSW 2440 IP Address: 220-253-241-208.nsw.netspace.net.au - 220.253.241.208 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1485	Project Website Submission	05/11/2010	Online Submission from Jess Noon (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha

				thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. Name: Jess Noon Address: 'Cedarvale', Mitchell, QLD 4465 IP Address: - 116.250.140.69 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1486	Project Website Submission	05/11/2010	Online Submission from Nellie Hirst (support)	The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all

issues and the steps taken to resolve them.

How many more venues have to close in NSW before people realise that soon there will be nowhere to play live music or undertake live performances. The NSW Government has a responsibility to ensure that well managed live outdoor venues are made available to the people of this state.

I have attended the Splendour in the Grass festival every year since I turned 17 (I am now 21). The two day festival is a highlight of my year and one of the main things I look forward (apart from the amazing live acts and atmosphere) is the trip down south, staying in a cute little beach house and hanging out with the friendly local residents.

Although Splendour at Woodford was an okay substitute I felt it just didn't hold the same vibe and atmosphere from previous years. I know a lot of other festival goers that agree with this statement and we are all hoping to see a new and exciting venue in 2011.

staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.

The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.

3Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area.

3

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

3We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events.

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1495	Project Website Submission	05/11/2010	Online Submission from Justin Quinn (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

P1496	Project Website Submission	05/11/2010	Online Submission from Sean Robinson (support)	Name: Justin Quinn Address: Hannam CrForest Lake 4078 IP Address: cpe-58-166-160-115.lns2.woo.bigpond.net.au - 58.166.160.115 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I believe using these beautiful parklands as a permanent site for festivals and events would encourage a respect and appreciation for the parklands and their wellbeing. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. Parklands ensures that the site area and the adjoining sites are protected by maximising ?down time? between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1497	Project Website Submission	05/11/2010	Online Submission from Jessica Davis (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet.

Getting people to spend their tourism dollar in the northern rivers area is extremely important for sustaining the local and regional tourism businesses. On average Australian holiday makers will spend about $130 per night staying in the northern rivers region and the North Byron Parklands project is going to attract between 80,000 and 120,000 people to the area each year. The economic income will be huge and will support a whole host of tourism based organisations.

This proposal will create a cultural breading ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home!

P1498	Project Website Submission	05/11/2010	Online Submission from James Somers (support)	If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime. We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Name: James Somers Address: 28 Avonmore Street, Edens Landing QLD 4207 IP Address: - 202.150.62.35 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1499	Project Website Submission	05/11/2010	Online Submission from Megan Porter (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. Megan Porter Name: Megan Porter Address: 15 Glamorgan Street, Paddington 4064 IP Address: 90.001.vod.brs.iprimus.net.au - 211.26.19.90 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1500	Project Website Submission	05/11/2010	Online Submission from Zoe James (support)	Splendour isn't just a festival for crazy young people to get drunk and go wild. It's an experience of a lifetime, and people all around the world know about it. Byron Bay is such a beautiful, prime location for splendour. Before I went to Splendour I had never been to Byron Bay, sure I heard it was nice and relaxing but other then that there wasn't much convincing me to holiday there. After I experienced a Splendour festival I fell completely in love with the place. And have holidays frequently in Byron Bay. While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and

reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal.

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

Why wouldnâ□™t we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal.

Splendour in the grass really is the biggest benefit you could ask for in a town like Byron Bay. It just adds something else. "Byron Bay, home of Splendour in the Grass".

I just ask that you please really take these facts into consideration. Splendour isn't a negative its a positive and to deny it would be a huge mistake.

Please bring Splendour home!!

Thank you

				Zoe James.

P1501	Project Website Submission	05/11/2010	Online Submission from Carrie McCarthy (support)	I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the

region needs organisation?s like North Byron Parklands to provide much needed jobs.

How fantastic! There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that don?t require employees. North Byron Parklands will provide many new jobs for the young people in the community. Name: Annabel Brusasco Address: 4 Harbut Street, Holland Park West, Brisbane, QLD 4121 IP Address: 210-18-193-110.boystown.com.au - 210.18.193.110 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1503	Project Website Submission	05/11/2010	Online Submission from Renee Engl (object)	The North Byron Parklands / Splendour site is part of a 'critical' climate change corridor (DECCW, 2010)as it links the Billinudgel Nature Reserve to the World Heritage Rainforests of the Mt. Warning caldera. It contains over 50 Threatened 'flora & fauna' species, including Koalas and it has 3 ecological Endangered Communities (EEC). It was zoned for environmental and agricultural protection (Cleland Col, 1997), is a ridgeline of archaeological significance and is part of a cultural 'precinct'. Further constraints and considerations are that the NSW FNC Bush Fire Risk Management Plan lists the area as 'catastrophic'. Widespread, highly inflammable peat soils exist on site. Also, evacuation of patrons from the site is not possible in a flood event (Tech. Paper WI). Splendour's hydrologist for 'Trial' event gives a 20 min. warning for a flash flood. The State Government has invested approx. $14 million in conserving the area and turnning it into a permanent festival site will permanently change the coastal & rural amenity north of the Brunswick River. It will also create traffic gridlock at the Yelgun Interchange extending for kilometres with great impact on local residents. Name: Renee Engl Address: 5 Kamala Court Coopers Shoot NSW 2479

P1505	Project Website Submission	05/11/2010	Online Submission from Brigid Kennedy of N/A (support)	With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering. Name: Brigid Kennedy Organisation: N/A Address: 155 Lynne Grove Avenue, Corinda IP Address: 124-171-233-107.dyn.iinet.net.au - 124.171.233.107 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1506	Project Website Submission	05/11/2010	Online Submission from Edward Macdonald (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region. Name: Edward Macdonald Address: 68 Ridge st Merewether, NSW 2291 IP Address: advite.lnk.telstra.net - 203.45.142.57 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1507	Project Website Submission	05/11/2010	Online Submission from grace ste[henson (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the â□˜coast to hinterlandâ□™ wildlife corridor. The extended â□˜restâ□™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. From a cultural breeding ground perspective alone we must get the proposal approved. Itâ□™s a fabulous exciting vision and we are very lucky that this proposal is before us. Name: grace ste[henson Address: 19 pakenham street, Aroona 4551, QLD IP Address: 176.77-224-89.dsl.completel.net - 89.224.77.176 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1508	Project Website Submission	05/11/2010	Online Submission from Louisa Ramsay (support)	I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region. I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved! Name: Louisa Ramsay Address: 56 Church St VIC 3068 IP Address: cpe-58-175-210-253.nhcz1.lon.bigpond.net.au - 58.175.210.253 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1509	Project Website Submission	05/11/2010	Online Submission from Rebecca Jerdan (support)	Splendour's future will no doubt be infamous - like Australias very own Glastonbury. It is an amazing festival which wants to be back in its amazing home of Byron. It would a great shame for the Byron Shire to loose the Splendour in the Grass festival. The local community needs the festival, as it offers a huge amount of business for local shop owners, pubs, hotels, motels and camping grounds. Many of these local business will feel great financial pressure if Splendour in the Grass does not return to the region. Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia. Name: Rebecca Jerdan Address: 26 Amy StHawthorne Brisbane 4171 IP Address: eth1376.qld.adsl.internode.on.net - 150.101.182.98 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1510	Project Website Submission	05/11/2010	Online Submission from Genevieve Reynolds (support)	When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community. Name: Genevieve Reynolds Address: 30 Foucart Sr Rozelle NSW 2039 IP Address: 203-217-17-9.perm.iinet.net.au - 203.217.17.9 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1511	Project Website Submission	05/11/2010	Online Submission from Adam Taylor (support)

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

P1512	Project Website Submission	05/11/2010	Online Submission from Mark Griffiths (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. The future of Byron Bay. Employment, community benefits, fun. Need we say more? North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it. For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management. Name: Mark Griffiths Address: 56 Downes st Tarragindi brisbane qld IP Address: 60-241-99-25.static.tpgi.com.au - 60.241.99.25 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1513	Project Website Submission	05/11/2010	Online Submission from Deborah McKay (support)	We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture. Name: Deborah McKay Address: 7/148 Sherwood Rd Toowng, QLD, 4066 IP Address: nocproxy01-b.net.qut.edu.au - 131.181.251.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1514	Project Website Submission	05/11/2010	Online Submission from Nicholas Hogan (support)	The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home. It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklandâ□™s environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. Name: Nicholas Hogan Address: 51 Begg St Gulliver Qld 4812 IP Address: - 119.225.119.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

				Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1515	Project Website Submission	05/11/2010	Online Submission from Paul Sutherland (support)	I support this application on a number of fronts but particularly on environmental management and social benefits flowing to the community. It is time to support the creative industries which so many people rely on for a living. You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. Name: Paul Sutherland Address: 23 Arlington Street Underwood QLD 4119 IP Address: cpe-60-228-178-182.lns6.woo.bigpond.net.au - 60.228.178.182 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1516	Project Website Submission	05/11/2010	Online Submission from tahnee anderson (support)

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities.

With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

P1520	Project Website Submission	05/11/2010	Online Submission from Jayde Bognuda (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficulty. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approval projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise ?on-ground? what the currently

inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities.

North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map.

P1523	Project Website Submission	05/11/2010	Online Submission from Rebecca Andrew (support)	While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all. Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application.

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

P1524	Project Website Submission	05/11/2010	Online Submission from Gaye Wellington (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home!

P1525	Project Website Submission	05/11/2010	Online Submission from Samantha White (support)	Name: Gaye Wellington Address: 2/61 Centennial Circuit, Byron Bay IP Address: 114.73.148.156.optusnet.com.au - 114.73.148.156 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately $192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved! Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial. Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that.

P1526	Project Website Submission	05/11/2010	Online Submission from Annie Roberts of Brisbane Spa Repairs (support)	Name: Samantha White Address: 2/153 Government Road Labrador Qld IP Address: asas-mail1.asas.qld.edu.au - 203.100.1.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

				North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth! Name: Annie Roberts Organisation: Brisbane Spa Repairs Address: 371 Winstanley StreetCarindale Q 4152 IP Address: cpe-60-226-65-180.qld.bigpond.net.au - 60.226.65.180 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1527	Project Website Submission	05/11/2010	Online Submission from Jade Reilly (support)	North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth! The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year. The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an

important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

P1528	Project Website Submission	05/11/2010	Online Submission from Dimity Slater (support)	There is nothing else that brings together a community like this! There is a real need to reverse the current trend of closing music and artistic venues around the State of NSW. Music and arts are so important to the health and vibrancy of a community and I urge you to approve the North Byron parklands venue. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. We must bring Splendour home! The opportunities the Parklands event site will bring to the youth in the community such as employment and culture are just too good to miss. Please!!! xox Name: Dimity Slater Address: 11j21 Northumberland StCollingwood VIC 3066 IP Address: 203-217-94-159.dyn.iinet.net.au - 203.217.94.159 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1529	Project Website Submission	05/11/2010	Online Submission from Adrian Comiskey (support)	12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review with be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events. While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region. Name: Adrian Comiskey Address: 29 Acanthus Avenue Burleigh Heads QLD 4220 IP Address: 027.a.001.gld.iprimus.net.au - 211.26.67.27 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1530	Project Website Submission	05/11/2010	Online Submission from Tiffany Fiechtner (support)	splendor in the grass started as a grass roots music festival, not only a time for fantastic music, but a time to gather with friends and get back to basics. Byron is the epitome of this. The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture. Name: Tiffany Fiechtner Address: 131 Carmody Road, Saint Lucia, Brisbane, Australia IP Address: - 173.180.76.29 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1531	Project Website Submission	05/11/2010	Online Submission from Lauren Goode (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket. There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. A business that combines ecology with events and community giving. Thatâ□™s the kind of business that our young people are looking to for training and experience. Letâ□™s get it approved. Splendour in the Grass has a 10 year history with Byron Bay, and having been to 6, I can absolutely say that one of the best things about Splendour is it's beautiful surroundings. I have always been impressed with Splendour and it's efforts to make the festival ecologically sustainable and to minimise such a big gathering of peoples' effects on the environment. The new site will allow Splendour to be more environmentally and economically friendly than ever, and it can only get better - and it is the efforts of the Splendour organisers, teamed with the magical Byron Bay surroundings that makes Splendour in the Grass such a magical event. Please let it return home. Name: Lauren Goode Address: 25 View Street Newmarket QLD 4051

				IP Address: 220-253-169-195.qld.netspace.net.au - 220.253.169.195 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1532	Project Website Submission	05/11/2010	Online Submission from Nathan Hanrahan of ALS Environmental (support)	I have been a regular visitor to Byron Bay for the past 7 years. I holiday in Byron once a year and have also attended a number of Splendor in the Grass and Blues and Roots Festivals. I live in Queensland so it was actually easier for me to go to the Splendour in the Grass in Woodford this year. But it's home is Byron. Byron is partly defined by the festivals and events it holds each year. As I am not a local to the shire I can not gauge what the community sentiment is on the festival or any other events. From an outside perspective however, it would appear that economically, this festival and the other events would be a massive boost to the local business community each year. Byron is a tourist town and the Splendour weekend brings in more tourists at one time then any other weekend of the year. It is a great advertisement for the local area. I had never been to Byron before attending my first Splendour in 2003. I now have an annual holiday in Byron every January because I love the place. To be honest, that never would have happened if I did not have to go to Byron to attend Splendour back in '03. The guarantee of a large tract of land being put aside as an environmental reserve also appeals to me from the proposal. Basically, the way I see it is that most business's in the Byron shire rely largely on tourist dollars. Music festivals and other events are a great way to lure visitors to the region, especially tourists from interstate and the chances that they will then return to Byron are greatly increased. It would seem logical that these festivals and events should have there own space. It would save them having to fight each year just to host their event in Byron, make planning and staging events much easier, and it may draw in other events to the region (pending community approval o Name: Nathan Hanrahan Organisation: ALS Environmental Address: 7 Third Avenue Atherton, Qld, 4883 IP Address: cpe-203-51-44-52.lns8.cht.bigpond.net.au - 203.51.44.52

P1533	Project Website Submission	05/11/2010	Online Submission from Ashley Doyle (support)	Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. The North Byron Parklands proposal will provide social benefits across the Northern Rivers area. Cultural events are valued by the community as it adds to their quality of life and creates improved social cohesion, lifestyle improvement, diversity, and increased creativity. The North Byron Parklands sounds really interesting and exciting. https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1534	Project Website Submission	05/11/2010	Online Submission from Fraser Wyatt (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise â□œon-groundâ□□ what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the regionâ□™s creative industries, providing world class training and work experience opportunities.

P1535	Project Website Submission	05/11/2010	Online Submission from Claire Jerrard (support)	Name: Fraser Wyatt Address: 78A Wynnum Rd Norman Park 4170 IP Address: 203-58-6-166.static.tpgi.com.au - 203.58.6.166 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term. Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times.

				Name: Claire Jerrard Address: 5 Bencke St Rockhampton 4700 IP Address: - 165.86.81.20 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1536	Project Website Submission	05/11/2010	Online Submission from Annaliese Egan (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket. Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal. The young people on the Northern Rivers deserve to have a festival that they can be proud of, a festival that they religiously attend, and a festival that is held in a environmental sound and sustainable venue. I fully support the North Byron Parklands proposal. Name: Annaliese Egan Address: 3/30 Iris Street, Holland Park West, Queensland

IP Address: dsl51b6d1ca.pool.t-online.hu - 81.182.209.202 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1539	Project Website Submission	05/11/2010	Online Submission from Jaclyn Robertson (support)	With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal. Name: Jaclyn Robertson Address: 41/1 Wiley St CHIPPENDALE NSW 2008 IP Address: - 115.186.229.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1540	Project Website Submission	05/11/2010	Online Submission from Kate Thompson (support)	At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended. North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community. A lot of my friends are moving outside of Byron Bay to bigger and better opportunities. It would be great if we had those opportunities offered to us closer to home. Name: Kate Thompson Address: 34 Leslie Parade, Salcks Creek, QLD, 4127 IP Address: mail2.emergency.qld.gov.au - 131.242.134.237 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1541	Project Website Submission	05/11/2010	Online Submission from Jenny Sztaroszta (support)

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book.

With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity.

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them.

P1542	Project Website Submission	05/11/2010	Online Submission from Richard Hardy of AECOM (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the â□˜coast to hinterlandâ□™ wildlife corridor. The extended â□˜restâ□™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible. The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. Name: Richard Hardy Organisation: AECOM

				Address: 8 Faversham Street Woolloongabba QLD 4102 IP Address: - 125.7.81.6 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1543	Project Website Submission	05/11/2010	Online Submission from Abby Evans (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. North Byron Parklands proposal to rejuvenate the Parklands site has lead to the employment of local indigenous bush regeneration teams to plant thousands of trees across their site. This program is an ecellent way to involve the traditional land owners in the area and helps to restore the site and set the foundations for a sustainable event site. The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

P1544	Project Website Submission	05/11/2010	Online Submission from David Baggott (support)	Name: Abby Evans Address: Wolffdene 4207 QLD IP Address: nimue-37.its.uow.edu.au - 130.130.37.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 On the subject of employment the north coast has a long history of hosting many different types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth! Name: David Baggott Address: 13/482 Pacific Highway Lane Cove, NSW 2066

P1545	Project Website Submission	05/11/2010	Online Submission from Chris Robertson (support)	IP Address: - 203.37.208.144 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses. Name: Chris Robertson

P1547	Project Website Submission	05/11/2010	Online Submission from Nicole Dobber (support)	With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. There has been a long search for a permanent cultural events site in the Byron Shire and while the Blues Festival has purchased a site (after the North Byron Parklands property was bought) they have always committed to only hosting the Blues Fest there. So there is still a very strong need for another site that can cater to a range of cultural and community events. The North Byron Parklands site is the perfect choice conveniently located in the North of the

				Shire and should be supported by all levels of government. It will be a huge benefit for the area on so many fronts. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay. Name: Nicole Dobber Address: 16 Carillion Court Newnham, TAS 7248 IP Address: proxy3.utas.edu.au - 131.217.6.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1548	Project Website Submission	05/11/2010	Online Submission from David Johnson (support)	The North Byron Parklands has gone to great lengths to protect and enhance the biodiversity values of the site. This is shown by the Parklands group developing a environmental, health and safety management manual to identify, manage and monitor all the identified potential ecological risks. Its time for our state government to get behind the music and arts industries and support them by helping to provide a much needed sustainable outdoor music and arts venue. Its time to approve North Byron Parklands.I know many people in the creative industries sector that will benefit financially and through greater exposure to their markets if the North Byron Parklands project is approved. In NSW we need more venues so it makes good sense to approve this project. In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact

in job availability in the region and will be a very positive economic force.

Believe me when i say that Splendour is by far the most Organised

festival we have in Australia.

These guys and gals really know their stuff.

Cheers

David Johnson

P1549	Project Website Submission	05/11/2010	Online Submission from Sarah Grant of Pink Zinc Entertainment (support)

With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative.

The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site.

I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved.

With up to twenty days of events each year the work experience opportunities for people in the region are very exciting. The bump in and bump out periods provide further work. We need these jobs and the training they provide, from high level event management to ticketing, technical production and traffic management.

P1550	Project Website Submission	05/11/2010	Online Submission from Ryan Miles (support)	The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. Name: Ryan Miles Address: 56 Salerno st Isle of Capri IP Address: - 165.69.13.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1551	Project Website Submission	05/11/2010	Online Submission from Frank Abernethy of UQ (support)	While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. Name: Frank Abernethy Organisation: UQ Address: 100 Rockbourne Terrace IP Address: cpe-58-174-104-177.pdzn1.woo.bigpond.net.au - 58.174.104.177 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1552	Project Website Submission	05/11/2010	Online Submission from Zoe Xavier (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. I think making this venue a permanent location for Splendour is a great way to put Australia on the map in terms of festival culture. Festival culture is vastly becoming apart of our youth culture, and to be able to have a festival with a guaranteed permanent location and be accepted by the community, it will increase the longevity of the life of Splendour. Name: Zoe Xavier Address: 28 Woolcock St Red Hill QLD 4059 IP Address: c-59-100-75-138.bri.connect.net.au - 59.100.75.138 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1553	Project Website Submission	05/11/2010	Online Submission from Michelle Edwards (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. Splendour is Splendour as its held at Byron Bay, everyone looks forward to heading to Byron for a relaxed weekend with great surroundings and convenient transport/accomodation close to the festival, unlike Woodford that is difficult to get to and not really any other alternatives other than camping. Byron Bay would be loosing out on so much tourist revenue all the hotels, restaurants etc would boom when Splendour is on. Name: Michelle Edwards Address: 36 BINNEA STREET, YAROOMBA, QLD 4573 IP Address: cpe-124-187-110-144.lns11.woo.bigpond.net.au - 124.187.110.144 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1555	Project Website Submission	05/11/2010	Online Submission from Michelle Burton (support)	The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. Byron Shire Council has always longed for a permanent event site in its LGA, particularly now that the existing sites are either no longer available or are too inadequate to deal with world class events. The Blues Fest have bought a site which they intent to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would such a shame for the NSW government not to approve it. Name: Michelle Burton Address:

				24 Grace Street MITCHELTON QLD 4053 IP Address: haines8.lnk.telstra.net - 203.45.214.140 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1556	Project Website Submission	05/11/2010	Online Submission from Elise Granzien (support)	One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region?s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

It is important for the youth to be proud of where they come from. The Parklands proposed cultural event site is something that the youth are behind and should be supported by the local government.

P1557	Project Website Submission	05/11/2010	Online Submission from Philip Taylor (support)	North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map. Everyone I know enjoys attending and listening to music so when an opportunity comes along to built a superior and sustainable live music and arts venue it is really important that governments seize the moment and approve it. North Byron Parklands is one such opportunity. The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Name: Philip Taylor Address: 3 Bovelles StreetCamp Hill IP Address: 60-241-215-29.static.tpgi.com.au - 60.241.215.29 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1558	Project Website Submission	05/11/2010	Online Submission from Sam Doherty (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. Name: Sam Doherty Address: 31 Nesca Parade The Hill NSW 2300 IP Address: - 134.148.48.1 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1559	Project Website Submission	05/11/2010	Online Submission from Emma Wilson (support)	I would be exceptionally disappointed if the proposal for this cultural events site did not go ahead. North Byron Parklands proposal to rejuvenate the Parklands site has lead to the employment of local indigenous bush regeneration teams to plant thousands of trees across their site. This program is an ecellent way to involve the traditional land owners in the area and helps to restore the site and set the foundations for a sustainable event site. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ□™ economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed.

I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused.

As a music teacher myself, I see the importance in fostering creativity in youth, which is exactly what the proposed venue will do. As outlined in the proposal there will be minimal impact on the local community, while giving the residents of the Byron Shire an opportunity to both experience world class music and arts, and also to create and showcase their own. It would be a tragedy for the Australian music industry, and the community at large if this wonderful initiative was made impossible.

P1560	Project Website Submission	05/11/2010	Online Submission from gary wright (support)	The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area. Name: gary wright Address: 7 glenn court worongary qld 4213 IP Address: cpe-123-211-236-220.lnse4.woo.bigpond.net.au - 123.211.236.220 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1561	Project Website Submission	05/11/2010	Online Submission from Amy Tickle (support)	With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

				North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community. There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that don?t require employees. North Byron Parklands will provide many new jobs for the young people in the community. Name: Amy Tickle Address: PO Box 1579, Toowoomba QKD 4350 IP Address: cpe-124-187-121-112.lns1.woo.bigpond.net.au - 124.187.121.112 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1562	Project Website Submission	05/11/2010	Online Submission from Melissa Mitchell (support)	Splendour in the Grass is part of Byron's cultural heritage. The proposed permanent site at the North Byron Parklands will ensure that this integral part of local colour will forever stay connected with the Byron area, as it rightfully should. One of the things that really impresses me about the North Byron Parklands proposal is the level of community consultation they have undertaken. From public planting days to environmental forums, site tours to newsletters and letter box drops, these guys have demonstrated a strong willingness to communicate and listen to the community. I feel they have shown that they will more than adequately manage a variety of events at this site in a professional and sensitive manner.

				The economic value of creative industries for the region is estimated to be $190 million with the indutry having a job growth rate of 100% over the past decade. Lets bring Splendour in the Grass home, back to the the Byron Shire and develop our creative industires further to provide new and exciting job opportunities for the youth in the future. Name: Melissa Mitchell Address: 3 Bodmin Place Chapel Hill QLD 4069 IP Address: cpe-121-208-172-117.cxyh1.cha.bigpond.net.au - 121.208.172.117 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1563	Project Website Submission	05/11/2010	Online Submission from Jennifer Green (support)	Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry. It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events.

North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community.

P1565	Project Website Submission	05/11/2010	Online Submission from karla smith (support)	This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together. Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands. The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Name: karla smith Address: 9 waminda st morningside IP Address: d110-32-2-209.rdl800.qld.optusnet.com.au - 110.32.2.209 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1566	Project Website Submission	05/11/2010	Online Submission from Stephanie Miller of Peats Ridge Festival (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. Byron Bay is an integral part of the Splendour Experience. In a winter period it provides the opportunity to escape to a beachside area and enjoy some sun, music and entertainment. Woodforde is a great site, but it has changed the identity of Splendour in the Grass to something else. It should be kept as it was in order to maintain the integrity and distinctiveness of the festival. P1568	Project Website Submission	05/11/2010	Online Submission from Jenna Lewis (support)	North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome. The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble.

P1569	Project Website Submission	05/11/2010	Online Submission from David Brush of LJ Hooker Commercial Silverwater (support)	Name: Jenna Lewis Address: 10/21-23 croydon street, cronulla 2230 IP Address: - 138.25.252.194 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably. I think the North Byron Parklands gives the youth of today a chance to enjoy new

				experiences. This is what we need to keep the youth entertained and focused.
				Name: David Brush Organisation: LJ Hooker Commercial Silverwater Address: 891 Old Northern Road, Dural, NSW, 2158 IP Address: 60-242-23-25.static.tpgi.com.au - 60.242.23.25 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1570	Project Website Submission	05/11/2010	Online Submission from Darren Nagorcka (support)	While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. The North Byron Parklands will deliver a range of social benefits particularly in the form of the proposed community grants program. This initiative will see up to $100,000 a year ploughed back into the local community. If we rationally consider that the proposed North Byron Parklands venue will only be in

operation for a number of weeks a year plus bump in and out then one can see that the environment will be rested for most of the year and the community will reap the benefits but not the downside of a venue that operates all year long.

P1571	Project Website Submission	05/11/2010	Online Submission from Alethea Snowden (support)	For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers. Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands. Name: Alethea Snowden Address: 1/32 Ocean Street, Mermaid Beach, QLD 4218 IP Address: - 203.185.231.194 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1572	Project Website Submission	05/11/2010	Online Submission from James Van Homrigh (support)	North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved! The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. Name: James Van Homrigh Address: 65A/41 Gotha St Fortitude Valley QLD 4006 IP Address: - 202.150.62.35 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1573	Project Website Submission	05/11/2010	Online Submission from Lisa Hennell of na (support)	At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. What?s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. P1575	Project Website Submission	05/11/2010	Online Submission from Hannah Western (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

				Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands.

P1576	Project Website Submission	05/11/2010	Online Submission from Marnie Strow (support)	Good morning, North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW

government.

What?s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this.

Regards,

Marnie

P1579	Project Website Submission	05/11/2010	Online Submission from Shelley Kent (support)	In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

This proposal will create a cultural breading ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home!

P1580	Project Website Submission	05/11/2010	Online Submission from Siobhan Foley of Byron Bay English Language School (support)	Cultural Events Site, Yelgun 09_0028 I am the Director of Studies at the Byron Bay English Language School. Every year international students at school get jobs at Splendour in the Grass. This is not only a financial benifit to the students but also a cultural one, as well as a chance to practice their English. The students always have a great time working at Splendour and some students have gone on to work at other Festivals. Splendour has always been very encouraging to these students and it has become a valuable experience for our students. Name: Siobhan Foley Organisation: Byron Bay English Language School Address: 5/1 Carlye St Byron Bay NSW 2481 IP Address: 122-148-38-29.static.dsl.dodo.com.au - 122.148.38.29 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1581	Project Website Submission	05/11/2010	Online Submission from Barbara Stander (object)	As a resident of Byron Bay for 13 years, I have experienced the impact of large visitor numbers to my town. Those impacts include traffic gridlock and air pollution normally seen in cities, noise, violence at night, garbage everywhere and massive degradation to our beautiful beaches, particularly the dune structures. But that's just general tourism in the peak summer holidays. When the blues and splendour and particularly Splendour hit town, I don't go out much at all. The shop owners talk of surviving it - drunk teenagers falling into their shops at 10am and buying little, people 6 abreast pushing others off the footpath, the roads littered with humgover people - literally lying in the road as we try to get to the beach for a morning walk. But its the inability of anyone to control this that is what you planners need to understand. What the Parklands people say they can do, they cannot. Noise mitigation for the Pacific hwy has not worked and will not work here. I'm with those who have suggested much more already degraded areas - and those with much highere levels of unemployment - back of Casino or Lismore, for example that would suit. The site at yelgun is a sensitive environmental convergence point for beach, bush, potentially good farmland and low impact development at best. Not this mega-festival site. I've been to Woodford -

and it is a low-key event in atmosphere and personnel. We exited on the last day and 10 mins later were waiting for breakfast in the small town of Woodford itself. then we went home. People trail out - not what i heard happened when

Splendour used the site - queues for hours! And this is going to happen several times a year with very little feed-in to the Pac Hwy. Festival like the Blues cater for a wider demographic - Splendour's demographic is so narrow and that's what they want to quadruple. But in the end its the environmental impacts that incense me. They can get all the 'green' awards they like - come and look at Byron

Bay's dunes even after the recent Blues Fest out of town - litter so far and wide and particularly plastic and our birds pecking at it and it blowing into the water for our turtles to choke on. Help our community retain and hopefully rebuild this wildlife corridor at Yelgun. Don't change the position that has been upheld in court over and over - that this is unsuitable for this kind of development. its precious and we must hang on to what little remains near the coast.

Thank you

Barbara Stander

P1582	Project Website Submission	05/11/2010	Online Submission from christopher j anderson (support)	This proposal is so important for the Northen Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce. There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase. Name: christopher j anderson Address: 45 browning street byron bay 2481 IP Address: global257.lnk.telstra.net - 203.45.31.76 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1583	Project Website Submission	05/11/2010	Online Submission from Nyree Richards (object)	To whom it may concern, I am very concerned that a cultural events site could be considered in an environmentally sensitive area. We as a culture need to learn how to say 'no' to development that impacts upon other species. When are we going to learn? As a resident of Brunswick Heads, a small and preserved seaside town, I am also concerned about the impact this festival will have on our local climate. I don't feel this festival will develop our community in anyway, it feels more like an intrusion. Community events like the Mullumbimby to Brunswick Run, Kites and Bikes DO meet local needs. Thank you for your consideration and response, Nyree Richards Name: Nyree Richards Address: 1/11 Newberry Parade, Brunswick Heads, NSW 2483 IP Address: cpe-121-216-34-31.lnse1.ken.bigpond.net.au - 121.216.34.31 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1584	Project Website Submission	05/11/2010	Online Submission from melissa peacock (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the ?sustainable? development basket. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. What?s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Name: melissa peacock Address: birchcross cottage higher cotley dunsford IP Address: 5e07aa34.bb.sky.com - 94.7.170.52 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1585	Project Website Submission	05/11/2010	Online Submission from Patrick Lawrence of n/a (support)	With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ□™s important to have these opportunities for young people in the region. North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures. Name: Patrick Lawrence Organisation: n/a Address: 24 Harford Avenue, PANANIA NSW 2213 IP Address: - 213.249.131.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1586	Project Website Submission	05/11/2010	Online Submission from Kirsten White (support)	For five years my oldest son, and for the past two years my youngest son have been going to Splendour in the Grass. Out of all the festivals they go to, this is definitely their favourite, as it is by far the safest, best managed and cleanest of the outdoor music festivals. And they have gone to all of them! The food is outstanding and not at all like festival food. It allows people to show off their skills as chefs and no doubt is the best publicity they could ask for. In turn this would generate immense benefits to the local businesses in the area. The acts both musically and otherwise are a real showcase and the organisers of Splendour should be congratulated. Not only do they get the biggest acts internationally but they also showcase our own. Both my children have been fortunate enough to secure work at Splendour in the Grass and they tell me that a lot of local kids from Byron and it's surrounds look forward to working there as they are generally unemployed and cannot find work in the area on a full time basis. Purely an observation, not a criticism. I generally (as a parent) worry about some of the festivals that my children go to as there has often been trouble. Apparently Splendour is very well manned and quite strict with it's rules and regulations and boundaries. I think it would be a shame to stop this festival especially if they have somewhere like the North Byron Parklands site and I think it would really reflect badly upon the local council and NSW Dept of Planning if this festival were to be stopped. In fact it would be a wonderul thing if everyone could really get behind Splendour and truly make it Byron Bay and Northern NSW's very own music festival. IT WOULD REALLY PUT YOU ON THE MAP Please, think very carefully about this

P1587	Project Website Submission	04/11/2010	Online Submission from Prudence Upson (support)	Name: Kirsten White Address: 198 Chapel Hill Road, Chapel Hill. Qld. 4069 IP Address: d122-104-168-74.rdl800.qld.optusnet.com.au - 122.104.168.74 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. 12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review with be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events. Name: Prudence Upson Address: 26 Matilda Street ,Wellington Point, QLD 4160 IP Address: 60-241-58-21.tpgi.com.au - 60.241.58.21

				Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1588	Project Website Submission	04/11/2010	Online Submission from Rochelle Brook (support)	Not only will Splendour bring world class entertainment to the Byron Shire it will also provide much needed jobs as well. In the present economic climate tourism in the area has dropped and businesses would also benefit from keeping Splendour in the Byron Shire. Name: Rochelle Brook Address: 47 Tristania St, Bangalow, NSW 2479 IP Address: 159.085.dsl.syd.iprimus.net.au - 58.178.13.159 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1589	Project Website Submission	04/11/2010	Online Submission from Krystyna Parrott (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. The young people on the Northern Rivers deserve to have a festival that they can be proud of, a festival that they religiously attend, and a festival that is held in a environmental sound and sustainable venue. I fully support the North Byron Parklands proposal. Name: Krystyna Parrott Address: 22/129 Smart Road Modbury SA 5092 IP Address: cpe-144-136-172-235.sa.bigpond.net.au - 144.136.172.235 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1590	Project Website Submission	04/11/2010	Online Submission from Brenton Strachan (support)	While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low. Please approve this proposal! It is very important for our young people to feel like the region

				has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region. North Byron Parklands should be approved because the venue is going to provided a much needed avenue for musicians and artists to express their artistic ability and help earn a living. Too many venues have already closed down in NSW and it is time the government supported musicians and artists and helped them to make a living. North Byron Parklands is likely to be one of the most important venues in Australia. It needs to be approved. Name: Brenton Strachan Address: 2/57 Erneton St Newmarket QLD 4051 IP Address: i6.240.154.85.omantel.net.om - 85.154.240.6 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1591	Project Website Submission	04/11/2010	Online Submission from Nadine McLean (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW

				government. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.
P1592	Project Website Submission	04/11/2010	Online Submission from Lydia Thompson of none (support)	Name: Nadine McLean Address: 16/47-55 Milson Rd Cremorne Point NSW 2090 IP Address: cpe-58-172-80-151.czqm1.cht.bigpond.net.au - 58.172.80.151 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Surely it is obvious to the government that NSW needs a permanent sustainable outdoor music event, particularly one located on the far north coast. The application covers all issues and provides a range of solutions. It is now time to approve it. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community.

What?s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this.

I am a local resident of Byron Shire and was born here. When I was a girl (I am now 38) there was no cultural events like this in our area. This is amazing opportunity for all, but particularly, the young people in the Shire in cultural terms. I have attended one festival and it was very well run. I did not see any young people misbehaving or out of control. Everyone was polite and having a good time. I really hope this can stay in our aea as it adds immensely to the cultural life of our community.

P1593	Project Website Submission	04/11/2010	Online Submission from Cameron Birt of The Bowery (support)	If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. Thereâ□™s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others. Name: Cameron Birt Organisation: The Bowery Address: 21 Macintosh Street Auchenflower, Q 4966 IP Address: cpe-58-174-105-102.pdzn1.woo.bigpond.net.au - 58.174.105.102 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1594	Project Website Submission	04/11/2010	Online Submission from Janet pyne (object)	I object to this DA on all these issues Traffic problems,threat to nature and wildlfe corridor,flooding on site,total loss of local amenitys,illegal parking/camping on local streets and parks,family residental areas turned into permanent party holiday lets,no infrastructure for accomodation/food/services for 50,000 party goers 4 times a year + 4x 10,000 + other events,byron has a festival site already we dont need 2. Name: Janet pyne Address: 85 Yelgun Rd Yelgun 2483 IP Address: 203-219-3-120.tpgi.com.au - 203.219.3.120 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1595	Project Website Submission	04/11/2010	Online Submission from spencer Ashford (support)	The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is

				that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative.
				Name: spencer Ashford Address: 567 friday hut road,possum creek,nsw,2479 IP Address: - 116.250.15.44 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1596	Project Website Submission	04/11/2010	Online Submission from Kathleen Evans (support)	I have worked with the organisers of Splendour in the Grass on a number of occasions and have found them to be deeply concerned with the well-being and happiness of locals who might be adversely affected by their event. Not only are they concerned, but they are willing to listen to those who have feedback in an attempt to accommodate all parties as best as possible. The same has been proven with their assessments of possible impacts of the new site at Byron Parklands. The level of detail undertaken in the assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket. The Byron Parklands site is a prime opportunity for the Byron area to again become a leader in sustainable environmental management. And what better place for it than a venue for cultural activities where communities come together to celebrate the arts, amongst other things. This event deserves AT LEAST a trial at the Byron Parklands site.

I hope you concur.

Thanks

Kathleen

P1598	Project Website Submission	04/11/2010	Online Submission from Emily Hanson (support)	I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth. It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not worldâ™s best environmental practice. Name: Emily Hanson Address: 10/1 West St Balgowlah Heights Sydney, NSW 2093 IP Address: 175.182.dsl.syd.iprimus.net.au - 58.178.84.175 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1599	Project Website Submission	04/11/2010	Online Submission from Paul Mitchell (object)	This application should be rejected, the site and area will not be able to cope with traffic and populationj increase. The operators show no regard for the area they just want the profits Name: Paul Mitchell Address: 9 Nandroya Ave Ocean Shores NSW 2483 IP Address: proxy02.syd.iprimus.net.au - 210.50.143.21 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1600	Project Website Submission	04/11/2010	Online Submission from Tom Lang of IMC (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â□˜I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ□™. (Donna Sue Sanders â□“ Executive Director of the Daytona State

Foundation).

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

If we want to maintain a vibrant creative culture in our region we need to support proposals such as this. North Byron Parklands sustainable event space is a perfect way to sustain and encourage our local creatuve culture.

P1601	Project Website Submission	04/11/2010	Online Submission from matt allworth of local veterinarian (support)	As a vet, for many years I have tended the sick and injued widlife of the Northern Rivers. Given the potential impact of the North Byron Parklands on this pro-bono workload, I have taken a close interest in the proposal. I am convinced the indigenous animal community has more to gain from the proposed funding of conservation activities by NBP, than letting it revert to farming. The philanthropic dispersals will benefit not only wildlife lucky enough to live on site, but also those further afield. It a shame the vocal Nimbism of local residents drowns out the interests of a speechless and often neglected community. Matt Allworth BVSc Name: matt allworth Organisation: local veterinarian Address: po box 860 byron bay nsw 2481 IP Address: cpe-121-216-215-224.lnse3.ken.bigpond.net.au - 121.216.215.224 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1602	Project Website Submission	04/11/2010	Online Submission from reem abed-rabbo (support)	Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW. If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. Name: reem abed-rabbo Address: cudgen road kingscliff IP Address: cpe-124-176-95-107.lns7.ken.bigpond.net.au - 124.176.95.107 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1603	Project Website Submission	04/11/2010	Online Submission from Tom Grace (object)	I wish to submit my objection to the propsed permanent festival site at Yelgun. As a former taxi driver in Byron Bay and life long resident of Byron Shire I have witnessed the negative impacts of Splendour in the Grass on the local health services, the negative impacts on residential amenity and the explosion in alcohol related violence and anti-social behaviour that this type of event brings to the area. There is also an unnaceptable risk to wildlife in the area proposed and strong negative pressure on the biodiversity in such a valuable wildlife corridor, There are also serious fire and flooding risks associated with the proposal with 1 in 5 year floods sending the proposed site under at least 0.2m of water! & this proposal goes against the local community and councils current thinking about festivals and event poilcy in Byron Shire, this is a proposal that is completely unsuitable for the location in so many ways Name: Tom Grace Address: 8 Avocado Court, Mullumbimby, NSW, 2482 IP Address: cpe-124-184-117-147.lns14.cht.bigpond.net.au - 124.184.117.147 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1604	Project Website Submission	04/11/2010	Online Submission from Milica Loncar (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. Name: Milica Loncar Address: PO Box 2007 Byron Bay NSW 2481 IP Address: cpe-121-217-13-12.lnse1.cht.bigpond.net.au - 121.217.13.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1605	Project Website Submission	04/11/2010	Online Submission from Aude Perrine of Climate Friendly (support)	Dear Sir, I'm writing to you to support the North Byron Parklands project. The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community. Kind regards, Aude Name: Aude Perrine Organisation: Climate Friendly Address: Suite B, Level 2, 140 William St, East Sydney, NSW 2011 IP Address: mail.climatefriendly.com - 203.45.149.39 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1606	Project Website Submission	04/11/2010	Online Submission from Kathryn Riley (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. I think Splendour in the Grass is a fantastic event that I have enjoyed for many years. A festival like this, in a location like this is immense potential socially and environmentally. It's a great platform to boost local economy and tourism as well as to highlight important environmental issues. Festivals like this and 'the planting, dreaming festival, island vibe' promote community spirit and human interconnectedness as well as respect for the environment, exposing people to inspiring locations and allowing them to learn about caring for the environment and living sustainably. Festivals like these teach and allow people to get involved in planting trees, composting, proper waste disposal and other eco-friendly workshops and spaces. Please allow this to continue, there's so much to be learnt and enjoyed! This festival is one of the most important festivals in Australian culture with the potential to get even better in a space like the North Byron Parklands. Byron is the home of splendour! Name: Kathryn Riley Address: 19 Howard Street Paddington Brisbane 4064 IP Address: ppp118-208-69-100.lns20.bne4.internode.on.net - 118.208.69.100 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1607	Project Website Submission	04/11/2010	Online Submission from Greg Loftus (support)	Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner. Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â Name: Greg Loftus Address: 13 Lobelia StreetChatswood West, NSW 2067 IP Address: - 144.140.148.72 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1608	Project Website Submission	04/11/2010	Online Submission from Joeley Brown of BBC Australia (support)	I support this application on a number of fronts but particularly on environmental management and social benefits flowing to the community. It is time to support the creative industries which so many people rely on for a living. Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application. Please take this submission seriously, as the people behind the North Byron Parklands only have the BEST interests of the community and environment. This is such a wonderful initiative which can only enhance the local area - not destroy it in any way! Name: Joeley Brown Organisation: BBC Australia Address:

				2/53 Birriga Rd, Bellevue Hill, NSW 2023 IP Address: gatea.syd.bbc.co.uk - 203.166.22.173 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1609	Project Website Submission	04/11/2010	Online Submission from Bea Berry of Red Lotus Acupuncture (support)	North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. Name: Bea Berry Organisation: Red Lotus Acupuncture Address: Coronet Court6/995 brunswick St New Farm QLD 4005 IP Address: - 210.8.48.213 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1610	Project Website Submission	04/11/2010	Online Submission from Jessie Marshall of Mental health Sector (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Name: Jessie Marshall Organisation: Mental health Sector Address: 5 Coolgardie Street Dunlop, ACT 2615 IP Address: ppp115-202.static.internode.on.net - 150.101.115.202 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1611	Project Website Submission	04/11/2010	Online Submission from Povel Torudd of Tepee Life Pty Ltd (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to

ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide.

Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime.

The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

Dare I add... it is also what Australia needs, we need to rebuild faith in our government as enablers of not just a bunch of red tape, but also some fun. Let the people have its will and you will have their support in so many other things too, and for many years to come.

Povel

P1612	Project Website Submission	04/11/2010	Online Submission from James Casey (support)	To whom it may concern Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together. Keep Splendour in Byron Name: James Casey Address: 11 Government Rd, Mona Vale IP Address: cpe-144-136-97-173.dxzw1.ken.bigpond.net.au - 144.136.97.173 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1613	Project Website Submission	04/11/2010	Online Submission from Jimmy McGilchrist of rezon8 (support)	The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesnâ™t proceed then itâ™s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklandsâ™ group? No-one. That would be a terrible lost opportunity. Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids.

Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the â□œSplendid Initiativeâ□□ offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice.

As a visual artist the North Byron site presents a better long term location to plan and implement long term more permanent projects.

P1614	Project Website Submission	04/11/2010	Online Submission from Jade Grant (support)	These sorts of events bring business to companies in a much larger area than just Byron Bay, Smaller towns nearby are also boosted financially during festival periods. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Plus it means there is a specific site which can be purpose built, making it more tolerant to festival use, and better for the surrounding environments in that they do not get damaged. The North Byron Parklands proposal will provide social benefits across the Northern Rivers area. Cultural events are valued by the community as it adds to their quality of life and creates improved social cohesion, lifestyle improvement, diversity, and increased creativity. You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sounds like a perfect way to make sure the people keep smiling. And encourage financial stability within the business owner who do not attend the festivals and events held at such a site. Name: Jade Grant Address: 30 Gallery Place Little Mountain QLD 4551

P1616	Project Website Submission	04/11/2010	Online Submission from Stuart Lester of - (support)	Not only have the North Byron Parklands organisation developed what must be considered world?s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. Name: Stuart Lester Organisation: - Address: 8 Shari Avenue,Picnic Point,NSW, 2213 IP Address: dsl-220-253-68-36.nsw.netspace.net.au - 220.253.68.36

P1618	Project Website Submission	04/11/2010	Online Submission from Winson Lam (support)	North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community. While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ□™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. Name: Winson Lam Address: 18 Highgreen Close Kuraby IP Address: 203-214-115-248.dyn.iinet.net.au - 203.214.115.248 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1619	Project Website Submission	04/11/2010	Online Submission from Suey Ashby (support)	I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Everyone looks after each other and the environment at these events and we need to keep our music festivals going. Byron is a great homeplace for Splendour and we look forward to visiting the same site every year =) xx Name: Suey Ashby Address: 42 Guthrie Avenue North Geelong 3215 IP Address: - 120.16.4.189 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1620	Project Website Submission	04/11/2010	Online Submission from Deborah Brownlow of Self employed (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. The Splendour crew are also committed during the Festival to protecting the environment as per their recycling programs etc. As a long time employee of Splendour and a Sydney sider this is an important factor to me as the destruction of Sydney over the years by overdevelopment does not make me a .fan of devlopment. However, Splendour's proposal combines the best of both world's: a beautiful environment that will not be adversely affected by the festival and the provision of jobs and opportunities for local Byron people. As a winter festival, the festival provides a much needed boost to the economy of many local businesses particularly in the hospitality and retail sectors. Its time for our state government to get behind the music and arts industries and support them by helping to provide a much needed sustainable outdoor music and arts venue. Its

				time to approve North Byron Parklands. I know many people in the creative industries sector that will benefit financially and through greater exposure to their markets if the North Byron Parklands project is approved. In NSW we need more venues so it makes good sense to approve this project.
				Name: Deborah Brownlow Organisation: Self employed Address: 15/44 Hardie St, Darlinghurst NSW 2010 IP Address: - 119.12.182.77 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1621	Project Website Submission	04/11/2010	Online Submission from Danielle Martin (support)	Splendour in the Grass Festival is ONE OF A KIND.. There is no other festival that encompasses and embraces the link between Music and Culture the way Splendour in the Grass does. The Byron Bay location enables all NSW Splendour Lovers to join in the fun. The move to QLD made it very difficult for us to attend the Festival and a move back to Byron Bay would be awesome for all NSW Splendour Lovers.. What better place than the cultural environment of Byron Bay to hold such a wonderful event. With the recent global financial crisis many businesses in the area were hit hard. Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals.

The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government.

Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

Please Please Please move the festival back to Byron... We love it and miss it...

Danielle Martin

P1622	Project Website Submission	04/11/2010	Online Submission from Rebecca` Phillips (support)	North Byron Parklands has a strong focus on cultural management. This is shown by the proposed cultural centre aimed to provide learning opportunities for staff to build a greater understanding of our local indigenous and non-indigenous ancestry. Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. Name: Rebecca` Phillips Address: 1/132 Military Road Neutral Bay NSW 2089 IP Address: - 203.202.144.223 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1623	Project Website Submission	04/11/2010	Online Submission from Justin Peberdy (support)	We should all be getting behind such an exciting project which offers businesses and the community a range of important social and economic benefits. The beauty of this application is that it also strongly supports the environment. Name: Justin Peberdy Address: 845 Fig Tree Pocket Road, Fig Tree Pocket. 4069. IP Address: cpe-58-174-97-31.cxyh2.woo.bigpond.net.au - 58.174.97.31 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1624	Project Website Submission	04/11/2010	Online Submission from Thomas Cootes (support)	Events are really important for young people today. Coming together is not just about getting drunk and partying. It?s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people. I live in Grafton and in 2008 my mates in Ballina and i agreed we should go to byron bay for our first splendour as we were just getting into festivals and other social things.Our first splendour was something we will never forget,not only did it have the best music groups from around the world they had them right here in N.S.W in beautiful Byron.In 2009 we were one of the first to buy tickets for this awsome music and cultural event as 2008 blew us away and 2009 was just as good,maybe better.We have been to plenty of festivals around Brisbane and Gold Coast since 2008 but nothing compairs to Splendour In The Grass. We never attended Splendour 2010 simply because of the fact everything is so much more expensive up thier and the fact that they get every other festival in QLD,and i know alot of people around Grafton and Ballina who didnt attend for the same reason. Spendour In The Grass is about Byron Bay,when people hear Byron they think Splendour,when they hear Splendour they think Byron.Its an event where the young and even the old can come and enjoy first class music and cultural arts,everyone at splendour is thier for a good time and is in a happy mood for the whole weekend. Byron obviously has even better facilities now then Belongil so why not bring it home,why not bring it back to the home town that made it the festival it is today...It would not only

				boost local economy and help local buisnesses but it would help out the kids who cant or dont get to travel for these events.
				Name: Thomas Cootes Address: 332 Lake Road Swan Creek Via Grafton IP Address: cpe-121-213-205-55.lns16.cht.bigpond.net.au - 121.213.205.55 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1625	Project Website Submission	04/11/2010	Online Submission from Rick Slater (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort

on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.

While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice.

A business that combines ecology with events and community giving. Thatâ□™s the kind of business that our young people are looking to for training and experience. Letâ□™s get it approved.

P1626	Project Website Submission	04/11/2010	Online Submission (object)	Regarding the plans for the Yelgun cultural events site: my opinion is it should not be allowed to go ahead. The impact on the town I live in will be one more nail in the coffin, with so little advantage to residents. I've watched for many years how the town is trashed in successive waves of thoughtless tourists, how small businesses are forced out by high rents, to be replaced by shops that cater (often briefly) for tourists.I see what happens at the Gold Coast, when everyone who can leaves town during the car race, & has their lives interrupted for months. Plans for multiple festivals would be likely to do the same here, but without the infrastructure,& with the same single lane access into Byron. The reasons people want to come here, are exactly what is terminated when they do.It's a virus.The conservation issues at the actual site are another very real reason to STOP IT, PLEASE. I prefer my details not be public. Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1627	Project Website Submission	04/11/2010	Online Submission from Jacqui Burns (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising â˜down timeâ™ between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisationâ™s like North Byron Parklands to provide much needed jobs. I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved!

				People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love.
				Name: Jacqui Burns Address: 8 Halley Court Coolum Beach QLD 4573 IP Address: - 120.159.46.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1628	Project Website Submission	04/11/2010	Online Submission from Garth Brien of Holiday Accommodation Pty Ltd (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. A place where people can get together and enjoy the beauty that Byron Bay has to offer. The North Byron Parklands idea is inspiring for young people. There is precious little around, particularly in regional areas, which is inspiring for them. The proposal is all about

				the environment, events, culture and celebration. Itâ□™s about young people and being young. This is really important.
				Name: Garth Brien Organisation: Holiday Accommodation Pty Ltd Address: Lot 16 Koranba Place, Coorabell, NSW, 2479 IP Address: sonyab.lnk.telstra.net - 203.45.45.29 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1629	Project Website Submission	04/11/2010	Online Submission from Joel Boojers (support)	While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.
				If we want to maintain a vibrant creative culture in our region we need to support proposals such as this. North Byron Parklands sustainable event space is a perfect way to sustain and encourage our local creatuve culture.

				I humbly think that this application is a worthy cause. I believe that the organisers/producers of Splendour in the Grass will go to all lengths possible to create an environmentally friendly and safe location for it's clients to enjoy music and creativity. When weighed up against the total number of days in the year, the event brings so much enjoyment, prospective tourists to the area (to increase Byron Bay's appeal as a destination) and so long as responsible festival behaviour is endorsed then I belive that Splendour can be a worthwhile event for people of all ages and backgrounds to experience. Name: Joel Boojers Address: 31 Wendouree Cres,Westlake Qld 4074 IP Address: proxyone.mcauley.acu.edu.au - 192.148.225.27 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1630	Project Website Submission	04/11/2010	Online Submission from Jessica Nash (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! Splendour in the Grass has provided high level training in a range of areas and has

				supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.
				Name: Jessica Nash Address: 28 Sandpiper Place, Woronora Heights, 2233, Sydney IP Address: d220-236-21-110.dsl.nsw.optusnet.com.au - 220.236.21.110 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1631	Project Website Submission	04/11/2010	Online Submission from Tia Stanley (support)	Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering. Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

				The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians.
				Name: Tia Stanley Address: Gold Coast IP Address: 203-206-187-46.perm.iinet.net.au - 203.206.187.46 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1632	Project Website Submission	04/11/2010	Online Submission from chloe kerkmez (support)	Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. It?s a fantastic opportunity for us all.
				In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA?s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.
				North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.

P1633	Project Website Submission	04/11/2010	Online Submission from Andrew Staniforth (support)	I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth. While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible. Name: Andrew Staniforth Address: canberra IP Address: ppp121-45-222-218.lns20.cbr1.internode.on.net - 121.45.222.218 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1634	Project Website Submission	04/11/2010	Online Submission from Louis Rogers (support)	Splendour In The Grass is an amazing festival that has an incredible track record of delivering fantastic music year after year. Tickets to Splendour are the hottest tickets every year, reflecting the incredible popularity of this event. It brings a wealth of culture and prosperity to Australia and the Byron region. This event originated in the Byron Bay area, and this is its spiritual home. Australians from all corners of the country enjoy the trip to Byron to experience Splendour. Name: Louis Rogers Address: 4/9 Wyndham St, Alexandria, NSW, 2015 IP Address: ppp121-44-46-143.lns20.syd6.internode.on.net - 121.44.46.143 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1635	Project Website Submission	04/11/2010	Online Submission from Darren McCarthy of Mercy Centre (support)	To whom it may concern, Australia is one of the biggest music loving nations in the world, we always hear of bands loving it everytime they come here, not only for the beautiful country but the passion aussie's show towards music. Splendour brings us that music, and to give it a permanent home of its own will benifit not only the organisers but the people that enjoy it the most, the punters. When it used to be held at Belongil it was great, easy access to the beautiful beaches and the cultural settings of byron, but was to small. After seeing splendour in full force last year at Woodfordia, i have to say more is better. MOre fun, more singing, more dancing, more memories. And plus it would be massive for the local economy.

The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. Itâ□™s up to us as adults to decide that we want to support venues that support young people.

So if you could consider giving splendour a home of its own that would be tops, it will allow me, my wife and our friends to continue to do what we love most, watching some of the best live music in the world in an amazingly beautiful place.

Cheers up!!

P1636	Project Website Submission	04/11/2010	Online Submission from Bernadette Gordon (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. Why wouldnâ□™t we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal. Name: Bernadette Gordon Address: 9 Balyarta CrescentMooloolaba, QLD, 4557 IP Address: cache.ecn.net.au - 203.22.70.5

				Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1637	Project Website Submission	04/11/2010	Online Submission from Stella Magoulias of acupuncturist (support)	In relation to employment and wages the Byron local government area has one of the Stateâ□™s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. How many more venues have to close in NSW before people realise that soon there will be nowhere to play live music or undertake live performances. The NSW Government has a responsibility to ensure that well managed live outdoor venues are made available to the people of this state. Name: Stella Magoulias Organisation: acupuncturist Address: 231 Burwood Road, CONCORD NSW 2137 IP Address: 203-206-230-160.perm.iinet.net.au - 203.206.230.160 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1638	Project Website Submission	04/11/2010	Online Submission from iain reynolds (object)	Given the remoteness of the site to any amenities the economic benefits to the local community are being overstated by the applicants. Further, the noise from events being held for close to 1/4 of the year will do a huge amount of damage to the local fauna, right next to a protected wild life corridor. The site is flood prone also and the noise from such events will cause a huge loss in amentity for the local residents who reside in the surrounding rural area. Please reject. Name: iain reynolds Address: 49 Chinamans Hill Road Middle Pocket NSW 2483 IP Address: d220-236-199-88.dsl.nsw.optusnet.com.au - 220.236.199.88 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1639	Project Website Submission	04/11/2010	Online Submission from Chris Garrett (support)	. If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive.

				Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia. Name: Chris Garrett Address: 928 Jiggi Road, Jiggi NSW 2480 IP Address: 241.42.70.115.static.exetel.com.au - 115.70.42.241 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1640	Project Website Submission	04/11/2010	Online Submission from Darren Gray of coalition for festival sanity (object)	AS a long time resident of north ocean shores I have deep concerns about this project.Firstly the Billinudgel nature reserve borders this festival site.How anyone (even with no experience in planning)can even for one minute think this is an appropiate place for multipal festivals leaves me stunned.The area around this site is primarily families and what concerns me is the traffic impact on the local community,beaches,nature. The North byron Parklands are a money making business and are only concerned with making money, I have attended all community and Byron parkland meetings and in no way have felt that they are or will be good for my community. I am also a long-time business owner in this end of the Byron Shire and would benefit from the site, however, I have more interest in the development of my community than in making money. P1641	Project Website Submission	04/11/2010	Online Submission from Alisha Soady (support)	There is a real need to reverse the current trend of closing music and artistic venues around the State of NSW. Music and arts are so important to the health and vibrancy of a community and I urge you to approve the North Byron parklands venue. The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal. The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal.

P1642	Project Website Submission	04/11/2010	Online Submission from Andrea Challenger (support)	Name: Alisha Soady Address: 62 Blamey St Kelvin Grove 4059 IP Address: cpe-123-100-137-226.pivit.net.au - 123.100.137.226 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community.

P1643	Project Website Submission	04/11/2010	Online Submission from Tom Dewhurst (support)	Name: Andrea Challenger Address: 177 Mooroondu Road, Thorneside 4158 IP Address: cpe-58-173-192-29.ckcw1.cha.bigpond.net.au - 58.173.192.29 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue.

P1645	Project Website Submission	04/11/2010	Online Submission from Stephanie Fornasier of Department of Communities, Disability Services (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. Splendour in the Grass offers local youth the opportunity to work at the festival in return for

				a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â□œresource centreâ□™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.
P1646	Project Website Submission	04/11/2010	Online Submission from Michael Mckenzie (support)	Name: Stephanie Fornasier Organisation: Department of Communities, Disability Services Address: 31 Strong Avenue, Graceville, QLD 4075 IP Address: d110-32-7-20.rdl800.qld.optusnet.com.au - 110.32.7.20 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced

soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

North Byron Parkland events are not only for the youth, theyâ□™re for the whole community, young and old. Events can rejuvenate and reconnect us with our elders and our juniors.

P1647	Project Website Submission	03/11/2010	Online Submission from Grace Wicks (support)	To whom it may concern, For the last two years now I have attended the Splendour in the Grass. Although I thought the Woodford festival was fantastic and very well organised I believe Splendour should stay in Byron Bay. It brings so much to the local tourism industry. One of the main reasons I first became interested in the festival was because of it's location in Byron Bay. Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Thanks for your time Grace Wicks Name: Grace Wicks Address: 12/104 Musgrave Road Red Hill4059 IP Address: 122-149-123-36.static.dsl.dodo.com.au - 122.149.123.36

P1648	Project Website Submission	03/11/2010	Online Submission from jacquieline nash of me (support)	For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA?s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures. In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA?s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with

P1649	Project Website Submission	03/11/2010	Online Submission from Hannah Debus (support)	This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together. The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the â˜coast to hinterlandâ™ wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise â˜downtimeâ™ will allow the Parklands site to assist the functioning of the adjoining Nature Reserve. Name: Hannah Debus Address: 18 Cove St, South Turramurra, NSW, 2074 IP Address: cpe-121-209-196-82.nsw.bigpond.net.au - 121.209.196.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1650	Project Website Submission	03/11/2010	Online Submission from Linda Flower ()	I wish to make a strong objection against this proposal of Cultural Events site at Yelgun on the following grounds: I live in the nearest town to this site and I object to the influx of over 50,000 people who will overflow into our small coastal town which does not have the infrastructure to handle it. The amenities here cannot handle this influx. We already have one permanent festival site at Tyagarah and we do not need another one. The major festival to be held at the new site was very successfully held at the Woodford Permanent Festival Site last year and there is no reason why it cant be held there every year. That site already exists and the organisers were obviously happy to hold it there in the past. We have a precious Billinudgel Nature Reserve that will be put under significant and intolerable threats from noise, artificial lighting and disturbance by the large nos. of people. The proposal flies in the face of the State governments own planning decisings to protect this unique site. dur! There will be a huge number of the worst type of holiday letting with all-night partying going on in our neighbourhood and our nearest very small town. This is a family town and this family atmosphere will be put under thread. Byron Shire Council already has a huge number of difficulties with illegal holiday letting in the Shire. They already do not know how to deal with this and the residents are up in arms already. Flooding or fire at the site will mean chaos for festival goers and will divert your emergency

resources from whereever else they may be needed.

Our coastal areas should be protected. The large majority of our Nations' residents live by the coast. We are a coastal country and you will be giving away some of our precious resources which are not yours to give away . specially not to a money making venture which is not needed as other facilities already exist elsewhere to handle the immense influx of people that this will encourage.

I emplore you to keep your senses about this. The majority of the local community does not want this festival site. That is obvious. You need to consider this.

I have lived in this area for over 38 years and have seen this area become grosely overpopulated and the amentities and intrastructure become grosely inadequate already, and this project will only make that worse.

Please have a heart and do the right thing here.

I need a reply and a recognition of my disapproval

Respectfully yours,

Linda Flower m/s

P1651	Project Website Submission	03/11/2010	Online Submission from Tim Whaites (support)	The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. In the past there have been complaints made by residents living on Shirley Street in Byron Bay about the noise and litter accumulated after the Splendour in the Grass festival. North Byron Parklands solves this problem. The Parklands event site is startegically located 20mins drive north from Byron Bay and 25 mins drive south from Coolangatta. Name: Tim Whaites Address: 21/1 Cronin AveMain Beach 4217 IP Address: - 120.21.133.148 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1652	Project Website Submission	03/11/2010	Online Submission from Dean Tavener (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. So many people I know gain so much enjoyment from listening to live music. It seems to form an important part of our cultural expression within our society, however it appears to be on the wane in this country. To reverse this trend we need more venues that are sustainable such as that being proposed by North Byron Parkland North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community.

P1653	Project Website Submission	03/11/2010	Online Submission from julia green (support)	Name: Dean Tavener Address: 436 Pittwater RdNorth ManlyNSW 2100 IP Address: c58-111-128-56.belrs4.nsw.optusnet.com.au - 58.111.128.56 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. The approval of the North Byron Parklands proposal will benefit the local creative industries

and lead to a new wave of new and interesting jobs for the youth in the area. Let?s build the local industry and make The Byron Shire a hub for creative individuals.

I have experienced the great atmosphere Splendour at Byron has offered in the past and im in full support of the fun as well as their commitment to protecting the local environment.

Please consider giving the Splendour team this site as their home, i know they will take good care of it!

x

P1654	Project Website Submission	03/11/2010	Online Submission from Ben Huber of AAA Huber Consulting (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level!

P1655	Project Website Submission	03/11/2010	Online Submission from Kahla Glasheen (support)	I think that events like this help people grow, experience North Byron Parklands and all that our area has to offer. The North Byron Parklands proposal would definitely be a growing experience for me. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. Name: Kahla Glasheen Address: 14/19-21 Thurston St, Penrith NSW 2750 IP Address: - 115.128.30.220 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1657	Project Website Submission	03/11/2010	Online Submission from Bonnie Tregenza (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. Everyone I know enjoys attending and listening to music so when an opportunity comes along to built a superior and sustainable live music and arts venue it is really important that governments seize the moment and approve it. North Byron Parklands is one such opportunity. I think Splendour should stay in the Byron Bay because this is the area where the festival originated. I am worried that if the proposal for the new site (at North Byron Parklands) is rejected that Splendour in the Grass will cease to exist due to funding issues. It would be a huge shame to see one of Australia's most iconic music festivals disappear due to political

				based reasons. Name: Bonnie Tregenza Address: 195 O'Reilley's Hill RoadJumbukVIC 3869 IP Address: 122-149-80-81.static.dsl.dodo.com.au - 122.149.80.81 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1658	Project Website Submission	03/11/2010	Online Submission from Adrian Condon (support)	There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. So many once culturally iconic towns along the Pacific Highway are now either bypassed, over developed or suffering badly because of a lack of job opportunities. For decades, Byron Bay has represented a positive musical culture on the East Coast and is a hub for Australian holiday makers and international travellers alike. Byron is absolutely beautiful, both naturally and in its diversity. Its music festivals contribute greatly to its appeal and it would be such a shame to remove one of it's most significant drawcards. I really think the town and it's locals would suffer without it. Bringing Splendour home will increase job opportunities in the area and also sustain the existing businesses that rely on the heavy influx of visitors to stay afloat.

				Name: Adrian Condon Address: 2/19 Bolingbroke Parade Fairlight NSW 2094 IP Address: d58-107-141-44.sbr16.nsw.optusnet.com.au - 58.107.141.44 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1659	Project Website Submission	03/11/2010	Online Submission from Dirk Terrill of SAE Institute (support)	My family has lived within 35 kms of Byron Bay for just shy of 100 years. I have established an extremely successful position in the music industry in Byron Bay. This is a rich industry and hard to come by in smaller townships. We work extremely hard, and a cultural event is a huge chance for us to display this hard work. Losing Splendour was a massive issue for me personally and for my workplace. It gave us the chance to send students for workplacement and display our own music and audio engineering projects to gain awareness. Please approve this venue. Name: Dirk Terrill Organisation: SAE Institute Address: 5/10 Pinnacle Row Lennox Head IP Address: 203-219-75-8.tpgi.com.au - 203.219.75.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1660	Project Website Submission	03/11/2010	Online Submission from Cameron Dean of Student (support)	With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak.

				Itâ□™s a fantastic opportunity for us all. Splendour is the highlight festival for the year for many of us and one of the things that makes it so unique and awesome is its setting and what it stands for :) Name: Cameron Dean Organisation: Student Address: 119 Gormans Hill Road, Bathurst IP Address: cpe-203-51-77-230.lns17.cht.bigpond.net.au - 203.51.77.230 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1661	Project Website Submission	03/11/2010	Online Submission from Liza Aparicio (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Byron Shire Council has always longer for a permanent event site in its LGA, particularly now that the existing sites are either no longer available or are two inadequate to deal with world class events. The Blues Fest have bought a site which they intent to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would such a shame for the NSW government not to approve it. If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community.

				Name: Liza Aparicio Address: Unit 86/18-26 Church Avenue Mascot NSW 2020 IP Address: 124-149-44-45.dyn.iinet.net.au - 124.149.44.45 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1662	Project Website Submission	03/11/2010	Online Submission from Riana Harley (support)	The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands.
				Name: Riana Harley Address: 8 Beverley Court, Langwarrin 3910 IP Address: 112-213-209-114.bb.ispone.net.au - 112.213.209.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1663	Project Website Submission	03/11/2010	Online Submission from Micheal Dockray (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home! The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful. I finished my HSC this year and would love to stay close to my family and friends. I honestly feel at times that in order for me climb the corporate ladder I have to move away. Byron Bay has so much to offer, the lifestyle, the people but unfortunately not so much in the lines of employment. The North Byron Parklands proposal opens up a wide opportunity for all locals. P1664	Project Website Submission	03/11/2010	Online Submission from Alicia Adams (support)

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

P1665	Project Website Submission	03/11/2010	Online Submission from Black Dockray (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become ?out of bounds? to protect identified areas of importance.

P1667	Project Website Submission	03/11/2010	Online Submission from Caleb Martin (support)	Having attended a few Splendour in the grass festivals in Byron and the most recent event at Woodfordia, it is obvious to me where all future events should be held. Please bring Splendour back to Byron. The event organizers have made a tremendous effort in maintaining and improving the natural surrounds of the event site and I firmly believe they will continue to contribute responsibly to the Byron area in the future. I completely agree with the following statements made about the festival: 'The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.' 'A place where people can get together and enjoy the beauty that Byron Bay has to offer.' 'North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldnâ□™t go ahead.' Thankyou for your time, I hope the right decision is made. Caleb Martin

P1668	Project Website Submission	03/11/2010	Online Submission from Satomi Hook (support)	I came to Australia many years ago from Japan and have been an Australian resident for many years. Something that I am very proud of. I come from a country where we have many festivals and events throughout the year in celebration of our culture, spirituality, arts and crafts and seasons. One amazing way to bring people together to improve understanding an an acceptance of differences and qualities that make up a cultural richness is to allow events, meetings of people in places that embrace nature and the beauty of it. The japanese embrace our culture, our people and our diversity through festivals, events and nature. White Australian culture is so much younger and may even have a few things that could be learned through entertaining some of what older cultures have found has worked for them. Australia deserves to have a richer, more environmentally and socially integrated culture. This proposal is an opportunity just waiting to happen. It will be a great loss if this project is not given approval. I want to offer my full support and wish Byron Parklands my best wishes with their submission. P1670	Project Website Submission	03/11/2010	Online Submission from Clinton Hook ()

To whom it may concern,

Please be advised that I fully support the proposal of an events site at Yelgun. My reasons for this are as follows;

? I came to this area to enjoy diversity. The proposed site will provide the opportunity for all those who utilize the site to enjoy a wide range of activities and cultural events which will only enrich what the community has to offer.

? I have been working and living in the Byron Shire for nearly ten years. I work as a professional counselor and often am concerned about the lack of recreational activities on offer especially to youth. This proposed venue will allow so many interest groups to carry out meaningful activities which will add to the lives of those who attend and participate. The proposal supports far beyond one or two music festivals but rather people who wish to utilize a beautiful and considered space and environment to meet with others with similar interests.

? In the Byron Shire there is a lack of employment opportunities. This project is destined to provide wonderful employment opportunities to many in the shire.

? Land regeneration- the property in question is destined to be transformed over time from a depleted farm into a forest boasting the planting of many trees and the nurturing of expanded habitats for many creatures. I have had the opportunity to visit the property in question on one of the many information days arranged by Byron Parklands. I was very impressed with the amount of planting already undertaken.

In summary, this project is going to do nothing less than add considerable worth, value and diversity on so many fronts to the Byron Shire. Please give approval to the North Byron Parklands submission.

Sincerely

Clinton Hook

P1672	Project Website Submission	03/11/2010	Online Submission from Mathew Mcdonnell (support)	It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. Having a world class sustainable event venue at the Parklands site will put The Northen Rivers on the map as a leader in sustainable venue developments. This will also aid local educational institutes such as Southern Cross University in environmental related courses by having a world class example in the area. North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

P1675	Project Website Submission	03/11/2010	Online Submission from (object)	I do not want you to show my name and address or email address on the website, so please leave that information off. I am writing to express my strong opposition to this proposal. The plans go against our Council?s Events Policy, which calls for only two major music events a year in the shire. Then there?s our Council?s Tourism Management Plan. A main goal is to change people?s perception of Byron as a party shire, but this proposal would make the shire even more of a party town than it already is! I?m concerned about many other things, too. One is the thousands of campers they?re planning on having on site. That will increase the fire risk in the area greatly, and that?s an area known for dangerous peat fires. And they won?t be able to stop people from going into Billinudgel Nature Reserve from the site and from there to the beach that?s part of the Reserve. Festival goers will go in the other direction, too. They won?t be able to control that at all. As to their claims about creating all kinds of jobs

				and bringing a lot of money into the area, their figures are suspect in my mind. I don?t see any real benefits to what they want to do but see a lot of negatives. I?m very much against the whole thing. They should find another place to do what they want to do. Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1676	Project Website Submission	03/11/2010	Online Submission from Rebecca Shave (support)	The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! Please approve this project, it really sounds exciting for various reasons, arts, employment and cultural awareness. How fantastic! So many people I know gain so much enjoyment from listening to live music. It seems to form an important part of our cultural expression within our society, however it appears to be on the wane in this country. To reverse this trend we need more venues that are sustainable such as that being proposed by North Byron Parkland The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. Name: Rebecca Shave Address: 10 Daffodil St

				Marayong 2148 IP Address: 122-148-123-219.static.dsl.dodo.com.au - 122.148.123.219 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1677	Project Website Submission	03/11/2010	Online Submission from Anna van Riel of Musician (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience.

P1678	Project Website Submission	03/11/2010	Online Submission from Madeleine Powley (support)	Name: Anna van Riel Organisation: Musician Address: PO Box 307 Byron Bay NSW 2481 IP Address: cpe-138-130-105-33.lns3.cht.bigpond.net.au - 138.130.105.33 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 To Dear NSW Department of Planning, It has been brought to my attention that there has been some hesitation in allowing Splendour in the Grass to host its amazing festival in the beautiful North Byron Parklands. From what I have researched, there seems to be nothing but positive outcomes in allowing this proposal. It can hardly be overlooked that Splendour is an extremely popular event, drawing thousands of people around Australia to the venue. The media coverage is like no other festival in Australia. With this in mind, the environment (which seems to be the deciding factor in allowing this proposal) can gain nothing but benefits from this. Advertising and promoting environmental knowledge to such a large group of people, namely the next generation, can produce nothing but positive outcomes in all areas, to not only the venues which Splendour in the Grass takes place, but all areas and aspects of the environment. The festival it self is already very well known to be environmentally conscious, with its Eco Cops spreading â□˜environmental loveâ□™ across the festival and the overall encouragement of environmental awareness. There is even an environmental option available in the ticketing to purchase â□˜Carbon Offset Ticketsâ□™.

				Furthermore, with Splendour in the Grass being such a large festival held every year, it would only make sense for it to maintain one location. Changing locations will also impact on other various venues, whereas if a sole location was adapted for Splendour in the Grass, the environmental impact may be restricted and thus reduced. This is obviously gained with the greater knowledge of a familiar environment. I believe there is nothing but good things to come out of allowing The North Byron Parklands proposal, which is why I think it should be seriously considered. Thank you for your time. Name: Madeleine Powley Address: 23 Kauper Street SCULLIN, ACT 2614 IP Address: cechod.lnk.telstra.net - 203.45.39.126 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1679	Project Website Submission	03/11/2010	Online Submission (Object)	I am against this proposal. Bringing 30,000 - 50,000 people into North Byron Shire Parklands will lead to major disturbances. The increase in traffic will be too much for the one two-lane road that services the site (along with many residential areas). That many people in a partying mood just can?t be controlled. The residents closest to the site in the north of the shire will have to put up with what Sunrise Beach residents put up with for so many years with Splendour in the Grass at Belongil Fields, only there will be almost three times the daily attendance and at least four times the events each year with that level of crowds. And the last thing needed right next to a major nature reserve is amplified live or recorded music, but the promoters will have it going all day until well after midnight for days in a row.

				This is a really bad idea. The promoters should look for a better place to for year-round events. Reject this proposal! PLEASE DO NOT PUBLISH MY NAME AND ADDRESS WHEN YOU PUT THIS SUBMISSION ON THE WEBSITE. Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1680	Project Website Submission	03/11/2010	Online Submission from Corinne McCool (support)	The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered. Name: Corinne McCool Address: 137 Ironwood Street, Aspley Qld 4034 IP Address: - 203.5.136.235 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1681	Project Website Submission	03/11/2010	Online Submission from Jade Mifsud (support)	One of the things that really impresses me about the North Byron Parklands proposal is the level of community consultation they have undertaken. From public planting days to environmental forums, site tours to newsletters and letter box drops, these guys have demonstrated a strong willingness to communicate and listen to the community. I feel they have shown that they will more than adequately manage a variety of events at this site in a professional and sensitive manner. The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term. Name: Jade Mifsud Address: 73 heath street evans head nsw 2473 IP Address: cpe-144-131-114-189.lns3.cht.bigpond.net.au - 144.131.114.189 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1682	Project Website Submission	03/11/2010	Online Submission from Alex Cooksey (support)	I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region. The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment.

On all fronts, traffic, noise, ecology, flooding, safety, etc North Byron Parklands has demonstrated it has assessed all significant risks and put in place measures to manage all issues. Most more traditional developments do not even come close to the level of risk assessment undertaken by North Byron Parklands.

The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

P1683	Project Website Submission	03/11/2010	Online Submission from Hannah Cartwright (support)	In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved! Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. Name: Hannah Cartwright Address: 1/47-49 West Street, Ascot Park SA 5043 IP Address: ppp118-210-194-249.lns20.adl6.internode.on.net - 118.210.194.249 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1684	Project Website Submission	03/11/2010	Online Submission from Michael Rae of Hunter Water Corporation (support)	Hi, I support the North Byron Parklands development. Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc. Parklands ensures that the site area and the adjoining sites are protected by maximising â˜down timeâ™ between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. Regards, Michael Rae Name: Michael Rae Organisation: Hunter Water Corporation Address: 310/4 Honeysuckle Dr, Newcastle NSW 2300 IP Address: ppp121-45-190-241.lns6.syd7.internode.on.net - 121.45.190.241

P1685	Project Website Submission	03/11/2010	Online Submission from Pia Birac (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â□“ young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

I also believe in the potential for ever growing festivals such as Splendour in the Grass to attract tourists from all over the world. Allowing such a festival to grow and gain a respected reputation would only help the Australian economy.

Thank you

P1686	Project Website Submission	03/11/2010	Online Submission from Amy Martin (support)

North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

In the past there have been complaints made by residents living on Shirley Street in Byron Bay about the noise and litter accumulated after the Splendour in the Grass festival. North Byron Parklands solves this problem. The Parklands event site is startegically located 20mins drive north from Byron Bay and 25 mins drive south from Coolangatta.

North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities!

I have attended the last two splendour in the grass festivals and i think it is important that it moves back to its home in byron bay.

Thanks

P1687	Project Website Submission	03/11/2010	Online Submission from Mark Colman (support)	The North Byron Parklands has gone to great lengths to protect and enhance the biodiversity values of the site. This is shown by the Parklands group developing a environmental, health and safety management manual to identify, manage and monitor all the identified potential ecological risks. North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region. There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that donâ□™t require employees. North Byron Parklands will provide many new jobs for the young people in the community. Name: Mark Colman Address: 8 Halsbury Ave Kingswoood, 5062, SA IP Address: cpe-58-160-171-112.unqy1.fli.bigpond.net.au - 58.160.171.112 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1688	Project Website Submission	03/11/2010	Online Submission from Allegra McCormack (support)	To the NSW Planning Commitee, Byron Shire and the wider northern rivers region has been a fast growing area for the creative industries sector. Huge numbers of people have moved into the region with expectations of finding work in this sector and more than ever there is a need to ensure that projects that directly and indirectly benefit this growing sector are supported. The Parklands proposal if approved will become a dominant force in expanding the creative industries sector and will provide substantial job opportunities. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. PLEASE APPROVE OF THIS PROPOSAL!! Kind regards, Allegra.

P1689	Project Website Submission	03/11/2010	Online Submission from Emma Norris of Worked for the Owner of Bazzar - Vintage Fashion etc at 2010 Splendour - Vendour Jill and Paul Norris (support)	To the NSW Planning Department. This is a serious submission in putting a formal request to have Splendour at the North Byron Parklands. I attended this festival back when it first began, I attended the festival for many reasons and the main one being that it was held in Byron Bay. We enjoy this place so much that we knew a festival held there would hold all the wonderful things of it surrondings. I went with my two sisters, Dad and boyfriend for the very first one. I continued to attend the festival in years to the follow, not every year but at least someone in our family has gone every year, eventually taking on the youngest sibling in our family. This year was the first year that my whole family atteneded, yes Mum came and she LOVED IT !!! We held a store there which went mega sucessfully, we sold vintage clothes, shoes, hats and anything else that looked like it would be enjoyed at splendour.

We all agreed that it was one of the best weekends of our lives, the atmosphere and great mix of people made it something amazing...oh and the food.

This is a personal request to get Splendour growing, existing, promoting and evolving into the great statement it is already making.

Thank you for your time.

Emma Norris

This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments.

P1690	Project Website Submission	03/11/2010	Online Submission from Matt Fehlberg (support)

Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal.

P1691	Project Website Submission	03/11/2010	Online Submission from Rosanagh Griffiths (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. The two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism. I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government. Name: Rosanagh Griffiths Address: 10/376 Dandenong Rd Caulfield North 3161 IP Address: 123-3-157-146.static.dsl.dodo.com.au - 123.3.157.146 Submission for Job: #3210 Cultural Events Site (Project Application)

P1694	Project Website Submission	03/11/2010	Online Submission from Ranee Saffioti (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. In the past there have been complaints made by residents living on Shirley Street in Byron Bay about the noise and litter accumulated after the Splendour in the Grass festival. North Byron Parklands solves this problem. The Parklands event site is startegically located 20mins drive north from Byron Bay and 25 mins drive south from Coolangatta. Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but letâ□™s create a high season in winter too by utilising North Byron Parklands! Name: Ranee Saffioti Address: 172 London Road Belmont 4153 IP Address: cpe-121-222-197-99.lnse1.woo.bigpond.net.au - 121.222.197.99 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1695	Project Website Submission	03/11/2010	Online Submission from Grace Hawkins (support)	The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. P1697	Project Website Submission	03/11/2010	Online Submission from Toni Armstrong of APN (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become â□œout of boundsâ□□ to maintain and protect identified cultural areas of importance. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. Events are really important for young people today. Coming together is not just about getting drunk and partying. Itâ□™s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people. Name: Toni Armstrong Organisation: APN Address: 38 Thiess Drive, Albany Creek Qld 4035 IP Address: apnnew7.lnk.telstra.net - 165.228.201.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1698	Project Website Submission	03/11/2010	Online Submission from Marissa Dowling (support)	Splendour is a fantastic music festival showcaseing some of the best local, national and international artist but it wouldn't be possible without a great venue that can hold the diversity of artists and people. It is also really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. Look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment, and bring splendour home. Name: Marissa Dowling Address: 74 Hardgrave Rd West End IP Address: triton-core.net.qut.edu.au - 131.181.251.18

				Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1699	Project Website Submission	03/11/2010	Online Submission from julia murray (support)	Having been to music festival events at both the original Belongil fields site and, most recently, the Woodford site in Queensland, I saw a world of difference in the atmosphere of the spaces. In summary: the larger the site, the better the experience. Having an out of town location for events would put the town of Byron Bay under much less strain and pressure from such a large group of festival goers, but simultaneously give the area an economic boost from those traveling up for the festival who may choose to stay on and spend additional time and money in the town. As part of Parklands' proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. It sounds as though there is a commitment for everything related to the site being environmentally tip top. Having a couple of dozen days a year for events is a pretty fair trade-off for the preservation and regeneration of such a vast tract of land. Name: julia murray Address:

				338 illawarra rd, marrickville, 2204 IP Address: 202-129-82-30.perm.iinet.net.au - 202.129.82.30 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1700	Project Website Submission	03/11/2010	Online Submission from adrienna van gogh (support)	While much is made of the Marshallâ□™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. Name: adrienna van gogh Address: 33 powderworks rd nth narrabeen IP Address: - 210.215.124.127 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1701	Project Website Submission	03/11/2010	Online Submission from Juliana Tasevska (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

				Name: Juliana Tasevska Address: 7/100 Curzon St North Melbourne Vic 3051 IP Address: cytopia.com.au - 203.41.197.74 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1702	Project Website Submission	03/11/2010	Online Submission from Rebecca Karagiorgos of - (support)	The Parklands project will greatly assist the ecological integrity of the area especially for the Billinudgel Nature Reserve and the coast to hinterland wildlife corridor. The project results in thousands of extra trees planted, improved habitat for wildlife and additions to the Nature Reserve. The careful scheduling of events to maximise downtime will allow the Parklands site to assist the functioning of the adjoining Nature Reserve. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. North Byron Parklands will provide training and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

P1703	Project Website Submission	03/11/2010	Online Submission from keryn regan of uts union (support)	Name: Rebecca Karagiorgos Organisation: - Address: 177 Highfield Rd, Camberwell IP Address: std-pa-163-139.prn.swin.edu.au - 136.186.163.139 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy. North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all donâ□™t move to cities. The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. i have attended the festival a number of times over the years and one of the most exciting

things that keeps me coming back is the great relationship the festival seems to have with the local businesses and community. the reality is that without this festival i would never have visited Byron which would have been a great shame and i fear that there are a number of people who could say the same thing. splendour has always tried to do the right thing by the local community as well as the fans of live music. with so much pressure these days on return on investment as oppossed to the greater benefits events like these can have it makes no sense to me why this community wouldn't give this support back.

P1704	Project Website Submission	03/11/2010	Online Submission from Nick Slater (support)	There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands. Name: Nick Slater Address: 69 Heussler Tce, Milton 4064 IP Address: d-c235-145.ext.adsl.uqconnect.net - 203.101.235.145 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1705	Project Website Submission	03/11/2010	Online Submission from MARTIN SELECKI of FILMSTREAM and WILDERSHIP (support)	FULLY SUPPORT THE PLAN and the people behind it. I have lived adjacent since 1989 and made a film about the Billinudgel Nature Reserve and surrounds in 1997 for BSC's submission to the NSW Commission of Inquiry. I have learned much about this particular land use and I am excited with the current plan for wildlife regeneration in harmony with cultural events. We badly need robust employment in this area, especially in sustainable projects. I know many people around me and I'm sure this plan will benefit everyone, and wilderness. Name: MARTIN SELECKI Organisation: FILMSTREAM and WILDERSHIP Address: PO BOX 391 BILLINUDGEL NSW 2483 IP Address: 122.110.29.22.optusnet.com.au - 122.110.29.22 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1706	Project Website Submission	03/11/2010	Online Submission from sally cooper (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron

Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused.

Not to mention, Byron Bay encompasses the "vibe" and central ideals of the festival. The township is a perfect venue for a festival event where the emphasis is simply on enjoying good music in beautiful surroundings. Furthermore, access to the beach and prominent tourist hot spots such as the Byron Bay lighthouse, entice more tourists further boosting the economy.

BRING SPLENDOUR HOME!!

Kind Regards

Sally Cooper

P1708	Project Website Submission	03/11/2010	Online Submission from Larrissa Cunningham (support)	NSW Department of Planning,

I am writing to show my support for Splendour in the Grass returning home to the beautiful Byron Bay, which is reasonably explained below.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

Not only that, but the Splendour family is all about promoting a healthy youth culture in a safe and beautiful environment. The youth of today are more environmentally conscious than ever, we respect our mother earth and would love a chance to prove how we can work in harmony with the land. Not only this, but the event will increase tourism and supply work for locals, stimulating the economy.

I trust that you will take full consideration of the above arguments and bring Splendour in the Grass home, to where it belongs in the magical Byron Bay.

Kind Regards

Larrissa Cunningham

P1709	Project Website Submission	03/11/2010	Online Submission from Sarah Forsyth (support)	One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become â□œout of boundsâ□□ to maintain and protect identified cultural areas of importance. I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner. The economic value of creative industries for the region is estimated to be $190 million with the indutry having a job growth rate of 100% over the past decade. Lets bring Splendour in the Grass home, back to the the Byron Shire and develop our creative industires further to provide new and exciting job opportunities for the youth in the future.

P1710	Project Website Submission	03/11/2010	Online Submission from daniel malki (support)	Name: Sarah Forsyth Address: 20 Balfour Rd Springfield, 5062 IP Address: ppp118-210-89-50.lns20.adl2.internode.on.net - 118.210.89.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy.

P1711	Project Website Submission	03/11/2010	Online Submission from Alex Berlage (support)	With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all

issues and the steps taken to resolve them.

North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead.

P1713	Project Website Submission	03/11/2010	Online Submission from Emma Plant (support)	On all fronts, traffic, noise, ecology, flooding, safety, etc North Byron Parklands has demonstrated it has assessed all significant risks and put in place measures to manage all issues. Most more traditional developments do not even come close to the level of risk assessment undertaken by North Byron Parklands. The North Byron Parklands proposal is for a maximum of 20 days of events each year, with up to 12 of these days being for major events (of 10,000 â□“ 35,000 people). Splendour in the Grass would occupy three of these 12 major event days. This proposal means this land will have little to no activity for 280 days each year, thereby preserving the natural local environment. These events attract a lot of attention from music/festival lovers who travel from far and wide to be a part of these. Just think of the tourism opportunities that present themselves when thousands of people frolick to the North Byron Parklands for up to 20 days a year?? Name: Emma Plant

P1715	Project Website Submission	03/11/2010	Online Submission from Mick Hosking (object)	I object to this DA for the following reasons Negative impact on residental amenitys Anti social behaviour,permanent party town Fire and flooding risks Lack of local amenitys to host up to 50,000 people Treat to billinudgel nature reserve,wildlife Traffic jams,limited or no acess to local roads Against Byron Bays event policy of smaller low key festivals Name: Mick Hosking Address: 85 Yelgun Rd Yelgun 2483 IP Address: 203-219-3-120.tpgi.com.au - 203.219.3.120 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1716	Project Website Submission	03/11/2010	Online Submission from Sam Barr (support)	Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that donâ□™t require employees. North Byron Parklands will provide many new jobs for the young people in the community. Splendour in the Grass is one of the best run and loved festivals in the world - it puts Byron Bay on the map and is a little beacon of light through winter! Please bring it back to Byron. Name: Sam Barr Address: 8/2 Ithaca Road, Elizabeth Bay 2011 IP Address: - 153.107.97.156 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1717	Project Website Submission	03/11/2010	Online Submission from Kirsty Kain (support)	The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture. Name: Kirsty Kain Address: 17/999 Rathdowne StNorth Carlton 3054 IP Address: tooronga.alia.vic.edu.au - 203.214.67.154 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1718	Project Website Submission	03/11/2010	Online Submission from Joanna Prasser (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. The approval of this proposal will lead to new employment opportunities that may not have previously been offered on the north coast of NSW. New and exciting jobs will boost the youth employment and inspire young adults to remain in the local area after completing study. In the past there have been complaints made by residents living on Shirley Street in Byron Bay about the noise and litter accumulated after the Splendour in the Grass festival. North Byron Parklands solves this problem. The Parklands event site is startegically located 20mins drive north from Byron Bay and 25 mins drive south from Coolangatta. A cultural event site such as the one proposed by North Byron Parklands will help develop

creative industries on the north coast. Events such as Splendour In The Grass inspire and encourage young adults to be creative and also provide special initiatives such as the young artists program, Splendid. Lets build up the creative industries in the region!

P1719	Project Website Submission	03/11/2010	Online Submission from Dean White of Builders (support)	BRING SPLENDER HOME..... PLEASE..... This is were splender was born Name: Dean White Organisation: Builders Address: 584 Milton Rd Toowong Qld. IP Address: proxy7.messagelabs.net - 117.120.18.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1720	Project Website Submission	03/11/2010	Online Submission from Naomi Kelly (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising ?down time? between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. Name: Naomi Kelly Address: 109 Mitcham Rd Donvale VIC 3111 IP Address: cpe-60-230-176-159.vic.bigpond.net.au - 60.230.176.159 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1721	Project Website Submission	03/11/2010	Online Submission from jonathon Rats of The Ghost Orchestra (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate.

Having read the environmental assessment report I can say without reserve that I strongly support the proposal put forward by North Byron Parklands. The application covers off on all of the important issues such as noise, traffic and ecology. It is so pleasing to see a development that has considered and responded to such a diverse range of issues. I firmly believe that the government should approve this application.

Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them.

P1722	Project Website Submission	03/11/2010	Online Submission from Steve Marquette of Marquez (support)	It's a sure way to provide for the local economy. Byron needs it more than anywhere else and the festival is more appealing at it's spiritual home. Name: Steve Marquette Organisation: Marquez Address: 5/18 Bonavista Ave, Maroubra 2035 IP Address: 124-168-3-99.dyn.iinet.net.au - 124.168.3.99 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1723	Project Website Submission	03/11/2010	Online Submission from Jonathon Knight of The Ghost Orchestra (support)	While much is made of the Marshallâ□™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities. The future of Byron Bay. Employment, community benefits, fun. Need we say more? A place where people can get together and enjoy the beauty that Byron Bay has to offer. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

				Name: Jonathon Knight Organisation: The Ghost Orchestra Address: 187 ninderry rd, Yandina IP Address: dsl-202-173-190-11.qld.westnet.com.au - 202.173.190.11 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1724	Project Website Submission	03/11/2010	Online Submission from Elmira Forrest (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local business? income. There is no reason why this proposal should not be approved by state government. Having a world class sustainable event site will encourage the youth be become more creative, help them build towards a career in a creative industry and boost creative industries in on the Northern Rivers. Sincerly, Elmira Forrest. Name: Elmira Forrest Address: 12 Copeland street Alexandria NSW 2015

P1726	Project Website Submission	03/11/2010	Online Submission from Pamela Harris (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. Last year was the first time I did not holiday in Byron Bay. Every year up until last year I had made the journey from Canberra to Byron Bay for Splendour in the Grass and stayed for a week. I love Byron Bay and its people but did not have a reason last year to make the trip. Hosting a festival with such far reaching appeal attracts people of all ages and backgrounds to your beautiful Shire. It makes people aware of how amazing the town is and will make Byron Bay a destination people consider long after their festival attending days are over. The impact of removing such a festical from your town will be seen for many years to come. Name: Pamela Harris Address: 12 Pudney St Farrer ACT 2607 IP Address: cpe-58-165-250-114.lns1.civ.bigpond.net.au - 58.165.250.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1727	Project Website Submission	03/11/2010	Online Submission from Siobhain McDonnell (support)	We should all be getting behind such an exciting project which offers businesses and the community a range of important social and economic benefits. The beauty of this application is that it also strongly supports the environment. This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home. From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. Name: Siobhain McDonnell Address: 43 Pepperina Dr Stockleigh QLD 4280 IP Address: mcgirvanmedia.com.au - 59.167.210.106 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1728	Project Website Submission	03/11/2010	Online Submission from samantha callen (support)	The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! LEAVE IT IT BYRON!! Name: samantha callen Address: 4/60 broad street, labrador qld IP Address: piniro1.lnk.telstra.net - 203.45.35.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1729	Project Website Submission	03/11/2010	Online Submission from Michael Swale (support)	To whom it may concern, I am writing in regard to the application of the Splendour in the Grass festival to be held at a permanent location in Byron Bay. It is understood that there are both environmental and sociological effects due to having such an event in the area, those being impacts on fauna and also the community. These aspects however are outweighed by facts such as the native endangered fauna being birds, usually vacating an area in the presence of such an event, and also the benefit of the community, profiting healthily from the income provided by the festival and it's patrons. For many years now Byron Bay has been synonymous to many as a beautiful town with amazing beaches, relaxed atmosphere and Splendour in the Grass. It would be a shame if this amazing festival were made to change so drastically, to move from the town we know and love for hosting it, please give Splendour in the Grass a home. Thank you, Regards, Michael Swale Name: Michael Swale Address: 36 Tarlington Road, Lower Beechmont, Queensland, 4211. IP Address: 1.42.79.161.optusnet.com.au - 1.42.79.161 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1730	Project Website Submission	03/11/2010	Online Submission from Sharon Cooksey (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment

base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coastâ□™s existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas.

I have read the North Byron Parklands proposal submission and while I have not personally been to many events, my children have, and I believe it is important to continue to offer entertainment opportunities such as this festival. I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved!

P1731	Project Website Submission	03/11/2010	Online Submission from Letitia Simpson (support)	To Whom It May Concern, Please consider my submission for bringing Splendour home. It would be a great disappointment if North Byron Parklands proposal doesnt go through as not only will it contribute to the environment, the economy but also add value to the community through culture and the arts. With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 50 years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative. We must bring Splendour home! The opportunities the Parklands event site will bring to the youth in the community such as employment and culture are just too good to miss. Name: Letitia Simpson Address:

				1/26 Waruda Street, Kirribilli NSW 2061 IP Address: babel.homelinux.net - 61.29.36.94 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1732	Project Website Submission	03/11/2010	Online Submission from Vanessa Pearce (support)	To the Dept, My husband and I have traveled to Byron Bay for every Splendour in the Grass, each time staying for a week at First Sun in a cabin for the week prior and weekend of the event. On average we spend approx. 3k and enjoy restaurants, whale watching, hang gliding, markets and many other facilities on hand in Byron Bay. We did not go to the last Splendour at Woodford as we did not want to go to Queensland and we did not want to camp. Part of the joy of Splendour in Byron is the well maintained and controlled environment and the excellent facilities available in the Byron Shire. Please bring Splendour back to Byron. Name: Vanessa Pearce Address: 16 Mittagong Rd Bowral NSW 2576 IP Address: c-210-10-175-58.syd.connect.net.au - 210.10.175.58 Submission for Job: #3210 Cultural Events Site (Project Application)

P1733	Project Website Submission	03/11/2010	Online Submission from Emma Levy (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers. If you consider that businesses involved in the tourism industry that will directly benefit from

the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

I'd like Splendour to be back at byron as it would be much easier for me to get to, so i can enjoy it as much as everyone else!! :-) Due to living in Sydney, having it that little bit closer allows more of an opportunity for my friends to get excited about it as well as me!

Byron is a beautiful place! The shopping, the beaches and the grasslands! BRING SPLENDOUR BACK HOME!! EVERYONE WANTS IT!!

xxx xxx xxx

P1734	Project Website Submission	03/11/2010	Online Submission from matthew pham (support)	I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. Name: matthew pham Address: 95 mooltan st, travancore, vic 3032 IP Address: unknown.net.reach.com - 134.159.163.135 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1735	Project Website Submission	03/11/2010	Online Submission from Jessica Trappel (support)	The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs. With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coastâ□™s existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas.

P1736	Project Website Submission	03/11/2010	Online Submission from Shaun Bates (support)	Name: Jessica Trappel Address: 580 Glenwilliam Rd, Via Clarencetown, NSW, 2321 IP Address: - 201.215.57.180 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity. Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this.

P1737	Project Website Submission	03/11/2010	Online Submission from Kate O'Malley (support)

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region.

P1738	Project Website Submission	03/11/2010	Online Submission from Gemma Regan (support)	I strongly support the application put forward by North Byron Parklands to establish a much needed outdoor music and arts venue. The government should approve this project as soon as practicable.Having read the North Byron Parklands application I cannot think of another proposed outdoor venue that has put so much effort into the identification and management of a range of issues. Surely this proposal must be approved on its merits The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. P1740	Project Website Submission	03/11/2010	Online Submission from Aidan Stimson (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. On all fronts, traffic, noise, ecology, flooding, safety, etc North Byron Parklands has demonstrated it has assessed all significant risks and put in place measures to manage all issues. Most more traditional developments do not even come close to the level of risk assessment undertaken by North Byron Parklands. How many more venues have to close in NSW before people realise that soon there will be nowhere to play live music or undertake live performances. The NSW Government has a responsibility to ensure that well managed live outdoor venues are made available to the people of this state. Name: Aidan Stimson Address: 8/40 Burchmore Road Manly Vale IP Address: proxy02.syd.iprimus.net.au - 210.50.143.21 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1741	Project Website Submission	03/11/2010	Online Submission from jon wood (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. Having a permanent cultural event venue in nature is the way forward for young people. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community. And not just for the young people either. Name: jon wood Address: 2 / 87 Sherwood Rd Toowong Qld 4066 IP Address: proxy7.messagelabs.net - 117.120.18.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1742	Project Website Submission	03/11/2010	Online Submission from Merrian Malouf (object)	I object to this abomination for the following reasons. 1. Are we to become the festival site for the nation? We already have one festival site at Tyagarah, north of Byron Bay. Why does our area have to support two sites - both owned & operated by private enterprise for profit. The scale of the festivals is far beyond what is reasonable for land that is immediately adjacent to Billinudgel Nature Reserve, a prime biodiversity asset on which the state has spent millions to protect for many years. Although the applicants mention daily attendance of 35,000 in their promotional material, their proposal clearly states that they are aiming for 50,000 people per day for major events, and those will be held at least four times a year for 3-4 days at a stretch. We have to keep in mind that if they get permission to proceed, they could always ask to increase the numbers of major events and the daily attendance still further

2. Fauna in our precious Billinudgel Nature Reserve will be under intolerable noise and lighting assault causing disruption of mating and predatory defense senses for vulnerable species. This will be over the whole year with the planned events for this site. It will affect the fauna's whole existence.

3. In 2009, the applicants were stopped from proceeding with a trial festival at Yelgun by a ruling from the Land & Environment Court concerning the roads they planned to build on the part of their land zoned as 7(k) habitat. Their current proposal ignores that court ruling and calls for roads in the same place. In fact, this part of the proposal is in direct contravention to a specific warning the Court gave concerning any future proposal the group might lodge. Why have the developers been allowed to over rule this decision & take it to this stage. Smacks of something a tad fishy in my books.

4. Increased bushfire risk with up 50,000 young and intoxicated people partying on the edge of the nature reserve, the unpatrolled beach & environs. Part of the site is peat bog & if this catches alight the only thing that will stop it is rain.

5. Traffic will be a major problem as the only access to the site is Tweed Valley Way. Even if only 5,000 cars try to access & leave this site on a daily basis the Tweed valley Way will be blocked for days on end during a major event. This means that the local population will have to deal with traffic jams on a monthly or even weekly basis. It also means that we (the locals) will have problems if we need an ambulance, fire brigade etc. How do these services get to our homes if the traffic has blocked access for miles?

6. There is a high risk of flooding in the proposed car parks & camping areas. The developers say it will flood only in a 1 in 100 flood, but you only need one of those to get that car park & camping areas flooded & then where will us locals be? We have a major disaster on our doorstep with all emergency services being directed towards this site - & us locals are neglected yet once again to accomodate a greedy money making consortium of developers. No car park or camping area should be built on flood prone land & that is that!!

7. Our little towns & villages will be turned into permanent weekend party towns with a huge influx of people coming in to 'enjoy' themselves. Our beaches (patrolled & unpatrolled) will be clogged with event goers - who will make sure they are safe at the beach? (we would need more surf lifesavers) who will police their exhuberant behaviour (we will need more Police) One of the attractions of tis area is our unspoilt towns & villages. If this site is allowed to go ahead these little places will be changed forever & for the worst.

8. The developers want 4 mega festivals a year. We already have a major festival at Easter at our other major events site (Bluesfest at Tyagarah) So the developers over ride our council & ask you to agree to this huge site with so many events planned. 4 mega festivals with a capacity of 50,000 (more than the population of our entire Shire) 4 smaller festivals with capacity of 10,000. Then smaller events like doof parties - where the drum beat can be

heard for miles (disrupts locals - tame & wild) & go all night accompanied by the appropriate party drugs. Smaller events again with an unlimited number per year. This means our public amenities will be stretched to the max on what could be a weekly basis. Does the NSW Govt. have a plan to add double the public amenities we have at the moment? If this site is allowed to go through the State Govt. must supply this shire with double the amenities we have at present - double the police, double the fire brigade, double the ambulance service, more patrolled beach? There does not appear to be imput in any level by the State Govt. to help with this major influx of party people to our Shire on a weekly basis.

9. Accommodation for people in this area is at a premium as it is with people finding it nearly impossible to get rental accommodation. With this festival site in full swing rental accommodation will be for holiday lets only & people who need to rent on a weekly basis will be pushed out of the market. Holiday lets are notorious for being party lets (not all, but who knows until they have moved in next door & the party starts) So this means that our lovely shire will be come party central with a party house near just about anyone & everyone.

10. Although the applicants claim they will be using the site for only 20 days per year for major events, they also admit that it will take days, often weeks, of preparation for events and time to clean-up afterwards. The pre and post event days will involve large numbers of people, equipment, and vehicles on the site. They will have to test sound and lighting equipment, erect structures, bring in supplies, etc. So the claim of "just a few days a year" is misleading. This stresses our local road system too much.

11. There is no way the promoters will be able to prevent attendees from tramping through Billinudgel Reserve to get to the beach, leaving behind bottles, cigarette butts, trash, etc..... & maybe drowning at the unpatrolled beach. Those of us who live near the Reserve see this kind of behaviour regularly in the Reserve, along with motorbikes, dogs, and kids playing with matches. We will inevitably see more of the same if 50,000 people are right next door to the Reserve for days. Byron Shire Council rangers and NPWS rangers are woefully understaffed. There is no way they will be able to patrol the sensitive areas properly.

12. Camping on site will be available for only some of the festival goers. Some may pay for accommodation elsewhere, but many will look for cheap alternatives such as camping in their cars and vans near the site. That means the people of Yelgun, Crabbes Creek, North Ocean Shores, Billinudgel, Wooyung, Brunswick Heads, etc. will have to deal with illegal camping on their streets, intrusion on their properties, etc.

13. The applicants' stated plans for managing traffic snarls, fire risks, flooding, and acid sulphate soils are grossly inadequate. The people who live near the site will be at serious risk for these reasons, too.

14. The proposal goes against Byron Shire Council's Events Policy. That policy calls for no more than two major music events in the shire per year. The Splendour promoters (the developers of this site) want four extremely large events, others that would be of the size

Splendour used to be, and unlimited "minor" events. It is not clear what those "minor" events might be, but they are likely to include "doof" parties and other noisy events that will also disturb the wildlife and the human neighbours. The proposal also goes against Byron Council?s Tourism Management Plan (2009) that calls for overcoming Byron Shire?s ?party town? image.

15. The applicants have engaged in minimal community consultation with the people in the shire and have made no effort to respond to their very genuine concerns. In fact, it was when they discovered how much opposition there was to their ideas for a permanent festival site that they applied to the state as a Major Project under Part 3A guidelines of the Planning Act. This Part 3A business has been called into serious question because it takes the decision making completely out of the hands of the local Council and community and puts it solely in the hands of the Planning Minister. Why do we have a local council if decisions are taken away from them & given to people in Sydney who have no idea of the way our shire functions?

16. The developers of this site say they will be adding jobs to the local economy. Maybe a few very part time weekend jobs. Most of the real jobs will be performed by friends & cronies of the developers & these people will be imported from other areas (like Sydney & Brisbane) Also because of the nature of the events proposed for this site most of the available jobs will be done by people with experience & therefore imported from other places (e.g. Scaffolding, traffic control, food vans etc.) Also there will be volunteer situation which supplies most of the workers for the Bluesfest at Easter. This is where the promoters give free tickets to people in exchange for them working a number of hours for nothing.

16. This site is for the benefit of a few greedy people who want to make a lot of money at the expense of the local community. They make out they are patrons of the arts. They are nothing of the kind. Just greedy money making individuals. None of them are actual locals. All have blown in from somewhere else & have bought this land to make themselves mega dollars. The little they intend to put back into the community will not go close to making up for the destruction they will cause.

P1745	Project Website Submission	03/11/2010	Online Submission from Marc Flach of Hutchies (support)	North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community. Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry. One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire

Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed.

P1748	Project Website Submission	03/11/2010	Online Submission from Amy Thompson (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ□™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

P1752	Project Website Submission	02/11/2010	Online Submission from Stephanie Williams of Private Citizen (support)	Large gatherings of people at events such as festivals have been a significant part of our culture from the earliest times. It is far more socially and environmentally responsible to have a purpose built facility for this type of event than trying to squeeze into another. A bit more detail below: Social Considerations: For many young people in regional areas, getting a job has proved to be very hard. In the case of the Byron Shire, other than retail and tourism there are few large employers. This project will offer a whole range of people with new prospects for a fulfilling career. This can only further enrich the creativity and innovation of an already vibrant shire. Environment: North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

P1753	Project Website Submission	02/11/2010	Online Submission from Brent Killeen (support)	Name: Stephanie Williams Organisation: Private Citizen Address: 10 Bann Street, Stafford Heights, Qld 4053 IP Address: - 120.21.23.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. Name: Brent Killeen

P1754	Project Website Submission	02/11/2010	Online Submission from Tamara Ryan (support)	Splendour in the Grass is the most environmentally responsible event I have been to. Caring for the environment is just as important to the operators as staging a successful event for the punters. When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. Splendour in the Grass brings significant revenue into the region, and introduces many non locals to the area who return at other times of the year to spend their tourist dollars. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead.

				The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. No doubt if permission to use the North Byron Parklands is declined, the festivals will be held elsewhere. The punters won't miss out - the local region would be the ones missing out on all that revenue. Name: Tamara Ryan Address: 313/88 Macquarie Street Teneriffe Q 4005 IP Address: c-61-68-218-229.bri.connect.net.au - 61.68.218.229 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1755	Project Website Submission	02/11/2010	Online Submission from fredricko laritz of exceed amd excel pty ltd (support)	I have been to every splendour in the grass festival excluding 2009 and I believe that after 2010's version at woodford there is nowhere in the world that sets the great vibes for this festival than Byron. The festival's heart and soul is in this area and should never have to leave.I fully support this with all my heart. I hope that it continues and grows in Byron so that my children and then their children van enjoy it as much as I have for the past 10 years. North Byron Parklands proposal of a sustainable arts and music venue that invites not just

our locals to enjoy but that people will travel can only benefit our local economy.

Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application.

Events are really important for young people today. Coming together is not just about getting drunk and partying. Itâ□™s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people.

P1756	Project Website Submission	02/11/2010	Online Submission from kylie norberry (support)

Please bring back Splendour to Byron.

The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process.

I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government.

It also brings a significant amount of money into the Byron Shire,bringing people there that may not normally have gone there.

I personally had never stayed in Byron Bay until I went to a Splendour in the Grass festival.Now I will keep coming back because i fell in love with the place.

P1757	Project Website Submission	02/11/2010	Online Submission from Chris Harding of The Black Stars ()

As a resident of Lennox Head and a local musician I have often contemplated moving from this area that I love so dearly due to the limited opportunities for people of this region. In 2008 our band The Black Stars opened the main stage of Splendour in the Grass on which the final act of the evening was internationally renowned act DEVO. This opportunity has been invaluable to our band and the exposure has made it possible for us to gig interstate and receive airplay nationwide partly due to the recognition we received from playing such a large festival.

I believe the young creative people of Byron Bay should be given incentive to stay in the area. Aside from the beautiful surroundings, it is the culture that characterises our region. Splendour in the Grass has not just contributed greatly to this culture, but has also literally contributed to programs for young people that I have been involved in, providing hope and opportunities to young people in the area with strong artistic aspirations. I find it sad that people who are not inspired by such a fantastic event work to take it away from our youth who are already limited in creative entertainment activities.

I understand that the Splendour producers have worked fastidiously to ensure that the environmental impact upon the area is minimal and that they are in fact looking to preserve the area through good practice and limited usage. In all of my dealings with the people of Splendour in the Grass I found them to be considerate, honest and positive, I believe that they have the best intentions for the area and trust that they will respect their privilege to be able to hold this event.

On a completely different note it was very sad to see how many empty shops there were in the cinema complex on Johnson St in Byron Bay when driving through town a c

P1759	Project Website Submission	02/11/2010	Online Submission from Joel Michel (support)	The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments. Name: Joel Michel Address: 79 Rose Street, Wooloowin, Qld 4030 IP Address: - 120.156.103.154 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1760	Project Website Submission	02/11/2010	Online Submission from Ryan O'Rourke (support)	Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. There is a real need to reverse the current trend of closing music and artistic venues around the State of NSW. Music and arts are so important to the health and vibrancy of a community and I urge you to approve the North Byron parklands venue. Name: Ryan O'Rourke Address: 53 nerang river drive IP Address: cpe-58-166-164-26.lns2.woo.bigpond.net.au - 58.166.164.26 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1761	Project Website Submission	02/11/2010	Online Submission from Catherine King (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community.

P1762	Project Website Submission	02/11/2010	Online Submission from Fraser Nock of ANZ (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this.

P1763	Project Website Submission	02/11/2010	Online Submission from Melissa norman (support)	A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands! Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity.

The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements.

P1764	Project Website Submission	02/11/2010	Online Submission from Laura Irvine-Brown (support)

1. North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year.

2. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project.

3. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government.

4. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

P1768	Project Website Submission	02/11/2010	Online Submission from Haylee McGlynn of Private (support)	North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. Name: Haylee McGlynn Organisation: Private Address: 56 Mt Vernon Dr, Kambah, ACT 2902 IP Address: 203-213-37-38.static.tpgi.com.au - 203.213.37.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1769	Project Website Submission	02/11/2010	Online Submission from Belinda Zubakin of N/A (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

				I find great delight knowing that competent Event Managers will be involved with all the events held at North Byron Parklands, ensuring that we have a lot of great experiences if this proposal goes through.
				Name: Belinda Zubakin Organisation: N/A Address: 1/13 Pendara Crescent Lismore Heights NSW 2480 IP Address: 110-174-207-35.static.tpgi.com.au - 110.174.207.35 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1770	Project Website Submission	02/11/2010	Online Submission from Andrew Inman of Private citizen and Splendour in the Grass attendee (support)	North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. The Byron Shire and Northern Rivers region is home to an aging community with a high

proportion of retirees. This means many young people are leaving the area to seek education and employment opportunities elsewhere. North Byron Parklands would help provide employment for many of these young people, thus giving them a reason to stay in the area.

Thank you,

Andrew

P1771	Project Website Submission	02/11/2010	Online Submission from Eimear O'Sullivan (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral responsibility to approve it just on employment considerations alone. Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! Name: Eimear O'Sullivan Address: 10 Fore st CanterburySydney, NSW 2193 IP Address: c211-30-123-183.rivrw2.nsw.optusnet.com.au - 211.30.123.183 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1772	Project Website Submission	02/11/2010	Online Submission from Nathan Kelly (support)

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

This proposal is so important for the Northen Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce.

We must bring Splendour home! The opportunities the Parklands event site will bring to the youth in the community such as employment and culture are just too good to miss.

P1774	Project Website Submission	02/11/2010	Online Submission from Ashley Little (support)	Splendour in the grass isn't splendour without Byron bay! Gold coast isn't the same as a Byron. Byron has that blues and roots chilled out splendour feel. Basically as far as I'm concerned if splendour isn't held in Byron, well it's a different festival to the one I know and love and really should be cancelled! Please bring splendour back to Byron!!! Ashley, Name: Ashley Little Address: 24 Lockyer cl dural 2158 nsw IP Address: d220-239-135-88.bla801.nsw.optusnet.com.au - 220.239.135.88 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1775	Project Website Submission	02/11/2010	Online Submission from luke mansfield (support)	Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best

practice, if not world?s best environmental practice.

Let?s get the creative juices flowing in the Northern Rivers. Bring Splendour home, let?s get on with the job of creating exciting training and employment opportunities for our young people.

P1776	Project Website Submission	02/11/2010	Online Submission from Sarah Stepien (support)	North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. Name: Sarah Stepien Address: 6/364 Moore Park Road, Paddington NSW 2021 IP Address: 122.110.17.211.optusnet.com.au - 122.110.17.211 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1777	Project Website Submission	02/11/2010	Online Submission from Nathan Koenig of Parkes Shire Council (support)	Hi, I would simply like to say that, as avid live music consumers, my friends and I all agree that Splendour in the Grass 2010 was the best run festival we have ever attended. The atmosphere was great, the crowds spectacular and the event unforgettable. This was felt by all the surrounding townships and businesses we spent time in. The whole area of Woodfordia was behind the festival and keen to benefit from the influx of tourists. I'd imagine it was quite a boon for the locals. Obviously the site will have to change for the continuation of the festival but the atmosphere needn't be lost. Why not bring the social and monetary benefits to Byron? Splendour brings jobs, money, tourists, travelling businesses, sponsorship opportunities and international attention whenever it be held. Wouldn't Byron benefit from hosting Splendour as much as Splendour benefiting from a Byron home? The only issue i had with the Woodford site was ease of access to the site. However I believe the proposed site is advantageously located near the Pacific Highway to accommodate large amount of vehicular movements - a major plus!

Byron and surrounds also has a great number of accommodation options for festival goers. If the festival is run in off-season like this year it would greatly assist these local businesses.

As for environmental factors, Splendour is big on promoting the Green viewpoint. Carbon-offset tickets, tree-planting, recycling and environmental activists on the grounds were only some of the things I witnessed about this year's festival.

I wont drag on with my opinions but working in local government for the last 3 years completing engineering assessments has given me some experience in assessing the adequacy of sites for developing, construction and functions. From the information i have looked at this site seems ideal to host Splendour in the Grass in the future.

Byron should jump at the chance to secure this excellent and now world-renown festival for years to come.

Thanks,

Nathan Koenig

P1778	Project Website Submission	02/11/2010	Online Submission from Sean Hourigan of Western Star (support)	In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. Name: Sean Hourigan Organisation: Western Star Address: 27 Downs Street,Roma Qld 4455 IP Address: apnnew5.lnk.telstra.net - 139.130.121.94 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1779	Project Website Submission	02/11/2010	Online Submission from Kellie Harmer (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

				Most of the businesses within the Northern Rivers and Byron Shire are sole traders and do not offer any employment opportunities to the community. Bringing Splendour in the Grass festival back to Byron Bay would result in North Byron Parklands offering many new employment opportunities for the residents in the region. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ□™ income. There is no reason why this proposal should not be approved by state government. Name: Kellie Harmer Address: 35 Huckerby street, Cremorne Victoria 3121 IP Address: 220-245-174-111.static.tpgi.com.au - 220.245.174.111 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1780	Project Website Submission	02/11/2010	Online Submission from Ted Kearney (object)	I do not want to see the proposed "cultural events site" approved for North Byron Shire Parklands in Yelgun. I am against the Concept Plan and the specific Project Application. The number of festivals they are planning is far beyond what the site and the shire can handle. The applicants' Environmental Assessment does not adequately address how they will control traffic, extreme noise, the disturbance of wildlife at Billinudgel Nature Reserve, illegal camping in nearby residential areas, and the kind of anti-social behaviour that Byron Shire has come to expect from Splendour in the Grass (from the heavy drinking the patrons will be doing). Byron Shire already has plenty of tourists, far more than many other shires in the state. We do not need, nor do we want to see, the kinds of enormous events that clog our roads even further and strain our infrastructure. 50,000 people per day in a shire with an entire population of 30,000 is simply too many people. I would also like to point out that Byron Council's Tourism Management Plan expressly calls for reducing Byron Shire's image

as "party central". This kind of development will not in any way help with that. It will just worsen the image. Please reject this! It is not in the best interests of Byron Shire. I am not against festivals, but this kind of development on this scale is simply wrong for that property.

P1781	Project Website Submission	02/11/2010	Online Submission from Louise Cohen (support)	It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parkland?s environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. Name: Louise Cohen Address: 14a Roebuck st Mile End 5031 IP Address: 123-3-130-39.static.dsl.dodo.com.au - 123.3.130.39 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1782	Project Website Submission	02/11/2010	Online Submission from Chris Argue ()	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means

that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coast?s existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas.

The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

My freinds and I travelled from South Australia to attend the 2010 Splendour in the Grass festival held in Woodfordia QLD. Having been our first time we found it to be a very well run event in a beautiful setting and would hope to attend arin in the future. I would hate to see it compromised or not staged at all due to a lack of a siutable permanent venue.

Thanks

Chris

P1783	Project Website Submission	02/11/2010	Online Submission from hayley braxton (support)	IP Address: - 202.124.89.90 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The northern rivers area over the past 20 years has been built on the back of the creative arts industry, so it is vital that the government support this industry by promptly approving the North Byron Parklands project. Musicians and artists are finding it harder to earn a living by way of live performances because so many venues are being closed down around the country. It is time the government supported this industry and one way of showing this support is by approving the North Byron Parklands venue. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. Name: hayley braxton Address: 19 Upper Skene st Newtown ViC 3220 IP Address: 121.104.208.203.cable.dyn.gex.ncable.com.au - 203.208.104.121 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1784	Project Website Submission	02/11/2010	Online Submission from Bianca Gibbs of student (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. We have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project. Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore. Cultural arts and music festivals are enjoyed by many people in Byron. People travel from

				near and far to attend. It would be such a shame to not offer this anymore.

P1785	Project Website Submission	02/11/2010	Online Submission from Adrian Testa (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.
				North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

P1786	Project Website Submission	02/11/2010	Online Submission from Sandra Nicoletti (support)	North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it. With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral responsibility to approve it just on employment considerations alone. Name: Sandra Nicoletti Address: 2/24 Garden Terrace,Newmarket QLD 4051 IP Address: c-61-68-213-131.bri.connect.net.au - 61.68.213.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1787	Project Website Submission	02/11/2010	Online Submission from Jacki McClymont of student (support)	North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. Name: Jacki McClymont Organisation: student Address: Rose St Highett, 3190 IP Address: 114.74.162.22.optusnet.com.au - 114.74.162.22 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1788	Project Website Submission	02/11/2010	Online Submission from Ash Daly (support)	One of the most significant benefits for the environment coming out of this application is the proponentâ□™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Name: Ash Daly Address: 16/1 King William St Adelaide SA IP Address: cpe-121-214-193-114.lns6.fli.bigpond.net.au - 121.214.193.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1789	Project Website Submission	02/11/2010	Online Submission from Nikki Mann (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. One of the things that really impresses me about the North Byron Parklands proposal is the level of community consultation they have undertaken. From public planting days to environmental forums, site tours to newsletters and letter box drops, these guys have

demonstrated a strong willingness to communicate and listen to the community. I feel they have shown that they will more than adequately manage a variety of events at this site in a professional and sensitive manner.

This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

P1790	Project Website Submission	02/11/2010	Online Submission from Cameron Waterhouse (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. It is important for the youth to be proud of where they come from. The Parklands proposed cultural event site is something that the youth are behind and should be supported by the local government. Name: Cameron Waterhouse Address: 9 Daly St Bilgola NSW 2107 IP Address: 123-243-36-195.static.tpgi.com.au - 123.243.36.195 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1791	Project Website Submission	02/11/2010	Online Submission from Buster Hills-Hughes (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and

avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

So take action Minister Kelly, take action now and bring this very special event back to where it belongs in NSW.

P1792	Project Website Submission	02/11/2010	Online Submission from coedie ferguson (support)	As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives. Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that. In my opinion Splendour in the grass put a huge amount of thought and effort into protecting the environment by fencing off surrounding bushland and supplying bins for both rubbish and recycling. I would love to see Splendour back in the Byron shire. P1793	Project Website Submission	02/11/2010	Online Submission from Jay Mavericks of My self (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. Thereâ□™s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others. Name: Jay Mavericks Organisation: My self Address: No way IP Address: httpgate.sa.gov.au - 203.26.122.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1794	Project Website Submission	02/11/2010	Online Submission from Jessica Parker of Melbourne University (support)	Give Splendour a Home! The joy and excitment that this festival brings to so many thousands of people should not be underestimated. It is an incredible experience and one that I hope I can continue to go back to for many years to come. The Byron Bay area is so beautiful and so well suited to the atmosphere that Splendour generates. The ringing in our ears is a kind souvenior to the days filled with delightful sounds and amazing people. Please give Splendour a permanent home so that we can dance our hearts out once again! The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all donâ□™t move to cities.

Kind regards,

Jessica Parker

P1795	Project Website Submission	02/11/2010	Online Submission from glenn slobodzian (support)

Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people.

The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government.

It would be a shame to see this proposal turned down, it doesnâ™t take much to see that the North Byron Parklands proposal has so much to offer.

P1796	Project Website Submission	02/11/2010	Online Submission from Kelly Quinn (support)	Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one? I have long been a supporter of events in Byron Bay - having lived on the Gold Coast all my life. Byron's open minded view Name: Kelly Quinn Address: 2/8 Tiffany Close,Robina Q 4226 IP Address: 144-135-4-216.tpips.telstra.com - 144.135.4.216 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1797	Project Website Submission	02/11/2010	Online Submission from Laurence Plant of Wakehurst Soccer Club (support)	Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. Name: Laurence Plant Organisation: Wakehurst Soccer Club Address: 3/19 Merlin St. Neutral Bay NSW 2089 IP Address: - 203.108.239.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1798	Project Website Submission	02/11/2010	Online Submission from Judith Kearney (object)	I strongly object to the proposed festival site at Yelgun. I live near the site in North Ocean Shores and think that festivals attracting 50,000 people per day are simply far too large for that site. The promoters will not be able to control crowds of that size either on the site or when they are coming and going from the site to accommodations or activities elsewhere. 25,000 campers alone will be a major challenge! Many thousands of people so close to Billinudgel Nature Reserve will almost certainly endanger the Reserve by intruding on it, especially to get to the beach. The fire risk out there is also "extreme", with "catastrophic consequences" according to the RFS. The increased traffic will be a nightmare for those of us who are closest to the site and use Tweed Valley Way daily. And of course, the sound of amplified music from 11AM until 3AM the following morning for days in a row will be intolerable. The proposed multiple large festivals each year goes against Byron Shire Council's Events Policy, and I agree strongly with that policy. It provides a reasonable balance between tourists who want to attend festivals in the shire and residents who do not want to be overwhelmed with tourists. I urge you to reject both the proposed Concept Plan AND the Project Application. I am strongly against both. Name: Judith Kearney Address: 35 Rangal Road North Ocean Shores IP Address: cpe-121-216-205-110.lnse3.ken.bigpond.net.au - 121.216.205.110 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1799	Project Website Submission	02/11/2010	Online Submission from Kunal Khanna (support)	Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. A place where people can get together and enjoy the beauty that Byron Bay has to offer. A music festival is a very important part of the Australian culture, in particular Splendour!! Giving such an event a permanent home will be beneficial to all. Name: Kunal Khanna Address: 1/30 Nicholson street North Fitzroy VIC 3068 IP Address: d58-110-177-152.sun13.vic.optusnet.com.au - 58.110.177.152 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1800	Project Website Submission	02/11/2010	Online Submission from Neil Howard (support)	Dear NSW Department of Planning, A controlled and well run festival gives young people a place to get out of city life for a few days and into the country, as well as preserving parkland and providing jobs and attracting tourist dollars to the area. I have chosen the following 3 paragraphs to best represent my thoughts on having Splendour in the Grass back to the Byron Bay area.

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

Regards,

Neil Howard

P1801	Project Website Submission	02/11/2010	Online Submission from STEPHANIE MCDONALD of FCm (support)	North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy. There has been a long search for a permanent cultural events site in the Byron Shire and while the Blues Festival has purchased a site (after the North Byron Parklands property was bought) they have always committed to only hosting the Blues Fest there. So there is still a very strong need for another site that can cater to a range of cultural and community events. The North Byron Parklands site is the perfect choice conveniently located in the North of the Shire and should be supported by all levels of government. It will be a huge benefit for the area on so many fronts. We must bring Splendour home! The opportunities the Parklands event site will bring to the youth in the community such as employment and culture are just too good to miss. P1802	Project Website Submission	02/11/2010	Online Submission from Geoffrey Clulow (support)	North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world?s best environmental practice.

				Having a world class sustainable event site will encourage the youth be become more creative, help them build towards a career in a creative industry and boost creative industries in on the Northern Rivers.
				Name: Geoffrey Clulow Address: 2/74 Kirkdale Drive Charlestown New South Whales 2290 IP Address: 122-148-194-36.static.dsl.dodo.com.au - 122.148.194.36 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1803	Project Website Submission	02/11/2010	Online Submission from Kate Anderson (support)	It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised. North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners

				in helping to restore what is currently quite a degraded site.
				BRING SPLENDOUR HOME! P1804	Project Website Submission	02/11/2010	Online Submission from Louise Vieusseux (support)	North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral responsibility to approve it just on employment considerations alone. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

				Name: Louise Vieusseux Address: - IP Address: c211-30-206-7.thorn2.nsw.optusnet.com.au - 211.30.206.7 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1805	Project Website Submission	02/11/2010	Online Submission from Tanya Webb (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved! Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that. Name: Tanya Webb Address:

				506/10 Mount Street, North Sydney, NSW IP Address: 2821-ssl.optus.com.au - 203.13.128.104 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1806	Project Website Submission	02/11/2010	Online Submission from Angela Connelly (support)	Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. As a regular visitor to the Byron Bay area I would definitely not support anything that might ruin the natural beauty or impact badly on the environment of the area. All that has been written here is done so with the utmost sincerity. Thank you for your time.

P1807	Project Website Submission	02/11/2010	Online Submission from Candice Clements (support)	Name: Angela Connelly Address: 34 Brentwood Avenue Warrawee NSW 2074 IP Address: cpe-124-189-68-190.wkcz1.ken.bigpond.net.au - 124.189.68.190 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket. Name: Candice Clements

P1808	Project Website Submission	02/11/2010	Online Submission from Kirsty McMeekin (support)	Address: 119 Princess Street Morpeth, NSW 2321 IP Address: cpe-139-168-77-86.lns4.cht.bigpond.net.au - 139.168.77.86 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner. I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved! If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community.

Please allow Splendour In The Grass to permanently reside at North Byron Parklands.

Regards,

Kirsty

P1809	Project Website Submission	02/11/2010	Online Submission from Candice Hicks (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. Why wouldnâ□™t we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal. Name: Candice Hicks Address: 20 Cugera Avenue, Ingle Farm, 5098, SA IP Address: logfiller1.news.net.au - 165.69.90.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1810	Project Website Submission	02/11/2010	Online Submission from Tammy Tinawi of Space Ibiza Festival 2011 (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral

responsibility to approve it just on employment considerations alone.

On all fronts, traffic, noise, ecology, flooding, safety, etc North Byron Parklands has demonstrated it has assessed all significant risks and put in place measures to manage all issues. Most more traditional developments do not even come close to the level of risk assessment undertaken by North Byron Parklands.

Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands.

P1812	Project Website Submission	02/11/2010	Online Submission from tasha jaye (support)	This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together. Go on do it. Splendour brings an intense yearly dose of tourism to Byron during those months people don't tend to head to the beach and will continue to do so as long as it's held there. Viva la Splendour! Name: tasha jaye Address: 1a Kawana way Birtinya 4575 IP Address: cpe-121-223-0-71.lnse2.cha.bigpond.net.au - 121.223.0.71 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1813	Project Website Submission	02/11/2010	Online Submission from Elyssia Kane (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive.

The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to.

P1814	Project Website Submission	02/11/2010	Online Submission from MICHAEL PRICE (support)	In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. Name: MICHAEL PRICE Address: 53 OGDEN STREET STAFFORD 4053 IP Address: cpe-58-173-243-228.nmqt1.woo.bigpond.net.au - 58.173.243.228 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1815	Project Website Submission	02/11/2010	Online Submission from Simone Fleming (support)	The Marshallâ™s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses. Name: Simone Fleming Address: 71 Vincent St Sandringham 3191 IP Address: c211-28-217-55.brasd3.vic.optusnet.com.au - 211.28.217.55 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1816	Project Website Submission	02/11/2010	Online Submission from Emma Coward (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. Businesses like North Byron Parklands generate much needed jobs for our area. A lot of people I speak to are concerned about the lack of employment opportunities both within the shire and the northern rivers region. Any business that provides jobs to locals should be approved to operate.

				Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! Bringing Splendour back to Byron and at a new site would mean that more people are able to enjoy the spectacular event that splendour is and the town itself is able to increase its economy from tourists that have come far and wide to enjoy one of the best festivals that Australia has on offer !!! Name: Emma Coward Address: 13 Little St Kelvin Grove Brisbane 4059 IP Address: 123-243-190-96.static.tpgi.com.au - 123.243.190.96 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1817	Project Website Submission	02/11/2010	Online Submission from Cameron Parker ()	While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low. If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion

that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P1820	Project Website Submission	02/11/2010	Online Submission from Cam Young of ATSILS Qld (other)

Initially, as a long time Slendour attendee, I supported the move to North Byron; however after careful consideration of all the material made available by the Splendour producers, I feel that Woodfordia is a much more appropriate venue for such a large festival, and one that is currently in existence without having to further degrade more productive farmland.

Byron already has too many large events placing strain on the community and delicate natural resources. Woodfordia is already set up to hold such huge events and after attending this year's event, it has proved to be a vastly superior venue to both Belongil and North Byron, with its excellent steep amphitheatre and blind valley acoustic benefits.

I would hope that the Producers will not try and sabotage next year's event at Woodfordia by not implementing improvements to the ingress & egress issues caused by poor planning.

If it must pass that another festival becomes extinct due to event promoter over-extension and greed, then so be it - another will spring up in its place.

P1821	Project Website Submission	02/11/2010	Online Submission from Bev Williams (support)	In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTAâ□™s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. Name: Bev Williams Address: 49 keerong Ave RUSSELL VALE 2517 IP Address: - 153.107.97.157 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1822	Project Website Submission	02/11/2010	Online Submission from Michelle Ahern (support)	The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisationâ□™s like North Byron Parklands to provide much needed jobs. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the â□œSplendid Initiativeâ□□ offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. Name: Michelle Ahern Address: 28 Brodick St Carindale QLD 4152 IP Address: cpe-123-211-124-12.lnse4.cha.bigpond.net.au - 123.211.124.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1823	Project Website Submission	02/11/2010	Online Submission from Jeremy Ryan (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising â□˜down timeâ□™ between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector.

The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

North Byron Parklands proposal to rejuvenate the Parklands site has lead to the employment of local indigenous bush regeneration teams to plant thousands of trees across their site. This program is an ecellent way to involve the traditional land owners in the area and helps to restore the site and set the foundations for a sustainable event site.

P1824	Project Website Submission	02/11/2010	Online Submission from Harry Boerdam (support)

The North Byron Parklands Project will impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

P1825	Project Website Submission	02/11/2010	Online Submission from Heidi Keast (support)	There has been a long search for a permanent cultural events site in the Byron Shire and while the Blues Festival has purchased a site (after the North Byron Parklands property was bought) they have always committed to only hosting the Blues Fest there. So there is still a very strong need for another site that can cater to a range of cultural and community events. The North Byron Parklands site is the perfect choice conveniently located in the North of the Shire and should be supported by all levels of government. It will be a huge benefit for the area on so many fronts. North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the regionâ□™s creative industries, providing world class training and work experience opportunities. Please assist the organisers of Spendour in the Grass with their application to have a permanent home for this fantastic event. Name: Heidi Keast Address: Queensland IP Address: usclinux1.usc.edu.au - 203.29.106.59 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1826	Project Website Submission	02/11/2010	Online Submission from Sonya Muller (support)	North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldn't go ahead. Having reviewed North Byron Parkland's environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we don't have a suitable event site.

				North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate.
				We must support this application.
				I am fine to have my name mentioned but please do not publish my address details. Neither my home or email address. Thank you Name: Sonya Muller
				Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1827	Project Website Submission	02/11/2010	Online Submission from Alexandra Vuong (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome.
				I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved.

				This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.
				Name: Alexandra Vuong Address: 9 Gogol PlWetherill Park2164
				IP Address: cpe-121-218-67-173.lnse4.ken.bigpond.net.au - 121.218.67.173 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1828	Project Website Submission	02/11/2010	Online Submission from paul klaassen (support)	North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site.
				The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy.
				One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives.

				North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead.
				Name: paul klaassen Address: waratah west IP Address: 218-214-11-191.people.net.au - 218.214.11.191 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1829	Project Website Submission	02/11/2010	Online Submission from Patrick Price (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling.

Name: Patrick Price

Address:
10 Bentley st Redhead

P1830	Project Website Submission	02/11/2010	Online Submission from Andrew McKenna of Pelikan Artline (support)	North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! Name: Andrew McKenna Organisation: Pelikan Artline Address: 5 Ashford Ave, Castle Hill, NSW 2154 IP Address: s02dd.static.pacific.net.au - 61.8.17.221 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1831	Project Website Submission	02/11/2010	Online Submission from Sinead Tobin (support)	The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light.

P1832	Project Website Submission	02/11/2010	Online Submission from Matt Smith (support)	Name: Sinead Tobin Address: 7 Thurston Crescent Corrimal IP Address: cpe-121-216-156-164.lnse2.ken.bigpond.net.au - 121.216.156.164 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands proposed event site will provide a wide variety of employment opportunites to the reagion that is said to increase as the years go on. North Byron Parklands require staff to maintain and manage the event site plus each event organistaion will be looking to the local comunity for employees for their events. Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce. It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

P1833	Project Website Submission	02/11/2010	Online Submission from Ashley Leal (support)	Name: Matt Smith Address: 69/181 Lae Drive Runaway Bay IP Address: cpe-58-165-90-81.qld.bigpond.net.au - 58.165.90.81 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised. For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers. It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region. The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

P1834	Project Website Submission	02/11/2010	Online Submission from Scott Menegon (support)	Name: Ashley Leal Address: LPO Box 5340 University of Canberra Bruce ACT 2617 IP Address: statler.canberra.edu.au - 137.92.97.111 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The Marshallâ□™s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. I have been searching for a career opportunity close to home since finishing my HSC, this proposal sounds like exactly what I am after. Please approve the North Byron Parklands. The northern rivers area over the past 20 years has been built on the back of the creative arts industry, so it is vital that the government support this industry by promptly approving the North Byron Parklands project. Musicians and artists are finding it harder to earn a living by way of live performances because so many venues are being closed down around the country. It is time the government supported this industry and one way of showing this support is by approving the North Byron Parklands venue.

We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal.

P1835	Project Website Submission	02/11/2010	Online Submission from Belinda O'Brien (support)	The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately $55,000 compared with $71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region. In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. These opportunities offered to the young community are truly invaluable to our region. Name: Belinda O'Brien Address: 42 Tintern Rd, Ashfield, NSW 2131 IP Address: cpe-124-184-90-122.lns13.cht.bigpond.net.au - 124.184.90.122 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1836	Project Website Submission	02/11/2010	Online Submission from Caitlin Shurman (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the ?coast to hinterland? wildlife corridor. The extended ?rest? time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times. Name: Caitlin Shurman Address: 28 Wentworth St, South Hobart, Tas, 7004 IP Address: 124-171-114-75.dyn.iinet.net.au - 124.171.114.75 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1837	Project Website Submission	02/11/2010	Online Submission from yenda carson of university sunshine coast (support)	Byron started splendour and it shouldn't be pinched from them. Queensalnd has its major fesitvals investment twice a year in Woodford and The Dreaming. Byron greatly needs this event for its economic, social, cultural and political development. What a negative message this would send to the community and the region as a whole if Splendour wasnt returned to Byron. Name: yenda carson Organisation: university sunshine coast Address: 132 osborne road mitchelton IP Address: usclinux1.usc.edu.au - 203.29.106.59 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1838	Project Website Submission	02/11/2010	Online Submission from Karl Vass of Vass Promotions (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. Name: Karl Vass Organisation: Vass Promotions Address: 2/7 Albert StreetBurleigh Heads 4220 IP Address: - 115.131.30.100 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1839	Project Website Submission	02/11/2010	Online Submission from Emma Petchell (support)	There is a real need to reverse the current trend of closing music and artistic venues around the State of NSW. Music and arts are so important to the health and vibrancy of a community and I urge you to approve the North Byron parklands venue. The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â□œresource centreâ□™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. Name: Emma Petchell Address: 54 Runyon Ave Greystanes, NSW, 2145 IP Address: cpe-124-183-150-103.lns16.ken.bigpond.net.au - 124.183.150.103 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1840	Project Website Submission	02/11/2010	Online Submission from Chantelle Malone of - (support)	The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. Name: Chantelle Malone Organisation: - Address: 1/26 Tamar Street, Palmyra, WA, 6157 IP Address: philip116.lnk.telstra.net - 203.45.72.75 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1841	Project Website Submission	02/11/2010	Online Submission from Barbara Kennerley (object)	That this site should even be considered is beyond comprehension. It is entirely inappropriate in scale and unacceptable in terms of the impact it will have on our community. I live many miles away so my objection is not based on self-interest but rather on concern for the people who live close to this site. Why should anyone be asked to tolerate such disruption to their lives several times a year - all in the name of greed? We have plenty of DOOFs, parties and festivals in our small community and we need effective control over those before we consider even more. Name: Barbara Kennerley Address: POB 1203 Mullumbimby NSW 2482 IP Address: cpe-124-184-87-63.lns13.cht.bigpond.net.au - 124.184.87.63 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1842	Project Website Submission	02/11/2010	Online Submission from Dave Kennerley (object)	That this site should even be considered is beyond comprehension. It is entirely inappropriate in scale and unacceptable in terms of the impact it will have on our community. P1844	Project Website Submission	02/11/2010	Online Submission from adam vanderhelm (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. I think the local council is mad to not and try to compensate this organisation and the amount of revenue that it brings to the community. I live on the Sunshine Coast and know that the local council representing Woodford have welcomed the evnt with open arms. Byron Bay council from what i read about is to similar to our local council in so much as they are close off to the economic interests of the people and to worried about protecting the interest of self funded retiree's who are not business minded and only wish for less people to enjoy their part of the world. Name: adam vanderhelm Address: 37 Moreton Pde, Kings Beach QLD

P1845	Project Website Submission	02/11/2010	Online Submission from Harley Ahlfors (support)	Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. From all the local that i have spoken to and friends I have in Byron and its surrounding areas, the general consensus is that splendour should be home, with this new proposal all parties should find all issues and concerns are covered and finally this great festival can be home. Name: Harley Ahlfors Address: 14 henrietta st Waverley 2024 IP Address: 111-220-227-105.wbroadband.net.au - 111.220.227.105 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1846	Project Website Submission	02/11/2010	Online Submission from Kelsey Ingram (support)	To Whom iot may concern, It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning. Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one. If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. Most importantly Splendour is a Byron Bay Icon and it would be a tragedy to lose it. Yours sincerely, Kelsey Ingram Name: Kelsey Ingram Address: 1050 Gold Coast Hwy Palm Beach Qld 4221 IP Address: 122.110.89.41.optusnet.com.au - 122.110.89.41 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1848	Project Website Submission	02/11/2010	Online Submission from Ryan Williams (support)	To Whom it may concern with the NSW Department of Planning, It has come to my attention that Splendour In The Grass has run into trouble situating itself at the North Byron Parklands this coming year and for future years. I'm sad to see this because if SITG is cancelled as a result it will mean the death of one of Australia's most inspired and enjoyable music and arts festivals. I believe this would not just be a poor outcome for the festival planners and punters, but also the local areas and the state of NSW. I travelled from Perth to attend the festival in recent years, and I've met others who have travelled further, and many that had flown up and down your beautiful coastline for it. This is an enormous and valuable boost for your state, I'm sure last year and Woodford the revenue from Wellington Boots alone would have been substantial. My own personal opinions about the value of this festival to artists, punters and the economy aside, the festival runners also present some good points. Such as: The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which

has the potential to become a significant economic contributor within the Byron Shire economy over the long term.

In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only ever using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue.

The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported.

And finally, a cultural event site such as the one proposed by North Byron Parklands will help develop creative industries on the north coast. Events such as Splendour In The Grass inspire and encourage young adults to be creative and also provide special initiatives such as the young artists program, Splendid. Lets build up the creative industries in the region!

Thank you for your time,

Ryan Williams

P1851	Project Website Submission	02/11/2010	Online Submission from Tessa Campbell (support)	To the NSW Department of Planning, Splendour in the Grass has performed a thorough analyse of their future effect on the environment and economic and tourism industries, if the festival was permitted to return to Byron. You're aware of the positive impacts Splendour would create in Byron, as well as their plans to best work around the negatives, ensuring minimal effect on local wildlife. This is why in my submission I want to say that above all else, it must be remembered that Byron is the home of Splendour in the Grass. Without Byron there is no Splendour, and I think it could be said that without Splendour there is no Byron- for the Byron everyone loves is made up of a cultural experience of music, artistic expression, and relaxed days just enjoying yourself. It is the array of creative activities and events held that give Byron its unique personality and spark as a town. Without hosting festivals, such as Splendour, Byron begins to lose a little bit of what keeps it incredible and forever holding a place in everyone's hearts. Please keep this in mind when making your decision.

				Many thanks, Tessa Campbell Name: Tessa Campbell Address: 48A Attunga Road, Yowie Bay, NSW, 2228 IP Address: 203-206-231-240.perm.iinet.net.au - 203.206.231.240 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1852	Project Website Submission	02/11/2010	Online Submission from Carol Rogers (support)	Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing. The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all. There are many parts of the North Byron Parklands proposal that will directly benefit the

				young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city.
				Name: Carol Rogers Address: 22 Main Rd Fingal Head IP Address: cpe-139-168-164-100.lns10.woo.bigpond.net.au - 139.168.164.100 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1853	Project Website Submission	02/11/2010	Online Submission from Isobel Deane of EM Voices (support)	Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues.
				At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. $55,000 compared to NSWâ□™s average annual income of $71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need.
				North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome.

North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities!

P1855	Project Website Submission	02/11/2010	Online Submission from Rose Bleach (support)

Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area.

North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead.

With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light.

P1856	Project Website Submission	02/11/2010	Online Submission from Emma Guthrie of Nil (support)

While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all.

The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ□™ economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed.

Having a world class sustainable event venue at the Parklands site will put The Northen Rivers on the map as a leader in sustainable venue developments. This will also aid local educational institutes such as Southern Cross University in environmental related courses by having a world class example in the area.

P1857	Project Website Submission	02/11/2010	Online Submission from Corrinn Russell of Royal Hotel Richmond (support)	KEEP SPLENDOR IN BYRON!! It is constant advertising for the town itself, and people come from everywhere to go, because of the iconic, beautiful Location!! North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately $55,000 compared with $71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

P1858	Project Website Submission	02/11/2010	Online Submission from James Whitehead of NA (support)	Name: Corrinn Russell Organisation: Royal Hotel Richmond Address: 38 Culverston Ave,Denham Court NSW2565 IP Address: - 119.12.194.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as

				Splendour in the Grass to stay in NSW. The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. Name: James Whitehead Organisation: NA Address: 5/228 More Park Road, Paddington IP Address: - 203.25.195.230 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1859	Project Website Submission	02/11/2010	Online Submission from Flynn Daley (support)	Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the

area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

P1861	Project Website Submission	02/11/2010	Online Submission from jACQUELINE mCcREDDEN (support)

I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guy?s book.

North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately $192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved!

North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community.

Bring Splendour home to the Northern Rivers! Let?s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them.

P1862	Project Website Submission	02/11/2010	Online Submission from Jacqueline Walker of Lawyer (support)	Splendour in the Grass is an established and popular music festival with strong ties to the Byron Bay region. It is a vibrant and spiritual NSW and Australian tradition and a festival which I have enjoyed on many occasions. It needs a home. The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

Please bring Splendour Home.

P1866	Project Website Submission	02/11/2010	Online Submission from Sarah Vine (support)	The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer? Name: Sarah Vine Address: 2 Ntaba Rd Jewells, 2280, NSW IP Address: d58-107-2-233.sbr5.nsw.optusnet.com.au - 58.107.2.233 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1867	Project Website Submission	02/11/2010	Online Submission from Soraya Nammathao (support)	Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community. Name: Soraya Nammathao Address: 28 Kingdom Avenue,Kings Park IP Address: cpe-124-191-66-31.szbn2.lon.bigpond.net.au - 124.191.66.31 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1868	Project Website Submission	02/11/2010	Online Submission from David Brice (support)	Splendour in the Grass is fast becoming the 'iconic' arts and music festival of the Australian calender. The value of hosting this event to a local community is measured not only in the direct financial benefit but associated benefits throughout the year. The Byron Bay shire has long been associated with this wonderfully organised event. Allowing the North Byron Parklands proposal to go through will ensure that this will be the case for many years to come. Warm regards, David . Name: David Brice Address: 38 Byron st North Melbourne VIC 3051 IP Address: ppp118-209-119-56.lns20.mel4.internode.on.net - 118.209.119.56 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1869	Project Website Submission	02/11/2010	Online Submission from Shad Wicker of N/A (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community. Name: Shad Wicker Organisation: N/A Address: 159 bridge st Muswellbrook NSW IP Address: - 202.9.19.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1870	Project Website Submission	02/11/2010	Online Submission from Theodore Orfanos of UNSW (support)	We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it. So many individuals, families and businesses rely on the tourism dollar for their living. In the

North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

Byron bay is a fantastic venue and will benefit greatly from Spleandor. When I went for the first time in 2007, I had the time of my life. This was amplified by the awesome atmosphere of the Byron Bay area!

P1874	Project Website Submission	02/11/2010	Online Submission from Rohan White of burtenshaw scoufis (support)	Got to support our institutions. Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal. Name: Rohan White Organisation: burtenshaw scoufis Address: 3/222 Malabar Rd South Coogee IP Address: dsl-58-6-33-197.nsw.westnet.com.au - 58.6.33.197 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1875	Project Website Submission	02/11/2010	Online Submission from Natalie Robinson (support)	There is a reason why the government agencies including the National Parks and Wildlife services didnâ□™t object to this application, it really is in the best interest of everyone. In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficulty. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approval projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance

				all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.
				The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together.
				Name: Natalie Robinson Address: 8/15 Oxenham Cct ,GORDON, ACT 2906 IP Address: waldorf.canberra.edu.au - 137.92.97.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1876	Project Website Submission	02/11/2010	Online Submission from Ebony Allen (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged.
				We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it.

				Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home!

P1878	Project Website Submission	02/11/2010	Online Submission from Stephanie Jones (support)	At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. $55,000 compared to NSWâ™s average annual income of $71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need. Not only does splendor bring people to just the festival for three days but some stay for a full month. I know for a fact that this festival increases tourism dramatically within the Byron shire, something that is should be highly welcomed in todays climate. dont push away a chance of income for this small community. A chance of global acknowledgment for all issues involved in splendour. Name: Stephanie Jones Address: 151 Hunt Road, Bouldercombe, QLD 4702 IP Address: allanj.lnk.telstra.net - 165.228.54.161 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1879	Project Website Submission	02/11/2010	Online Submission from Sally Ross (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. Name: Sally Ross Address: 21 Ramsay Ave IP Address: cpe-124-190-90-184.kwze1.win.bigpond.net.au - 124.190.90.184 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1880	Project Website Submission	02/11/2010	Online Submission from mandeep singh (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result

they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.

Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron.

The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

Being young itâ□™s important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available.

P1882	Project Website Submission	02/11/2010	Online Submission from Andrew Kurtz (support)	With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home! How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. Name: Andrew Kurtz Address: 24 Brodrick Street, Karrinyup, Western Australia 6018 IP Address: wsce1.curtin.edu.au - 134.7.248.129 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1883	Project Website Submission	02/11/2010	Online Submission from Ben Ziser (support)	The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site. North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth! Name: Ben Ziser Address: 102 Cook Street Northgate QLD IP Address: - 120.17.197.103 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1884	Project Website Submission	02/11/2010	Online Submission from lacey Turner (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. Name: lacey Turner Address: 108 Collier Street Redhead NSW 2290 IP Address: b4db0.static.pacific.net.au - 125.255.45.176 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1885	Project Website Submission	02/11/2010	Online Submission from Bonnie Miller-Tucker (support)	Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but letâ□™s create a high season in winter too by utilising North Byron Parklands! The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ□™ income. There is no reason why this proposal should not be approved by state government. Having attended the last two Splendour in the Grasses I must say having the event in Byron Bay was such a better experience because it really is "home". North Byron Parklands has to be the new home for Splendour in the Grass!!! Name: Bonnie Miller-Tucker Address: Gold Coast, Queensland IP Address: d58-106-141-176.rdl801.qld.optusnet.com.au - 58.106.141.176 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1886	Project Website Submission	02/11/2010	Online Submission from Nina Dowling (support)	The new site seems to me to be really environmentally concious and creates minimal disruption to local ecosystems. We really want splendour back in bryon and it seems like myself and everyone else are willing to make a massive effort to ensure it is sustainable and non-disruptive. North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy. This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together. Thanks for your time, cant wait to see splendour back in Byron! Nina Dowling Name: Nina Dowling Address: 4 Thomas StDarlington NSW 2008 IP Address: www-cache5.usyd.edu.au - 129.78.64.105 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1887	Project Website Submission	02/11/2010	Online Submission from Bella Schlachter (support)	So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the regionâ□™s economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. Name: Bella Schlachter Address: 72a Steyne Rd Saratoga NSW 2251 IP Address: c-61-68-27-214.hay.connect.net.au - 61.68.27.214 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1888	Project Website Submission	02/11/2010	Online Submission from Joshua Trahair of PB (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. Name: Joshua Trahair Organisation: PB Address: 121A Lookout Rd NewLambton Hts NSW 2305 IP Address: ip-131-138-161-203.static.pipenetworks.com - 203.161.138.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1889	Project Website Submission	02/11/2010	Online Submission from Simone Projceski (support)	There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate

during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low.

P1890	Project Website Submission	02/11/2010	Online Submission (support)	The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. Also, by giving Splendour a HOME more recourses can then go into maintaining the NATURAL wilderness of the Byron Parklands as it is the beautiful scenery that attract the hoards of people (inc. the musicians). The great music is what makes them stay and support the business' of the area. The last thing anybody would want to do in this ECO generation is destroy a beautiful bit of land for selfish pleaure. I do not believe that is what would happen if Splendour is given permisson to call the picturesque landscape of Byron Parklands home. *Please do not disclose my personal details on the Proponent, these authorities, or on the Department's website thank you. Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1894	Project Website Submission	02/11/2010	Online Submission from Alan Murray (support)	I'm not familiar with the other pre-prepared statements proposed by bringsplendourhome. However, I would be very surprised if a compromise that protects the environment including local flora and fauna whilst allowing splendour and other events to have a permanent home cannot be reached. In my mind, the organisers of Splendour manage one of the most environmentally and community aware events that I've had the pleasure of attending. Planning approval should be encouraged to enable Splendour and other events held on this site to be used as a showcase for how events should be run. Name: Alan Murray Address: PO BOX 131 CALLAGHAN NSW, 2308 IP Address: pat-research.newcastle.edu.au - 134.148.48.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1895	Project Website Submission	02/11/2010	Online Submission from Cara Arbilo (support)	While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all. The future of Byron Bay. Employment, community benefits, fun. Need we say more? Name: Cara Arbilo Address: 1 Beazley Place Baulkham Hills NSW 2153 IP Address: b4ea5.static.pacific.net.au - 125.255.46.165 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1896	Project Website Submission	02/11/2010	Online Submission from Bonnie Knight (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs.

Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry.

From a cultural breeding ground perspective alone we must get the proposal approved. Itâ□™s a fabulous exciting vision and we are very lucky that this proposal is before us.

P1897	Project Website Submission	02/11/2010	Online Submission from Mark Troupe (support)	This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments. Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. Leave Woodford in Woodford, and SPLENDOUR IN BYRON!! Name: Mark Troupe Address: 80 Oxley Drive Karalee QLD IP Address: cbnel217.au.flitech.net - 203.160.2.130 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1898	Project Website Submission	02/11/2010	Online Submission from Peter White of Royal Adelaide Hospital Pharmacy (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P1899	Project Website Submission	02/11/2010	Online Submission from david Allingham (support)	Name: Peter White Organisation: Royal Adelaide Hospital Pharmacy Address: 41 Stuart Rd. DULWICH SA 5067 IP Address: tcpgate.sa.gov.au - 203.26.122.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive.

P1900	Project Website Submission	02/11/2010	Online Submission from rhian howard of University of Canberra (support)	Name: david Allingham Address: 34 Wignall St North Hobart Tas IP Address: - 203.52.130.139 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not world?s best environmental practice. The approval of the North Byron Parklands proposal will benefit the local creative industries

and lead to a new wave of new and interesting jobs for the youth in the area. Let?s build the local industry and make The Byron Shire a hub for creative individuals.

P1901	Project Website Submission	02/11/2010	Online Submission from Gemma Burcher (support)	Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: Gemma Burcher Address: 17 Forsyth St, Glebe NSW IP Address: cpe-121-217-64-127.lnse1.cht.bigpond.net.au - 121.217.64.127 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1902	Project Website Submission	02/11/2010	Online Submission from Jessica Corless (support)	The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and

professional way.

The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government.

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

P1903	Project Website Submission	02/11/2010	Online Submission from Claire Van Galen (support)	Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. Festivals also allow locals the opportunity for jobs on site. Name: Claire Van Galen Address: 820 Cambridge Road Cambridge 7170 IP Address: 220-253-139-24.tas.netspace.net.au - 220.253.139.24 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1904	Project Website Submission	02/11/2010	Online Submission from Brett Elliott of First Planet Pty. Ltd (support)	This festival makes money for local businesses, and is committed to participate in contributing to the environment in positive ways. Having Splendor back is what the majority of the community wants. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. A lot of my friends are moving outside of Byron Bay to bigger and better opportunities. It would be great if we had those opportunities offered to us closer to home. The Byron Shire is a community composed of many party goers who love a good time. Splendour is a reputable, exceptionally well run event, wit great programming, that really reflects well on the Shire. Name: Brett Elliott Organisation: First Planet Pty. Ltd Address: Cremorne, Syndney IP Address: - 120.20.95.148 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1905	Project Website Submission	02/11/2010	Online Submission from Jess Dalton (support)	One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature. North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved! The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. Name: Jess Dalton Address: 27 Kathleen Pde Picnic Point NSW IP Address: tachyon.gw.ansto.gov.au - 137.157.8.253 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1906	Project Website Submission	02/11/2010	Online Submission from Shannon Daly of Fulton Trotter Architects (support)	In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing. North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Name: Shannon Daly Organisation: Fulton Trotter Architects Address: 34 Charlotte St Paddington QLD 4064 IP Address: 203-214-98-250.dyn.iinet.net.au - 203.214.98.250 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1907	Project Website Submission	02/11/2010	Online Submission from Miranda Traycevska (support)	Splendour in the grass is the best festival ive been too, and Byron Bay is the nicest place in northern NSW that ive been. Together they will create magic. One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! Name: Miranda Traycevska Address: 20 Morphett St Dickon ACT IP Address: mail1.actewagl.com.au - 202.14.247.4 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1908	Project Website Submission	02/11/2010	Online Submission from Shanny Matterson (support)	GIVE SPLENDOUR A HOME OF ITS OWN! The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area. North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities. Just remember that its festivals like this that bring in an income and genereate tourism for little towns like Byron! Name: Shanny Matterson

				Address: 6 Ennis Court, Eagleby QLD 4207 IP Address: cpe-58-169-167-252.lns3.cha.bigpond.net.au - 58.169.167.252 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1909	Project Website Submission	02/11/2010	Online Submission from Vanessa Pham of n/a (support)	The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this. The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments.

				Name: Vanessa Pham Organisation: n/a Address: 7 Bach Place Bonnyrigg Heights NSW IP Address: 202.7.242.182.dynamic.rev.aanet.com.au - 202.7.242.182 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1910	Project Website Submission	02/11/2010	Online Submission from Samuel Carroll (support)	I have been going to Splendour for 5 years now and it is probably the best part of my year every year. It is an amazing meeting place for people from not just Australia but around the world. I myself have just moved to London, England and if possible I will be buying tickets again this year not just to Splendour in the grass but all the way to Australia to see one of the worlds best festivals. It has amazed me just how well know this festival is know right around the world. It would be so sad to say good buy to such an awesome event. Please Keep this beautiful event as a showcase of what Australia has to offer. Forever Splendour, Samuel Carroll Name: Samuel Carroll Address: 35 Laurina Cresent, McDowall Brisbane Qld 4053 IP Address: 5ac0c2e6.bb.sky.com - 90.192.194.230 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1911	Project Website Submission	02/11/2010	Online Submission from Kailee Strang (support)	Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a ?resource centre? where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region. Name: Kailee Strang Address: u1/219 Gan Gan Rd Anna Bay NSW 2316 IP Address: marked.lnk.telstra.net - 165.228.61.183 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1912	Project Website Submission	02/11/2010	Online Submission from Jamie Travers (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of

				job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area. North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. Name: Jamie Travers Address: 5 Meridian St Eastlakes IP Address: 124-169-146-167.dyn.iinet.net.au - 124.169.146.167 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1913	Project Website Submission	02/11/2010	Online Submission from Tim Warner of Student (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity.

We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level!

P1916	Project Website Submission	02/11/2010	Online Submission from Liam Moylan (support)	Dear Sir/Madam I believe spleandour should be given a permanent home in beautiful Byron. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. A business that combines ecology with events and community giving. Thatâ□™s the kind of business that our young people are looking to for training and experience. Letâ□™s get it approved. Regards, Liam Moylan Name: Liam Moylan Address: 10 Shoplands Rd Annangrove NSW 2156 IP Address: - 138.25.102.231 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P1917	Project Website Submission	02/11/2010	Online Submission from Rebecca Stanley (support)	The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. Name: Rebecca Stanley Address: 3/17 pakington street kew vic 3101 IP Address: 110-174-79-24.static.tpgi.com.au - 110.174.79.24 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1918	Project Website Submission	02/11/2010	Online Submission from James Duncan (support)	The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it.

The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to.

P1920	Project Website Submission	02/11/2010	Online Submission from Jay Argent (support)	North Byron Parklands proposal to bring splendour home is an opportunity to boost local business for many years to come. Each year when the festival season comes around businesses in the Byron Shire and surrounding areas will get a boost in sales due to the increase in tourism, helping small business and survive and in turn helping the local community. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of

				environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. Name: Jay Argent Address: 36 Cullinane Street, Tewantin QLD 4565 IP Address: - 200.122.174.63 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1922	Project Website Submission	02/11/2010	Online Submission from Thomas McNally (support)	While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments. Name: Thomas McNally Address: 38 Tukara road, South Penrith, NSW 2750 IP Address: 114.74.90.7.optusnet.com.au - 114.74.90.7 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1923	Project Website Submission	02/11/2010	Online Submission from Helen Seaman (support)	As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. Name: Helen Seaman Address: 2/197 Victoria Ave, Chatswood, NSW IP Address: 236ob.scansafe.net - 202.79.203.43 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1924	Project Website Submission	02/11/2010	Online Submission from Belinda Browning (support)	I have grown up in the Byron region and have attended Splendour in the Grass many times. I believe it is an important event that our region should support. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not worldâ™s best environmental practice. North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately $192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved!

P1925	Project Website Submission	02/11/2010	Online Submission from adam spina (support)	Name: Belinda Browning Address: 982 Bruxner Highway Wollongbar 2477 IP Address: host86-166-53-238.range86-166.btcentralplus.com - 86.166.53.238 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved.

				Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.
				Name: adam spina Address: 77 banfield drive townsville 4814 IP Address: - 120.156.238.149 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1926	Project Website Submission	02/11/2010	Online Submission from Jessica Brodie (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.
				The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site.
				One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity.

				What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature. North Byron Parkland events are not only for the youth, theyâ□™re for the whole community, young and old. Events can rejuvenate and reconnect us with our elders and our juniors. Name: Jessica Brodie Address: 134 Eton Street, Nundah, Qld 4012 IP Address: c114-77-129-210.fitzg3.qld.optusnet.com.au - 114.77.129.210 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home!

From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved.

North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community.

P1928	Project Website Submission	02/11/2010	Online Submission from Sam Crothers (support)

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature.

P1929	Project Website Submission	02/11/2010	Online Submission from Peter MacDougall (support)	Byron Shire Council has always longer for a permanent event site in its LGA, particularly now that the existing sites are either no longer available or are two inadequate to deal with world class events. The Blues Fest have bought a site which they intent to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would such a shame for the NSW government not to approve it. The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs. Name: Peter MacDougall Address: 8/12 Mahina Pl Wishart QLD 4122 IP Address: ppp118-208-135-171.lns20.bne1.internode.on.net - 118.208.135.171 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1930	Project Website Submission	02/11/2010	Online Submission from Elli Del Borrello (support)	With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â□œresource centreâ□™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.

Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but letâ□™s create a high season in winter too by utilising North Byron Parklands!

P1931	Project Website Submission	02/11/2010	Online Submission from Charlie Donaldson (support)	Name: Elli Del Borrello Address: 26 moss st east fremantle Perth WA IP Address: 124-169-189-31.dyn.iinet.net.au - 124.169.189.31 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book. Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. Letâ□™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ□™s get on with the job of creating exciting training and employment opportunities for our young people.

P1932	Project Website Submission	02/11/2010	Online Submission from Kym Holroyd (support)	Name: Charlie Donaldson Address: 42 Chalk St, Wooloowin 4030 Brisbane IP Address: - 203.94.56.161 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. I totally agree with both these provided statements. Even though I am from the otherside of the country, my partner and I dream of one day attending splendour in the grass. It is by far the most talked about and highest rated festival in the country. We would love nothing more then the festival to have a permanent and secure home. (Just like our favourite west-coast festival southbound). We truely hope we are lucky enough to obtain tickets for 2011 and that it be held in a safe, well thought out and taken care of permanent environment in Byron. Thankyou. Name: Kym Holroyd Address:

				17 Bryant Street, Bunbury, Western Australia IP Address: - 120.16.205.28 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1933	Project Website Submission	02/11/2010	Online Submission from Michaela Piper (support)	Bring Splendour Home! P1934	Project Website Submission	02/11/2010	Online Submission from Kelly Jenkins of UOW (support)	The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues.

We can look at other parts of the world to help understand the likely impacts of the North Byron Parklands proposal. Donna Sue Sanders â□“ Executive Director of the Daytona State Foundation states that â□˜communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ□™.

Gatherings such a Splendour encourage the youth of Australia to get active and get involve with what's going on in their communities. Not only this, but they encourage it in a safe, friendly environment. Putting the even in the northern end of Australia means only participants with excessive money are able to attend. This ruins the equity that Splendour encourages - that venue should not be something our government supports. So please, bring Splendour back home.

P1935	Project Website Submission	02/11/2010	Online Submission from Carina Costello (support)

The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket.

I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved!

The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth.

P1936	Project Website Submission	02/11/2010	Online Submission from hector faulkner of DENMARK MEDICAL CENTR (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities. Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered. North Byron Parklands will provide trainingÂ and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

P1937	Project Website Submission	02/11/2010	Online Submission from Alex Horvath of Macquarie University (support)	Name: hector faulkner Organisation: DENMARK MEDICAL CENTR Address: reaR 27 STRICKLAND ST DENMARK WA IP Address: 203-206-89-49.dyn.iinet.net.au - 203.206.89.49 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 To Whom it may concern, As an environmental earth science/environmental management student from sydney who is also an avid festival goer I can strongly advocate for the approval of this project. North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When

you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

P1938	Project Website Submission	02/11/2010	Online Submission from Jonathan Yee (support)	North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year. I find great delight knowing that competent Event Managers will be involved with all the events held at North Byron Parklands, ensuring that we have a lot of great experiences if this proposal goes through. Name: Jonathan Yee Address: 251 Musgrave Road, Coopers Plains 4108 QLD IP Address: 203-214-101-142.dyn.iinet.net.au - 203.214.101.142 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1939	Project Website Submission	02/11/2010	Online Submission from Rhiannon White ()	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a â□œsustainableâ□□ site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring.

				As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ□™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application.
				Byron Bay is a beautiful place and would be a fantastic venue to hold a festival such as Splendour in the Grass. The local environment would not be damaged as Splendour has many rules about anything that could harm the earth. It is an ecofriendly festival, when you buy the ticket you can also pay a carbon offset which pays to keep the environment around beautiful. This is one of the few festivals that have this option. Bluesfest is a lovely festival that is held in Byron Bay and it brings alot of revenue to the town. Having a festival that is even bigger will bring more people to Byron Bay who will then want to return because it is such a beautiful place. I could not t Name: Rhiannon White Address: 1/20 Waterview St Putney N.S.W 2112 IP Address: 111-220-224-132.wbroadband.net.au - 111.220.224.132 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1940	Project Website Submission	01/11/2010	Online Submission from Jonathan Hislop (support)	Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.
				Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry.

				One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.

P1941	Project Website Submission	01/11/2010	Online Submission from kira condos (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.
				Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron.
				What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other

similar organisations.

Thereâ™s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others.

P1942	Project Website Submission	01/11/2010	Online Submission from Fraser Wright of none (support)	I been attending the occational splendour in the grass festival since it began. It belongs in Byron, and I support the proposed site. 20 days a year is not much, and I know the Splendour team would put their best into sustaining the environment of the area so everyone can enjoy it in the future. It would be a great loss to have festival leave Byron. I hope it can stay! Name: Fraser Wright Organisation: none Address: 33 Brassey Street, Fairfield, QLD 4103 IP Address: ppp118-208-110-118.lns20.bne4.internode.on.net - 118.208.110.118 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1943	Project Website Submission	01/11/2010	Online Submission from Anna Lee (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site.

Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

P1944	Project Website Submission	01/11/2010	Online Submission from valeria marin (support)	There is current trend on The Northern Rivers for young adults to move to major cities such as Sydney and Melbourne soon after finishing school. North Byron Parklands provides incentives for the youth to remain in the area by creating new and exciting employment opportunities, such as event management, live sound engineering, and even a career in music! Name: valeria marin Address: 41 watergum way, woonona, nsw, 2517 IP Address: cpe-203-51-36-196.lns7.cht.bigpond.net.au - 203.51.36.196 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1945	Project Website Submission	01/11/2010	Online Submission (Support)	The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime. The approval of the North Byron Parklands proposal will benefit the local creative industries and lead to a new wave of new and interesting jobs for the youth in the area. Letâ□™s build the local industry and make The Byron Shire a hub for creative individuals.

				I do not want my name to be made available to the Proponent, these authorities, or on the Department's website. P1946	Project Website Submission	01/11/2010	Online Submission from REBECCA SCHUBERT (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. North Byron Parklands will provide training? and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

P1947	Project Website Submission	01/11/2010	Online Submission from Anthony Russell of Student (support)	The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment. Whats stopping you??!! Bring Splendour in the grass on!!!!!!!! Anthony Name: Anthony Russell Organisation: Student Address: International House The University of Newcastle Callaghan 2308 IP Address: proxy-prod1.newcastle.edu.au - 134.148.4.20 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1948	Project Website Submission	01/11/2010	Online Submission from Daniel Rozsa (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â□˜I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ□™. (Donna Sue Sanders â□“ Executive Director of the Daytona State Foundation). In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. Name: Daniel Rozsa Address: 52 Lyons St Cottesloe 6011, Perth, W.A IP Address: 203-206-19-207.dyn.iinet.net.au - 203.206.19.207 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1950	Project Website Submission	01/11/2010	Online Submission from Nina Klug (support)	To Whom It May Concern, The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. Regards,

Nina Klug

P1952	Project Website Submission	01/11/2010	Online Submission from Michael Hosking (support)	There is a reason why the government agencies including the National Parks and Wildlife services didnâ□™t object to this application, it really is in the best interest of everyone. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. A business that combines ecology with events and community giving. Thatâ□™s the kind of business that our young people are looking to for training and experience. Letâ□™s get it approved. Name: Michael Hosking Address: 3 White Ave Bacchus Marsh Vic IP Address: 218-215-175-23.people.net.au - 218.215.175.23 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1953	Project Website Submission	01/11/2010	Online Submission from David Skaines (support)

From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTAâ□™s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs.

P1954	Project Website Submission	01/11/2010	Online Submission from Constance McKenna (support)	One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up to 200 full time equivalent positions. Such a project is extremely important to this area. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative. Name: Constance McKenna Address: 6 Annie St, Windsor 4030 QLD

P1955	Project Website Submission	01/11/2010	Online Submission from Melanie Ingram (support)	IP Address: 124-171-207-211.dyn.iinet.net.au - 124.171.207.211 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for people. Name: Melanie Ingram Address: PO Box A2067

P1957	Project Website Submission	01/11/2010	Online Submission from Louise Rushforth of none (support)	As a resident of the Byron Shire for the last 15 years and a regular festival go-er (not just Splendour), it is great to have a festival with as much musical talent and that is as well organised as Splendour in our fine shire ... Let's bring it home!
				North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year.
				The list of events that each of the owners of North Byron Parklands have held over the past

ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events.

With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise â□œon-groundâ□□ what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities.

P1958	Project Website Submission	01/11/2010	Online Submission from Erin Sawtell (support)

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue.

From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application.

P1959	Project Website Submission	01/11/2010	Online Submission from Elly McDougall (support)	From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application. The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together. Name: Elly McDougall Address: 42 Glencoe St Rockhampton, 4700 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1960	Project Website Submission	01/11/2010	Online Submission from Ellen Reinhardt (support)	When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. It would a great shame for the Byron Shire to loose the Splendour in the Grass festival. The local community needs the festival, as it offers a huge amount of business for local shop owners, pubs, hotels, motels and camping grounds. Many of these local business will feel great financial pressure if Splendour in the Grass does not return to the region.

				It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the â□œSplendid Initiativeâ□□ offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice.
				Name: Ellen Reinhardt Address: 19 Lang St Bulimba QLD 4171 IP Address: cpe-121-208-132-28.eqmp1.cha.bigpond.net.au - 121.208.132.28 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1961	Project Website Submission	01/11/2010	Online Submission from Rory Hulmes of University of Canberra (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a

quality venue for young people in our region.

It would be a tragic loss to all Australians, not just to those from NSW and QLD, to lose this magnificent festival. North Byron Parklands appears from all perspectives, to be the very best location for this great event. I implore you to accept this proposal

Sincerely,

Rory Hulmes

P1962	Project Website Submission	01/11/2010	Online Submission from Maddie Sorensen (support)	The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. Name: Maddie Sorensen Address: 22 thredbo drworongary IP Address: cpe-60-226-130-43.qld.bigpond.net.au - 60.226.130.43 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1963	Project Website Submission	01/11/2010	Online Submission from Daniel Ellul (object)	I may be in the minority but I would be very disappointed if the festival was moved back to Byron. I attended my first Splendour in 2009 and while it was a good few days, compared to many other festivals I have attended it lacked in some places. After the festival I said I wouldn't go again until I found out it was in Woodford. This unlike last year was a fantastic few days and I left annoyed that it was over but also excited to come the next year. I'm sorry this isn't what you were looking for but I wanted you all (the great organisers) to know what I thought. Keep up the good work. Name: Daniel Ellul Address: 31 Barton St, West Mackay, QLD IP Address: customer-gedmonds.matilda.net.au - 210.7.60.142 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1964	Project Website Submission	01/11/2010	Online Submission from Rory Wilson (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the â□˜coast to hinterlandâ□™ wildlife corridor. The extended â□˜restâ□™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ□™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application.

The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development.

P1966	Project Website Submission	01/11/2010	Online Submission from Benn Wolhuter (support)	The North Byron Parklands sounds really interesting and exciting. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. One of the most significant benefits for the environment coming out of this application is the proponentâ□™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Name: Benn Wolhuter Address: 39 Allan St Port Kembla NSW 2505 IP Address: d110-32-224-112.bla800.nsw.optusnet.com.au - 110.32.224.112 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1967	Project Website Submission	01/11/2010	Online Submission from Joanne Pearce (support)	It seems the most likely disturbance for the environment will be light, noise and also traffic. Having reviewed North Byron Parkland's environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. Whilst in the area, we will be spending money on a wide variety of purchases, benefitting the many members of the local community.vio I think this venue would make a huge difference to the local community. Name: Joanne Pearce Address: 6 Truman Court, Stretton, 4116 IP Address: d58-110-34-244.rdl24.qld.optusnet.com.au - 58.110.34.244 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1968	Project Website Submission	01/11/2010	Online Submission from Jacinta Ferguson (support)	Letting Splendour slip away this year was a misake. Byron Shire will regret losing such a wonderful event that contributes to the region's international acclaim. Please don't let the opportunity to recover the festival pass us by!!! It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure a job and therefore we need as many of these innovative projects as possible. Name: Jacinta Ferguson Address: 2/2 Foster Street, East Ballina NSW 2478 IP Address: 132.74.233.220.static.exetel.com.au - 220.233.74.132 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1969	Project Website Submission	01/11/2010	Online Submission from Michael Carnell (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: Michael Carnell Address: 4/168 Kemp Street, Hamilton South, NSW, 2303 IP Address: proxy-prod2.newcastle.edu.au - 134.148.4.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1970	Project Website Submission	01/11/2010	Online Submission from Kiera Fahey (support)

The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home!

Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW.

There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals.

Not only does Splendour in the Grass bring money and attention to the area while the festival is on, but the word of mouth about Byron and surrounding areas after can only help to increase tourism to the area.

P1972	Project Website Submission	01/11/2010	Online Submission from Shelley Harris (support)	The various Aboriginal clans in and around the proposed North Byron Parklands site have had a long history in this area and for this reason the Parklands people have spent a lot of time consulting indigenous groups and organisations to work out how best to assess the site for significance. This process was done in a cooperative framework with the results that potential sites of significance will be protected through fencing and other means. The archaeological report does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. I do pray that you read the above and take into account all the positive aspects about having this festival at North Byron Parklands. Music unites us all on so many levels. Byron is a wonderful free feeling place.

				Yours Peaceful Name: Shelley Harris Address: 78 Johnston Street Bellbird Park Queensland IP Address: - 115.131.22.63 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1973	Project Website Submission	01/11/2010	Online Submission from Ishani Ratnayake (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring. North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! It would be a shame to see this proposal turned down, it doesn?t take much to see that the North Byron Parklands proposal has so much to offer.

				Name: Ishani Ratnayake Address: 87 Junction Road Wahroonga IP Address: c220-239-117-173.belrs4.nsw.optusnet.com.au - 220.239.117.173 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1975	Project Website Submission	01/11/2010	Online Submission from Liana Cornell (support)

North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations.

Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

From a cultural breeding ground perspective alone we must get the proposal approved. Itâ□™s a fabulous exciting vision and we are very lucky that this proposal is before us.

This will ensure the site will be ecologically sound for future major events. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ□™ economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community.

				Name: justin mcloughlan Address: 6 kestrel close benowa qld IP Address: cpe-60-228-65-59.lns6.woo.bigpond.net.au - 60.228.65.59 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1977	Project Website Submission	01/11/2010	Online Submission from Estefania Ahumada (support)	This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area.

P1978	Project Website Submission	01/11/2010	Online Submission from Emma Fuller (support)	Name: Estefania Ahumada Address: 94 Knightsbridge Ave Glenwood 2768 IP Address: cpe-121-218-199-33.lnse4.cht.bigpond.net.au - 121.218.199.33 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy. Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â□“ young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia. Name: Emma Fuller Address: 64 Stubbin St, Belivah, QLD

P1979	Project Website Submission	01/11/2010	Online Submission from Belinda Reid (support)	The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities! Name: Belinda Reid Address: 1 College Road,St Lucia q 4067 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)
https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P1980	Project Website Submission	01/11/2010	Online Submission from Sophie Schlachter (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. There is current trend on The Northern Rivers for young adults to move to major cities such as Sydney and Melbourne soon after finishing school. North Byron Parklands provides incentives for the youth to remain in the area by creating new and exciting employment opportunities, such as event management, live sound engineering, and even a career in music!

P1981	Project Website Submission	01/11/2010	Online Submission from Trudy Johnston (support)	Name: Sophie Schlachter Address: 72A Steyne Rd Saratoga NSW 2251 IP Address: r125-63-140-69.cpe.static.unwired.net.au - 125.63.140.69 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this. In recent times visitor day trips to the northern rivers has been declining. Coupled with a downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of time include cultural event activities such as those proposed by North Byron Parklands. This business is capable of attracting hundreds of thousands of visitors each year to the northern rivers which will be a huge boon for the area. It was so disappointing having Splendor away from it's home in Byron. I would love to see it

				return. I really believe the town can benefit in so many ways from having this massive event back in it's original home town! Kind regards, Trudy Name: Trudy Johnston Address: 102 treeview drive, burleigh waters IP Address: cpe-121-208-0-149.bqzl1.cha.bigpond.net.au - 121.208.0.149 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1982	Project Website Submission	01/11/2010	Online Submission from GABRIELLE PRITCHARD (support)	One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

			The two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism. Events are really important for young people today. Coming together is not just about getting drunk and partying. Itâ™s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people. Name: GABRIELLE PRITCHARD Address: 117 chapel lane bella vista nsw 2153 IP Address: - 202.124.74.99 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1983	Project Website Submission	01/11/2010	Online Submission from Paula Newman (support) The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna.

There has been a decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands can help with these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal.

North Byron Parklands will provide trainingÂ and work experience opportunities that will be extremely valuable to the region's workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

The impact of events can be effectively managed. Having attended Splendour at Woodford, it was clear that the impact of a lot of people in one place at one time can be managed. Splendour organisers have shown their commitment to caring for the natural environmental through their work with National Parks and other organisations to protect the most sensitive areas of the site.

It would be a positive for the Northern Rivers as a whole - economically and culturally. Conditions can be imposed on any approval to ensure impacts are minimised.

P1984	Project Website Submission	01/11/2010	Online Submission from Simone Tyson (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs. The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities.

P1985	Project Website Submission	01/11/2010	Online Submission from Alex Fox (support)	Name: Simone Tyson Address: 61 Highbury Street, Prospect SA 5082 IP Address: 202-6-147-102.static.adam.com.au - 202.6.147.102 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity. The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. A business that combines ecology with events and community giving. That?s the kind of business that our young people are looking to for training and experience. Let?s get it approved. Splendour is one of the few festivals remaining that still retains a sense of dignity and freedom amongst patrons, artists and workers. It is a festival with class... as byron bay is also a town with class. Name: Alex Fox

P1986	Project Website Submission	01/11/2010	Online Submission from Erin Thomas of n/a (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner. Name: Erin Thomas Organisation: n/a Address: 94 Kelleway Avenue, NichollsACT, 2913 IP Address: 240.120.96.58.static.exetel.com.au - 58.96.120.240 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1987	Project Website Submission	01/11/2010	Online Submission from elliott chadwick of yes events (support)	While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. The potential adverse impact of the Parklands usage on flora and fauna has been largely

mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species.

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

P1990	Project Website Submission	01/11/2010	Online Submission from Hamish Watkins of Kerralong Grazing (support)	Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. Making new friends, learning new activities, attending new and exciting events, a place where we are all welcome and safe. Bring on North Byron Parklands. I think splendour is also amazing for the music industry of Australia, not only dows it have the power to bring all the big acts from all over the glode for our enjoyment, it also gives our local artists a chance to really shine, performing inforn of an amazing audience and getting their name and music out there to the world. Splendour is one of the best music festivals of Australia and North Byron Parklands is the ultimate location for this festival to grow to new heights and be enjoyed by even more people every year. I cant wait for Spleandour In the Grass 2011 in North Byron Parklands :):) Name: Hamish Watkins Organisation: Kerralong Grazing Address: RMB 23Arthur River IP Address: prx7.waceo.schools.net.au - 203.36.44.17

P1991	Project Website Submission	01/11/2010	Online Submission from LINDA HILL of Qantas (support)	It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklandâ™s environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer? Please allow Splendour in the Grass to return to Byron as it is one weekend where Byron gets to share it's best qualities with those who love music.... and as long as all the environmental questions have been answered, the only winners can e Byron and Music..... and what is wrong with that!!!!

P1992	Project Website Submission	01/11/2010	Online Submission from Kathryn Kolb (support)	Let Splendour in the Grass return to Byron!! Name: LINDA HILL Organisation: Qantas Address: 35 Quirk st North Curl Curl 2099 IP Address: c220-239-51-194.belrs4.nsw.optusnet.com.au - 220.239.51.194 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 There are many reasons for Splendour to return/remain in Byron and listed below are only a few. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area. This proposal is so important for the Northen Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce. The events that will be held at North Byron Parklands will bring thousands of new people to the Byron Bay area each year. This can only benefit the local businesses.

				We all love Splendour, and so should you! Name: Kathryn Kolb Address: 1/23 Silva StAscot, 4007 IP Address: cpe-121-222-255-182.lnse2.woo.bigpond.net.au - 121.222.255.182 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1993	Project Website Submission	01/11/2010	Online Submission from Peter Jarvis (object)	I strongly object to this submission. Having a mega festival site so close to us will bring major crowds into our small town and with it loud music, late night parties and a young partyminded generation that have no respect or consideration for others. Not to mention the impact on the local environment and local flora/fauna. You can;t be serious about approving another festival site. We are only a small shire and we already hava festival site. I have nothing against the concert splendour in the Grass just not at this site - find somewhere else in NSW. I have ayoung family and I fear for my family as this concerts will bring into the shire the wrong type of people. Name: Peter Jarvis Address: 9 Konda Court Ocean Shores NSW 2483 IP Address: 80.43.70.115.static.exetel.com.au - 115.70.43.80 Submission for Job: #3210 Cultural Events Site (Project Application)

https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P1994	Project Website Submission	01/11/2010	Online Submission from Bronwyn Consadine (support)	The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesnâ□™t proceed then itâ□™s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklandsâ□™ group? No-one. That would be a terrible lost opportunity. The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available. We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level!

				Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer?
				Name: Bronwyn Consadine Address: 8 Hibble St West Ryde NSW 2114 IP Address: - 115.128.15.3 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1995	Project Website Submission	01/11/2010	Online Submission from luke fairley (support)	The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. Why wouldnâ□™t we want a world class facility like North Byron parklands in the Byron

				region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal. Name: luke fairley Address: st john's college, college road, st lucia, 4067 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1996	Project Website Submission	01/11/2010	Online Submission from Claudia Stretch (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. Please approve this project, it really sounds exciting for various reasons, arts, employment and cultural awareness. How fantastic! If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

				The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together. Please approve this project, it really sounds exciting for various reasons, arts, employment and cultural awareness. How fantastic! Name: Claudia Stretch Address: 3/16 Blenheim St, Randwick, NSW 2031 IP Address: d110-33-120-5.mas800.nsw.optusnet.com.au - 110.33.120.5 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1997	Project Website Submission	01/11/2010	Online Submission from Deborah Romero (support)	To whom this may concern, SPLENDOUR is a fantastic festival which brings together an amazing and diverse group of people who are all drawn to this festival for their love of music, friendship and fun. The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community.

Byron Bay is known for its culture and events. Donâ□™t deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal!

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

Please Seriously consider this letter and the proposal by SPLENDOUR.

THANK YOU,

Deborah Romero

				Name: Deborah Romero Address: 84A Ray Road IP Address: 124-149-51-252.dyn.iinet.net.au - 124.149.51.252 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P1998	Project Website Submission	01/11/2010	Online Submission from Katrina Mitchell (support)	The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore. Name: Katrina Mitchell Address: 2 Albion st WaverleyNSW 2024 IP Address: 123-243-64-174.static.tpgi.com.au - 123.243.64.174

P1999	Project Website Submission	01/11/2010	Online Submission from Catie Bechly (support)	If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime. Byron is the most magical setting for a festival like Splendor. Not only does it bring music lovers from all over Australia to Byron, but it allows Byron to show off its beautiful scenery, arts and culture. If not for Splendor I know that I would not have continuously returned to Byron numerous times throughout the year. Its a massive boost for Byron's tourism! I love you Byron!

				Name: Catie Bechly Address: NA IP Address: cpe-121-208-228-75.mjcz2.cha.bigpond.net.au - 121.208.228.75 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2000	Project Website Submission	01/11/2010	Online Submission from Jess Temby (support)	In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive. North Byron Parklands will provide trainingÂ and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

				There is no better live music experience than Splendour in the Grass in Byron Bay. I am from Perth and cherish traveling to beautiful Byron Bay to have one of the most amazing experiences. Please send Splendour home! Name: Jess Temby Address: 7 Hovea Avenue Sorrento WA 60020 IP Address: cpe-121-220-168-22.lns5.fli.bigpond.net.au - 121.220.168.22 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2001	Project Website Submission	01/11/2010	Online Submission from Kate Evans (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste, recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â□œresource centreâ□™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say. There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals.

Splendour in the Grass is an amazing festival with a beautiful atmosphere at Byron is a big part of that. While Woodford is a great venue, its just not Splendour without Byron Bay. The festival gives people a chance to see an amazing area that, for many people, would otherwise not be seen.

Please consider bringing Splendour back to Byron Bay!

P2002	Project Website Submission	01/11/2010	Online Submission from Greg Bull (support)	North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this. Name: Greg Bull Address: 661 Barkly st west footscray vic 3012 IP Address: cpe-124-181-217-100.lnse3.win.bigpond.net.au - 124.181.217.100 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2003	Project Website Submission	01/11/2010	Online Submission from Brett O'Donovan (support)

I have travelled to events organised by the people behind North Byron Parklands for 7 years and can honestly say they do a magnificent job in creating a safe, fun environment for patrons whilst ensuring the surrounding ecolife is maintained in a pure form. I thoroughly support any development as I am sure they would conduct themselves responsibly.

I have heard it many times before that living in a community which has locally based jobs provides for a health and sustainable society. Jobs in the north of New South Wales are hard to come by at the best of times so when a project comes along which will create new jobs for people it is important to support it. That is a key reason why I support the approval of the North Byron Parklands project.

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal.

Regards

Brett O'Donovan

P2004	Project Website Submission	01/11/2010	Online Submission from Kobe Roberts (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral responsibility to approve it just on employment considerations alone. If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P2005	Project Website Submission	01/11/2010	Online Submission from Sharlai Hughes (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. It is very exciting to see a proposal of this sort in the Byron Shire. North Byron Parklands will see a rise in employment opportunities for residents, a boost in sales in local businessâ□™, and a influx of cultural events. This development will make the north coast a definite stop on the tourist map for years to come. Lets get behind it! Name: Sharlai Hughes Address: 4/62 Murdoch Street Cremorne 2090 IP Address: d175-39-53-146.sbr801.nsw.optusnet.com.au - 175.39.53.146 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2006	Project Website Submission	01/11/2010	Online Submission from Holly Green (support)	North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community. Name: Holly Green Address: 137 Two Mile Road, Roma QLD 4455 IP Address: pizzacat1.usq.edu.au - 139.86.2.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2007	Project Website Submission	01/11/2010	Online Submission from Loren Whiting (support)	In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel

will be available to guide and manage events proposed for North Byron Parklands.

Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW.

The Northern Rivers region needs to plan ahead for future employment and training opportunities for our young community. We need to offer options to the young members of the community to encourage them to stay in the area. This proposal will provide these incentives.

P2008	Project Website Submission	01/11/2010	Online Submission from Tahnee Carroll (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important. So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the regionâ□™s economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. Name: Tahnee Carroll Address: 19 Taronga Parade, Caringbah, NSW, 2229 IP Address: c58-107-249-101.mirnd3.nsw.optusnet.com.au - 58.107.249.101 Submission for Job: #3210 Cultural Events Site (Project Application)

P2009	Project Website Submission	01/11/2010	Online Submission from Libby Klysz (support)	PLEASE DO NOT PUBLISH MY NAME ONLINE. If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way. While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all. The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all. Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2010	Project Website Submission	01/11/2010	Online Submission from Alexander Simes (support)	Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. The Byron Shire and Northern Rivers region is also home to an aging community with a high proportion of retirees. This means many young people are leaving the area to seek education and employment opportunities elsewhere. North Byron Parklands would help provide employment for many of these young people, thus giving them a reason to stay in the area. It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning. Name: Alexander Simes Address: 62 Sladden Road, Engadine, NSW 2233 IP Address: - 120.16.211.136 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2011	Project Website Submission	01/11/2010	Online Submission from dane kelly of mortgage broker (support)	There is a reason why the government agencies including the National Parks and Wildlife services didn?t object to this application, it really is in the best interest of everyone. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive. What?s important for Byron is the culture and celebration, its very important to our community. The North Byron Parklands proposal will provide security and ensure that Byron continues to offer this. Please,Please,Please leave this AMAZING festival in the Byron Shire people travel all over Australia for 3 days,it brings in so much money for the local economy,i live more then 10 hours drive from there but i have been to the last 4 festivals with around 10 of my friends and we all go out in Byron,Eat in Byron and sleep in Byron for at least a week before and after the festival...they are trying their best for the environment and it seems to be working!Im afraid that the locals who are objected to the festival will lose it forever and all the thousands of dollars in brings into the community..i have family that live in Ballina and even they say it brings money into thier town!! P2013	Project Website Submission	01/11/2010	Online Submission from Carrie Collins (support)	In relation to employment and wages the Byron local government area has one of the State?s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. It would be a shame to see this proposal turned down, it doesn?t take much to see that the North Byron Parklands proposal has so much to offer. Name: Carrie Collins Address: 4/40 Armbrust StManoora QLD 4870 IP Address: 203-214-87-50.dyn.iinet.net.au - 203.214.87.50

P2016	Project Website Submission	01/11/2010	Online Submission from Lucy Galletly (support)

If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

I would definitely apply for a job at the North Byron Parklands and know that it will lay my employment path out. This is the opportunity that I have always hoped Byron Bay would offer.

The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government!

P2019	Project Website Submission	01/11/2010	Online Submission from Wei Ying Lui (support)

North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving.

This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue.

Having a permanent cultural event venue in nature is the way forward for young people. Youth events are not just about getting drunk and partying. Cultural events are very important for young people, they help develop social skills, they encourage creative thinking, and create a sense of community.

P2022	Project Website Submission	01/11/2010	Online Submission from Sharon Friel (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers

region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important.

The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures.

P2023	Project Website Submission	01/11/2010	Online Submission from Therese Holmes (support)	North Byron Parklands is one of those venues that give back to the local community. This is important no matter which way you look at it. I think it would be a shame for this venue not to go ahead. It seems all too often people search for reasons not to go ahead with an event like this rather than looking at all the positives and reasons why it SHOULD go ahead! Name: Therese Holmes Address: 10 High St, North Lambton 2200 IP Address: d122-104-32-254.sbr6.nsw.optusnet.com.au - 122.104.32.254 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2024	Project Website Submission	01/11/2010	Online Submission from Liam Mason of Coles Asquith, Normanhurst Boys High (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. The pathways to the future can be seen as the development of this event and the regognition of the cultural aspects that are used.

				Name: Liam Mason Organisation: Coles Asquith, Normanhurst Boys High Address: 233 Galston Rd, Hornsby Heights 2077 IP Address: c211-30-211-211.thorn2.nsw.optusnet.com.au - 211.30.211.211 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2025	Project Website Submission	01/11/2010	Online Submission from George Gillies (support)	YOU NEED TO BRING SPLENDOUR HOME! IT'S THE MOST AMAZING FESTIVAL AUSTRALIA HAS! PLEEEEEEEEASE!!!!The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together. P2026	Project Website Submission	01/11/2010	Online Submission from Alexander pumkilin (support)	Spelndour is meant for byron bay!!!! The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands Byron bay needs splendour! Name: Alexander pumkilin Address: 5 yongala court, castle hill IP Address: 123-243-237-171.static.tpgi.com.au - 123.243.237.171 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2027	Project Website Submission	01/11/2010	Online Submission from David Shirley of Rio Tinto (support)	In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. Name: David Shirley Organisation: Rio Tinto Address: 12 Shenton Place Claremont WA 6010 IP Address: - 210.8.191.97 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2028	Project Website Submission	01/11/2010	Online Submission from Jessica Micallef (support)	The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

P2029	Project Website Submission	01/11/2010	Online Submission from Jade Boland (support)

With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home!

Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but let?s create a high season in winter too by utilising North Byron Parklands!

The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view.

P2030	Project Website Submission	01/11/2010	Online Submission from Nicole Ziebell (support)

When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve.

It is very exciting to see a proposal of this sort in the Byron Shire. North Byron Parklands will see a rise in employment opportunities for residents, a boost in sales in local businessâ□™, and a influx of cultural events. This development will make the north coast a definite stop on the tourist map for years to come. Lets get behind it!

There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city.

P2031	Project Website Submission	01/11/2010	Online Submission from John Gourlay (support)

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â□“ young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events.

It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events.

P2032	Project Website Submission	01/11/2010	Online Submission from Rebecca Wolfe (support)	When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Name: Rebecca Wolfe Address: 15 Kanturk St, FERNY GROVE QLD 4005 IP Address: cpe-58-161-236-136.iqla1.woo.bigpond.net.au - 58.161.236.136

P2033	Project Website Submission	01/11/2010	Online Submission from Elise Mccann (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved.

I would definitely apply for a job at the North Byron Parklands and know that it will lay my employment path out. This is the opportunity that I have always hoped Byron Bay would offer.

North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

P2034	Project Website Submission	01/11/2010	Online Submission from Rhiannon Foster (support)	Name: Elise Mccann Address: 12 Arcadia Ave Gymea Bay IP Address: - 82.132.248.115 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved.

P2035	Project Website Submission	01/11/2010	Online Submission from Emma Green (support)	Name: Rhiannon Foster Address: 18A Stook Court SPEARWOOD WA 6163 IP Address: catbert.2000cn.com.au - 203.161.123.140 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

P2036	Project Website Submission	01/11/2010	Online Submission from justine sinclair (support)	Name: Emma Green Address: 9A Perseverance Road Tea Tree Gully SA 5091 IP Address: cpe-144-136-188-172.sa.bigpond.net.au - 144.136.188.172 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P2037	Project Website Submission	01/11/2010	Online Submission from Asha Black (support)	For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers.
				Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.
				Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. P2038	Project Website Submission	01/11/2010	Online Submission from Merisha Clay (support)

The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support.

This proposal of North Byron Parklands must be approved by local government. Having a sustainable cultural event venue on the Northern Rivers will create new jobs, attract more visitors, encourage more cultural events, and bring the community together.

P2039	Project Website Submission	01/11/2010	Online Submission from Elizabeth Roberts (support)	Splendour in the Grass has become an iconic NSW music festival ,like Glastonbury for the UK, that showcases Australia's talent as well as drawing major international music acts. There are plenty of reasons why Byron Shire should love having a festival like this. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken

				such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.
				Name: Elizabeth Roberts Address: 10 Bracken Close Engadine IP Address: d175-39-90-201.riv800.nsw.optusnet.com.au - 175.39.90.201 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2040	Project Website Submission	01/11/2010	Online Submission from Amy Dempsey (support)	I strongly support the application. I have supported the cultural event by attending every year since its beginning, and I have always found the event to be wonderfully enjoyable, safe and friendly, environmentally conscious, and culturally empowering project. I have worked in Disability Employment in the Byron Bay region for 9 years and have found the event an essential source of employment for my disadvantaged clients in a depressed labour market. The event has also supported several of my friends to promote their music and art, and encouraged them in their careers. I missed the event terribly this year, as did many employees, artists and local festival goers. The region is not the same without it, and I am not alone in feeling my year was a little less exciting for not having this cultural event. I support the excellent environmental work the organisation has done on the Yelgun site, and hope to be involved in further events and environmental projects there in the future. Name: Amy Dempsey Address: 3 Rankin Drive, Bangalow NSW 2479 IP Address: ppp121-44-135-64.lns20.syd7.internode.on.net - 121.44.135.64

P2041	Project Website Submission	01/11/2010	Online Submission from Shayne Carter (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses. For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

				Name: Shayne Carter Address: 31 Dodds St Redhead 2290 IP Address: - 124.176.109.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2042	Project Website Submission	01/11/2010	Online Submission from Solange Frost (support)	Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands developing specific procedures and work instructions designed to protect the environment. Parklands have also proposed to create a sustainable event through planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. Name: Solange Frost Address: 8b/39 Penkivil St Bondi NSw 2026 IP Address: - 115.128.72.206 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2043	Project Website Submission	01/11/2010	Online Submission from Sarah Cattell (support)

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry.

This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.

P2044	Project Website Submission	01/11/2010	Online Submission from Andrew Fish of Fishbulb Solutions (support)	I am writing to voice my support for the permanent home that Splendour in the Grass is looking to acquire. The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together. North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! Events are really important for young people today. Coming together is not about getting drunk and partying. Itâ□™s about helping each other and supporting local bands and and celebrating life. Having a permanent cultural event venue in nature is important for young people. Regards, Andrew Fish Name: Andrew Fish Organisation: Fishbulb Solutions

P2045	Project Website Submission	01/11/2010	Online Submission from Mark Arathoon (support)	Address: 29 Gilda Street North Ryde NSW 2113 IP Address: c211-30-184-237.carlnfd1.nsw.optusnet.com.au - 211.30.184.237 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. Four of the owners of North Byron Parklands each have a long and successful history in hosting events. The size of these events have ranged from 5,000 to 50,000 people and have occurred at a number of venues across NSW. The skills, systems and processes they have developed over the past 12-15 years will no doubt be employed to ensure all events held at North Byron Parklands are done so in a professional and safe manner. Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one? North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a quality venue for young people in our region. Name: Mark Arathoon

P2047	Project Website Submission	01/11/2010	Online Submission from debra graham of none (support)	With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing. On the subject of employment the north coast has a long history of hosting many different

types of events. These events provide jobs for so many people and in an area where paying the rent or mortgage is tough it is critical that these events are allowed to continue. Without a permanent event area these jobs will be lost to the north coast. As such this project should be approved on the employment prospects it brings, let alone any other positives.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

Byron Bay has always been a bit pretentious,even 34 years ago ,my first visit.Something like splendour brings real people,real australians to byron,not just backpackers or yuppies.Please let some of the real old spirit of byron shire return.The shire can only benefit

P2050	Project Website Submission	01/11/2010	Online Submission from Danielle Fagerstrom (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book. Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them.

Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â□“ young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P2051	Project Website Submission	01/11/2010	Online Submission from Alannah Skinner of Formal Committee (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. With up to twenty days of events each year the work experience opportunities for people in the region are very exciting. The bump in and bump out periods provide further work. We need these jobs and the training they provide, from high level event management to ticketing, technical production and traffic management. Name: Alannah Skinner Organisation: Formal Committee Address: 343 Lower Plateau Rd, Bilgola, 2107 IP Address: - 120.18.218.205 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2052	Project Website Submission	01/11/2010	Online Submission from Stef Ruberto of Student (support)	The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. The North Byron Parklands sounds really interesting and exciting. Name: Stef Ruberto Organisation: Student Address: 90 mccracken st essendon 3040 IP Address: c122-108-49-43.sunsh1.vic.optusnet.com.au - 122.108.49.43 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2053	Project Website Submission	01/11/2010	Online Submission from scott hope (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. Name: scott hope Address: 1 jasmine streetBotanyNSW2019 IP Address: 164.73.233.220.static.exetel.com.au - 220.233.73.164 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2054	Project Website Submission	01/11/2010	Online Submission from Dominic Michaelis (support)	The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment. Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one? We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal. P2055	Project Website Submission	01/11/2010	Online Submission from rachel lister (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. It would a great shame for the Byron Shire to loose the Splendour in the Grass festival. The local community needs the festival, as it offers a huge amount of business for local shop owners, pubs, hotels, motels and camping grounds. Many of these local business will feel great financial pressure if Splendour in the Grass does not return to the region. Name: rachel lister Address: 152 strong avenue graceville IP Address: cpe-58-173-219-3.sxzd1.woo.bigpond.net.au - 58.173.219.3 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2056	Project Website Submission	01/11/2010	Online Submission from Oliver Hovav (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? While the economy booms in other states, NSW and in particular regional NSW continues to suffer. The likely employment opportunities that North Byron Parklands will bring to the Northern Rivers shall be substantial. Many people in this region are finding it hard to secure

a job and therefore we need as many of these innovative projects as possible.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal.

P2057	Project Website Submission	01/11/2010	Online Submission from Ashleigh Holmes (support)	North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments. Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. P2058	Project Website Submission	01/11/2010	Online Submission from Cameron Parker (support)	Please allow Splendor to be at the Nth Byron Parklands Name: Cameron Parker Address: 72 Raymont Road Grange IP Address: c211-31-56-182.kelvn3.qld.optusnet.com.au - 211.31.56.182 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2059	Project Website Submission	01/11/2010	Online Submission from Romina Pellizzeri (support)	Every year just as work brings you down and Uni gets that bit harder, we have something to look forwards to, we have something to lighten our spirits and just forget about the hard work we have to do back home. Splendour is that get away, it's so special for its one of the few places you can go and every one is there to have fun, everyone is there to smile and dance and sing and just embrace life. Splendour has one of the most beautiful atmospheres and that feeling is truly captured and embraced in its true home of Byron. Let us escape and relax away from our homes at another home of Splendour in Byron. The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the â□˜coast to hinterlandâ□™ wildlife corridor. The extended â□˜restâ□™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. A business that combines ecology with events and community giving. Thatâ□™s the kind of business that our young people are looking to for training and experience. Letâ□™s get it approved.

				Name: Romina Pellizzeri Address: 119 Eglinton st Kew IP Address: cpe-58-175-129-144.kezw1.lon.bigpond.net.au - 58.175.129.144 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2060	Project Website Submission	01/11/2010	Online Submission from Hayley Wilson of Education Qld (support)	There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals. Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. Name: Hayley Wilson Organisation: Education Qld Address: 28 Allambi Avenue, Broadbeach Waters, Q, 4218 IP Address: d58-104-208-53.dsl.nsw.optusnet.com.au - 58.104.208.53 Submission for Job: #3210 Cultural Events Site (Project Application)

P2061	Project Website Submission	01/11/2010	Online Submission from jess richardson (support)	Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application. Events are really important for young people today. Coming together is not just about getting drunk and partying. It?s about helping each other and learning. Having a permanent cultural event venue in nature is the way forward for young people. When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens

				of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land.
				splendour just isnt splendour unless its at byron. bryron makes splendour what it is the best festival in austraila. splendour loves bryon and bryon loves splendour plzzzzz let it cum home Name: jess richardson Address: 42 seaham st holmesville nsw 2286 IP Address: cpe-58-164-64-84.lns1.ken.bigpond.net.au - 58.164.64.84 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2062	Project Website Submission	01/11/2010	Online Submission from Paul Bussell (support)	I support the planning application for North Byron parklands to be able to host Splendour in the Grass and other events. As an interstate visitor these type of events are fantastic for local identity and economy. Many people travel from all around to attend these events in such exotic locations. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such

as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed.

P2064	Project Website Submission	01/11/2010	Online Submission from Janine Cheung (support)	Seems like a responsible approach to planning an event that is incredible fun. Byron should be proud to host Splendour and have the festival call it home. From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldnâ□™t go ahead. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. Thank you for your consideration. Name: Janine Cheung Address: 3 Marsh Crt Wantirna South IP Address: cpe-60-224-81-172.wxzr1.win.bigpond.net.au - 60.224.81.172 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2065	Project Website Submission	01/11/2010	Online Submission from Eli Bartier (support)	North Byron Parklands is showing initiative by deeply considering the environmental impacts put forward by such events, and eliminating or engineering solutions to such problems. This kind of management should be encouraged. Another point to consider is the jobs the North Byron Parklands proposal will create. Generating in excess of 200 jobs it seems to make sense to me to approve it. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative. Byron is a beach town heavily relying on tourism, especially during the summer months. As splendour in the grass is held in winter, a winter tourist season could be created, helping boost the economy during the seasonal lull. Thank you for your time

P2066	Project Website Submission	01/11/2010	Online Submission from Meftihe Achamyeleh (support)	Name: Eli Bartier Address: 9 Doull Place Thornlands 4164 IP Address: cpe-124-186-217-206.lns7.woo.bigpond.net.au - 124.186.217.206 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal. On a personal level, Splendour in the Grass is an amazing event that I travel from Victoria to see yearly. It has an amazing atmosphere, and is a festival that makes me proud to be Australian. Please take a moment to consider this submission and bring Splendour home. Name: Meftihe Achamyeleh

P2068	Project Website Submission	01/11/2010	Online Submission from Aimelyn Aquilino of The University of Sydney (support)	One of the things that really impresses me about the North Byron Parklands proposal is the level of community consultation they have undertaken. From public planting days to environmental forums, site tours to newsletters and letter box drops, these guys have demonstrated a strong willingness to communicate and listen to the community. I feel they have shown that they will more than adequately manage a variety of events at this site in a professional and sensitive manner. North Byron Parklands proposal to rejuvenate the Parklands site has lead to the employment of local indigenous bush regeneration teams to plant thousands of trees across their site. This program is an ecellent way to involve the traditional land owners in the area and helps to restore the site and set the foundations for a sustainable event site.

				I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused.
				Name: Aimelyn Aquilino Organisation: The University of Sydney Address: 30A Pagoda Crescent,Quakers HillNSW 2763 IP Address: ppp121-44-113-118.lns20.syd6.internode.on.net - 121.44.113.118 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2069	Project Website Submission	01/11/2010	Online Submission from Toni Johnson (support)	I absolutely LOVE live music and having grown up in Lennox Head (which for those of you who don't know is 15-20 minutes south of Byron Bay) and have always had to travel at least an hour to see the big acts touring. Speak to 90% of people around my age from that area and we all have been doing the same thing. Splendour was the solution to this problem and yet again you've taken something that the youth (and many of the adults) of the area love and enjoy because a small group of people dont like the crowd, the noise and by the sounds of things, don't like to see the younger portion of the population enjoying themselves! How many more years are the youth and music lovers of the area going to have to keep

				fighting to be allowed to hold events such as Splendour that are not only a fantastic promotion for the area, but also an absolutely incredible experience for its residence. Don't use the influx of people as an excuse either.....uh hello, have you been in Byron over Christmas??? A discussion at least needs to be had, bring Splendour back, its one of the best things that ever happened in the area!! Name: Toni Johnson Address: 13 Henderson Place, Lennox Head, NSW, 2478 IP Address: cpe-203-51-42-243.lns7.cht.bigpond.net.au - 203.51.42.243 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2070	Project Website Submission	01/11/2010	Online Submission from Matt Petropoulos (support)	The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative.

Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged.

Splendour in the Grass is arguably the most chilled and friendly festival in the Australian calendar. It brings loving people together, and we want those people in Byron.

Love is all you need, dude.

P2071	Project Website Submission	01/11/2010	Online Submission from corrine newman of youth work (support)	The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. The approval of the North Byron Parklands proposal will benefit the local creative industries and lead to a new wave of new and interesting jobs for the youth in the area. Letâ™s build the local industry and make The Byron Shire a hub for creative individuals. Name: corrine newman Organisation: youth work Address: 11 Melaleuca DveUpwey VIC 3158 IP Address: 60-240-229-213.tpgi.com.au - 60.240.229.213 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2072	Project Website Submission	01/11/2010	Online Submission from Aranya Changkaoprom (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences.

In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P2073	Project Website Submission	01/11/2010	Online Submission from Sam Ozana (support)	Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth. Dear NSW department of planning, Please Please allow Splendour in the grass to have their very own venue. Spendour has become an integral part of my life and july/august without splendour is like having spaghetti without bolognaise. Moreover, however, we need a place that we can call home. It would be much appreciated if you let us have a home. Regards, Sam Ozana

P2074	Project Website Submission	01/11/2010	Online Submission from Melissa Cicchiello (support)	Name: Sam Ozana Address: 53 Derby St, Vaucluse IP Address: cpe-121-209-248-158.vuls1.ken.bigpond.net.au - 121.209.248.158 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Save Splendour in the Grass. It is the definitive Australian musical festival and is purely representative of the amazing Australian youth culture that we have. Let us foster this. Don't deny it to us. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations. This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering. Name: Melissa Cicchiello

P2078	Project Website Submission	01/11/2010	Online Submission from tyler coulcher of - (support)

The two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism.

The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy.

This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

P2079	Project Website Submission	01/11/2010	Online Submission from Jake Grossman (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Imagine an events venue that can attract tens of thousands of visitors to a rural area. Imagine an events venue that has investigated and assessed all aspects of its operation and developed best practice policies and procedures. Imagine an events venue that generates lots of employment opportunities and provides much needed income for a range of businesses. Well the events venue is North Byron Parklands and it should be approved by the government because sustainable projects like this are few and far between.Â Â Â Â Â Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce. -- Splendour in the grass 2009 and 2010 have both quite easily made the list of highlights of my life. Not only the bands, but the crowd and the entire vibe of the festival is something really amazing and special. I feel like Splendour has a deep connection to the byron area, even though the Woodford site was also spectacular. Many people think that it should be kept at Woodford, but to be honest, it felt like this years event was missing something. I honestly believe that the festival would serve the audience better in its original foundation. Obviously the might that is the

				splendour festival could never be underwhelming, but for the development of the event, and the overall experience for all, Splendour must be hosted at home. SPLENDOUR BENDER WEEKENDER! P2080	Project Website Submission	01/11/2010	Online Submission from Jack Francis (support)	The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events.

P2081	Project Website Submission	01/11/2010	Online Submission from Kelly White of Patron (support)	Splendour MUST go back to Byron Parklands.The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. The people who go to Splendour care about the environment and are wiling to support the comunity to maintain the Byron Parklands. Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. The Byron locals deserve to have Splendour back to generate income and livelihood from the number of people visiting Spendour who stay in the region before and after the event. For these reasons this proposal should be approved by local government. Thank you for your consideration Name: Kelly White Organisation: Patron Address: 3/206 Arthur Street, Fairfield VIC 3078 IP Address: 27-32-139-178.static.tpgi.com.au - 27.32.139.178 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2082	Project Website Submission	01/11/2010	Online Submission from Cameron Gibb (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals. Name: Cameron Gibb Address: 10 Domain Rd Currumbin Gold coast 4223 IP Address: 60-240-252-50.tpgi.com.au - 60.240.252.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2083	Project Website Submission	01/11/2010	Online Submission from Matthew Hounslow (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way. It would be a shame to see this proposal turned down, it doesnâ□™t take much to see that the North Byron Parklands proposal has so much to offer. Name: Matthew Hounslow Address: 4/28 Coronation AvenuePottsville, NSW, 2489 IP Address: cpe-124-191-165-28.oxqn1.cha.bigpond.net.au - 124.191.165.28 Submission for Job: #3210 Cultural Events Site (Project Application)

P2084	Project Website Submission	01/11/2010	Online Submission from Brittany Proctor (support)	You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. Name: Brittany Proctor

				Address: 35 Brighton Road Highgate Hill IP Address: c211-31-6-63.rochd5.qld.optusnet.com.au - 211.31.6.63 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2085	Project Website Submission	01/11/2010	Online Submission from Zoe Saxby (support)	I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ□™s important to have these opportunities for young people in the region. Name: Zoe Saxby Address: 150 Gap creek road Kenmore Hills, Brisbane 4069

				IP Address: cpe-123-211-75-34.lnse4.cha.bigpond.net.au - 123.211.75.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2086	Project Website Submission	01/11/2010	Online Submission from Jacques Gasson of Devillain (support)	Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy. Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer?

P2087	Project Website Submission	01/11/2010	Online Submission from Jane Williams (support)	Name: Jacques Gasson Organisation: Devillain Address: 63 Bangalow rd Byron Bay NSW 2481 IP Address: 203-158-53-116.dyn.iinet.net.au - 203.158.53.116 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the sustainable?development basket. In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force. North Byron Parklands will provide training? and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

P2088	Project Website Submission	01/11/2010	Online Submission from Maria Fadljevic (support)	Name: Jane Williams Address: 77/24 Buchanan Street Balmain 2041 IP Address: rover-chif.btal.com.au - 203.10.111.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisationâ□™s like North Byron Parklands to provide much needed jobs. The North Byron Parklands proposal should be approved because of the incredible opportunities it provides both the community and the business community. I can imagine that this cultural arts and music event venue as becoming the preeminent cultural hub of Northern NSW and will do a lot to attract dollars from Queensland and Victoria. This project should be approved. It is important for the youth to be proud of where they come from. The Parklands proposed cultural event site is something that the youth are behind and should be supported by the local government. More space allows for more sanitary conditions and may also help to keep unwanted trouble out of surrounding residential/business areas while the festival runs.

P2089	Project Website Submission	01/11/2010	Online Submission from James Porich of n/a (support)	North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community. Name: James Porich Organisation: n/a Address: 59 Swinden Street DownerACT 2602 IP Address: ppp121-45-221-32.lns20.cbr1.internode.on.net - 121.45.221.32 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2090	Project Website Submission	01/11/2010	Online Submission from Victor Kahan of Student (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all donâ□™t move to cities. Name: Victor Kahan Organisation: Student Address: 16 wimbledon avenue IP Address: cpe-60-230-102-240.vic.bigpond.net.au - 60.230.102.240 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2091	Project Website Submission	01/11/2010	Online Submission from Greg Rodgers (support)	The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. Name: Greg Rodgers Address: 5/18A Dreschler Street,Flora Hill,Victoria,3550. IP Address: cpe-124-180-142-14.lnse4.lon.bigpond.net.au - 124.180.142.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2092	Project Website Submission	01/11/2010	Online Submission from Kate Miller (support)	The list of events that each of the owners of North Byron Parklands have held over the past ten years is absolutely staggering in terms of venues, numbers of patrons and dealing successfully with a range of regulatory authorities. Such experience will provide a significant edge when events are held at North Byron Parklands and will no doubt make for a succession of successful events. From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. Name: Kate Miller Address: 169 Hutton st, Thornbury, Vic 3071 IP Address: 202-161-23-26.dyn.iinet.net.au - 202.161.23.26 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2093	Project Website Submission	01/11/2010	Online Submission from Zoe Cebuliak of Animal Wellness (support)	One of the most significant benefits for the environment coming out of this application is the proponent?s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia. Name: Zoe Cebuliak Organisation: Animal Wellness Address: 1/21 Mitre St, St Lucia 4067 IP Address: 124-171-95-210.dyn.iinet.net.au - 124.171.95.210 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2094	Project Website Submission	01/11/2010	Online Submission from Joe Lynch (support)	While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. Name: Joe Lynch Address: 14 crawford ave stafford 4053 IP Address: - 58.163.175.132 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2095	Project Website Submission	01/11/2010	Online Submission from jessica tumbri of birdie's (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site. Name: jessica tumbri Organisation: birdie's Address: 745 nicholson street carlton vic 3068

				IP Address: 114.74.159.18.optusnet.com.au - 114.74.159.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2096	Project Website Submission	01/11/2010	Online Submission from samantha Courtney of Student (support)	I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. Name: samantha Courtney Organisation: Student Address: 27/4 Itong Place, Currumbin Waters, 4223, QLD IP Address: 110-174-241-60.static.tpgi.com.au - 110.174.241.60 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2097	Project Website Submission	01/11/2010	Online Submission from Sean Fletcher (support)

The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts.

We can look at other parts of the world to help understand the likely impacts of the North Byron Parklands proposal. Donna Sue Sanders ? Executive Director of the Daytona State Foundation states that ?communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a community?

With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this.

P2098	Project Website Submission	01/11/2010	Online Submission from Cameron McNeill (support)	I see it as a pity that the certain people of Byron are protesting the relocation of this festival to a permanent home. Especially when it is still so close. Ok, it may mean a drop in annual business and revenue but would they prefer that the business generated by this festival cease altogether if it moved elsewhere? Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not worldâ□™s best environmental practice. Please give Splendour In The Grass the home it deserves. P2099	Project Website Submission	01/11/2010	Online Submission from Rosie Toner (support)	The two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism. A business that combines ecology with events and community giving. That?s the kind of business that our young people are looking to for training and experience. Let?s get it approved. Splendour is a great opportunity to bridge the gap between generations of music. The dynamic splendour crowd is a demonstration of how music, culture and tourism can contribute to an unforgetable experiance for all ages. Bringing splendour home will ensure a strong future in byron tourism as well as a further promotion of the brilliance of music and culture coming together. Byron is the best place for splendour to be situated due to the community feel that comes with being in the area. Name: Rosie Toner Address: 10 sprigg pl, Mt colah, NSW, 2079 IP Address: cpe-144-136-116-132.hnub1.ken.bigpond.net.au - 144.136.116.132 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

				Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2100	Project Website Submission	01/11/2010	Online Submission from shane braithwaite (support)	Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire. North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual.

P2101	Project Website Submission	01/11/2010	Online Submission from Katie Diggins (support)	Name: shane braithwaite Address: 3/62 garrick stcoolangatta IP Address: 136.004.dsl.qld.iprimus.net.au - 211.26.12.136 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive. Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry. Name: Katie Diggins Address: 121 Palmgrove Rd Avalon IP Address: d175-39-0-52.sbr800.nsw.optusnet.com.au - 175.39.0.52 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2102	Project Website Submission	01/11/2010	Online Submission from Vickie Zhang (support)

The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation.

We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level!

P2103	Project Website Submission	01/11/2010	Online Submission from Rebecca Grose of Student (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby

				improve species movement opportunities through the further planting of endemic trees. This is a huge positive. Please bring Splendor back to Byron! P2104	Project Website Submission	01/11/2010	Online Submission from Stephanie Coutts (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the â□œSplendid Initiativeâ□□ offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. P2107	Project Website Submission	01/11/2010	Online Submission from stevie raymond of student (support)	There is no doubt the approval of the North Byron Parklands development application will provide the youth in the area an array of new jobs. These new jobs will be exciting for the youth and benefit the regions economy. In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing. Name: stevie raymond Organisation: student Address: 54a bungay road wingham nsw 2429 IP Address: - 119.12.212.226 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2108	Project Website Submission	01/11/2010	Online Submission from STEVE NOBLE of JB HiFi Commercial (support)	To whom it may concern, I have spent several years at Splendour in the Grass Festivals in Byron Bay and have enjoyed myself each and every time. I didn't go to Woodford this year as I prefer Byron as a venue. I have introduced many friends to the festival also. When we travel from Adelaide to attend we always spend 6-7 days in Byron and this is clearly of great benefit to the local economy. The vibe at the festival and in town is always fantastic. I have never noticed any bad behaviour unless it has been initiated by local Byron youths who are well known for their poor behaviour. Most people that travel to the festival are there for a good time and that is most apparent at each event.

I am a family man at 44 years of age and was planning to attend the festival for many years to come as I do the Blues Fest.

Splendour attracts all types of people and a wide variety of age groups - this is one thing that makes it special.

Being held in winter months offers local traders economic benefits and punters a point of difference from the plethora of summer festivals now dominating the national landscape.

The festival is extremely well organised and a credit to the people who manage it.

My only gripe would be the "over the top" police presence which is totally unnecessary as stated above there are rarely if any issues that I have noticed.

I wish SITG the best of luck with their future and I for one would love to see it settle back in or near Byron Bay for many years to come.

P2109	Project Website Submission	01/11/2010	Online Submission from Ashlee Francis (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture. Name: Ashlee Francis Address: 19 Polzin RoadHighfields Qld 4352 IP Address: dsl-202-173-147-86.qld.westnet.com.au - 202.173.147.86

P2110	Project Website Submission	01/11/2010	Online Submission from Lilly Crino (support)	With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. Name: Lilly Crino Address: 3 Chisholme place Windsor nsw 2756 IP Address: 175.33.165.252.optusnet.com.au - 175.33.165.252 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2111	Project Website Submission	01/11/2010	Online Submission from Emily Nuhn (support)	The North Byron Parklands project will incorporate a range of best practice environmental policies and procedures including a requirement to only host events in the existing cleared areas of the site. This means that all forested areas will be protected via fencing and security measures and effectively be out of bounds for event usage. This is a very positive initiative from an environmental point of view. Regarding employment, so many people are forced to leave coastal areas in search of a job. We need the government to play an active role in identifying suitable industries and businesses that can provide local jobs in these areas. North Byron Parklands is an obvious choice in helping to bridge this gap and should be approved to operate in Byron Shire. I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. Being young itâ□™s important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available. Name: Emily Nuhn Address: 14 Howard Court Arana Hills QLD 4054 IP Address: ppp118-208-87-56.lns20.bne4.internode.on.net - 118.208.87.56 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2112	Project Website Submission	01/11/2010	Online Submission from Bao Le (support)	It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the â□œSplendid Initiativeâ□□ offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. Name: Bao Le Address: University of Adelaide, North Terrace Campus

P2114	Project Website Submission	01/11/2010	Online Submission from Sam Manfield (support)

With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas.

Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends.

While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive.

North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all don?t move to cities.

P2116	Project Website Submission	01/11/2010	Online Submission from jessica wagner of IGA (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being. If you were to analyse the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way. North Byron Parklands have conservatively projected that their three major events each

				year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. Itâ□™s a fantastic opportunity for us all. Name: jessica wagner Organisation: IGA Address: 7a gilmore crescent morphettville SA 5043 IP Address: 114.74.21.207.optusnet.com.au - 114.74.21.207 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2117	Project Website Submission	01/11/2010	Online Submission from Chris Laws of Moon Communications Group (support)	The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. If you speak to anyone these days, getting and keeping a job is high up on the list. Regional areas generally do not have a range of diversified industries to choose from. Parklands is offering meaningful and interesting work, particularly for young people and should be welcomed with open arms.

The Byron region has become one of the most sought after destinations in one of the world's most sought after countries. It has done so because of its open minded, arts focused mindset that has accepted and celebrated people and activities of all kinds.

It feels ironic that an area that has prospered so much from its inclusive, art-focused culture, now finds itself in a position where its constituents are turning away the very things that made it what it is. Probably the things that attracted the constituents in the first place no less.

I went to Woodford this year and discovered a stunning part of Australia that I may never have discovered. I have already since booked a romantic weekend with my wife so that she too can discover it. Whilst at Woodford Splendour my friends and I stayed at a great B

P2118	Project Website Submission	01/11/2010	Online Submission from Tom Gillberg of Student (support)	It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. In relation to employment and wages the Byron local government area has one of the Stateâ□™s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. A place where people can get together and enjoy the beauty that Byron Bay has to offer. This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this. Name: Tom Gillberg Organisation: Student Address: 1/5 botany st randwick n.s.w 2031 IP Address: 123-243-81-252.tpgi.com.au - 123.243.81.252 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2119	Project Website Submission	01/11/2010	Online Submission from leah hill (support)	With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity. I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. Name: leah hill Address: 40/291 darlington dr banora point nsw 2486 IP Address: - 202.124.72.119 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2120	Project Website Submission	01/11/2010	Online Submission from Matt McIntosh (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a â□œsustainableâ□□ site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people.

Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing.

North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map.

P2121	Project Website Submission	01/11/2010	Online Submission from kim dyer (support)	I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. Name: kim dyer Address: 5 Gumara st Randwick 2031 IP Address: c-61-68-63-101.hay.connect.net.au - 61.68.63.101 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2122	Project Website Submission	01/11/2010	Online Submission from Emma Shapland (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy. Name: Emma Shapland Address: 6 danielle St Boondall Q 4034 IP Address: 220-253-88-72.qld.netspace.net.au - 220.253.88.72 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2123	Project Website Submission	01/11/2010	Online Submission from Emma Petraglia (support)	North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this. Name: Emma Petraglia Address: 16 Craig Avenue Ferntree Gully IP Address: 203-196-56-228.static-dsl.vic.aussiewholesale.net - 203.196.56.228 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2124	Project Website Submission	01/11/2010	Online Submission from Edward Gregory` of nil (support)	The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. The approval of the North Byron Parklands proposal will benefit the local creative industries and lead to a new wave of new and interesting jobs for the youth in the area. Let?s build the local industry and make The Byron Shire a hub for creative individuals. With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. Name: Edward Gregory` Organisation: nil Address: 27 Gladstone Pde Lindfield NSW IP Address: 124-169-7-45.dyn.iinet.net.au - 124.169.7.45 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2125	Project Website Submission	01/11/2010	Online Submission from Ellen Hammond (support)	There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city. The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â˜I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ™. (Donna Sue Sanders â“ Executive Director of the Daytona State Foundation). Name: Ellen Hammond Address: 63 Anvil Street Greta NSW 2334 IP Address: cpe-58-168-18-48.lns4.cht.bigpond.net.au - 58.168.18.48 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2126	Project Website Submission	01/11/2010	Online Submission from Natalie White (support)	It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve this application. Name: Natalie White Address: 15 Baldwin Ave Asquith 2077 IP Address: c211-30-222-2.thorn2.nsw.optusnet.com.au - 211.30.222.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2127	Project Website Submission	01/11/2010	Online Submission from Jayden Williamson (support)	I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government. The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. Name: Jayden Williamson Address: 15 Tank St Aspley IP Address: cpe-121-223-96-192.lnse2.woo.bigpond.net.au - 121.223.96.192 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2128	Project Website Submission	01/11/2010	Online Submission from Kate Parker (support)

In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force.

The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people.

From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application.

The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.

P2129	Project Website Submission	01/11/2010	Online Submission from edward barry (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. The North Byron Parklands event site will generate significant economic benefits to the region. There will be an increase in jobs for the maintenance and management of the North Byron Parklands site as well as employment opportunities from the organisations of the proposed events at the site. The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

P2130	Project Website Submission	01/11/2010	Online Submission from Julia Wells of University of Western Australia (support)	Name: edward barry Address: 1/50 wiley st waverleysydney IP Address: c-61-69-174-96.syd.connect.net.au - 61.69.174.96 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Dear NSW Department of Planning, Splendour in the grass is run by a community of people that care. They care about community values, environmental preservation and animal welfare. The music event itself celebrates not only creativity and social cooperation, but also the beautiful surrounds of Byron Bay, NSW. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â□˜I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ□™. (Donna Sue Sanders â□“ Executive Director of the Daytona State Foundation). If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in the community. Please allow splendour in the grass to continue to showcase your state as the beautiful,

				generous and friendly land that it is. Please bring splendour home. Sincerely, Julia Wells Name: Julia Wells Organisation: University of Western Australia Address: 44 Clive St Bicton Perth 6157 IP Address: comp30.ichr.uwa.edu.au - 130.95.146.30 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2131	Project Website Submission	01/11/2010	Online Submission from Naomi Luck (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is

				vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. Name: Naomi Luck Address: 105 Balmain road Leichhardt NSW 2040 IP Address: 123-2-29-11.static.dsl.dodo.com.au - 123.2.29.11 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2132	Project Website Submission	01/11/2010	Online Submission from Simone Feletti (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site.

Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant.

The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunites and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.

P2133	Project Website Submission	01/11/2010	Online Submission from toni smyth (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. Name: toni smyth Address: 28 lockwood crescentwithers wa 6230 IP Address: 203-206-97-214.dyn.iinet.net.au - 203.206.97.214 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2134	Project Website Submission	01/11/2010	Online Submission from Aleysha Spry (support)	I am so excited to attend Splendour and the beautiful home to where the festival belongs. We need to be at home, where its easy to get to and plenty of places to stay and other sites and things to do. Name: Aleysha Spry Address: 14 Burragorang Road Ruse IP Address: 60-240-65-236.tpgi.com.au - 60.240.65.236 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2135	Project Website Submission	01/11/2010	Online Submission from Alan Watters (support)	I am in favour of Splendour In The Grass (SITG) using the North Byron Parklands Annually. One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in

managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands.

Clearly, the SITG staff are environmentally considerate, and are fully aware of the surrounding areas ajoining the Parklands. Please approve their request to Host their event.

Regards,

Alan Watters

P2136	Project Website Submission	01/11/2010	Online Submission from Ben Harding (support)	There are literally thousands of tourism businesses within 75 kilometres of the proposed North Byron Parklands event site. Most of these businesses are family owned and operated and as such are likely to benefit income wise from this proposal. With a flatter than normal couple of years this extra income will be warmly welcome by these businesses. Letâ□™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ□™s get on with the job of creating exciting training and employment opportunities for our young people. Even better just to have it in NSW. Name: Ben Harding Address: 3 Ritchard Avenue, Coogee, 2034 IP Address: 60-242-27-228.static.tpgi.com.au - 60.242.27.228 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2137	Project Website Submission	01/11/2010	Online Submission from Ash Hall (support)	North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. Name: Ash Hall Address: 50 Rawson place, Kyneton, Victoria, 3444 IP Address: cpe-124-180-0-38.lns1.lon.bigpond.net.au - 124.180.0.38 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2138	Project Website Submission	01/11/2010	Online Submission from jason bridge (support)	My name is jase,it was splendour that first bought me to this wonderful area and lifestyle we all enjoy 9 years ago...Since this i have created my own business and have my own house.this year was the first splendour ive mist since the 2 day festival began... splendour is byron bay and belongs were it began...splendour bought me here its a part of us all that live in this wonder place we call home.. Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. Name: jason bridge Address: 69 north creek rd lennox head....2478 IP Address: cpe-121-218-191-223.lnse4.cht.bigpond.net.au - 121.218.191.223 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2139	Project Website Submission	01/11/2010	Online Submission from Sophie Power of university of adelaide (support)	Please consider the new proposal for splendour in the grass in byron bay. It is a world class festival and is integral for the tourism of both australia and byron bay. One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.

The approval of this proposal will lead to new employment opportunities that may not have previously been offered on the north coast of NSW. New and exciting jobs will boost the youth employment and inspire young adults to remain in the local area after completing study.

Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW.

P2140	Project Website Submission	01/11/2010	Online Submission from Caitlin Wynn (support)

It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklands environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity.

For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers.

The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future.

P2141	Project Website Submission	01/11/2010	Online Submission from Kim Hosking (support)

The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast.

The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the â□˜coast to hinterlandâ□™ wildlife corridor. The extended â□˜restâ□™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves.

P2142	Project Website Submission	01/11/2010	Online Submission from Sarah Garden (support)	At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended. In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. Name: Sarah Garden Address: 44/7 bortfield drive Chiswick IP Address: d58-105-140-100.dsl.nsw.optusnet.com.au - 58.105.140.100 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2143	Project Website Submission	01/11/2010	Online Submission from Tanya Lovely (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. As a youth of the area I am constantly searching for ways to broaden my horizons. I believe this proposal will offer new opportunities, new jobs, new experiences and new ways to develop. P2146	Project Website Submission	01/11/2010	Online Submission from Mitchell McLean of University of Technology Sydney (support)	Byron Bay and Splendour in the grass are two pee's in a pod, from a cultural perspective the towns identity and the identity of the festival represent very similar values. Splendour in the grass stands for everything that is youth culture making it fitting to hold the festival in a town where no one grows old, Byron Bay. I myself have attended the Splendour in the Grass festival three times at Byron Bay 07 08 09 and every time we have been there we have spent an extra week either before or after

				the festival in Byron and even though Splendour itself is only on for 2 days of that week the festival feels like it goes for the whole week we are there due to the town of Byron Bay be alive. I have done quite abit of travel around the world in the past couple years and as you meet people who are interested in coming to Australia they will allways ask you where should they visit and a bunch of times you meet these people at festivals oversea's so they ask you what festivals they should go to. My answer is allways Byron Bay and Splendour in the Grass combining the two only makes sense. In conclusion Splendour in the Grass is all that is Byron Bay! Name: Mitchell McLean Organisation: University of Technology Sydney Address: 61 Moansh Road Gladesville 2111 IP Address: ppp56d1.dsl.pacific.net.au - 125.255.22.209 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2147	Project Website Submission	01/11/2010	Online Submission from james martin (support)	The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in

the area.

Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

P2148	Project Website Submission	01/11/2010	Online Submission from Fleur Billing (support)	One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed. This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments. The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. Name: Fleur Billing Address: 9 Glyde StreetEast FremantleWA 6158 IP Address: - 203.14.52.45 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2149	Project Website Submission	01/11/2010	Online Submission from scott chant (support)	The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. A place where people can get together and enjoy the beauty that Byron Bay has to offer. Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. I have been to every single Splendour in the Grass since it started and whenever I spoke to locals in town (including retailers and other shop owners) they didn't have a problem with the event and pretty much all of them spoke positively about it. P2150	Project Website Submission	01/11/2010	Online Submission from William Appleton of Student (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives. Name: William Appleton Organisation: Student Address: 1189 Farnborough rd IP Address: leslie3.lnk.telstra.net - 203.45.9.172 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2151	Project Website Submission	01/11/2010	Online Submission from Greta Devane (support)	From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. Name: Greta Devane Address: 30 Couldrey St Bardon Qld 4065 IP Address: 225.131.dsl.brs.iprimus.net.au - 58.179.90.225 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2152	Project Website Submission	01/11/2010	Online Submission from george ambrose (support)	There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. the site can be used as a huge Australian tourism tool and a flagship for Australian music. Name: george ambrose Address: 12/1 Tewkesbury ave. Darlinghurst , NSW, 2010 IP Address: 123-2-19-17.static.dsl.dodo.com.au - 123.2.19.17 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2153	Project Website Submission	01/11/2010	Online Submission from scott fogden (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. It would a great shame for the Byron Shire to loose the Splendour in the Grass festival. The local community needs the festival, as it offers a huge amount of business for local shop owners, pubs, hotels, motels and camping grounds. Many of these local business will feel great financial pressure if Splendour in the Grass does not return to the region. The model of a green sustainable event space which gives back to its host community is a model we need, particularly if we want to sustain a vibrant creative culture.

P2154	Project Website Submission	01/11/2010	Online Submission from Melanie McCane (support)	The future of Byron Bay. Employment, community benefits, fun. Need we say more? A place where people can get together and enjoy the beauty that Byron Bay has to offer. Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer? Name: Melanie McCane Address: 38B Carabella rd Caringbah Sydney NSW 2229 IP Address: - 119.77.8.4 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2155	Project Website Submission	01/11/2010	Online Submission from sheryn FORNASIER (support)	With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. Name: sheryn FORNASIER Address: 31 Strong Avenue. Graceville IP Address: d110-32-7-20.rdl800.qld.optusnet.com.au - 110.32.7.20 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2156	Project Website Submission	01/11/2010	Online Submission from Tom Webb (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but letâ□™s create a high season in winter too by utilising North Byron Parklands! Name: Tom Webb Address: 13 Ingram St, Kensington, NSW, 2033 IP Address: cpe-121-210-50-169.bqcz1.ken.bigpond.net.au - 121.210.50.169 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2158	Project Website Submission	01/11/2010	Online Submission from Chad Grant (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the region?s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunites and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.

P2159	Project Website Submission	01/11/2010	Online Submission from Sarah McMahon (support)	Name: Chad Grant Address: 10 Argyle St Bonnells Bay IP Address: - 110.144.16.43 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. The future of Byron Bay. Employment, community benefits, fun. Need we say more? Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this

development will allow the growth of such popular events as Splendour in the Grass to stay in NSW.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

P2160	Project Website Submission	01/11/2010	Online Submission from Leah McNamara (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. If you were to analysis the professional event management of such festivals as Splendour in the Grass, Parklife, Shore Thing and Sunset Suns one could only come to the conclusion that these event operators are up there with the most successful an well managed events in Australia. Each of these events are owned and operated by members of North Byron

Parklands. Their expertise in event management is second to none and will be a huge advantage in ensuring the events hosted at this site are done so in a compliant and professional way.

All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector.

North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the regionâ□™s creative industries, providing world class training and work experience opportunities.

P2161	Project Website Submission	01/11/2010	Online Submission from Hannah Fickler (support)	After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve this application. The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. Name: Hannah Fickler Address: 9 St Johns Ave Month Abert, Vic, 3127 IP Address: cpe-58-175-85-13.bfcz1.lon.bigpond.net.au - 58.175.85.13 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2162	Project Website Submission	01/11/2010	Online Submission from Penny Koutras (support)	It seems they most likely disturbance for the environment will be light and noise and also traffic. Having reviewed North Byron Parklandâ□™s environmental, health and safety management manual it is clear that they have put a lot of energy into assessing and mitigating any potential environmental risks associated with these activities. The work they have done for managing the environment is above and beyond what one would expect for such a low impact activity. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. Name: Penny Koutras Address: 72 Sydenham Rd Marrickville NSW 2204 IP Address: 27-32-55-187.static.tpgi.com.au - 27.32.55.187 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2163	Project Website Submission	01/11/2010	Online Submission from Ellyce Hinchcliffe (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. North Byron Parklands is proposing a sustainable arts and music venue that will provide significant employment opportunities to a range of people in the Byron and Northern Rivers region. Many of the jobs will suit our younger people and with an aging demographic this is vital to ensuring that there is an opportunity to up skill our youth in a growing and profitable sector. Jobs are very important. Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that. Name: Ellyce Hinchcliffe Address: 52 Commercial Rd, Prahran VIC 3181 IP Address: cpe-120-146-195-104.static.vic.bigpond.net.au - 120.146.195.104 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2164	Project Website Submission	01/11/2010	Online Submission from Braden Bird (support)	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. North Byron Parkland events are not only for the youth, theyâ™re for the whole community, young and old. Events can rejuvenate and reconnect us with our elders and our juniors. Please seriously consider having the event home at Byron Bay. Music festivals such as Splendour In The Grass really do bring people together. Everyone is out to have a good time and they are great for tourism. Thankyou, Braden Bird Name: Braden Bird Address: 6 The Corso, Forster 2428

P2165	Project Website Submission	01/11/2010	Online Submission from KYLIE TRZCINSKI (support)	As soon as I started reading about this proposal I had an instant realization of the benefits North Byron Parklands would bring to our local economy but also to my family. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people. When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Name: KYLIE TRZCINSKI Address: 5 Carlotta Street IP Address: 229.133.dsl.brs.iprimus.net.au - 58.179.92.229 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2166	Project Website Submission	01/11/2010	Online Submission from Kelly Searancke (support)	The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. This proposal is so important for the Northen Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce.

P2167	Project Website Submission	01/11/2010	Online Submission from Kate Moloney (support)	Name: Kelly Searancke Address: 108 Lawson Street, Redfern 2016 IP Address: - 115.186.229.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Splendour in the Grass is clearly attempting to do the right thing here. Please don't let a small group of people ruin all the fantastic experiences that Splendour has to offer. Byron is Splendour's home, please let it come back. There is time allocated at this site for major events, why not allow one as widely loved and as efficiently run as Splendour to take a few of those days. The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. One of the things that really impresses me about the North Byron Parklands proposal is the level of community consultation they have undertaken. From public planting days to environmental forums, site tours to newsletters and letter box drops, these guys have demonstrated a strong willingness to communicate and listen to the community. I feel they have shown that they will more than adequately manage a variety of events at this site in a professional and sensitive manner. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a

				lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project.

P2168	Project Website Submission	01/11/2010	Online Submission from Courtney Lyons (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. PLEASE let this happen. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

P2170	Project Website Submission	01/11/2010	Online Submission from Rhiannon Bridgeman (support)	While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local business? income. There is no reason why this proposal should not be approved by state government. A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands! Name: Rhiannon Bridgeman Address: 174 Kentucky St Armidale NSW 2350 IP Address: - 129.180.76.53 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2171	Project Website Submission	01/11/2010	Online Submission from Antonia Pritchard (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. P2173	Project Website Submission	01/11/2010	Online Submission from Virginia Luff of Sunset (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. The local government must get behind the North Byron Parklands proposal and bring Splendour in the Grass back to the Byron Shire area. The Byron shire needs the tourism, the culture and the job opprotunities that will come from this development. Lets get behind it! Name: Virginia Luff Organisation: Sunset Address: 7 Gillies Crt, Rural View, Qld. 4740 IP Address: dsl-202-72-160-68.wa.westnet.com.au - 202.72.160.68 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2174	Project Website Submission	01/11/2010	Online Submission from Caroline Draperich (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning. The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home!

I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved!

Thereâ□™s not as much employment opportunities as people think around Byron Bay, the majority of the businesses are non employing, sole operators. North Byron Parklands would improve these numbers for the youth and others.

P2175	Project Website Submission	01/11/2010	Online Submission from Teighan Donnelly (support)	Byron Bay is what makes Splendour in Grass. Its the vibe that Byron gives off. Its a great place and makes this festivals that much more special. Please bring it home. It would a great shame for the Byron Shire to loose the Splendour in the Grass festival. The local community needs the festival, as it offers a huge amount of business for local shop owners, pubs, hotels, motels and camping grounds. Many of these local business will feel great financial pressure if Splendour in the Grass does not return to the region. Name: Teighan Donnelly Address: 64 Mooloolah Drive, MInyama QLD 4575 IP Address: ppp188-254.static.internode.on.net - 150.101.188.254 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2176	Project Website Submission	01/11/2010	Online Submission from Luke Tarasin (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved!

				The culture of Byron Bay is fantastic and eye opening. This proposal will share our culture with all.
				Letâ□™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ□™s get on with the job of creating exciting training and employment opportunities for our young people.
				Name: Luke Tarasin Address: 3/42 Pioneer St, Zillmere. Queensland. 4034 IP Address: cpe-58-169-160-41.lns3.cha.bigpond.net.au - 58.169.160.41 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2177	Project Website Submission	01/11/2010	Online Submission from Luke Salem (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes.

In relation to employment and wages the Byron local government area has one of the Stateâ□™s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities.

North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me.

P2178	Project Website Submission	01/11/2010	Online Submission from David Stewart (support)

The North Byron Parklands will be the 1st proposed land use that will see a massive improvement in environmental outcomes for the site. For many years the North Byron Parklands site has been used for intensive agricultural activities and land clearing, impacting on the site dramatically. North Byron Parklands has planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year to restore the site. This has to be seen as a great result for the local environment.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a quality venue for young people in our region.

P2179	Project Website Submission	01/11/2010	Online Submission from Stephanie Speight (support)	Splendour in the Grass is one of Australia's premier music and arts events. Personally the festival I attended remains one of the best experiences of my life, and was totally worth the necessary interstate travel. Surely a worthwhile attraction for every area, North Byron Parklands allowing Splendour in the Grass to operate in a sustainable, safe way that is causing minimal harm to locals and the environment can only be a good thing. Not only for the Australian, and international, music scene, but also tourism and the local economy North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. Name: Stephanie Speight Address: 38 Brown Street Heidelberg Victoria 3084 IP Address: 202-161-29-231.dyn.iinet.net.au - 202.161.29.231 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2180	Project Website Submission	01/11/2010	Online Submission from morag mcnichol (support)	Splendour in the Grass is the best festival Australia has to offer, not only do they bring brilliant musicians over for us but they make the Australian landscape a headliner as well. Byron Bay epitomises the beauty of Australia, and Splendour gives the international community a chance to appreciate it just as much as the locals do. Go Splendour. Name: morag mcnichol Address: 195 Hale st Petrie Tce Brisbane IP Address: nocproxy01-b.net.qut.edu.au - 131.181.251.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2181	Project Website Submission	01/11/2010	Online Submission from Anastasia Tighe (support)	North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. North Byron Parklands offers young people the opportunity to interact with the wider community. Being young is all about getting out there and this proposal would provide a quality venue for young people in our region.

				Name: Anastasia Tighe Address: 32 Cary St Marrickville NSW 2204 IP Address: c211-30-137-242.rivrw3.nsw.optusnet.com.au - 211.30.137.242 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2182	Project Website Submission	01/11/2010	Online Submission from Sam Dwyer (support)	If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one? Name: Sam Dwyer Address: 4 Gilmore Street Wollongong

				IP Address: d110-33-103-211.mas800.nsw.optusnet.com.au - 110.33.103.211 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2183	Project Website Submission	01/11/2010	Online Submission from Coreen Flower (support)	I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal. In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken. Name: Coreen Flower Address: 1/162 Dangar st Armidale 2350 IP Address: 122-148-197-139.static.dsl.dodo.com.au - 122.148.197.139 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2184	Project Website Submission	01/11/2010	Online Submission from Sophie Kleinig of Eventful (support)	Byron is where Splendor belongs - bring it home! Name: Sophie Kleinig Organisation: Eventful Address: 42 Burke StreetChifleySydney NSW 2036 IP Address: integra.integranet.com.au - 210.87.21.250 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2185	Project Website Submission	01/11/2010	Online Submission from Katya Zawada (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. The North Byron Parklands proposal is a fantastic idea offering various ways to boost and maximize our local economy. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up

and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

P2186	Project Website Submission	01/11/2010	Online Submission from Nick van Bussel (support)	We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal. The North Byron Parklands proposal will provide social benefits across the Northern Rivers area. Cultural events are valued by the community as it adds to their quality of life and creates improved social cohesion, lifestyle improvement, diversity, and increased creativity. Name: Nick van Bussel Address: 83 Main Street, Kangaroo Point, QLD 4169 IP Address: - 203.94.189.210 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2187	Project Website Submission	01/11/2010	Online Submission from Sophie Day of na (support)	Splendor was born and grown in Byron Bay, and is a festival whose identity and vibe are distinctly Byron...It isn't a true Splendor if it's not held in the Northern Rivers region. Not only does it help perpetuate the local economy, it gives local artists a chance to perform in front of their home crowd with the added bonus of national exposure. Although its sad that Belongi fields can no longer host Splendor the opportunity for Byron to reclaim Splendor in the Parklands site is unsurpassable. Name: Sophie Day Organisation: na Address: alstonville IP Address: 110-174-209-103.static.tpgi.com.au - 110.174.209.103 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2188	Project Website Submission	01/11/2010	Online Submission from Talisa Rimland (support)	North Byron Parklands proposed event site will provide a wide variety of employment opportunites to the reagion that is said to increase as the years go on. North Byron Parklands require staff to maintain and manage the event site plus each event organistaion will be looking to the local comunity for employees for their events. There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. Why wouldn?t we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal. Name: Talisa Rimland Address: 2 Fifth Avenue Shoalwater WA 6169 IP Address: cpe-124-182-52-251.lns6.wel.bigpond.net.au - 124.182.52.251 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2189	Project Website Submission	01/11/2010	Online Submission from Daniel Neill (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being North Byron Parklands have undertaken a detailed economic impact assessment which bodes well for the tourism industry should it be approved. Projections show that tens of thousands of people will visit the area each year and this influx of people will significantly bolster our tourism businesses. With so many locals relying on the tourism industry for their income, such a project is very welcome. We really need this to get the go ahead. My friends and I will go to events at North Byron Parklands. Hopefully we will be able to get jobs at events. Name: Daniel Neill Address: 60 Kenilworth Cres,Cranebrook 2749 NSW IP Address: 115-64-91-54.static.tpgi.com.au - 115.64.91.54 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2190	Project Website Submission	01/11/2010	Online Submission from Carmen James (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. This proposal will create a cultural breading ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home! Name: Carmen James Address: 602/187 Liverpool St, Sydney IP Address: - 120.19.87.216 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2196	Project Website Submission	01/11/2010	Online Submission from kati contreras (support)

There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city.

It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning.

We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level!

P2197	Project Website Submission	01/11/2010	Online Submission from Ashley Stapleton of splendour lover (support)	Splendour in the Grass is the highlight of my year, and has been for the past 3 years. Splendour is like no other festival, although it makes an enormous profit, Splendour organisers take great care in conserving the environment. By 'bringing splendour home' the North Byron Parklands will reap the benefits of Splendour organisers paying for this very conservation. Undoubtedly, for 20 days of the year, the parklands will be used in excess, however for those remaining 280 days it can be recovered. Splendour in the Grass is a festival which brings joy to tens of thousands of people, it provides work, stimulates tourism and aids local businesses. Admittedly there are numerous disadvantages of holding the festival however organisers strive to minimise problems and ultimately this festival is just too good to turn down! Don't deny Splendour it's true home, Byron and Splendour are synonymous. P2198	Project Website Submission	01/11/2010	Online Submission from Nicola Garland (support)

It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised.

North Byron Parklands proposed event site will provide a wide variety of employment opportunites to the reagion that is said to increase as the years go on. North Byron Parklands require staff to maintain and manage the event site plus each event organistaion will be looking to the local comunity for employees for their events.

Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

P2199	Project Website Submission	01/11/2010	Online Submission from Hayley Hoctor (support)

North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

P2200	Project Website Submission	01/11/2010	Online Submission from Ryan Stuchbery (support)

If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species.

P2201	Project Website Submission	01/11/2010	Online Submission from Amber McDonald (support)	Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome. There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth. Name: Amber McDonald Address: 5/70 Phillip RdPutney NSW2112 IP Address: 110.20.53.14.optusnet.com.au - 110.20.53.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2202	Project Website Submission	01/11/2010	Online Submission from Robyn Daniels (support)	Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore. Name: Robyn Daniels Address: 2 Curlew Place, Wurtulla 4575 IP Address: cpe-121-223-64-218.lnse2.woo.bigpond.net.au - 121.223.64.218 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2203	Project Website Submission	01/11/2010	Online Submission from Aimee Rasa (support)

North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region.

The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense.

This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting.

P2204	Project Website Submission	01/11/2010	Online Submission from Joshua Clements (support)

The Splendour In The Grass music festival is not only for our state's entertainment purposes, it brings massive names from around the world which also brings much needed tourism to the precious Byron Bay area. I have personally met many of the business owners of the area and they have all expressed great enthusiasm towards the festival and the business it brings. In 2010, the fact that it was moved to Woodford, QLD, was a distressing time for the locals in Byron.

The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government.

				NSW 2320 IP Address: 120.75-67-202.dynamic.dsl.syd.iprimus.net.au - 202.67.75.120 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2205	Project Website Submission	01/11/2010	Online Submission from Peter Evans (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region. I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience.

				Name: Peter Evans Address: 10 Ellinbank St Newborough, VIC 3825 Australia IP Address: 119-18-18-211.cust.aussiebb.net - 119.18.18.211 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2206	Project Website Submission	01/11/2010	Online Submission from Alexandra Hah (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. Name: Alexandra Hah

				Address: 6 William Street, Keiraville 2500, NSW IP Address: cpe-58-166-110-115.lnse5.cht.bigpond.net.au - 58.166.110.115 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2207	Project Website Submission	01/11/2010	Online Submission from Billy Dimas of Subway Development NSW/ACT Pty Ltd (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. North Byron Parklands commitment to the environment and vegetation management should be applauded. I see no reason at all why this shouldnâ□™t go ahead. Name: Billy Dimas Organisation: Subway Development NSW/ACT Pty Ltd Address: 39 Langer Ave, Dolans Bay NSW 2229 IP Address: 110-175-251-232.static.tpgi.com.au - 110.175.251.232 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2208	Project Website Submission	01/11/2010	Online Submission from emily battese (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficulty. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approval projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve

this application.

We need to look to the future for training and employment opportunities. A real estate industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal.

P2209	Project Website Submission	01/11/2010	Online Submission from Imogen Tanner (support)	After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. Name: Imogen Tanner Address: Unit 425 Dixon StreetAUCHENFLOWER QLD 4066 IP Address: ppp188-94.static.internode.on.net - 150.101.188.94 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2210	Project Website Submission	01/11/2010	Online Submission from Lachlan McGregor (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. Name: Lachlan McGregor Address: 16 Matthews Cres Port Kembla IP Address: dsl-220-253-78-14.nsw.netspace.net.au - 220.253.78.14 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2211	Project Website Submission	01/11/2010	Online Submission from Carolyn Peake (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth. Name: Carolyn Peake Address: 5 Douglas Street, Millswood, SA, 5034 IP Address: logfiller1.news.net.au - 165.69.90.8 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2212	Project Website Submission	01/11/2010	Online Submission from Natanya Milton (support)	North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen. While much is made of the Marshallâ□™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. Name: Natanya Milton Address: East Melbourne IP Address: 115-64-148-114.static.tpgi.com.au - 115.64.148.114 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2213	Project Website Submission	01/11/2010	Online Submission from Ashley O'Donnell (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. Name: Ashley O'Donnell Address: 2 Truscott Street Campbell ACT 2612 IP Address: 203-217-54-159.dyn.iinet.net.au - 203.217.54.159 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2214	Project Website Submission	01/11/2010	Online Submission from Jen Oswald of TAFE (support)	Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward. North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it. Name: Jen Oswald Organisation: TAFE Address: 17 Innes Ave, Hornsby IP Address: c211-30-222-50.thorn2.nsw.optusnet.com.au - 211.30.222.50 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2215	Project Website Submission	01/11/2010	Online Submission from Cara Murphy (support)	North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. Name: Cara Murphy Address: 32 Miriam St Holland Park West 4121,QLD

P2216	Project Website Submission	01/11/2010	Online Submission from allan collins (support)	With a very large number of people reliant on the tourism industry for their income, whether they are an employee or an owner-operator, the North Byron Parklands project represents a potentially substantial increase in business for these people. If you consider just the sheer number of punters the proposal will attract one can start to see the economic benefits which will flow to the region. I think most businesses would view this proposal in a positive light. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together. Name: allan collins Address: po box 280 west wyalong n.s.w.2671 IP Address: 125-168-47-163.wbroadband.net.au - 125.168.47.163 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2217	Project Website Submission	01/11/2010	Online Submission from Ashleigh Fletcher (support)	Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative industries. This alliance will provide the community with world class training and work experience opportunities.

				The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a â□œsustainableâ□□ site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site.
				Name: Ashleigh Fletcher Address: 6 Herman Way IP Address: cpe-138-217-252-236.lns2.wel.bigpond.net.au - 138.217.252.236 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2218	Project Website Submission	01/11/2010	Online Submission from Richard Foreman of RIchFit (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

				I am a frequent visitor to Byron Bay and have been attending Splendour in the grass for the past 3 years. I strongly believe that Splendour in the Grass should be held in Byron Bay. Thank you, Richard Foreman. Name: Richard Foreman Organisation: RIchFit Address: 15 Moriac Street Moorooka QLD 4105 IP Address: 203-214-109-176.dyn.iinet.net.au - 203.214.109.176 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2219	Project Website Submission	01/11/2010	Online Submission from Alison Hill (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal.

Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer?

P2220	Project Website Submission	01/11/2010	Online Submission from Lisa Tran (support)	To Whom It May Concern,

Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

The demographic characteristics of the region are indicative of an aging community with a high proportion of retiree aged people and many young people aged 20 to 34 leaving the area to seek education and employment opportunities. North Byron Parklands would definitely help provide employment for many of these young people.

We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level!

You need to listen and hear the public's support behind this great event!!

P2221	Project Website Submission	01/11/2010	Online Submission from adrian winther (support)

Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers.

There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth.

The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians.

P2222	Project Website Submission	01/11/2010	Online Submission from Rebecca Whittred (support)	The North Byron Parklands proposal will provide social benefits across the Northern Rivers area. Cultural events are valued by the community as it adds to their quality of life and creates improved social cohesion, lifestyle improvement, diversity, and increased creativity. Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore. Byron Bay is an amazing place and splendour on the grass is an amazing festival! Obviously they are meant to be together. Please let this be Splendour's new home!! Name: Rebecca Whittred Address: 12 Wilkins Place Drewvale 4116 IP Address: cpe-124-185-239-93.lns8.cha.bigpond.net.au - 124.185.239.93 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2223	Project Website Submission	01/11/2010	Online Submission from Ashleigh Bunter (support)	I support bringing the Splendour in the Grass festival back to its home in Byron Bay as I believe the new site of North Byron Parklands would be perfect for the internationally renowned festival and would in turn be very beneficial to the town of Byron as it would bring in lots of business for the community over a few days of the year with less impact on the town itself than was witnessed when the festival was hosted previously at Belongil Fields. To let such an opportunity pass by would be a shame. This site would be protected and looked after and not even used for most of the year and then easily accommodate large crowds and provide a very special place for people to journey to from all over Australia for the annual events that may take place there.

If we consider the important contributions to the region made by tourism such as income generation and the creation of jobs then it follows that approving projects that have a large positive effect on increasing tourism rates will be a good thing for the State of NSW. North Byron Parklands will be responsible for drawing thousands of intra and interstate visitors, most of whom will require accommodation, food and beverages and in many instances will actively pursue some form of paying leisure activity. To let such an opportunity pass the region by would be a crime.

Please help give Splendour its new home

Yours Sincerly

Ashleigh Bunter

P2224	Project Website Submission	01/11/2010	Online Submission from Darren Cope of NFS (support)

The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment?

Employment opportunities are getting harder and harder for many people in rural areas to find. With so many industries moving out of rural areas we need to encourage those businesses that want to set up in these regions with as much help as possible. I understand that North Byron Parklands will provide a large number of jobs across a very broad range skill sets. Projects of this nature should be approved on this basis alone.

I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved.

North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun.

P2225	Project Website Submission	01/11/2010	Online Submission from RONAN MAHON of Xpand (support)	North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year. We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it.

We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it.

North Byron Parklands has a strong focus on cultural management. This is shown by the proposed cultural centre aimed to provide learning opportunities for staff to build a greater

understanding of our local indigenous and non-indigenous ancestry.

This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering.

P2226	Project Website Submission	01/11/2010	Online Submission from Chelsea Peinke (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. Name: Chelsea Peinke Address: 212 Nicholson Road, Subiaco WA 6008 IP Address: 203-59-99-74.perm.iinet.net.au - 203.59.99.74 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2227	Project Website Submission	01/11/2010	Online Submission from Teagan Craig (support)	The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime.

P2228	Project Website Submission	01/11/2010	Online Submission from Danielle Magalhaes (support)	Name: Teagan Craig Address: 84 Canowie Road, Jindalee IP Address: cpe-58-174-24-90.jbcz2.cha.bigpond.net.au - 58.174.24.90 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Regarding the ecology of the site, having undertaken a number of vegetation and flora surveys, including detailed koala surveys, the North Byron Parklands group have completed more ecological assessments than other traditional developments such as housing, industrial estates, and quarries. This demonstrates that the organisation is serious about identifying and managing ecological issues. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. It is vitally important to the local tourism industry that the North Byron Parklands project is approved. This single project is expected to attract hundreds of thousands of visitors to the region each and every year. The flow on effects to the tourism operators will be significant and will also help to grow much needed jobs for the region. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire.

				Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents.
				Name: Danielle Magalhaes Address: 24 Qualtrough Street - QLD 4102 Brisbane IP Address: - 202.124.73.42 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2229	Project Website Submission	01/11/2010	Online Submission from Zak Solari (support)	When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times. There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning

				involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals.
				Name: Zak Solari Address: 15 Namoi Place, East Lindfield, 2070, Sydney, NSW IP Address: c122-106-230-165.belrs3.nsw.optusnet.com.au - 122.106.230.165 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2230	Project Website Submission	01/11/2010	Online Submission from Cara Stass of student (support)	Please approve this project, it really sounds exciting for various reasons, arts, employment and cultural awareness. How fantastic! Not to mention tourism. I am planning on travelling from Perth to see splender so.. come on guys..With regards to the wildlife corridor it has been significantly degraded over many decades due to such activities as primary production and agriculture. As such it is currently highly fragmented and in need of revegetation. The Parklands proposal will see the biggest rehabilitation program the area has seen for the past 5o years as a result of its detailed vegetation management plan which will result in thousands of trees being planted in strategic areas. There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city.

This proposal is so important for the Northen Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce.

P2231	Project Website Submission	01/11/2010	Online Submission from Carly Djosovic of - (support)	A place to meet new people, attend exciting events, and be creative and inspired? I say bring it on North Byron Parklands! The North Byron Parklands project will see upwards of 150,000 patrons coming to the region when it reaches full capacity. All of these people will need places to stay and food and other supplies. They will spend on tourism attractions and help bolster the local economy. From a tourism perspective this project makes great sense. Splendour not only provides a cultural engaging event for young people but also opens up countless job opportunities and business for the town. It really seems ridiculous to be giving away such a easy (not to mention excessive) boost to the town's economy. Splendour takes place in the perfect time of year for Byron. Come late July the summer tourists have long gone, and the weekend of Spendour would break up the winter lull before summer came back around again. BRING SPLENDOUR HOME!! Name: Carly Djosovic Organisation: - Address: 26 Cyclades Crescent, Currumbin Waters QLD 4223 IP Address: 12.152.dsl.brs.iprimus.net.au - 58.179.111.12

P2232	Project Website Submission	01/11/2010	Online Submission from Mykolas Byrne of UQ (support)	While much is made of the Marshallâ□™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are

specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year.

Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.

Further to all this, I note the positive impact that the Woodford Folk Festival has had on its permanent site on the Sunshine Coast over the last few years. I believe that granting permission to Splendour in the grass to maintain and develop this site would provide similar opportunities for a balance between productive use and stewardship of our natural resources.

P2240	Project Website Submission	01/11/2010	Online Submission from Lilly Kendall-Langley (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. The Northern Rivers region needs to plan ahead for future employment and training opportunities for our young community. We need to offer options to the young members of the community to encourage them to stay in the area. This proposal will provide these incentives. Name: Lilly Kendall-Langley Address: 41 Williton road Karrinyup 6018, perth WA IP Address: lib-vrhl-l06.library.uwa.edu.au - 130.95.106.139 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2241	Project Website Submission	01/11/2010	Online Submission from jacqui laurenson of studio popsicle (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being With the recent global financial crisis many businesses in the area were hit hard.

Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals.

With respect to the mapped wildlife corridor it should be pointed out that many parts of it identified as high conservation have in fact been cleared by previous land owners. The North Byron Parklands proposal has not only committed to helping restore this corridor, they have also committed to doing so in accordance with the Byron Shire Council wildlife map. This means having the opportunity to actually realise â□œon-groundâ□□ what the currently inaccurate council map purports is in existence. The end result will be a greatly improved corridor that actually has some functioning capabilities.

It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the â□œSplendid Initiativeâ□□ offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice.

P2243	Project Website Submission	01/11/2010	Online Submission from Angie Atkins (support)

The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term.

In recent times visitor day trips to the northern rivers has been declining. Coupled with a downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of time include cultural event activities such as those proposed by North Byron Parklands. This business is capable of attracting hundreds of thousands of visitors each year to the northern rivers which will be a huge boon for the area.

This proposal will create a cultural breading ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home!

P2245	Project Website Submission	01/11/2010	Online Submission from Liam Doherty (support)	With the recent global financial crisis many businesses in the area were hit hard. Employment opportunities diminished and there is a real need for viable employers such as the proposed North Byron Parklands. The jobs this group will provide are going to be extremely important to many families and individuals. North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. Name: Liam Doherty

				Address: Mudgeeraba, Queensland IP Address: dsl-202-173-177-116.qld.westnet.com.au - 202.173.177.116 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2246	Project Website Submission	01/11/2010	Online Submission from Alex McGrath (support)	We love Splendour, and we love Byron, and I think the two belong together. All the locals in Byron we spoke to when we were on out way back to Sydney from Woodford expressed enthusiasm towards Splendour returning. They love Splendour like we do. Woodford was great, but not 100% suitable, so we want splendour back in Byron!!! With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. With such a massive projected increase in the population of the north coast how are people expected to find meaningful work? It is only by governments thinking outside of the traditional tourism and accommodation industries and assisting other sectors to operate that such jobs can be made available. Parklands covers an industry that can provide lots of local jobs.

Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved.

I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth.

P2247	Project Website Submission	01/11/2010	Online Submission from Hannah Mitchell (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future. Name: Hannah Mitchell Address: 8 Wood St Sandringham VIC 3191 IP Address: 220.253-194-80.vic.netspace.net.au - 220.253.194.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2248	Project Website Submission	01/11/2010	Online Submission from Grace Hayman-King (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. In relation to employment, with so many people moving to coastal areas governments have a role as planners to ensure that industries and the jobs they bring are afforded every opportunity of success. Parklands is one such business that makes good sense to locate in the Byron Shire. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. Name: Grace Hayman-King Address: 45 Wilden Street Paddington Brisbane Queensland Australia 4064 IP Address: c122-108-252-85.kelvn3.qld.optusnet.com.au - 122.108.252.85 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2249	Project Website Submission	01/11/2010	Online Submission from Kate Phippard of Student (support)	One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen. From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. Name: Kate Phippard Organisation: Student Address: 40 College Cresent, Parkville, Vic, 3052 IP Address: 125-253-96-28.static.cpe.bigair.net.au - 125.253.96.28 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2250	Project Website Submission	01/11/2010	Online Submission from Nadeem Nav (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner. In the past the Splendour in the Grass festival has provide young adults with high level training in many areas, plus, supported creative youth initiatives like Splendid. These opportunities offered to the young community are truly invaluable to our region. Name: Nadeem Nav Address: 2 Ambrym Avenue,Frenchs Forest IP Address: c122-106-242-13.belrs3.nsw.optusnet.com.au - 122.106.242.13 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2251	Project Website Submission	01/11/2010	Online Submission from Nick Addlem (support)

If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance.

As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive.

Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW.

For the educational institutions around the Northern Rivers this proposal is very positive. Students can study at the institution and gain on the ground experience and field work at North Byron Parklands in areas such as ecology management, event management and traffic management.

Thank you.

Sincerely regards,

Nick Addlem

P2253	Project Website Submission	01/11/2010	Online Submission from Amber Chapman (support)

12 months after the first major event at the proposed event site, North Byron Parklands will commission an in depth ecological impact assessment and review. Any reasonable recommendations arising from the review with be processed through the environmental, health and safety manual created especially for the parklands site. This will ensure the site will be ecologically sound for future major events.

If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments.

The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous.

P2258	Project Website Submission	01/11/2010	Online Submission from Kane Boyce (support)

This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and Noth byron Parklands will provide this.

Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home!

One of the most significant benefits for the environment coming out of this application is the proponent?s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

P2261	Project Website Submission	01/11/2010	Online Submission from Olivia Robinson (support)

North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments.

North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

North Byron Parklands would provide many opportunities for young people to gain experience in professional event management. This is something that just would not be provided if Splendour in the Grass was not held in Byron Bay. This is a great was of retaining our young professionals and aspiring professionals.

P2263	Project Website Submission	01/11/2010	Online Submission from Lucienne Cassidy (support)	As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected. There are not very many opportunities in the far north coast for professional event management experience, especially since Splendour in the Grass has (hopefully temporarily!) gone. North Byron Parklands would provide excellent training in the area of event management. With up twenty days of events a year and the associated planning involved with both large and small events, this is a jewel for retaining our young professionals and aspiring professionals. It seems the most likely disturbance for the environment will be light and noise and also traffic.

				Name: Lucienne Cassidy Address: 8 Killarney Street Mosman IP Address: pvsyslb0.ee.unsw.edu.au - 149.171.67.12 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2264	Project Website Submission	01/11/2010	Online Submission from Leanne Smith of - (support)	Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. Name: Leanne Smith Organisation: - Address: 2/98 Thynne RoadMorningside, Qld 4170 IP Address: 110-174-203-80.static.tpgi.com.au - 110.174.203.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2265	Project Website Submission	01/11/2010	Online Submission from Helen Gardner of UNSW (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately $55,000 compared with $71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region. The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal. Name: Helen Gardner Organisation: UNSW Address: 13/269 Riley Street, Surry Hills, NSW, 2010 IP Address: - 129.94.247.20 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2266	Project Website Submission	01/11/2010	Online Submission from Michael Mai (support)	There needs to be a dedicated area for the youth to gather together and celebrate life. Young people will organise parties and have a good time no matter if there is large event venues or not. It is up to the adult members of the community to carry the youth by supporting venues designed for the youth. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people.

				Name: Michael Mai Address: 8 Flinders Rd. Woolooware 2230 IP Address: c122-108-142-122.mirnd3.nsw.optusnet.com.au - 122.108.142.122 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2267	Project Website Submission	01/11/2010	Online Submission from Elise Coran of Peats Ridge Festival (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. In recent times visitor day trips to the northern rivers has been declining. Coupled with a downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of time include cultural event activities such as those proposed by North Byron Parklands. This business is capable of attracting hundreds of thousands of visitors each year to the northern rivers which will be a huge boon for the area. Name: Elise Coran Organisation: Peats Ridge Festival

				Address: 13 Fitzroy Street, Newtown 2042 IP Address: 203-206-181-66.perm.iinet.net.au - 203.206.181.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2268	Project Website Submission	01/11/2010	Online Submission from Jess Flynn (support)	The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Byron Bay is built on its beautiful natural assets and many tourist attractions yet like many other coastal towns it suffers from seasonal swings. The North Byron Parklands proposal would significantly smooth tourism demand by attracting visitors in traditionally slow times. As tourism is so important to the town and surrounding areas such projects should be openly encouraged. Name: Jess Flynn Address: 4/54 Erneton St, Newmarket 4051 IP Address: - 210.18.236.126 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210

P2269	Project Website Submission	01/11/2010	Online Submission from Thomas Hong of BAE Systems Australia (support)

The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

P2270	Project Website Submission	01/11/2010	Online Submission from karen broughton (support)

One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisation?s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.

Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people.

Byron Bay is known for its culture and events. Don?t deprive our town of such a tremendous opportunity. Business will thrive, local tourism will benefit and our accommodation facilities will be bulging. Sounds ideal!

P2271	Project Website Submission	01/11/2010	Online Submission from Rhea thorn (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve this application. Employment is a major consideration for this proposal, bringing new hope to the people that want to stay within Byron. Name: Rhea thorn Address: 135 Goodlet Street, Surry Hills, 2010 IP Address: 27-32-46-209.static.tpgi.com.au - 27.32.46.209 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2272	Project Website Submission	01/11/2010	Online Submission from Andrew Collins of Lemoncholy design (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map. Name: Andrew Collins Organisation: Lemoncholy design Address: 11 bursaria street O'Connor ACT IP Address: cpe-124-176-56-17.lns3.dea.bigpond.net.au - 124.176.56.17 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2273	Project Website Submission	01/11/2010	Online Submission from Daniel Lambert (support)	The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. Name: Daniel Lambert Address: 445 Trower Rd Brinkin IP Address: - 153.107.97.151 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2274	Project Website Submission	01/11/2010	Online Submission from Chelsea Morros (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, ?I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise

substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a community?. (Donna Sue Sanders ? Executive Director of the Daytona State Foundation).

So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

Why wouldn?t we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal.

P2275	Project Website Submission	01/11/2010	Online Submission from Henry Motteram of the precinct (support)	The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures. Name: Henry Motteram Organisation: the precinct Address: Level 1, 58 Robert St, Rozelle NSW 2039 IP Address: ppp224-190.lns3.syd7.internode.on.net - 59.167.224.190 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2276	Project Website Submission	01/11/2010	Online Submission from Niall O'Brien (support)	Dear NSW Department of Planning, please please please bring Splendour back to Byron Bay, it is such a magical place that just adds so much to the experience!! Coming from Adelaide my friends and I can really appreciate your beautiful beaches, they are infinite times better than the Southern Ocean beaches we are used to! I can honestly say that my Byron Bay holiday in 2006 was my favorite holiday within Australia and I am itching to get back there as soon as I can. If Splendour returned it would just give me all the more reason to return to your beautiful part of Australia! So please, bring Splendour home. Yours Sincerely, Niall O'Brien. Name: Niall O'Brien Address: 69 Penfold Road, Rosslyn Park, Adelaide, S.A. P2277	Project Website Submission	01/11/2010	Online Submission from Sarah Kyle-Little (support)	I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region. The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together. Name: Sarah Kyle-Little Address: 44B Terrace St, Toowong IP Address: 110-174-196-131.static.tpgi.com.au - 110.174.196.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2278	Project Website Submission	01/11/2010	Online Submission from Eloise Sara (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. Name: Eloise Sara Address: 19 Fourth Ave Lane Cove NSW 2066 IP Address: d110-32-167-182.sbr12.nsw.optusnet.com.au - 110.32.167.182 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2279	Project Website Submission	01/11/2010	Online Submission from sam conley of your mothers face (support)	just do it. you know these cats put on a good show, and rake a date load of cash in to the community. from what i've read environmentally they are sound enough, considering you let douchebags like the big day out trample your state and leave shit everywhere. and the people in byron having a whinge are stupid city folk who moved bush because they wanted something different, and can't deal with the memory of what they left EVEN IF IT IS ONLY TWO WEEKENDS OF THE WHOLE FUCKING YEAR. the amount of scratch into both the local (accommodation, supplies etc) and state (taxes you miserable bastards) economies because of this festival is ridiculous. think of the millions you won't have to inject into that new supermarket carpark because those confused yuppie hippie bastards can afford to do it themselves. Name: sam conley Organisation: your mothers face Address: red hill qld IP Address: cpe-121-222-160-176.lnse1.woo.bigpond.net.au - 121.222.160.176 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2280	Project Website Submission	01/11/2010	Online Submission from Brett Goss (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. Don't turn North Byron into a backwater by strangling this huge opportunity with overzealous

				conservatism! Name: Brett Goss Address: 10a Saratoga Drive Novar Gardens IP Address: pulteney-pix.border.net.adelaide.edu.au - 192.43.227.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2281	Project Website Submission	01/11/2010	Online Submission from rebeccca dawes (support)	yes please bring splender back to byron bay! its magical there! It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. Job opportunities are a hot topic on the north coast. If North Byron Parklands is not allowed to operate in Byron Shire then these jobs will be lost to another region willing to approve this project. The creation of local jobs is a very important one. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal.

P2282	Project Website Submission	01/11/2010	Online Submission from Wesley Strong of Acton Campbell & Co (support)	Name: rebeccca dawes Address: 26 greenough cct Kaleen ACT IP Address: - 203.221.172.10 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments.

P2286	Project Website Submission	01/11/2010	Online Submission from Keely Quinn (support)	People in Byron Bay are very focused on supporting and interacting within society. Enjoying and experiencing what Byron has to offer. The North Byron Parklands is the very thing that our locals would love. There has been a long search for a permanent cultural events site in the Byron Shire and while the Blues Festival has purchased a site (after the North Byron Parklands property was bought) they have always committed to only hosting the Blues Fest there. So there is still a very strong need for another site that can cater to a range of cultural and community events. The North Byron Parklands site is the perfect choice conveniently located in the North of the Shire and should be supported by all levels of government. It will be a huge benefit for the area on so many fronts. Name: Keely Quinn Address: 66 Greta st Gerringong NSW 2534 IP Address: cpmon.mq.edu.au - 137.111.13.200 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2287	Project Website Submission	01/11/2010	Online Submission from Courtney Austin of N/A (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ□™s book. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of

mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass.

So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the regionâ□™s economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

Byron Bay is beautiful, and Splendour in the Grass has been lucky to have had the opportunity to be staged in Byron's beautiful surroundings in previous years. However, Byron Bay is lucky to have Splendour in the Grass. The most sought-after event of the year, every year. Splendour in the Grass has revolutionised music culture within Australia. When I think of Splendour, I think of Byron. This association is amazing, please don't separate one from the other. It would be a tragedy.

Bring Splendour Home.

P2288	Project Website Submission	01/11/2010	Online Submission from Simone Peterson (support)	North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. We constantly hear about politicians doing their best to ensure a supply of good jobs for our young people, however NSW currently is experiencing very high rates of youth unemployment. Governments and politicians must become more aware of the types of projects that will generate such youth oriented jobs and the North Byron Parklands proposal is a very good example. Reported to generate in excess of 200 jobs it seems to make sense to me to approve it. If we want to maintain a vibrant creative culture in our region we need to support proposals such as this. North Byron Parklands sustainable event space is a perfect way to sustain and encourage our local creatuve culture. Name: Simone Peterson Address: 75 Wyandra Crescent, Murarrie Qld 4172 IP Address: cpe-121-215-246-52.static.qld.bigpond.net.au - 121.215.246.52 Submission for Job: #3210 Cultural Events Site (Project Application)

P2289	Project Website Submission	01/11/2010	Online Submission from Natalie Newby (support)	I have been attending the festival since I was 16 and loved every year of it! Splendour is the event where I met some of my best friends and experienced the best weekends of my life. Each year gets better and it would be devistating to end such a monumental event. It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account.

				Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable.
				Name: Natalie Newby Address: 16/9 Freyburg Street SORRENTOQLD 4217 IP Address: cpe-58-174-50-68.mjcz1.woo.bigpond.net.au - 58.174.50.68 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2290	Project Website Submission	01/11/2010	Online Submission from Freya Grove of student (support)	Splendour is a rewarding experience, with this site, more people will have an opportunity to share the experience and support Australia music culture. This will be possible because of the more convenient location and the opportunities the organisers will have to improve the location to suit the festival. This will also ensure safety and comfort at the festival. North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. Splendour in the Grass offers local youth the opportunity to work at the festival in return for

				a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers. Under the North Byron Parklands environmental management manual there is a particular Environmental Standard that requires events being held on the site to adhere to a number of stringent environmental controls. The controls include buffer zones, environmental inductions, fencing aspects, wildlife rescue teams and lighting requirement to reduce illumination of bush blocks. I am unaware of any other outdoor event venue requiring such tight environmental controls. Parklands will certainly be moving towards Australian best practice, if not worldâ™s best environmental practice. Name: Freya Grove Organisation: student Address: 28/111 Markeri St, Mermaid Waters 4218 IP Address: 123-2-127-7.static.dsl.dodo.com.au - 123.2.127.7 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2291	Project Website Submission	01/11/2010	Online Submission from Phoebe Cullen of UNSW (support)	The site in question if not used for a sustainable cultural arts and event venue may end up being used by whoever buys it in a manner that would place greater pressure on the environment. Here we have an opportunity to hold a low impact activity that will see the land rested for some 75% of the year. Allowing such large rest times will benefit both fauna and flora across and adjacent to the site. This is a very positive outcome. Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors

such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project.

In recent times visitor day trips to the northern rivers has been declining. Coupled with a downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of time include cultural event activities such as those proposed by North Byron Parklands. This business is capable of attracting hundreds of thousands of visitors each year to the northern rivers which will be a huge boon for the area.

I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused.

P2292	Project Website Submission	01/11/2010	Online Submission from tahnee nicholson (support)	The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region. North Byron Parklands will provide jobs and training in event management, ticketing, technical production and traffic management for up to 20 days each year. These work and training opportunities are needed and are very exciting for young adults in the community. Name: tahnee nicholson Address: 7 panima place newport 2106 IP Address: cpe-124-187-150-180.lns17.ken.bigpond.net.au - 124.187.150.180 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2293	Project Website Submission	01/11/2010	Online Submission from Arthur Randell (support)	While the current research into noise emissions and their effects on fauna is far from comprehensive, the team at North Byron Parklands have developed a host of environmental procedures and processes to manage this issue. From the use of sophisticated unidirectional public address systems to fauna monitoring programs the management systems that will be employed will greatly reduce any possible impacts on fauna. The pleasing thing to note is that fauna are only temporarily inconvenienced by noise if at all. In relation to employment and wages the Byron local government area has one of the Stateâ□™s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. Name: Arthur Randell Address: 70 Thomson St, Darlinghurst, NSW, 2010 IP Address: 124-169-9-26.dyn.iinet.net.au - 124.169.9.26 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2294	Project Website Submission	01/11/2010	Online Submission from Nikita Cullington (support)	The North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth! It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.

But really, the two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism.

Besides this, there aren't really any reasons NOT to bring Splendour Home. It is one of the most fantastic and amazing events that I have ever had the pleasure of attending. It is something that I will tell my children and grandchildren about in years to come. Please don't take away the chance of many people creating many more splendorous memories.

Sincerely,

Nikita Cullington

P2295	Project Website Submission	01/11/2010	Online Submission from Eliza Mcdonald (support)

Environmental audits are a requirement for all major events. If we consider that eventually there might be up to three major events in a given year one can start to get an idea of the breadth and depth of environmental information that will be captured by these environmental audits. North Byron Parklands will be able to build up an impressive database of fauna and flora observations and will then be able to adjust or modify their policies and procedures to better protect environmental values moving forward.

Splendour in the Grass offers local youth the opportunity to work at the festival in return for a festival ticket. This program gives the youth valuable work experience in customer service, hospitality, event management etc. Splendour in the Grass also offers work to musicians, live sound engineers, and event managers.

I think that events like this help people grow, experience North Byron Parklands and all that our area has to offer. The North Byron Parklands proposal would definitely be a growing experience for me.

Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government.

P2298	Project Website Submission	01/11/2010	Online Submission from Angela Gray (support)	It is a good sign when an organisation like North Byron Parklands goes the extra mile to assess the possible environmental impacts related to their project. North Byron Parklands have proposed extensive mitigation strategies that will protect the ecological attributes and improve the overall environmental viability of the site. This high level of planning should be encouraged. The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful. North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead. Name: Angela Gray Address: 29A Albany Crescent, Oaklands Park SA 5046 IP Address: - 203.13.3.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2299	Project Website Submission	01/11/2010	Online Submission from Brooke Earley (support)	This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Name: Brooke Earley Address: 70/431 St Kilda Road Melbourne Vic 3004 IP Address: 122-128-62.dsl.connexus.net.au - 203.122.128.62 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2300	Project Website Submission	01/11/2010	Online Submission from Elizabeth Crowley (support)	To whom it may concern

After reading the proposals from the producers of the Splendour Festival I am very much in support of the North Byron Parklands becoming the new home for the festival. Its a huge area and would not be used for the majority of the rest of the year, which seems very reasonable to me.

Young Australians are becoming more and more environmentally conscious and we would all participate in any measures we could to minimize damage to the environment.

Australian music and culture benefits greatly from bringing people together at these festivals. We get a glimpse of what the rest of the world has to offer musically as well as giving exposure to our home grown acts.

With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing.

The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values.

There has been a long search for a permanent cultural events site in the Byron Shire and while the Blues Festival has purchased a site (after the North Byron Parklands property was bought) they have always committed to only hosting the Blues Fest there. So there is still a very strong need for another site that can cater to a range of cultural and community events. The North Byron Parklands site is the perfect choice conveniently located in the North of the Shire and should be supported by all levels of government. It will be a huge benefit for the

				area on so many fronts. Yours sincerely Elizabeth Crowley
				Name: Elizabeth Crowley Address: 9/53-63 Penkivil St, Bondi, NSW 2026 IP Address: cpe-58-161-227-13.iqla1.woo.bigpond.net.au - 58.161.227.13 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2301	Project Website Submission	01/11/2010	Online Submission from Andrea Goodwin of Byron Beach Cafe (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events.

Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application.

This proposal will create a cultural breading ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home!

P2303	Project Website Submission	01/11/2010	Online Submission from Matthew Ryan (support)	North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of

				predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome. This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and North Byron Parklands will provide this. P2304	Project Website Submission	01/11/2010	Online Submission from Georgia Gribble of GJ's (support)	North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. As a youth of the area I am constantly searching for ways to broaden my horizons. I believe

this proposal will offer new opportunities, new jobs, new experiences and new ways to develop.

P2305	Project Website Submission	01/11/2010	Online Submission from Ruth Scovell (support)	The local area needs an established cultural event site! North Byron Parklands offers a a sustainable cultural event site for the community to meet together to celebrate, learn, collaborate, and showcase contemporary practices. North Byron Parklands is a good thing and should be supported by the local government! With so many people moving into capital cities the government needs to ensure that regional employment opportunities are secured whenever they are offered. Parklands have a project that will provide plenty of jobs for a range of people and it is super important that they jobs stay in our area. Name: Ruth Scovell Address: 16 Crosby RoadAlbion QLD 4010 IP Address: mail.valeaustralia.com.au - 203.94.190.138 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2306	Project Website Submission	01/11/2010	Online Submission from kristy hayes (support)	The North Byron Parklands will see the subject site have the opportunity to maintain low impact activity that will see the site unoccupied for some 75% of the year. By allowing the sites land to rest both fauna and flora growth wil be encouraged across and adjacent to the site. This restoration will be a positive outcome for the local environment. If you speak to anyone these days, getting and keeping a job is high up on the list. Regional areas generally do not have a range of diversified industries to choose from. Parklands is

offering meaningful and interesting work, particularly for young people and should be welcomed with open arms.

In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTA?s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

The North Byron Parklands will offer new experiences for people to explore and enjoy. What a great way to bring our community together.

P2307	Project Website Submission	01/11/2010	Online Submission from Allison Jones (support)

Splendour in the Grass is a major cultural event on the annual music calendar, bringing music fans together in a beautiful environment for some innocent fun and celebration of both Australian and international artists. The event is incredibly well organised and also brings many short and long term economic benefits to the area it is held in.

The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket.

P2308	Project Website Submission	01/11/2010	Online Submission from Graeme Bates of Lifes Natural Catalyst Pty Ltd (support)	Open your hearts and accept the assurances of the people who are bringing Spendour in the Grass to this beautiful setting that they do so in full recognition of the fact that the impact on human as well as fauna and flora will be minimal - except for the humans who attend the festival and hopefully the imact will be huge - in an uplifting and positive way. Name: Graeme Bates Organisation: Lifes Natural Catalyst Pty Ltd Address: 1830 Tallebudgera Creek RoadTallebudgera Valley QLD 4228 IP Address: cpe-123-211-64-66.lnse4.cha.bigpond.net.au - 123.211.64.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2309	Project Website Submission	01/11/2010	Online Submission from Nina Schneider ()	Not only have the North Byron Parklands organisation developed what must be considered worldâ™s best practice environmental management systems and processes, they are also planning to have an environmental education program folded into the mix for good measure. A number of events proposed to be held at this site already have initiatives such as Eco Cops which are undergraduate environmental science students who promote environmental programs and accepted practices to patrons while at an event. This is a very good proactive measure. Recent statistics provided by the Australian Bureau of Statistics indicate that the majority of business owners in the shire and the northern rivers area do not employ people, rather these businesses are operated by self employed people. As such it is obvious that other larger organisations and businesses are required to employ people in a are in much need of job opportunities. North Byron Parklands is one such organisation proposing to generate up

to 200 full time equivalent positions. Such a project is extremely important to this area.

What other venue in NSW or Australia for that matter has paid so much attention to environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

Splendour in the Grass has provided a lot of mentorship and training opportunities for young people in the past. The fabulous Splendid initiative is an example of this. They really invest in young people. Even if these initiatives remain limited to Splendour in the Grass, itâ□™s important to ha

P2310	Project Website Submission	01/11/2010	Online Submission from Maree Doyle (support)	To whom it may concern, This year I attended my first Splendour in the Grass but did so Bu way of a roadtrip from Melbourne. As a result of this I stopped in for two nights at Byron Bay. Byron bay is A beautiful town and from what I could tell one that greatly missed the Splendour in the Grass Festival in 2010. The town was quiet. And the shopkeepers all expressed a disappointment that Splendour had been forced to relocate. I had decided bit to go to Splendour this year because woodfordia was not for me. There were too many people in to spread out a venue and it was chaos getting between stages as all the paths seemed to bottleneck. Not to metion the relatively low appeal that Brisbane and the gold coast offer as a commercial and tacky holiday destination. Byron bay on the other hand is a beautiful little town that I have not stopped praising since I got back to Perth. I would absolutely return to splendour next year if it could coincide with a return to Byron Bay. In addition to this I put forward the arguments of the Splendour in the Grass organization: The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

				With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create.
				Name: Maree Doyle Address: 24b Keslake WayParkwood. WA. 6147 IP Address: - 202.81.69.153 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2311	Project Website Submission	01/11/2010	Online Submission from Grace Caird of - (support)	Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc. This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people. For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands.

P2312	Project Website Submission	01/11/2010	Online Submission from Sarah Currie (support)	Name: Grace Caird Organisation: - Address: 80 stone street Bayswater IP Address: 203-206-12-82.dyn.iinet.net.au - 203.206.12.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 One of the big measures that will protect fauna at the North Byron Parklands site is the limiting of events to a minimal number each year. If such a proposal was to operate for 20 weeks a year then they may cause some environmental problems but given that it will only run for 20 days a year and the rest of the time it will be just farm land, then this has to be a strong positive. The current population of the Northern Rivers is approximately 294,000 people, and is anticipated to increase to approximately 376,000 people by 2036. Such an increase in population requires a suite of stable employers. North Byron Parklands can play a significant role in providing jobs to people in this region. North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense. With its focus on cultural heritage management, North Byron Parklands can instill in the

				region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.
				Name: Sarah Currie Address: 6 Vista CrtBerwick, Vic 3806 IP Address: - 120.21.10.25 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2313	Project Website Submission	01/11/2010	Online Submission from Natalia Fester (support)	The economic benefits from this proposal will be felt locally and regionally. 210 full time equivalent jobs will be created by the approval of this application. It is estimated that the total multiplier effect of the enterprise operating at capacity is $192.6 million annually. North Byron Parklands proposed event site will provide a wide variety of employment opportunites to the reagion that is said to increase as the years go on. North Byron Parklands require staff to maintain and manage the event site plus each event organistaion will be looking to the local comunity for employees for their events. Letâ□™s look at the environmental initiatives that the North Byron Parklands people are proposing. Environmental auditing, sediment and erosion control, fencing to keep people in cleared areas, buffer zones to forests, inductions for workers, wildlife rescue teams during events, traffic control, no dogs, etc. The list of requirements they have placed on event operators is substantial and will result in a well protected environment. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot

of my friends will. It sounds exciting and fun.

P2320	Project Website Submission	01/11/2010	Online Submission from Dylan Cashman (support)	I have lived in the byron bay/ ballina area for the past 5 years and this was the first splendour i had to miss. The move to take it out of the shire impacts not only the festival but the entire local community. Many people argue that it brings excessive drugs into the byron community but its simply the enormous presence of drug detection squads that exposes the already large drugs culture that byron has a reputation for. I urge you to let the glory that is splendour return to its home in byron and be restored to the best festival in australia which everyone knows it is. Name: Dylan Cashman Address: 7/31 McKinnon Street East Ballina IP Address: 175.38.86.249.optusnet.com.au - 175.38.86.249 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2321	Project Website Submission	01/11/2010	Online Submission from Cecilia Ravarava (support)	The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region. Name: Cecilia Ravarava Address: 1 Architects Pl, St Clair IP Address: - 123.200.246.230 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2322	Project Website Submission	01/11/2010	Online Submission from Tom Burns (support)	The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the â□˜coast to hinterlandâ□™ wildlife corridor. The extended â□˜restâ□™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves. The creative industries sector is becoming a leading sector in employment opportunities in the northern rivers region and is responsible for providing an ever increasing number of people with jobs. Music and arts should be embraced in our society because of these jobs that it creates and North Byron Parklands if it is approved is set to be a big employer for the area. As such I am very much in favour in seeing this project get up and running. Jobs are incredibly important and this project has my full support. Name: Tom Burns Address: 13 Carlyon St Ormond 3204 IP Address: 202-161-20-112.dyn.iinet.net.au - 202.161.20.112 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2323	Project Website Submission	01/11/2010	Online Submission from Thomas Price (support)	At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide

employment opportunities to many in our community, particularly young people.

The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone.

North Byron Parklands will foster partnerships with key regional, national and international learning institutions such as Southern Cross University and the School of Audio Engineering (SAE). These partnerships will further strengthen the regionâ™s creative industries, providing world class training and work experience opportunities.

P2324	Project Website Submission	01/11/2010	Online Submission from Benjamin Jennings (support)	Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. We need more job opportunities in the area and that is exactly what the North Byron Parklands proposal will achieve. Lets bring splendour home to a world class sustainable cultural event venue and help the area tackle the unemployment level! The North Byron Parkland proposal sounds very beneficial to our youth, elderly and families. A fantastic way for our society to be brought together. Name: Benjamin Jennings Address: 2/2 Queenscliff Road, Queenscliff, NSW 2096 IP Address: - 203.166.11.82 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2325	Project Website Submission	01/11/2010	Online Submission from Courtney O'Connor of QUT (support)	If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. Name: Courtney O'Connor Organisation: QUT Address: 6/93 Beatrice Terrace,ASCOT QLD 4007 IP Address: nocproxy01-b.net.qut.edu.au - 131.181.251.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2326	Project Website Submission	01/11/2010	Online Submission from Fern James (support)	The Marshallâ™s Ridge wildlife corridor on the proposed site is actually damaged, populated with harmful weeds, and is in need of restoration. North Byron Parklands has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will help improve fauna movement opportunities. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. Cheers Fern Name: Fern James Address: 63 Plantain Road Shailer Park QLD 4128 IP Address: c211-31-11-213.rochd5.qld.optusnet.com.au - 211.31.11.213 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2327	Project Website Submission	01/11/2010	Online Submission from Lisette Muratore (support)	Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc. With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity. Plus Splendour attracts lots of tools with lots of money to spend. You know that they're going to get a bit messy and end up buying a pallet of hotdogs each, no matter what the price. So if you charge heaps for the hotdogs (which people are likely to do at these things) then you make a bunch of money that you can give to the wild animals to buy Christmas presents for their children with. So say HECK YES to Splendour in Byron! :D Name: Lisette Muratore Address: 292 Johnston st, Abbotsford, Victoria IP Address: - 119.225.39.198 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2328	Project Website Submission	01/11/2010	Online Submission from David Cuthbertson of Home (support)	North Byron Parklands through their application to the Department of Planning have more than adequately shown that this is an organisation willing to go beyond compliance in terms of environmental management. What other development would have documented in such detail the plans, policies and procedures to effectively manage all issues covering the environment. Everything from lighting and erosion control through to revegetation and fauna audits has been included in their impressive management manual. The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. In the Byron and northern rivers areas tourism is subject to busy times and quiet times. It is planned that a number of events will occur at the North Byron Parklands site each year and one of these takes place in winter when tourism businesses are struggling to cover costs. Building a dedicated events venue in the Byron Shire will have a number of very positive benefits for the tourism industry which is a good thing. A cultural event site such as the one proposed by North Byron Parklands will help develop creative industries on the north coast. Events such as Splendour In The Grass inspire and encourage young adults to be creative and also provide special initiatives such as the young artists program, Splendid. Lets build up the creative industries in the region!

P2330	Project Website Submission	01/11/2010	Online Submission from Damian Perna (support)	One of the most significant benefits for the environment coming out of this application is the proponent?s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region. Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome. You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the peo

				Name: Damian Perna Address: 20 Caledonia Crescent Mulgrave Victoria 3170 IP Address: mail.johnslyng.com.au - 203.39.235.33 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2331	Project Website Submission	01/11/2010	Online Submission from Stephanie Stevens (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative.
				Name: Stephanie Stevens Address: 15 Indigo Crescent, ANNANDALE, QLD IP Address: allptrs.eq.edu.au - 203.10.121.86 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2332	Project Website Submission	01/11/2010	Online Submission from Claude Walker (support)	I love Byron Bay and always treat the locals with the respect they deserve. I always feel grateful that they have us there and I bring nothing but love, goodwill and money. Keep out the drunken louts by not selling them tickets, but don't let Byron lose splendour! While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. Name: Claude Walker Address: 14 Fenner St Downer, ACT IP Address: - 130.56.88.216 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2333	Project Website Submission	01/11/2010	Online Submission from lauren purkiss (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a

manner that ensures the management of all aspects of large and small events are adequately covered.

I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner.

Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands provides incentives for young people to remain in the region.

P2338	Project Website Submission	01/11/2010	Online Submission from Diana Dickens of home (support)

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble.

If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region.

But this is not just for young people. I am in my 50's and contemporary music is my thing. Don't make Byron so exclusive that it can't continue to host this pre-eminent music festival.

P2343	Project Website Submission	01/11/2010	Online Submission from Nana Moussa of Centrelink (support)	From an environmental perspective North Byron Parklands has ticked all the boxes in terms of assessment and risk mitigation. This was also reflected when they originally applied for a one off trial event through Byron Shire Council. Not only did the Council approve the DA but none of the state government agencies including National Parks and Wildlife Services objected to the application. North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. From a cultural breeding ground perspective alone we must get the proposal approved. Itâ□™s a fabulous exciting vision and we are very lucky that this proposal is before us. Bringing Splendour back to Byron would do wonders for local tourism and generate publicity income for NSW and the local community. Name: Nana Moussa Organisation: Centrelink Address: 6 Wattle Avenue, Macquarie Fields NSW 2564 IP Address: - 202.124.75.71 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2344	Project Website Submission	01/11/2010	Online Submission from james hunter (support)	The splendour in the grass festival is amazing and every year i have enjoyed it. Except for last as the line up was amazing could of been enhanced by the location - Blues and roots is a fine example of a festival that moved to the right location. it was so much fun at the new venue as it was large, green, and close to Byron and everything people love about Byron. The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. The North Byron Parklands proposed plan for a permanent cultural venue is inspiring for young people. Regional areas such as ours can really benefit our youth by inspiring them to participate and to achieve. It is important to remember that North Byron Parklands proposal is all about the environment, events, culture, celebration and the youth. The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians.

P2345	Project Website Submission	01/11/2010	Online Submission (support)	Name: james hunter Address: 18 Soden Street, Yeerongpilly IP Address: firstc25.lnk.telstra.net - 203.45.214.35 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Please DO NOT display my name on the departments website or in any public submissions The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a ?sustainable? site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

P2346	Project Website Submission	01/11/2010	Online Submission from Alexandra Marks (support)	Having travelled to many music festivals around the world I can say that Splendour in the Grass is a truly world class festival and the organisation of the event including line up, access and safety make it one of the most desirable events globally. This event really puts Bryon and Australia on the international music festival radar. Please DO NOT display my name on the departments website or in any public submissions Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. The income generated by the North Byron Parklands event site will link together economic growth and development within the arts, cultural and recreational services industries which has the potential to become a significant economic contributor within the Byron Shire economy over the long term. Having a world class facility like North Byron Parklands in the Byron region is an awesome opportunity. Any place in Australia would welcome that. P2347	Project Website Submission	01/11/2010	Online Submission from Andy El-Bayeh of Keystone (support)	While there are a number of identified threatened species at the North Byron Parklands site, all of these creatures are winged species such as water borne birds, owls and various bats. Research into the effects of intermittent noise shows that such fauna will usually relocate during such episodes and will return quickly once noise abates. Further the movement of such fauna is entirely dependent on food resources. If there are no fruits and blossoms across the site then the presence of these species will be very low. The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation

and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. Itâ□™s up to us as adults to decide that we want to support venues that support young people.

P2348	Project Website Submission	01/11/2010	Online Submission from Daniel McCarthy (support)	Dear Sir/Madam I am writing in relation to Splendour in the Grass and the application to move the festival site to Byron, NWS. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve this application. It is really important to note that any environmental pressures will be greatly reduced as a result of only using a percentage of the site for events. The areas that they will use are the grassy open spaces meaning that no activities will occur in bush land or forest blocks. It is just another example of good environmental management. With up to twenty days of events each year the work experience opportunities for people in the region are very exciting. The bump in and bump out periods provide further work. We need these jobs and the training they provide, from high level event management to ticketing, technical production and traffic management. Yours faithfully Daniel McCarthy Name: Daniel McCarthy Address: 8/12 Hanworth StreetEast Brisbane QLD 4169 IP Address: cpe-60-226-185-52.qld.bigpond.net.au - 60.226.185.52

P2350	Project Website Submission	01/11/2010	Online Submission from Shaun Moss (support)	Hi I'm sure that by now you have received a number of submissions that have hopefully satisfied all your concerns regarding Splendour's request for using the North Bryon Parklands. Without being an expert, my impression of Splendour's organisers is that they are very professional, caring, community-minded and environmentally-minded people. I am convinced that they will conduct their events as they have always done (to the best of my knowledge) - with the utmost care and respect for the environment, wildlife, native people, surrounding community and participants.

I can understand the very valid concerns about the use and potential mis-use of this valuable land. However, I have no doubt that all precautions and care will be taken to ensure that it is not damaged, and in face will be improved through the efforts of the Splendour team and others. I believe that showing faith in these good people and trusting them will be one of the best ways to protect and improve this land.

At the very least you could allow them permission to use it for a year or so, and evaluate the impact. Apart from benefits to the environment, I'm sure the festival gives a valuable boost to the town's economy.

Warmest regards,

Shaun Moss

P2351	Project Website Submission	01/11/2010	Online Submission from Paul Malone of Fisher Buttrose Architects (support)	North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive. North Byron Parklands is a really exciting idea and I really hope it goes ahead. My friends and I will definitely attend events held at the venue. I think this venue would make a huge difference to our community. Name: Paul Malone Organisation: Fisher Buttrose Architects Address: 1 Duffy St, Freshwater, Cairns, 4870 IP Address: eth81.qld.adsl.internode.on.net - 150.101.179.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2352	Project Website Submission	01/11/2010	Online Submission from Chloe Chapman (support)	I know of many businesses that rely on events for a large part of their income. These businesses employ local people and locally based jobs are hard to come by. We should support Parklands as it will be a large employer in the region. In regards to the environment the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of some 100ha thus leaving large tracts of the property for wildlife functions. I think the environmental controls under their environmental, health and safety management manual will also reduce impacts and make this a leading sustainable outdoor event venue. Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities â□“ young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia. Name: Chloe Chapman Address: 67 Powderworks Road, Nth Narrabeen, NSW, 2101 IP Address: c122-106-252-48.belrs3.nsw.optusnet.com.au - 122.106.252.48 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2353	Project Website Submission	01/11/2010	Online Submission from Shaun Purcell (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? With jobs hard to come by in regional areas such as the north coast it is really important that projects that can provide ongoing employment opportunities are considered seriously by government. I believe that North Byron Parklands is one such venture that can offer many people a job opportunity. Name: Shaun Purcell Address: 3/40 Herbertson Road, Carina Heights, QLD 4152 IP Address: eth2386.vic.adsl.internode.on.net - 150.101.159.81 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2354	Project Website Submission	01/11/2010	Online Submission from Stephen Marks of Incorp (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. There is currently approximately 294,00 people living on the Northern Rivers and this number is said to increase to approximately 376,000 residents by 2036. This huge increase in the next 26 years requires action to create employment opportunities in the region. North

Byron Parklands can offer an array of employment opportunities in the future to tackle this population increase.

Businesses from across the northern rivers involved in tourism related activities stand to benefit significantly from the influx of visitors both from within and outside NSW. The likely spend from attendees at events held at North Byron Parklands would be strong given people will procure accommodation, buy food and drink and purchase a range of other goods and services. This will translate into an economic bonus for the region that must not be squandered.

Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It?s up to us as adults to decide that we want to support venues that support young people.

P2355	Project Website Submission	01/11/2010	Online Submission from Clare Kempnich (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. Because of the extensive level of community consultation undertaken by North Byron Parklands I have a very clear understanding of the benefits and issues of the application. The high quality of information has allowed people locally and in the wider community to make an informed decision about the proposal and I would imagine that the responses are overwhelmingly in favour of the project. It shows that when a company is prepared to go that one step further in communicating to the public that people can fully understand all of the issues and also the steps to be put in place to manage them. I fully support this application. North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. Name: Clare Kempnich Address: 4/41 Stanley St IndooroopillyQLD 4068 IP Address: proxy1.uq.edu.au - 130.102.158.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2356	Project Website Submission	01/11/2010	Online Submission from Joe Payten (support)	One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive. I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Name: Joe Payten Address: 5261 Warraderry Way Canowindra NSW 2804 IP Address: - 125.254.102.102 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2357	Project Website Submission	01/11/2010	Online Submission from Cyndy Reddy (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. Until very recently NSW has had a less than enviable employment track record mainly due to the global financial crisis. While it looks like the state is on the mend we still need to ensure that projects like North Byron Parklands are given the green light because of the large number of regional jobs it will provide.

In relation to fauna movement across and adjacent to the North Byron Parklands site one huge positive that the proposed underpass will bring is that it will provide much needed north-south migration on either side of Jones Road. This road currently acts as a barrier for such fauna movement and denies many creatures the opportunity to take advantage of the RTAâ□™s expensive fauna overpass straddling the Pacific highway. This alone will provide significant fauna movement routes for many creatures.

North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities!

P2358	Project Website Submission	01/11/2010	Online Submission from Bernadette Strahan (support)	One of the things that really impresses me about the North Byron Parklands proposal is the level of community consultation they have undertaken. From public planting days to environmental forums, site tours to newsletters and letter box drops, these guys have demonstrated a strong willingness to communicate and listen to the community. I feel they have shown that they will more than adequately manage a variety of events at this site in a professional and sensitive manner. While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal. Name: Bernadette Strahan Address: 9 Eleventh Avenue Inglewood WA 6052 IP Address: imimicml1.net.ecu.edu.au - 139.230.245.21 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2359	Project Website Submission	01/11/2010	Online Submission from jordan kretchmer (support)	One of the most significant benefits for the environment coming out of this application is the proponentâ□™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

North Byron Parklands will provide trainingÂ and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures.

P2360	Project Website Submission	01/11/2010	Online Submission from Emma Berry (support)	This is a great opportunity to provide employment and other economic benefits to the area. The care being taken to cover the environmental aspects and the opportunity to maintain the parkland permanently while having the influx of people for only a small period of time. The youth in Byron need to have some positive distraction. The different aspects of culture, music and art that the North Byron Parklands proposal will offer guides the youth in a positive way and teaches them that amazing experiences can be had without trouble. Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. Name: Emma Berry Address: 1903/100 Harbour Esp, Docklands, VIC 3008 IP Address: - 203.110.235.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2361	Project Website Submission	01/11/2010	Online Submission from Caroline Graham (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. North Byron Parklands proposed event site will provide a wide variety of employment opportunites to the reagion that is said to increase as the years go on. North Byron Parklands require staff to maintain and manage the event site plus each event organistaion will be looking to the local comunity for employees for their events. North Byron Parklands has a strong focus on cultural management. This is shown by the proposed cultural centre aimed to provide learning opportunities for staff to build a greater understanding of our local indigenous and non-indigenous ancestry. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. Name: Caroline Graham Address: 19/527 Gold Coast Highway, Tugun, 4224 IP Address: iris.bond.edu.au - 131.244.3.45 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2362	Project Website Submission	01/11/2010	Online Submission from Lucinda swanton (support)	The level of detail undertaken in the identification and assessment of likely impacts on fauna and flora across and adjacent to the North Byron Parklands site is impressive. There is unlikely to be many (if any) other types of development north coast that have gone to this level of detail and thoroughness. The commitments listed to preserve and enhance the ecology certainly help to put this development into the â□œsustainableâ□□ development basket. Too many people are forced to look outside Byron for employment opportunities. The North Byron Parklands proposal offers ample opportunities and will surely make the locals very happy. The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal. With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff. These submissions are to show truly how many people believe in this cause so please pay attention and don't just turn a blind eye. Name: Lucinda swanton Address: 22 grange street, mont albert IP Address: 124.253.dsl.mel.iprimus.net.au - 58.179.156.124 Submission for Job: #3210 Cultural Events Site (Project Application)

P2364	Project Website Submission	01/11/2010	Online Submission from Janelle Hargrave (support)	I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government. The Parklands project is going to attract tens of thousands of people to stay in the wider area. Many of these attendees will extend their stay in the region before and after various events and this will generate a direct positive impact for accommodation providers as well as food and beverage establishments within the local area and region. So many people are employed in the tourism industry so having a world class events venue would be extremely advantageous. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands.

P2365	Project Website Submission	01/11/2010	Online Submission from Lisa Farmer (support)	Name: Janelle Hargrave Address: 22 Coomera Crt, Helensvale, Qld, 4212 IP Address: theinv4.lnk.telstra.net - 165.228.132.146 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. I find great delight knowing that competent Event Managers will be involved with all the events held at North Byron Parklands, ensuring that we have a lot of great experiences if this proposal goes through. Splendour is such a special event on the Australian festival calendar as evidenced by its increasing popularity and to allow more people to enjoy this event in the future at its own home site would be positive for all those involved and the Byron community.

P2366	Project Website Submission	01/11/2010	Online Submission from Kristine Dewar (support)	Name: Lisa Farmer Address: PO Box 1350 BROADBEACH QLD 4218 IP Address: - 120.19.138.25 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 In regards to the environment, the proposed North Byron Parklands site is some 256ha in size and the proponents have committed to only every using a maximum of 100ha. This leaves large tracts of the property for wildlife functions. With their further commitment to restore wildlife corridors along the creek line and hold major events for just 12 days per year, it is my belief that the proposed land use may in fact contribute to better environmental outcomes for the property. As an area heavily reliant on tourism and retail markets for economic growth, securing the ongoing use of this site for festival will add to the economic and social sustainability of Byron Bay. This will occur through employment opportunities and the ongoing injection of visitor dollars to the local economy. Further, the Parklands site contains an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local Indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people, contributing positively to the reconciliation of Aboriginal and non-Aboriginal Australians.

P2367	Project Website Submission	01/11/2010	Online Submission from Joel Sammut of Austereo (support)	Name: Kristine Dewar Address: 15 Camden St Albion Qld 4010 IP Address: c114-77-147-220.fitzg3.qld.optusnet.com.au - 114.77.147.220 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a â□œsustainableâ□□ site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. In the northern rivers area more and more people have been moving into the creative industries sector because of the interesting and fulfilling work that can be undertaken. There is a very real need to continue growing this sector to provide people with more job opportunities. North Byron Parklands is a proposal that will truly make a big impact in job availability in the region and will be a very positive economic force. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. The youth in the Northern Rivers area need a place to gather and have a good time and

				North Byron Parklands provides this. Imagine all the new opportunites and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.
				Name: Joel Sammut Organisation: Austereo Address: 1/184 Glenmore Rd Paddington, NSW 2016 IP Address: - 203.1.211.150 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2368	Project Website Submission	01/11/2010	Online Submission from Lauren Quaintance (support)	One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.
				North Byron Parklands proposal of a sustainable arts and music venue that invites not just our locals to enjoy but that people will travel can only benefit our local economy.
				Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing.

This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering.

P2369	Project Website Submission	01/11/2010	Online Submission from Graham Steadman (support)	While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue. If employment growth in regional areas is a key concern of the NSW state government then approving this project makes sound economic sense. There is a real need to support organisations that can provide such large numbers of jobs in an area where finding a good job can be very difficult. It seems to me that approving this project will have lasting long term benefits for job prospectors in this rural region. Name: Graham Steadman Address: 161 Fernvale Road, Tarragindi, QLD 4121 IP Address: - 115.131.0.3 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2370	Project Website Submission	01/11/2010	Online Submission from Shane Valesini (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times. Name: Shane Valesini Address: 32 Cedarleigh Road,Kenmore, QLD, 4069 IP Address: c122-108-251-97.kelvn3.qld.optusnet.com.au - 122.108.251.97 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2371	Project Website Submission	01/11/2010	Online Submission from Nikola Dyson (support)	With the Environmental, Health and Safety management manual prepared by North Byron Parklands the management of environmental values will be done so within a world class framework which will reduce potential and actual impacts on fauna and flora. The system is that comprehensive that it has even considered and regulated light spill from potable lighting towers. The proponents should be commended on such an initiative. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner. North Byron Parklands proposal is a tangible cultural asset for the youth. It seems obvious, the jobs that will come from the proposal are needed in the region. This application should be approved by local government if only for the young people in the community.

P2372	Project Website Submission	01/11/2010	Online Submission from Angie Gumbleton (support)	Name: Nikola Dyson Address: 5 Langham crt Grovedale , Geelong, Victoria IP Address: d58-106-110-233.sun4.vic.optusnet.com.au - 58.106.110.233 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Splendour in the Grass has provided high level training in a range of areas and has supported youth initiatives such as Splendid. With the expanded suite of festivals at North Byron Parklands the opportunities for work experience and training are invaluable. When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land. The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future.

P2373	Project Website Submission	01/11/2010	Online Submission from Matthew Head (support)	Name: Angie Gumbleton Address: 13 Brolga St Slade Point QLD 4740 IP Address: cpe-124-185-241-42.lns8.cha.bigpond.net.au - 124.185.241.42 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Bring Splendour home to the Northern Rivers! Let?s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. One of the most significant benefits for the environment coming out of this application is the proponent?s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land. Events offer a broad range of jobs to lots of individuals. From labourers to sound engineers or caterers to sign writers these jobs are very much needed in NSW. We have already lost a lot of our events to Queensland and other states and we must grasp this huge employment opportunity with both hands. The government has an obligation to approve this project. If you consider that businesses involved in the tourism industry that will directly benefit from the North Byron Parklands project stretch from Ballina in the South to Tweed Heads in the North, not to mention all the inland towns, then it becomes very apparent that this project will benefit a very wide area. Supporting the tourism industry should be a key concern for the government and approving projects of this nature would help the industry considerably.

P2374	Project Website Submission	01/11/2010	Online Submission from Jarna McLean of ACP Magazines (support)	Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. Cultural arts and music event facilities such as those proposed by North Byron Parklands will greatly assist the local tourism industry by attracting thousands of people from Queensland, Sydney and Victoria. All of these visitors will require accommodation and other services and will greatly benefit the tourism sector. This is surely a good thing. This proposal gives the Byron Shire the opportunity to showcase a sustainable purpose built outdoor event venue that benefits the community in so many ways. Creating jobs, boosting local business and leading the way in sustainable cultural developments. Name: Jarna McLean Organisation: ACP Magazines Address: 1/8 Elizabeth Parade Lane Cove North IP Address: - 115.186.228.9 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2375	Project Website Submission	01/11/2010	Online Submission from Emma Hearne (support)	The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. I think it is extremely important that you consider this proposal and its benefits. Rather than the festivals moving to different locations each year, having it in one location allows serious thought, effort and management to occur to make sure the area is sustained and looked after. If the proposal is not granted, I'm sure much less care and thought of each site would be taken when the festivals move each year, rather than having a stationary 'home' to look after all year round between each festival. Name: Emma Hearne Address: 126/2 Artarmon Road Willoughby NSW 2068 IP Address: 218-215-11-145.people.net.au - 218.215.11.145 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2376	Project Website Submission	01/11/2010	Online Submission from Brent Wallace of The Fans Group (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. This proposal is extremely positive for educational institutes in the area such as SAE and the Southern Cross University. This proposal will see students gain on ground experience and employment opportunities in area such as event management, ecology management, and live sound engineering. P2377	Project Website Submission	01/11/2010	Online Submission from Estelle Ward (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a â□œsustainableâ□□ site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisationâ□™s like North Byron Parklands to provide much needed jobs. In a coastal region such as the Byron and Tweed areas tourism businesses are the financial lifeblood for so many people. Ensuring we attract businesses such as North Byron Parklands who will be responsible for bringing significant numbers of visitors to the region is vital if we are to maintain the viability of this critical sector. Government agencies should be approving projects of this nature. As a youth of the area I am constantly searching for ways to broaden my horizons. I believe this proposal will offer new opportunities, new jobs, new experiences and new ways to develop.

				Name: Estelle Ward Address: 15 Horsington St, Morningside IP Address: - 203.100.2.93 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2378	Project Website Submission	01/11/2010	Online Submission from Danielle Whitbread (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. North Byron Parklands sounds like a great idea. I would definitely attend and no doubt a lot of my friends will. It sounds exciting and fun. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Name: Danielle Whitbread Address: 99 Bacchus Circuit Kambah ACT 2902

P2379	Project Website Submission	01/11/2010	Online Submission from wendy neagle (support)	I am writing to lend support to the 'splendour' team Australia, generally speaking has been lucky in terms of its overall unemployment rate, however in the northern rivers the rate is much higher. Regions such as this need employers across a range of industries not just retail and tourism. I am sure that North Byron Parklands will become a major employer in the region if the project is approved. With respect to the environment one of the risks that the people from North Byron Parklands have identified is the potential for road kill associated with traffic movements before, during and after an event. As such they have implemented a number of requirements including on site environmental inductions, speed limiting devises, signage and a wildlife rescue team. This is just one example of the sound environmental practices they are proposing. it is a wonderful opportunity to promote the region and have an ongoing event which will bring many people and benefits to the region. yours sincerely, wendy neagle

				Name: wendy neagle Address: po box 169 emerald, vic 3782 IP Address: cpe-124-176-242-95.lns6.win.bigpond.net.au - 124.176.242.95 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2380	Project Website Submission	01/11/2010	Online Submission from Mark Vidler (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative. Name: Mark Vidler Address: 9/47a Shirley Road, Wollstonecraft NSW 2065

				IP Address: fwsm-203-166-54-105.sdnys.sg.alter.net - 203.166.54.105 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2381	Project Website Submission	01/11/2010	Online Submission from Briony Chapman (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. SPLENDOR FOR BYRON... ALL THE WAY! P2382	Project Website Submission	01/11/2010	Online Submission from fiona carey (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. In relation to employment and wages the Byron local government area has one of the State?s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives. Name: fiona carey Address: 146 sinclaires rd, strathfieldsaye IP Address: wcp.connexus.net.au - 203.12.22.55 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2383	Project Website Submission	01/11/2010	Online Submission from Anna Heaton of Habitat HQ (support)	To Whom it May Concern: North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. Byron Bay is widely known for pushing the barrier and making things possible. We as a town have so much to offer and this new proposal will put us on the map so to speak. It?s a fantastic opportunity for us all. As someone who has worked in the tourism industry including 5 year in Byron Bay I know that the operators in the area have had their worst winter in over 10 years. Splendour would have bought millions of dollars into Byron this year but instead it was Woodford in QLD who benifited from the festival. I hope for the sake of my tourism friends in Byron as well as all the festival punters that the North Byron Parklands becomes the new home to one of the best festivals in the world. Regards

				Anna Heaton Name: Anna Heaton Organisation: Habitat HQ Address: 93 Baker Street Richmond VIC 3121 IP Address: 202-129-124-150.perm.iinet.net.au - 202.129.124.150 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2384	Project Website Submission	01/11/2010	Online Submission from Ashleigh Sly (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising ?down time? between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. Byron and the Northern Rivers unemployment rate (around 8.5%) is substantially higher than the NSW average of 5.5%. We need businesses such as Parklands who can provide employment opportunities to many in our community, particularly young people. Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach. This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment

				opportunities, why not offer work to them at home.
				Name: Ashleigh Sly Address: 199 Beattie Street, Balmain NSW 2041 IP Address: - 218.185.16.66 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2385	Project Website Submission	01/11/2010	Online Submission from Anna Moar (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. North Byron Parklands proposed event site will provide a wide variety of employment opportunites to the reagion that is said to increase as the years go on. North Byron Parklands require staff to maintain and manage the event site plus each event organistaion will be looking to the local comunity for employees for their events. Letâ□™s get the creative juices flowing in the Northern Rivers. Bring Splendour home, letâ□™s get on with the job of creating exciting training and employment opportunities for our young people.

P2386	Project Website Submission	01/11/2010	Online Submission from Sara Sharpe (support)	Name: Anna Moar Address: 9/160 Marine Pde, Maroubra IP Address: r125-63-149-58.cpe.unwired.net.au - 125.63.149.58 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 Splendour is one of the only music festivals that young Australians from all over the country can gather around and meet to enjoy the unique culture Splendour provides whilst listening to their favourite bands. Like Glastonbury in the UK, Splendour is becoming world-renowned, so why spoil the opportunity for foreigners and the rest of Australia to explore one of the most beautiful places in Australia. As well as this, the economical benefits that it would bring to Byron's and Bangalow's local community would be astounding. P2387	Project Website Submission	01/11/2010	Online Submission from Jenna Sanders (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000's of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one? P2389	Project Website Submission	01/11/2010	Online Submission from Amy Ahern (support)	Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved. Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting training and employment opportunities for them. Name: Amy Ahern Address: 59 Stornaway Road Queanbeyan 2620 IP Address: - 203.31.52.137 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2390	Project Website Submission	01/11/2010	Online Submission from Chris Bryant (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. Splendour is an iconic Australian event. It would be a shame to see it fall down after years of successful events, especially as this year gave a glimpse of how much Splendour can achieve. It keeps growing in popularity, but stays true to it's beginnings, which is demonstrated by it's desire to remain viable in Byron Bay Cheers, Chris Name: Chris Bryant Address: 28 Churchill Ave Cheltenham Vic 3192 IP Address: 115-64-166-233.static.tpgi.com.au - 115.64.166.233 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2391	Project Website Submission	01/11/2010	Online Submission from Charis Lynn (support)	North Byron Parklands have already undertaken a number of detailed fauna and flora surveys across the proposed site. On top of this they have now committed to undertaking environmental audits for all major events (before, during after). Such information will be very valuable in terms of fine tuning the current environmental policies and procedures and will dramatically reduce any associated environmental pressures. Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even

the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime.

Cultural arts and music festivals are enjoyed by many people in Byron. People travel from near and far to attend. It would be such a shame to not offer this anymore.

The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance.

I personally have travelled to Splendour in the Grass for the last 4 years, from Tasmania and Sydney. Splendour is an opportunity to meet up with my relatives at Tweed Heads and see friends who I otherwise wouldn't see. It is also the best festival I have ever been to with the line up of 2010 being one of the best around the world. Although 2010 was a great year for Splendour, I found it extremely hard in comparison with it being in Byron Bay, to travel too. I had never had an issue with traffic or camping at Splendour before, however heading to Woodfordia I remained in traffic for 6 hours, ran my Aunts car into the back of another car due to suddenly stopping traffic, causing my side passenger to hit her head on the windscreen and smash it. We were then not given a camping spot and sent to find our own at 2am. This had never happened at Byron, the staff were always friendly and I've been able to drive home after the event without an issue. The trip to Woodford is too far. Bring Byron back!

Name: Charis Lynn

Address:

				37 Rowley St, Camperdown, 2050 IP Address: 203-158-51-89.dyn.iinet.net.au - 203.158.51.89 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2392	Project Website Submission	01/11/2010	Online Submission from Philip Skuthorpe of Individual (support)	Much of the agricultural and forestry industries of the northern rivers has significantly declined over the past decade and many people have been forced into lower paid sectors such as retail and tourism. Now more than ever there is a need for diversifying the employment base and the North Byron Parklands proposal will do exactly that. With job positions projected to be more than 200 there is a very real need to approve such a project. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. It is a matter of seeing the opportunities for positive environmental outcomes in what are presently unexpected places. As time progresses and we all grow up a little with our environmental outlook, we will recognise that being successful in business can also mean being successful with the ecology and environment in which your business operates. Those in the position to bring about such change should be encouraged, not demonised.

P2393	Project Website Submission	01/11/2010	Online Submission from Lauren Burton-Jones (support)	Name: Philip Skuthorpe Organisation: Individual Address: 45 Koombahla Drive tallebudgera 4228 IP Address: - 115.131.29.10 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 One of the unintended effects on the environment from outdoor events is light spill. So it is pleasing to see that this issue is well addressed under the organisationâ□™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events. The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. A place where people can get together and enjoy the beauty that Byron Bay has to offer. With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.

				yay Name: Lauren Burton-Jones Address: 15 armstrong way highland park qld 4211 IP Address: 202.63.49.199.static.rev.aanet.com.au - 202.63.49.199 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2394	Project Website Submission	01/11/2010	Online Submission from Ryan Waters (support)	The long history of agricultural activities at the North Byron Parklands site has lead to the degradation of much of the site over the past 50 years. Regeneration work is needed before the site can be considered ecologically valuable and the North Byron Parklands team plan to plant a significant number of native trees to achieve this. The two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism. Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. It?s up to us as adults to decide that we want to support venues that support young people. Name: Ryan Waters Address:

				37 Minerva Court Eatons Hill IP Address: cpe-121-222-40-5.lnse1.cha.bigpond.net.au - 121.222.40.5 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2395	Project Website Submission	01/11/2010	Online Submission from Alana West of Hostec (support)	The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. How many times have we heard of organisations saying that they have incorporated environmental considerations into their business activities? Well here is a project that seems to have been built from the ground up based on ensuring that environmental impacts are mitigated or reduced and that positive environmental outcomes such as tree planting and habitat creation are maximised. Great job parklands. With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff. Splendour is an excellent festival with excellent punters who respect the environment and are there to enjoy themselves. I stopped over in Byron on the way to Splendour this year and all the locals I spoke to said they were sorry that Byron was not being held there and they hoped it would be back. Give splendour a home!

				Name: Alana West Organisation: Hostec Address: Level 6, 11 York st Sydney 2000 IP Address: access.hostec.com - 203.63.243.70 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2396	Project Website Submission	01/11/2010	Online Submission from Siobhan Doyle (support)	The local indigenous stakeholders do not object the North Byron Parklands proposal. There is actually an ancient Aboriginal meeting place situated in the local area that contains the Parkland site. This site will be a cultural meeting place for all Australians. The tourism industry is a major contributor to the Byron Shire and Northern Rivers Region economies, with visitation critical to the regionsâ□™ economies. The proposed North Byron Parklands project will result in a massive increase in the number of domestic visitors to the area and to a lesser degree, will also attract many overseas visitors. As this industry is so important to the region it makes good sense for this project to proceed. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. Name: Siobhan Doyle

				Address: 110 Bell st Coburg Vic 3058 IP Address: cpe-143-238-1-59.lnse1.win.bigpond.net.au - 143.238.1.59 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2397	Project Website Submission	01/11/2010	Online Submission from Sam Verney (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? The proposed North Byron Parklands vegetation management plan will see a staged regime of tree planting across the site. Apart from the obvious habitat creation, etc, this level of mass planting will have other important environmental benefits. Benefits such as reduced soil erosion, salinity and of course will also help to greatly improve water quality through nature filtration processes associated with such significant biomass. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. I believe that cultural events in our community help people grow and develop. North Byron Parklands proposed event site would create social and inspiring opportunities for our regions youth. The site is an excellent idea and would continue to bring a great stream of revenue for the area along with supplying world class entertainment which I have had the most enjoyable

				time of my life every year. Name: Sam Verney Address: Unit 5, 9 Hill Crescent, Carina Heights, 4152 QLD IP Address: - 202.124.73.227 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2398	Project Website Submission	01/11/2010	Online Submission from Adam MacLeod of CSIRO (support)	It would be great to have Spelndour back home. The music festival is a great atmosphere for people to enjoy the bands and enjoy the local environment. You can see from previous Splendor events (and from other large music festivals, such as Glastonbury which attracts 150 000 people each year) that the organisers and public attendees go out of there way to be good guests -- at an environmental and personal level. Name: Adam MacLeod Organisation: CSIRO Address: 18 First St, Ashbury NSW IP Address: pinegreen-mm.atnf.csiro.au - 130.155.197.155 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2399	Project Website Submission	01/11/2010	Online Submission from Katie Blakey of Australian Sex Party (support)

In addition to the plethora of environmental programs proposed by North Byron Parklands once the site becomes operational, I note that they will also undertake in-depth ecological assessments prior to and during their construction phase. While it is noted that their building program is relatively small given the limited infrastructure planned, it is very pleasing to see that such ecological assessment and monitoring is to be undertaken.

For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers.

The projected visitor nights generated by the North Byron Parklands in its fifth year of operation is in the order of 97,000. This is a massive accommodation boon for hotels, motels, apartments and camping facilities in the region and does not even take into account the other forms of tourism expenditure that such visitors will make. Tourism is a key industry in northern NSW and should be supported in order to maintain and grow the sector into the future.

P2400	Project Website Submission	01/11/2010	Online Submission from Michelle Walker (support)	There is a reason why the government agencies including the National Parks and Wildlife services didnâ□™t object to this application, it really is in the best interest of everyone. North Byron Parklands ability to generate new and exciting employment opportunities will encourage young adults to remain working and living in the region instead of packing up and moving to a large city seeking employment. It is important to maintain the balance of ages in the community. This proposal must be approved! There has been a rapid decline in jobs, tourism and culture in the Northern Rivers over recent years. Proposals like North Byron Parklands are the answer to these problems. We need to support creative industries that promise to provide so much for the community. Approve the North Byron Parklands proposal. I think that events like this help people grow, experience North Byron Parklands and all that our area has to offer. The North Byron Parklands proposal would definitely be a growing experience for me. Dont take splendour in the grass away from us, it is one of the best festivals in australia and needs to stay in Byron Bay where it all began.

				thanks Michelle Name: Michelle Walker Address: 27/10 Goodwin Street, Narrabeen, NSW, 2101 IP Address: - 210.7.132.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2401	Project Website Submission	01/11/2010	Online Submission from henry young of USU (support)	North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Byron Shire and the wider northern rivers region has been a fast growing area for the creative industries sector. Huge numbers of people have moved into the region with expectations of finding work in this sector and more than ever there is a need to ensure that projects that directly and indirectly benefit this growing sector are supported. The Parklands proposal if approved will become a dominant force in expanding the creative industries sector and will provide substantial job opportunities. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification

				system. This is a great initiative. Name: henry young Organisation: USU Address: 176 New mt rodd rd Bingara NSW 2404 IP Address: r125-63-140-69.cpe.static.unwired.net.au - 125.63.140.69 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2402	Project Website Submission	01/11/2010	Online Submission from Ben Howell (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. The approval of this proposal will lead to new employment opportunities that may not have previously been offered on the north coast of NSW. New and exciting jobs will boost the youth employment and inspire young adults to remain in the local area after completing study.

				Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth! P2403	Project Website Submission	01/11/2010	Online Submission from Levi Kalms (support)	Byron Bay is a recognised tourism icon. It has thousands of beds in a wide range of accommodation outlets specifically designed to cater for the tourism market. When those beds remain empty for much of the year then the town should be very nervous. Those basking in the quiet times are shortsighted and cannot see the decay and decline that will follow the removal of economic generators such as the Splendour In the Grass festival and the associated North Byron Parklands project. Having been involved in many tourist related businesses, one is very aware of the seasonal fluctuation of visitors. Any proposal that plans to attract tens of thousands of visitors to a given region must be seriously considered and North Byron Parklands is one such project. With plans for a number of multiple large events, some scheduled in traditional low seasons such as winter is very beneficial for this industry.

				The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience.
				Name: Levi Kalms Address: 340 Cardigan St Carlton VIC 3053 IP Address: dsl-210-15-211-166-static.vic.netspace.net.au - 210.15.211.166 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2404	Project Website Submission	01/11/2010	Online Submission from Alissa Byers (support)	For each event held at the Parklands site, the event holder will need to prepare an event management plan that meets all the high standard of requirements outlined in the environmental, health and safety management manual created by North Byron Parklands. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. Please approve this proposal! It is very important for our young people to feel like the region has new and exciting jobs to offer for them. We need to hold onto our youth as packing up and moving to large cities is becoming the norm in our community. North Byron Parklands

provides incentives for young people to remain in the region.

Also Splendour in the Grass is one of the orignial festivals which shouldn't be forced out of the the community.Splendour brings some the best musicans through out the world to Byron which usually they fall in love with because it is a special place.The local community ,business and tourism benefits from such events which keeps everybody happy in any ways.This is why and makes Splendour what it is because of where it is.

P2405	Project Website Submission	01/11/2010	Online Submission from Stephen Rees of Kmart (support)	Three words. Jobs, tourism and culture. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances to fence erecting. Name: Stephen Rees Organisation: Kmart Address: Kmart Ballina Cnr Fox & Kerr St. Ballina 2478 IP Address: 107.114.233.220.static.exetel.com.au - 220.233.114.107 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2406	Project Website Submission	01/11/2010	Online Submission from Blake Robinson (support)	From Tweed Heads to Evans Head most of the business activity revolves around tourism. To have a cultural arts and music venue such as North Byron Parklands which will bring tens of thousands of visitors to the area and with the vast majority seeking accommodation over multiple nights is a huge economic windfall. Such a proposal would seamlessly add to the already diversified tourism offerings of the region and should be approved. Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â□˜I learned that creative,

progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ□™. (Donna Sue Sanders â□“ Executive Director of the Daytona State Foundation).

P2407	Project Website Submission	01/11/2010	Online Submission from Kassie Thoams-Smith of Mondial Assistance (support)	The size of the events that could occur at Parklands may reach 50,000 people but compared to other large events in Australia this is quite conservative. North Byron Parklands will only host events that fit into the appropriate and sustainable parameters. It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different

communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P2408	Project Website Submission	01/11/2010	Online Submission from Tom Langley (support)	North Byron Parklands proposes to create a world class sustainable cultural events site within an ecologically enhanced site. Parklands will achieve this through thourough planning and by adhering to the guielines of the environmental, health and safety management manual they have developed. Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. As soon as I started reading about this proposal I had an instant realization of the benefits North Byron Parklands would bring to the local economy of Byron Bay. I realise that this is not all about economics, and I also realise that as a non-resident of Byron Bay that economics simply does not really affect me. But this is an incredible thing for Byron - I have been there so many times, often NOT during the festival, because I knew about it FROM the festival. If you take Splendour away from Byron, then at least part of the magic that is Byron bay will disappear.

The North Byron Parklands proposal is exactly the thing we need as a society, especially for our economy. It will develop opportunities that will help small businesses which will ensure the continued success of Byron Bay.

As a resident of Bruce, right next to the University of Canberra, there are are quite a few days in the year where there is a large amount of noise coming from the University. This weekend just passed (30th - 31st October), Stonefest, the oldest festival in Australia, was held there. And I heard the whole thing! It's really not something that has a huge impact on local people, even if they are not interested in involving themselves in the event.

P2409	Project Website Submission	01/11/2010	Online Submission from emma slattery (support)	As soon as I started reading about this proposal I had an instant realization of the benefits North Byron Parklands would bring to our local economy but also to my family. In NSW and particularly regional areas such as Byron and the wider northern rivers area securing a job is becoming very difficulty. While other states prosper, NSW has fallen behind and the people are the ones suffering. The NSW Government needs to approval projects such as North Byron Parklands because it will create employment and this in turn is good for our state economy. Parklands ensures that the site area and the adjoining sites are protected by maximising â□˜down timeâ□™ between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes. I think the North Byron Parklands gives the youth of today a chance to enjoy new experiences. This is what we need to keep the youth entertained and focused. Name: emma slattery Address: 2/11 James st, Bondi Junction, Sydney NSW 2022 IP Address: - 203.111.165.202 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2410	Project Website Submission	01/11/2010	Online Submission from Jacob Swilks of Private (support)	There is a reason why the government agencies including the National Parks and Wildlife services didnâ□™t object to this application, it really is in the best interest of everyone. The local indigenous bush regeneration team has been responsible for planting over seven thousand trees in key locations of the site. This is an example of the Parklands group working with its community to provide new employment opportunities. Lets set the standard for cultural event venues in Australia. North Byron Parklands will be a sustainable cultural venue that be available for future generations to enjoy. The Byron Shire usually promotes sustainable developments, so why not support this one? Name: Jacob Swilks Organisation: Private Address: 80 marine pde nords wharf nsw 2281 IP Address: d58-104-152-162.dsl.nsw.optusnet.com.au - 58.104.152.162 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2411	Project Website Submission	01/11/2010	Online Submission from Peter Abbott (support)	The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant.

As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive.

The North Byron Parklands proposal will provide social benefits across the Northern Rivers area. Cultural events are valued by the community as it adds to their quality of life and creates improved social cohesion, lifestyle improvement, diversity, and increased creativity.

This proposal will create a cultural breading ground for the Byron Shire and for that reason alone this proposal must be approved by local government. Bring Splendour home!

P2413	Project Website Submission	01/11/2010	Online Submission from George MIllwood of Ebern Pty Ltd (support)	Name: Tom Langley Address: Unit 2 1-5 Goldman Street Bruce ACT 2617 IP Address: lnk203.vic5.adsl.esc.net.au - 210.56.81.203 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. Businesses in the area need organisation?s like North Byron Parklands to provide much needed jobs. So many people rely on tourism for their income on the North Coast that there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector.

				This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.
				Name: George MIllwood Organisation: Ebern Pty Ltd Address: 5 First Street, Ashbury, NSW, 2193 IP Address: cpe-124-189-80-39.azsz1.cht.bigpond.net.au - 124.189.80.39 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2414	Project Website Submission	01/11/2010	Online Submission from apryl geale (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year.
				When you consider that the North Byron Parklands team has planted over 7,000 trees across key parts of the site to improve habitat and fauna migration opportunities (and many of these plantings are now 4 metres plus), it is pleasing to note that they will be planting tens of thousands more trees as part of their managed parklands approach to revegetating the site. This is a huge windfall for an environment which is currently predominantly cleared pasture land.
				In recent times visitor day trips to the northern rivers has been declining. Coupled with a

				downward trend in the average per head tourism spend it is clear that strategies need to be put in place to increase visitor numbers. Projects that can significantly increase tourism numbers in a short space of time include cultural event activities such as those proposed by North Byron Parklands. This business is capable of attracting hundreds of thousands of visitors each year to the northern rivers which will be a huge boon for the area. With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.
P2415	Project Website Submission	01/11/2010	Online Submission from Tara Macdonald (support)	Name: apryl geale Address: 77 Tarcutta st Wagga wagga 2650 IP Address: 122-148-123-221.static.dsl.dodo.com.au - 122.148.123.221 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I've always loved musci festivals, especially of the outdoor camping variety and Byron Bay is such a beautiful place to hold such events. It's amazing to see so many different young people come together for a festival to enjoy their love of music, dance, socialising, eating and having a great time. I've never come across any trouble at a music festival such as splendour, people seem to respect and appreciate the effort that has gone into creating the festival as well as the environment around them. I believe Byron is the perfect location for Splendour and would benefit greatly from becoming it's home! From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and

would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive.

North Byron Parklands have conservatively projected that their three major events each year will attract more than 100,000 visitors to the region each year. With a currently depressed tourism sector, such a proposal is a welcome shot in the arm. The direct and indirect economic benefits flowing the tourism sector and other related industries will be immense.

P2416	Project Website Submission	01/11/2010	Online Submission from alicia mcmillan-wise (support)	I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. Name: alicia mcmillan-wise Address: 52 bennett rd londonderry nsw 2753 IP Address: 220-245-182-124.tpgi.com.au - 220.245.182.124 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2417	Project Website Submission	01/11/2010	Online Submission from Katie Franich (support)	In relation to environmental management one of the biggest impacts on fauna in this region is dogs. It is pleasing to note that the environmental, health and safety management manual strictly prohibits dogs from entering the site. Just this on initiative will help to reduce pressure on the environment, not to mention the host of other excellent environmental programs they have documented. This proposal brings in new hope to Byron Bays local economy, small businesses that currently struggle will thrive on the additional revenue. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

				Events are not just for young people, they are for keeping us young. For reinvigorating us and reconnecting us. Having a permanent space in nature to gather together as different communities ? young people, old people, music lovers, bird watchers, is a very exciting proposition for Australia.

P2418	Project Website Submission	01/11/2010	Online Submission from Christopher Denman (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. North Byron Parklands has worked closely together with the local Aboriginal Land Council to conduct a number of archaeological digs to help determine the culturally significant parts of the site. These digs have lead to certain areas of the site to become â□œout of boundsâ□□ to maintain and protect identified cultural areas of importance. Apart from the amazing environmental initiatives covering fauna and flora across the North Byron Parklands site that have been developed, these guys are also going to tackle waste,

				recycling and the minimisation of resource consumption through a number of proven effective measures. They have even proposed a â□œresource centreâ□™ where materials can be stored and used again and again for other events. This is a pretty impressive effort I must say.
				Name: Christopher Denman Address: 4 Lipton Place McDowall IP Address: cpe-121-208-232-193.mjcz2.cha.bigpond.net.au - 121.208.232.193 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2419	Project Website Submission	01/11/2010	Online Submission from Daisy Lueckl of N/A (support)	The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesnâ□™t proceed then itâ□™s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklandsâ□™ group? No-one. That would be a terrible lost opportunity.
				North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately $192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved!
				So many people in the northern rivers area rely on the tourism industry for their bread and butter. These days most businesses are geared towards the tourism dollar and if past trends are anything to go by this industry sector will continue to play a key role in the regionâ□™s

				economic fortunes. The people behind Parklands will play a dominant role in growing and sustaining the tourism industry and we should all get behind them to make this project a reality. North Byron Parklands has so much to offer the Byron Shire and Northern rivers region. It seems strange to think twice about this proposal. This proposed venue has to go ahead. Name: Daisy Lueckl Organisation: N/A Address: 101 Pittwater Road, Manly NSW 2095 IP Address: cpe-121-210-1-58.mnqy1.cht.bigpond.net.au - 121.210.1.58 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2420	Project Website Submission	01/11/2010	Online Submission from Prue Ashon (support)	When you have the combined expertise of event operators as those that make up the owners of North Byron Parklands it is quite evident that events that are proposed to be held at the Parklands site will be conducted in a successful and safe manner. With years of combined expertise these industry leaders will ensure that all events are conducted in a manner that ensures the management of all aspects of large and small events are adequately covered. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control

measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government.

Why wouldn?t we want a world class facility like North Byron parklands in the Byron region? This proposal will create new jobs to young adults and promote sustainable development. The local government should welcome that and support this proposal.

P2422	Project Website Submission	01/11/2010	Online Submission from Chris Hannibal of Sydney UNI (support)	The North Byron Parklands site has undergone a number of detailed assessments to assure the site is enhanced to be able to become a â□œsustainableâ□□ site for cultural events in the area. It is unlikely that many other developments on the north coast have gone into this much detail and conducted such thorough assessments. This shows the level commitment the North Byron Parkland have for this site. The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record

only comes about through effective, well planned event policies and procedures.

The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

Byron Shire Council has always longer for a permanent event site in its LGA, particularly now that the existing sites are either no longer available or are two inadequate to deal with world class events. The Blues Fest have bought a site which they intent to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would such a shame for the NSW government not to approve it.

P2423	Project Website Submission	01/11/2010	Online Submission from John Beaton (support)	Please allow the North Byron Parklands proposal to go through, it would mean so much to me and all my friends. Name: John Beaton Address: 6/16 Queen St Kingaroy IP Address: - 202.150.62.35 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2424	Project Website Submission	01/11/2010	Online Submission from Sara Thomas (support)	The level of environmental assessment that has taken place across North Byron Parklands is greater than for any other development in the Northern Rivers region. Not even councils or government agencies responsible for managing environmental values has undertaken such in-depth studies. All such assessments indicate that the proposal will not only have minimal environmental impacts, it is actually likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. These are very positive outcomes. The success of towns reliant on tourism generally comes down to how many people visit the area. To maintain a sustainable business, tourism dependant regions need to not only maintain visitor numbers, they need to grow them. North Byron Parklands represents the types of businesses that are required to increase visitor numbers and if this proposal goes ahead it will be a very positive thing for the NSW north coast. With its focus on cultural heritage management, North Byron Parklands can instill in the region a greater understanding of our local indigenous and non-indigenous ancestry. The cultural centre would provide unique learning opportunities for staff.

P2425	Project Website Submission	01/11/2010	Online Submission from Rob Wilson (support)	Name: Sara Thomas Address: 77 Victory Road, Airport West, VIC 3042 IP Address: mail.retirecare.com.au - 125.255.116.80 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The level of commitment in relation to environmental monitoring before, during and after events is going to provide environmental benefits on two fronts. First it will accurately document the presence or otherwise of various fauna around event times. It will also importantly start to build a large amount of environmental data which can be used to guide and modify environmental practices into the future. With the already significant amount of environmental data captured through assessments and surveys, this body of knowledge is likely to be significant. Potential environmental impacts on the proposed site have been avoided by development areas occupying only the existing grassland areas of the site. Plus, the development proposes an additional 11.1 ha of re-vegetation and 48.1 ha of additional plantings. A place where people can get together and enjoy the beauty that Byron Bay has to offer. North Byron Parklands offers music, entertainment and culture for our locals and tourists. What a great way of putting Byron Bay more on the map.

P2426	Project Website Submission	01/11/2010	Online Submission from Alice Wilson of n/a (support)	Name: Rob Wilson Address: 17 Coachwood Close Byron Bay IP Address: liferi.lnk.telstra.net - 203.45.118.187 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands will attract tens of thousands of visitors to the area, create employment opportunities, and promote sustainable development. It seems obvious that this development will benefit our community, the local government just needs to support it! This proposal will expose our young people to an array of new job options including event management, live sound engineering, various publicity/promotional roles, and traffic management. The region needs new jobs and Noth byron Parklands will provide this. The Parklands development proposes the planting of thousands of extra trees that will improve habitat for wildlife and boost the ecological integrity of the Billinudgel Nature Reserve and the â□˜coast to hinterlandâ□™ wildlife corridor. The extended â□˜restâ□™ time that the event site will receive will not only aid the direct sight but encourage growth in the surrounding nature reserves.

P2427	Project Website Submission	01/11/2010	Online Submission from tara mellish ()	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. Positive environmental outcomes are important for any development and one very important outcome offered by the North Byron Parklands proponents is to apply a vegetation

management plan across the entire site. Under this plan sections of the site will be restored back to pristine forest cover while others will be treated as managed parklands. Under this treatment very large areas will be planted with low density native trees that will provide connection points for fauna to avoid large pastoral areas and reduce the likelihood of predation during movement across the site. They are not required by law to do this, but do see it as an important environmental outcome.

It is important to offer creative opportunities to the youth of Byron By and surrounding areas. The Splendour in the Grass festival provides the ?Splendid Initiative? offers ten young and emerging artists the chance to immerse themselves in an intense residential laboratory experience that develops their arts practice.

P2428	Project Website Submission	01/11/2010	Online Submission from Benjamin Richardson of None (support)	To Splendour site approval board, This proposal is so important for the Northen Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce. Every year tens of thousands of people flock to the Splendour in the Grass event with the explicit intention of having the best time possible. This includes checking out the local area's around the site as well. By doing this the 32 000 people who attend are giving back to the local community as a sign of graditude for letting the Splendour in the Grass event take place. If you speak to anyone these days, getting and keeping a job is high up on the list. Regional areas generally do not have a range of diversified industries to choose from. Parklands is offering meaningful and interesting work, particularly for young people and should be welcomed with open arms. Having Splendour in the Grass in the Byron shire brings people from all over Australia (and the world) into the local area to see the natural beauty of northern NSW. Once people have been within the Byron Shire for Splendour they go home thinking nothing but good things about the area and many make sure they get back to the Byron Shire area when Splendour is not on just to enjoy it. These people from all over Australia tell others about how much they enjoyed the area and convince others to come as well. Through this means Splendour generates tourism all year round for the Byron Shire bringing in work and money for the local commmunity. With up to twenty days of events each year the work experience opportunities for people in the region are very exciting. The bump in and bump out periods provide further work. We need these jobs and the training they provide, from high level event management to ticketing, technical production and traffic management.

If Splendour gets approved for a permanent home in the Byron Shire it will cement Splendour in the Grass as a festival of world wide notoriety not only for the impressive line up's and production but also for the beautiful location where Splendour is held.

Thank you,

Ben

P2429	Project Website Submission	01/11/2010	Online Submission from Shaun Reilly of OneSteel (support)	It is unlikely that there is another events venue that has the level of environmental management systems in place as those proposed by North Byron Parklands. Based on ISO14001 the environmental policies and procedures to be implemented at this venue will provide robust monitoring and mitigation measures to ensure that fauna and flora is protected. Measures such as requiring suitable buffer zones between event activities and forest blocks is one such positive initiative. Name: Shaun Reilly Organisation: OneSteel Address: 7 Persimmon Grove, Golden Grove, SA 5125 IP Address: - 202.53.194.9 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2430	Project Website Submission	01/11/2010	Online Submission from Kerri Dibben (support)	The two main reasons I believe the festival should be brought back is Tourism and Culture. Tourism and culture are so important to the area as many business rely on the influx of visitor for large events like Splendour to keep thier business alive. Visitors travel to the area to experience the laid back, coastal culture of the region. Parklands will bring more and more cultural events to the area and in turn boost tourism. Name: Kerri Dibben Address: po box 1531 Griffith IP Address: c-210-10-167-225.syd.connect.net.au - 210.10.167.225 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2431	Project Website Submission	01/11/2010	Online Submission from Loretta Lee (support)	The North Byron Parklands project is an innovative and acceptable use of this very large, former grazing and cane-growing property. If the NBP proposal doesnâ□™t proceed then itâ□™s likely that the land will revert to those uses, or could possibly be subdivided into another cookie-cutter seaside suburb. Who will continue the environmental regeneration works being undertaken by the North Byron Parklandsâ□™ group? No-one. That would be a terrible lost opportunity. The North Byron Parklands application exceeds all expectations and must be approved. There is just so many good things that will come from North Byron Parklands proposal including environmental restoration, employment opportunities, a tourism increase, and a boost in local businessâ□™ income. There is no reason why this proposal should not be approved by state government. Bring Splendour home to the Northern Rivers! Letâ□™s look after the young people in the community by approving this proposal. North Byron Parklands will create new and exciting

				training and employment opportunities for them.
				Name: Loretta Lee Address: 59 Plummer Road Mentone, VIC 3194 IP Address: cpe-124-189-129-224.cyzn1.lon.bigpond.net.au - 124.189.129.224 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2432	Project Website Submission	01/11/2010	Online Submission from Geraldine Worner (support)	It is very telling when an organisation such as North Byron Parklands go to the considerable lengths they have to identify and assess the potential environmental impacts associated with the project. The extensive mitigation strategies they have proposed will not only see the protection of valuable ecological attributes but improve the overall environmental viability of the site. It is pleasing to see such a high level of environmental planning. Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home! Byron Bay is a tourist town that relies heavily on tourists to generate revenue. Our high season is summer but letâ□™s create a high season in winter too by utilising North Byron Parklands!

P2433	Project Website Submission	01/11/2010	Online Submission from Erin Skubiski (support)	Name: Geraldine Worner Address: 40 Calgary Street, Sandringham, Auckland, New Zealand IP Address: 124-197-3-3.callplus.net.nz - 124.197.3.3 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The average annual household income in the Byron Shire and the Northern Rivers is substantially lower than NSW (approximately $55,000 compared with $71,000) and as such employment opportunities generated by North Byron Parklands would be incredibly valuable to the Shire and the region. While it has to be recognised that the recently upgraded Pacific Highway and the existing Tweed Valley Way represent the biggest barrier to fauna migration in an east-west direction, the owners of North Byron Parklands have committed to improving the currently degraded wildlife corridor in a number of ways. Putting aside the fact that they have already planted over 7,000 trees in the corridor area and removed large quantities of noxious weeds, their vegetation management plan will dramatically improve vegetation cover and thereby improve species movement opportunities through the further planting of endemic trees. This is a huge positive. North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth!

				Name: Erin Skubiski Address: 55 Thurlow Street, Redfern, NSW, 2016 IP Address: mx3.bluefirems.com.au - 202.146.6.254 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2434	Project Website Submission	01/11/2010	Online Submission from Melanie Riddle (support)	The North Byron Parklands site has a long history of agricultural activity that has degraded much of the site over the past 50 years. While there are still some high conservation value areas of the site a great deal of regeneration is needed before the site can be considered ecologically valuable. The Parklands people are proposing significant tree plantings which will be a valuable process. With so many people relying on tourism for their income on the North Coast there is an obligation on behalf of state and local governments to help facilitate any reasonable project that will increase domestic and international tourist numbers. North Byron Parklands will become the home of a number of major events with each of these events attracting thousands of people to the area. This will greatly enhance the local tourism sector. Name: Melanie Riddle Address: 4/54 Ewos Parade, Cronulla, NSW 2230

P2435	Project Website Submission	01/11/2010	Online Submission from Nick Gillett of student (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. The people behind North Byron Parklands are professional event operators with decades of combined experience in hosting successful events. Having sold millions of tickets to the dozens of events they have held, it is extremely beneficial that such experienced personnel will be available to guide and manage events proposed for North Byron Parklands. I don't understand why anyone would disapprove of the development. This should't even need my support.

				Name: Nick Gillett Organisation: student Address: 42 Mulsanne St, Holland Park WestBrisbane, QLD 4121 IP Address: cpe-121-208-213-112.mjcz2.cha.bigpond.net.au - 121.208.213.112 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2436	Project Website Submission	01/11/2010	Online Submission from Cassie Cranley (support)	It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.It would a great shame for the Byron Shire to loose the Splendour in the Grass festival. The local community needs the festival, as it offers a huge amount of business for local shop owners, pubs, hotels, motels and camping grounds. Many of these local business will feel great financial pressure if Splendour in the Grass does not return to the region.The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region. Name: Cassie Cranley Address: 70 Kiarama Ave Kiama Downs 2533 IP Address: 203-206-134-9.perm.iinet.net.au - 203.206.134.9

P2437	Project Website Submission	01/11/2010	Online Submission from Daniel Chaitow (support)	With the documenting of environmental requirements through the North Byron Parklands management manual it is clear that a very high level of commitment has been made to protect and enhance the environment. Take for example the requirement to have a 30 metre buffer between the car park and adjoining nature reserve. This initiative will protect the nature reserve and will allow for the buffer area to slowly regenerate back to its former bushland status. In relation to employment and wages the Byron local government area has one of the Stateâ□™s lowest average wages, around $31,000 per annum. A proposal like Parklands will bring much needed employment opportunities top the area and will likely provide a large number of positions that are well paid. The Shire and the region need these opportunities. With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government.

P2440	Project Website Submission	01/11/2010	Online Submission from Catherine O'Malley (support)	The North Byron Parklands has gone to great lengths to protect and enhance the biodiversity values of the site. This is shown by the Parklands group developing a environmental, health and safety management manual to identify, manage and monitor all the identified potential ecological risks. Having read the North Byron Parklands submission and attended many events over the past number of years I am blown away by the level of detail and the huge range of control measures that this development offers to ensure smooth and successful events. The North Coast of NSW needs a development of this nature and it should be approved by the NSW government. Having Splendour back home in Byron can only help the local community and with all the reseach and investment that is being proposed there will be no damage to the envirnoment. Name: Catherine O'Malley Address: 41 Anderson Stree, Newport VIC 3015 IP Address: 30.171-50-210.static.corp.syd.iprimus.net.au - 210.50.171.30 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2441	Project Website Submission	01/11/2010	Online Submission from jeff hancock (support)

North Byron Parklands is set to play a pivotal role in strengthening the north coast tourism sector by attracting so many people to the area. These visitors will likely stay one or two days either side of the event they are attending and will no doubt spend a lot of money on goods and services and tourism related activities. This project should be supported from the Premier down, because the regions stands to gain so much from it.

The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment.

On top of this, there are no other adequate venues to host events like splendour in the grass. Last years event in woodfordia was unsuitable as the location could not handle the volume of traffic needed for such a major event. Having a venue such as North Byron Parklands will keep bringing return customers to this event, as well as supplying byron shire with a handsome influx of revenue.

P2442	Project Website Submission	01/11/2010	Online Submission from Ollie Edwards of SurfStitch.com (support)	If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. For many young people in the local area, getting a job has proved to be very hard. This is because other than retail and tourism there are few large employers about. Bad luck if you do not want to make a career in pouring coffee or cleaning rooms. This project will offer a whole range of people with new prospects in securing a job in the creative industries, an industry that is on the rise in this area. We really do need more substantial employers. Name: Ollie Edwards Organisation: SurfStitch.com Address: 89 Darley St, Mona Vale, NSW, 2103. P2443	Project Website Submission	01/11/2010	Online Submission from Rachel Cuskelly (support)	The North Byron Parklands site has numerous positives in its favour. Not the least among them are the numerous accommodation outlets within easy reach via excellent road networks. The venue is also close to airports at both Ballina and Coolangatta, a factor which will appeal to interstate and overseas visitors. There is also plenty of room on site for thousands to camp. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklands? proposal 100% . The local government should approve this application. It would be a shame to see this proposal turned down, it doesn?t take much to see that the North Byron Parklands proposal has so much to offer. P2447	Project Website Submission	01/11/2010	Online Submission from Billie-Grace Dunk of Student (support)	Most of the jobs on the North Coast rely on industries such as tourism and retail trade. To help expand the employment base there is a strong need to nurture an array of other industries such as artistic and creative industries. North Byron Parklands is a project that will greatly assist in providing a diversity in job prospects and on this basis should be actively supported by government and the wider community. North Byron Parklands comprises a number of people with envious event management track records. These people have hosted many, many events that have attracted millions of people. If the North Byron Parklands venue can attract a large number of people to the area each year (which it is estimated to do) then the local tourism industry stands to benefit significantly. Given the past few years which have been tough for these operators, surely this is a welcome opportunity. At present the North Byron Parklands site is subject to significant sediment and erosion issues. Previous land practices have seen poor top soil removal and impacts on graded lands. The North Byron Parklands proposal aims to address these existing soil impacts and also has put in place a sediment and erosion control plan during their construction and operation phases. This is to be commended. Name: Billie-Grace Dunk Organisation: Student Address: 140 Fairfiel Rd Fairfield, Birsbane, Qld 4103, IP Address: 202.63.51.91.static.rev.aanet.com.au - 202.63.51.91 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2448	Project Website Submission	01/11/2010	Online Submission from Simon Fuller of Sonar1 (support)	With the employment numbers as low as they are, the Byron Shire community needs the jobs that will come from approving the North byron Parklands proposal and bringing Splendour in the Grass home! The Byron region can market itself as a hub for events and creativity if this proposal is approved. They would be very fortunate indeed to have the training and skills benefits of such a proposal. Tourism is one of the biggest employers in the northern rivers area and the North Byron Parklands proposal is projecting that it will bring thousands of people to the area each year. Increasing visitor numbers to the area is the surest way to help grow these tourism businesses particularly when the proposal shall bring large numbers of people to the area in traditionally slow times. Name: Simon Fuller Organisation: Sonar1 Address: NarrabeenNSW IP Address: c122-106-229-3.belrs3.nsw.optusnet.com.au - 122.106.229.3 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2449	Project Website Submission	01/11/2010	Online Submission from Robin Pagan (support)	I agree with all the below and think is it great for both the Festival and Byron for Splendour to have a permanent home in the Byron area. The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000′s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. North Byron Parklands already has demonstrated its commitment to working with local indigenous people through the ongoing relationship it has developed with the Madhima Gulgan rainforest regeneration team. Together these two groups have been responsible for planting over 7,000 native trees across the site and the construction and placement of more than 25 nest boxes for resident fauna. One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive. There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city. Name: Robin Pagan Address: 101 Old Gold Mines Road Sutton NSW 2620

P2450	Project Website Submission	01/11/2010	Online Submission from Matthew Jokovich of Curtin University (support)	Hi Im Matthew Jokovich and I want to support the return of the Splendor in the Grass festival to the North Pyron Parklands. The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available. The Byron and surrounding areas in the last twenty years have survived on the back of tourism. While other more traditional industries have been in decline, tourism has provided an income for countless families and individuals in the region. North Byron Parklands is a project that will generate large numbers of visitors to the region which given the recent global financial crisis is just what the sector needs. It should be approved on this basis alone. Thanks for your time,

				Matthew Jokovich Name: Matthew Jokovich Organisation: Curtin University Address: 3 Burnby Cross, Leeming, 6149 IP Address: wsce2.curtin.edu.au - 134.7.248.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2451	Project Website Submission	01/11/2010	Online Submission from Lauren Pendergast (support)	North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. The potential adverse impact of the Parklands usage on flora and fauna has been largely mitigated by virtue of the event site occupying only existing grassland areas of the site and avoiding vegetated parts of the site. Further, the significant increase in habitat afforded by the additional 11.1 ha of revegetation and 48.1 ha of additional plantings also mitigates against adverse impact upon flora and fauna species. I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported. The North Byron Parklands sounds really interesting and exciting.

P2452	Project Website Submission	01/11/2010	Online Submission from John Meenan (support)	Name: Lauren Pendergast Address: 11 Monk CresBOMADERRY NSW 2541 IP Address: southc34.lnk.telstra.net - 165.228.69.217 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 While much is made of the Marshallâ□™s Ridge wildlife corridor the actual reality of this corridor is that it is fragmented, populated with noxious weeds and is great need of repair. Restoration will only come about by the landowner, in this instance being North Byron Parklands. This business has committed through its vegetation management plan and a number of other measures to reduce forest fragmentation by planting endemic species which will no doubt improve fauna movement opportunities. Most businesses that operate in Northern NSW do not have anywhere near the level of sophisticated environmental strategies, controls and procedures that North Byron Parklands is preparing to put in place. It seems that every aspect of flora and fauna management has been considered and with a robust environmental auditing component I think we will see some excellent environmental outcomes arising from this development. I am very supportive of their approach. Name: John Meenan Address:

				20 Braunton st BictonWA6157 IP Address: wsce2.curtin.edu.au - 134.7.248.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2453	Project Website Submission	01/11/2010	Online Submission from Eugene Showler of N/A (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guy's book. With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral responsibility to approve it just on employment considerations alone. As far as most events go in terms of protecting the environment, they put in place things like recycling bins and the like. North Byron Parklands is proposing a bunch of environmental controls that go way above and beyond such simple measures. I am extremely impressed with the environmental programs they are going to commit to and have every confidence that the environment will be more than adequately protected.

I am a young an enthusiastic person always looking for new ways to broaden my horizons. North Byron Parklands will open me up to new creative opportunities and experiences. It is important that this proposal is apporved by local government.

I've never been to Bryon's... YES BYRON'S ...SPLENDOR IN THE GRASS FESTIVAL BUT PLAN TO SOON, I HAVE ATTENDED MANY OTHERS IN VICTORIA AND HAVE JUST RETURN FROM AN AWESOME FESTIVAL JUST TODAY AND FOUND THIS EMAIL TO OFFER MY SUPPORT. I BELIEVE FESTIVALS TO BE AMAZING, INCREDIBLY AMAZING AS THEY BRING ABOUT UNITY, A GREAT SENSE OF FREEDOM AND INCREDIBLE LEARNING EXPERIENCES OF THE HUMAN SPIRIT, SOUL AND MIND IN A WAY THAT ISN'T ALWAYS AVAILABLE IN THE INDIVIDUAL'S HOME, FAMILY,SCHOOL LIFE OR LIFE IN GENERAL. PLEASE SHOW YOUR SUPPORT FOR THESE WONDERFUL TIMES THAT CAN CHANGE A PERSON IN SUCH A POSITIVE WAY AND GO TO ONE YOURSELF, YOU WILL NOT BE DISAPPOINTED. IF I COULD BE APART OF ANY ORGANISATION, BEING PART OF AN EVENTS CREW-THAT DO THIS VERY HARD LOGISTICAL NIGHTMARE OF LOVE- WOULD BE IT. ALL THE BEST.

P2454	Project Website Submission	01/11/2010	Online Submission from Arlie McCarthy (support)	North Byron Parklands will bring more tourism to The Byron Shire every year, boosting local business revenue and helping small business stay on thier feet. This proposal will benefit everyone. The North Byron Parklands has been subjected to decades of intensive cattle farming and sugar cane crops. With respect to the cattle, they have severely degraded the understory of most of the forest blocks on the site. The Parklands proposal includes a commitment to fence off many of the forest blocks which will allow a much needed fauna understory to regrow and which will provide habitat for many vertebrate creatures. Through this corridors connecting existing habitat patches will be created, allowing many species to disperse more widely and prevent small isolated patches of species forming. Young people need to gather together to celebrate. Young people will gather regardless of cultural event venues. Supporting venues that do this in a safe, encouraging and positive environment is critical and will help prevent young people gathering together in destructive or undesirable ways. It's up to us as adults to decide that we want to support venues that support young people. Name: Arlie McCarthy Address: 5 Camden Rd, Hawthorn, VIC 3122 IP Address: capcpe-58-175-113-237.lons13.win.bigpond.net.au - 58.175.113.237 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028)

P2455	Project Website Submission	01/11/2010	Online Submission from Tony Gilding of Macadamia Castle (support)	Dear Sir/Madam As owner of the Macadamia Castle I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I am very confident that this will be a successful cultural event site. I have also visited the site for a full inspection We do need events in this area of high unemployment and low seasons. This site does look as good as we will get. The amount of detail and the control measures put in place for this development should be applauded. This proposal should be approved! P2456	Project Website Submission	01/11/2010	Online Submission from Nicole Nathan (support)	In regards to employment so many traditional industry sectors have left the mid and far north coast of NSW. This has resulted in a significant structural change to our employment base. A new shift towards service industries and importantly the creative industries means that the necessary infrastructure and planning decisions are required to capitalise on this trend. North Byron Parklands is one such project that will strengthen the North Coastâ□™s existing creative industries base and will generate significant part time and full time employment, all of which is much needed in these areas. As a state, we need to get behind this proposal. Over the years we have lost many cultural event opportunities to QLD and VIC because we donâ□™t have a sufficient event site. North Byron Parklands has all the right controls in place and a positive cultural outlook for our sate. We must support this application. I find great delight knowing that competent Event Managers will be involved with all the events held at North Byron Parklands, ensuring that we have a lot of great experiences if this proposal goes through. Name: Nicole Nathan Address: 8A Graham Street, Southport Qld 4215 IP Address: - 202.124.74.184 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2457	Project Website Submission	01/11/2010	Online Submission from Bradley Hickford of Harvey Norman (support)	An annual event for music lovers... Don't let red tape stop thousands of people from enjoying this event and supporting Australian music culture! P2458	Project Website Submission	01/11/2010	Online Submission from Ally Gibellini (support)	The North Byron Parklands is quite unique in that the proposed outdoor venue will be non-operation for the vast majority of the year. With only twenty event days per year this means that there is significant time for resting the site which is a huge positive for the environment. It should be considered that if this development does not proceed then some other form of development which may be far more intrusive and full time in nature may be applied for and approved in the future. This project will be good for the environment. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. Tourism is really the back bone of of regional areas such as the Northern Rivers. This proposal will not only boost tourism but it will boost the creative industries sector and encourage other supportive industries to invest in the creative industries sector creating growth in the area. This proposal needs to be approved.

				North Byron Parklands will add incentive to the young people of the Northern Rivers to stay in the local area. This proposal will see a number of new employment opportunities for the youth in the community including event management, traffic control, ticketing and more. The region needs to provide more jobs for young people so they all donâ□™t move to cities. P2460	Project Website Submission	01/11/2010	Online Submission from Darren Ung (support)	North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. As a youth of the area I am constantly searching for ways to broaden my horizons. I believe this proposal will offer new opportunities, new jobs, new experiences and new ways to develop. Name: Darren Ung Address: 34 Bareena Street, Canley Vale, 2166New South Wales, Australia IP Address: 115-64-38-170.static.tpgi.com.au - 115.64.38.170 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2461	Project Website Submission	01/11/2010	Online Submission from Joel 'Milky T' English of Jam Music (support)	The preservation of ecological values in and adjacent to the Parklands site is an important aspect of the proposal. Much scientific assessment has been undertaken which highlights that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values. The North Byron Parklands Project will actually result in a positive impact on the environment and should be supported. Name: Joel 'Milky T' English Organisation: Jam Music Address: Level 5 - 52 King Street SYDNEY, NSW, 2000 IP Address: post.merivale.com - 210.215.160.18 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2462	Project Website Submission	01/11/2010	Online Submission from luka montin (support)	Holding events requires a sound understanding of a whole range of logistical and safety aspects. The team behind North Byron Parklands have been responsible for putting together numerous large events over the past decade. In each case they have successfully managed important aspects such as noise, ecology, lighting, traffic and crowd and safety management. The systems and procedures they have developed will assist any event being held at the North Byron Parklands site which I believe will help result in successful events. Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a

				crime.
				Name: luka montin Address: 689 king georges road, penshurst, 2222, NSW IP Address: - 203.98.195.117 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2463	Project Website Submission	01/11/2010	Online Submission from Rod Dalton of Sydney@Work (support)	There is a reason why the government agencies including the National Parks and Wildlife services didn?t object to this application, it really is in the best interest of everyone. Byron and the surrounding areas relies substantially on a range of small businesses and cottage industries to employ the people that live in this community. There are not many large employers such as what North Byron Parklands would become should it be approved. I think we need to approve and support these types of projects in regional areas to ensure there are enough job choices available to people. The North Byron Parklands will have the Parklands teams involved who have an amazing track record in developing and holding outdoor cultural arts and music events. A guarantee that this proposal will be nothing but successful. I find great delight knowing that competent Event Managers will be involved with all the events held at North Byron Parklands, ensuring that we have a lot of great experiences if this proposal goes through.

P2464	Project Website Submission	01/11/2010	Online Submission from Brodie Curnow (support)	Name: Rod Dalton Organisation: Sydney@Work Address: 24 Falconer St, West Ryde, NSW 2114 IP Address: static-202-80-147-161.linkinnovations.com - 202.80.147.161 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The Department would be hard pressed to list other proposals such as the North Byron Parklands one that has clearly documented the environmental controls it proposes to put in place to actively manage the environment. The environmental management manual is an excellent example of a proactive organisation who is obviously serious about ensuring that fauna and flora is appropriately considered and managed within legislative requirements. This proposal is so important for the Northen Rivers region because of the number of great things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce. The events management industry is extremely competitive and only those operators who can demonstrate compliance with all facets of event management time and time again are the ones that survive. The owners of North Byron Parklands each have years of experience in bringing highly successful events to the general public. Such an outstanding track record only comes about through effective, well planned event policies and procedures.

				Splendour In The Grass always has and always will be concerned with its surrounding environment and always takes the best course of action to ensure that the environment is taken care of and is the utmost of importance and priority. never have I seen a festival of this size so concerned about being Green, and all the festival punters feel the same way, and treat the land with respect. Splendour In The Grass holds the land with the highest importance, and has never let any negativity impact upon the locals of Byron Bay, the businesses, or the owners of the land. This is an amazing experience and opportunity to let the tradition of Splendour In The Grass continue to thrive, and allows life long memories to be made. If the decision to keep Splendour in Byron Bay is a positive outcome, it is certain that the dedicated, loyal punters and festival organisers will be eternally greatful.
				Name: Brodie Curnow Address: 66 Denison Rd, Lewisham, NSW, 2049 IP Address: - 149.171.248.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2465	Project Website Submission	01/11/2010	Online Submission from Roger Ma of Student (support)	The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. The Byron Shire Council identifies the creative industries sector as one of nine key focus areas which foster the prosperity of the shire through sustainable job creation. The shire has

a long history of creative endeavours and this needs to be built on by supporting such proposals as that put forward by North Byron Parklands. Generating a large number of jobs for the area, it is extremely important that it is approved. Doing so will provide a broad spectrum of the local community with jobs that would otherwise not be available.

Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed.

It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people.

P2466	Project Website Submission	01/11/2010	Online Submission from Annika Cruickshank (support)

While much is made about the supposed wildlife corridor in and around the North Byron Parklands site the fact is that much of the vegetation is patchy and degraded. The Parklands people have gone to great lengths to ensure that temporary events are managed in a way to maintain and improve fauna movement. For example only placing temporary fencing just before events commence is one such initiative that will help greatly with this issue.

North Byron Parklands will help build up creative industries in the Northern Rivers area. Establishing a permanent and sustainable cultural event venue will lead to an array of new job opportunities and in time create economic growth in the region.

One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature.

The youth in the Northern Rivers area need a place to gather and have a good time and North Byron Parklands provides this. Imagine all the new opportunites and experiences young people have if this proposal is approved. They will be exposed to some of the best contemporary musical acts from all around the world and be open to new employment opportunities at all events.

P2467	Project Website Submission	01/11/2010	Online Submission from Nathan Maguire of Matixu Pty Ltd (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. The proposed Parklands site has a long history with various Aboriginal clans in and around the area and North Byron Parklands has gone to great measures to maintain important cultural areas. It is great to see that the archaeological report conducted by Parklands does not identify any aspects of the project that will have a negative impact on important cultural artefacts or values. The North Byron Parklands proposal provides so many new opportunities to the community. The residents will be offered new job opportunities and business owners will gain more business through a boost in tourism to the area. For these reasons this proposal should be approved by local government. It would be a huge shame for this venue proposal not to be approved. North Byron Parklands proposed venue will give back to the local community, providing a environmentally sustainable area for cultural events and a gathering place for young people. P2470	Project Website Submission	01/11/2010	Online Submission from Ryan Bostock (support)	I am so excited about the opportunities that a proposal of this nature can offer to both the people of Byron Shire and the north coast. It provides for employment, tourism and cultural experiences that unfortunately over the past years have been driven out of the shire by small minded local politics. North Byron Parklands can play a massive role in putting this beautiful area firmly back on the tourist map. This application should be approved. Why not? There are other areas around Byron that cater for all types of events, how is it even contemplated when North Byron Parklands has so much to offer? Name: Ryan Bostock Address: Buderim, QLD IP Address: cpe-124-186-143-218.lns10.woo.bigpond.net.au - 124.186.143.218 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2471	Project Website Submission	01/11/2010	Online Submission from Evan Palmer of Amnesia (support)	Hi, I think it's important to bring Splenduor to this location. It is pleasing to note that the North Byron Parklands proposal includes a requirement for wildlife rescue personnel to be present during all major events. This requirement means that there is a very capable first response team on hand to deal with trapped or injured wildlife. It is also an excellent opportunity for these people to monitor any interactions between people and fauna. Such data can then be used to modify and improve processes and procedures for future events. If you speak to anyone these days, getting and keeping a job is high up on the list. Regional areas generally do not have a range of diversified industries to choose from. Parklands is offering meaningful and interesting work, particularly for young people and should be welcomed with open arms. North Byron Parklands can be a showcase for our local talents by supporting jobs and training in the areas of bush regeneration and sustainability management. -Evan Name: Evan Palmer Organisation: Amnesia Address: 11/128 George St Redfern Sydney 2016 IP Address: 202-171-164-136.static.cpe.bigair.net.au - 202.171.164.136 Submission for Job: #3210 Cultural Events Site (Project Application)

P2472	Project Website Submission	01/11/2010	Online Submission from Suzanne Koch of Yahoo!7 (support)	Most outdoor events pay little attention to the environment so it is heartening to see an organisation such as North Byron Parklands who have put a considerable effort into developing specific procedures and work instructions designed to protect the environment. These guys even have an environmental incident notification system which will document all issues and the steps taken to resolve them. Splendour in the Grass has always been a peaceful, fun, welcoming festival which attracts some of the world's most talented bands. There is a sense of community, respect and fun and having attended five times I can't imagine it anywhere else but Byron! Please consider this application as it brings great things to the local community, great things to the Australian music community and great things to the people that attend. Name: Suzanne Koch Organisation: Yahoo!7 Address: Level 2, Pier 8/9 23 Hickson Rd Millers Point NSW 2000 IP Address: corp-nat.sydney.corp.yahoo.com - 124.108.98.216 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2473	Project Website Submission	01/11/2010	Online Submission from paul hopper of Terrace Outdoor Living (support)

One of the most significant benefits for the environment coming out of this application is the proponentâ□™s willingness to transfer a net 28ha of very high quality bushland to National Parks that would see an expansion of the Billinudgel Nature Reserve. Ignoring the significant value of the land proposed to be handed over, it has to be acknowledged that this is probably the only opportunity to expand this nature reserve as it is bound by private landowners who are unlikely to give away their land.

This proposal is a no brainer for the young. The jobs are vital, not just at North Byron Parklands but in all the industries which this proposal supports and makes more viable. The proposal is a tangible cultural asset for our young people.

With respect to ensuring that staff and contractors take care to protect and enhance the environment where events will take place, it is excellent to note that the North Byron Parklands proposal includes an environmental induction for such workers. In this instance all workers are required to read and sign an environmental induction which covers a range of important environmental issues, not the least the environmental incident notification system. This is a great initiative.

North Byron Parklands is all about hosting lots of different events, all of which require people to work in a variety of jobs. One event can employ hundreds of people for a period of time and in an area such as Byron such job opportunities are very welcome. We should be doing all we can to make this project happen.

P2474	Project Website Submission	01/11/2010	Online Submission from James Scott (support)	Environmentally North Byron Parklands has its finger on the pulse. This is the exact thing we need to raise awareness and have society appreciate what nature has on offer. While some states can fall back on the mining industry, NSW has to rely on a variety of industry sectors to help fund the expansion of the state. Opportunities for employment such as that being offered by the North Byron Parklands proposal is vital to the sustainability of regional areas. The North Byron Parklands proposal brings so many positive benefits to the northern rivers region that based on planning merit alone, this application must be approved. Whether one considers employment, income generation, environmental protection measures or a massive boost to the regionâ□™s tourism economy, this application exceeds all expectations. On this basis this proposal should be approved by the state government. Byron Bay and the surrounding areas are home to many things. I was born in lismore and grew up in Northern NSW. My family moved to QLD when I was very young. One thing that always sticks in my memory is how as a child I used to visit Byron as a child numerous times every year for over a decade.I'm now in my 20's and still return as often as I can. Over the last few years I've noticed how Byron has changed. Some things are for the better, and some things aren't. Change is inevitable. Personally I think letting Byron infact letting New South Wales let this unique festival walk away is a disgrace. The publicity and tourism it generates it staggering. It is an internationally renowned festival which takes so much careful planning and consideration. The fact that the festival generates $2 million dollars a year for the community for a 3 day event that is only growing year by year is reason to allow this development. A purpose built site, where the organisers can plan and perfect this event

and many others can surely only be a postive thing in the current financial climate. I know there are costs and dangers associated with any event, but I personally feel you would be the only Council or Government in the world that would turn down this opportunity. From music, to the arts, to environmental aspects - the organisers incorporate all. Up and coming members of the arts community dream of being able to play/perform/show their artwork at festivals like these. Would you really want to deprive people of their chance and their dreams? Would you really want to loose the festival to another community? There is more than one opportunity here it is a chance to preserve the environment, teach people, and entertain people. There is a reason people travel all the way around the world to come to byron. The place is pure magic.

P2476	Project Website Submission	01/11/2010	Online Submission from amanda hansen of AHM (support)	From an environmental perspective one of the most pleasing aspects of the North Byron Parklands proposal is the distinct lack of permanent infrastructure and the need to clear trees. The most significant infrastructure relates to the underpass under Jones Road and would involve removal of about 50 trees (which are mainly Camphor). With such minimal works required to make an events venue it means that the vast majority of the site shall remain as is, which is a real positive. Being young it?s important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available. Name: amanda hansen Organisation: AHM Address: 11 Iris Avenue, Coniston, NSW, 2500 IP Address: proxy4.messagelabs.net - 117.120.16.131 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2477	Project Website Submission	01/11/2010	Online Submission from Emily Domain (support)	It is true there are a number of threatened species at the North Byron Parklands site, such as water borne birds, owls and various bats. Research into the effects of irregular noise to such species shows that they will usually relocate and return quickly once noise ceases. This a positive result for all parties and it is good to know the species will not be disturbed some 260 days of the year. With so many people worried about finding a job in this current economic climate a project of this nature in a regional area is a breath of fresh air. As a community we need to get behind this fantastic concept and support it. As a government, there is a huge moral

responsibility to approve it just on employment considerations alone.

One of the strengths of the North Byron Parklands proposal is the flow on benefits it will provide to the tourism industry. Still picking itself up after the recent financial crisis the tourism industry stands to be the big winner from this proposal. With massive visitor generating capacity this proposal will singlehandedly attract hundreds of thousands of people to the region, all of whom need accommodation and other services once they arrive.

Having a world class sustainable event venue at the Parklands site will put The Northen Rivers on the map as a leader in sustainable venue developments. This will also aid local educational institutes such as Southern Cross University in environmental related courses by having a world class example in the area.

P2480	Project Website Submission	01/11/2010	Online Submission from Jenny Thompson of Macquarie Life (support)	When the owners of North Byron Parklands bought the property they took on board a court order to rehabilitate Yelgun Creek which was badly degraded by the former owner. This creek system used to flow into the Billinudgel Nature Reserve, feeding it with flood waters and providing the varied hydrological flows that the existing flora community required. The North Byron Parklands people will now rehabilitate the creek by removing excess siltation and undertaking riparian plantings. This will be a huge plus for the nature reserve. The North Byron Parklands proposal supports jobs and training in the areas of bush regeneration and sustainability management. These are great industries for the Byron shire. Not only can we nurture our event and cultural tourism industries but these green industries are areas where we can excel. North Byron Parklands can be a showcase for our local talents. Name: Jenny Thompson Organisation: Macquarie Life Address: 562 Old Cleveland Road Camp Hill QLD 4152 IP Address: - 203.210.68.145

P2481	Project Website Submission	01/11/2010	Online Submission from Ross Hocking of El Dorado Music Pty Ltd (support)	Having been involved in the music industry for over 10 years and specifically working in the field of major outdoor festivals - i implore you to approve Splendour In The Grass's application for a permanent home at North Byron Parklands. North Byron Parklands is likely to be the first arts and music venue that has prepared an environmental, health and safety management manual to manage interactions with the environment. The environmental standard from this manual provides a range of measures designed to protect the environment. Given that the activity in question is low impact the environmental management of the site will easily achieve positive benefits for the environment. Kind Regards, Ross Name: Ross Hocking Organisation: El Dorado Music Pty Ltd Address: PO Box 439,Goodwood,SA 5034 IP Address: ppp118-210-62-156.lns20.adl2.internode.on.net - 118.210.62.156 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2482	Project Website Submission	01/11/2010	Online Submission from Elizabeth Brown (object)	Byron Bay is an ideal home for Spendour in the Grass. The festival is only held over three days and during this time, the local community's economy thrives! Name: Elizabeth Brown Address: 45 Greendale Ave Pymble NSW 2073 IP Address: s075e.static.pacific.net.au - 210.23.146.94 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2483	Project Website Submission	01/11/2010	Online Submission from Sharni Hardie of N/A (support)	In relation to event management there is no standard manual that an event operator can refer to. Typically successful management of an event is a result of past experience and the refinement of policies and processes. The North Byron Parklands team have been responsible for creating and hosting some of the most successful outdoor music festivals in the country. Having hundreds of thousands of satisfied customers through their turnstiles it is reassuring to know such professionals will be at the helm at the Parklands site. You only have to look around the Byron community when a festival or an event takes place to see the people smiling and the excitement in the air. The North Byron Parklands proposal sure sounds like a perfect way to make sure the people keep smiling. The North Byron Parklands Project willÂ impact the environment positively and should be supported. The preservation of ecological values in and around the Parklands site is an important aspect of North Byron Parklands proposal. The large amount of scientific assessment that has been conducted shows that the site has been heavily degraded over the past number of years and that the proposed fauna and flora management plans will greatly enhance and protect existing identified values on the site.

P2484	Project Website Submission	01/11/2010	Online Submission from Katie Statham of Two Bears Fighting Management (support)	Name: Sharni Hardie Organisation: N/A Address: 3 Bonniebrae St Wynnum West Qld 4178 IP Address: 246.45.233.220.static.exetel.com.au - 220.233.45.246 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately $192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved! I have read the North Byron Parklands proposal submission and I have also been to many events over the years and I have to say, I am very confident that this will be a successful cultural event site. The amount of detail and the control measures put in place for this development should be applauded. This proposal must be approved! Name: Katie Statham

P2485	Project Website Submission	01/11/2010	Online Submission from Christiane Dyer (support)	The North Byron Parklands proposal has considered both indigenous and non-indigenous issues associated with the proposal. In particular, Parklands has worked closely with the local Tweed/Byron Aboriginal Land Council and has complemented a number of archaeological digs to help determine the significance of parts of the site. It is pleasing to see that certain areas of the site will become â□œout of boundsâ□□ to protect identified areas of importance. I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. Positioned in beautiful Byron Bay this incredible venue will stimulate so many other supportive industries to invest and grow the creative industries sector. This sector along with tourism is the life blood of regional areas such as northern NSW and I cannot see any sensible reason why it should not be approved. North Byron Parklands will provide trainingÂ and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training. North Byron Parklands will provide trainingÂ and work experience opportunities that will be extremely valuable to the regions workforce. The proposal will deliver high quality events, a cultural centre, sustainability initiatives, and ongoing community consultation which in turn will offer the regions workplace new skills training.

				I honestly do not think there is any other event venue in Australia, let alone NSW, that has so much going for it. P2486	Project Website Submission	01/11/2010	Online Submission from Donna-Jane Acornley (support)	North Byron Parklands proposal will create 210 full time equivalent jobs. The proposal will generate approximately $192.6 million annually (total multiplier effect) when operating at capacity (RPS Group March 2010). These figures found on the North byron Parklands website are extremely impressive and would benift the community dramatically. This application must be approved!
				Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.

P2487	Project Website Submission	01/11/2010	Online Submission from Erin McGovern (support)	Name: Donna-Jane Acornley Address: 4 Fraser Street, Lane Cove NSW 2066 IP Address: - 203.2.125.128 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 North Byron Parklands organisation are serious about managing the ecological issues at the event site. An example of this is the fact that there have been more vegetation and flora surveys conducted at the site than housing, industrial estate, and quarries assessments. The size of events that could occur at Parklands is appropriate and sustainable. The few events that may reach 50,000 patrons per day in the future are not mega or huge. Other events in Australia and the rest of the world are much bigger. There is a large demand for more employment opportunities in and around the Byron Bay area due to most of the shops being small, 1 person operated businesses that donâ□™t require employees. North Byron Parklands will provide many new jobs for the young people in the community. Name: Erin McGovern Address: 129 Birdwood TerraceAuchenflower QLD 4066

P2489	Project Website Submission	01/11/2010	Online Submission from Winston Struye (support)	I have seen what a range of other industry developments have offered up to protect the environment. In all cases their activities intrinsically contain much greater environmental risks compared to North Byron Parklands, yet their environmental controls are not even remotely as advanced or detailed. It is obvious that this proponent has thought long and hard about managing its activities in an environmentally and sustainable manner. Name: Winston Struye Address: 5-17 Fleimgton Rd.North Melbourne, VIC 3051 IP Address: 2.167.70.115.static.exetel.com.au - 115.70.167.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2490	Project Website Submission	01/11/2010	Online Submission from Andrew Wale-Corey (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Over the past 5 years the northern rivers area and Byron shire have experienced a drop in the number of domestic tourists. The North Byron Parklands proposal would help to attract a significant number of domestic tourists from south east Queensland and southern NSW and Victoria. As much of the region is built on tourism it is important that such projects are allowed to proceed. I feel that this site will allow for major events such as splendour int he grass to have a more permanent, as a young adult from the region these events help to create the unique culture of the region. To have this site for cultural events it will help to preserve this much loved culture for years to come.

P2492	Project Website Submission	01/11/2010	Online Submission from Craig Williams of public sector commission (support)	I wouldn't think about visiting the area if it wasn't for events like this. Now I'm familiar with the area, the surrounding environment, and the conservation concerns. The event does far more for awareness and tourism than the perceived damage. Name: Craig Williams Organisation: public sector commission Address: 7 Sierra Chase, Leeming, WA IP Address: - 203.62.236.34 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2493	Project Website Submission	01/11/2010	Online Submission from Sophie russell (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Understanding the likely impacts of the Parklands proposal can be assisted from looking at similar experiences in other parts of the world. For example, â□˜I learned that creative, progressive communities understand both the tangible and intangible effects of music festivals. With time and encouragement, communities that embrace and cultivate relationships and partnerships offering financial and operational support, ultimately realise substantial economic and fiscal impacts. Furthermore, many articles reported that quality of life improves along with the chance to attract and retain young, innovative people to a communityâ□™. (Donna Sue Sanders â□“ Executive Director of the Daytona State Foundation).

Events are a huge part of the Byron Shire calendar and the area has benefited over the years in so many ways by these well managed shows. Right now there are no venue spaces available for events due to various land use changes and space restrictions. Even the recently acquired event space for the Blues Festival is reported only to ever be used for this one event. The North Byron Parklands site is a once in a generation opportunity to develop a world class event venue that can cater for small and large events and provide the economic, social and environmental benefits that have traditionally flowed from these activities. Losing this much needed business to Queensland or another state would be a crime.

North Byron Parklands proposal is a very positive thing for the youth in the community. This proposal will see new jobs in the region and promote sustainable development throughout the country. This application must be approved for our youth!

My name is Sophie Russell and i've been a resident of Byron Bay for the past 21 years. Splendour in the Grass has always been an extremely important part of byron shire's culture. I remember going to the first ever splendour in the grass and it's so great to see how much its grown. Its given me a job several years in a row and has had an extremely positive impact on the youth of the area. It was so sad that it wasn't in Byron Bay this year. As I now live in Sydney, all my friends come back for the festival. It's like a reunion. It's such a shame that people are protesting against this festival. I can't even imagine why! It's such a positive aspect of Byron Bay and we're such a lucky area to have the best Australian music festival right at our doorstep!

P2494	Project Website Submission	01/11/2010	Online Submission from Richard Barrett of Human Resources Manager (support)	Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal. The employment size of businesses within the Northern Rivers and Byron Shire reflects that the majority of businesses within the Byron Shire (60%) and the Northern Rivers Region (62%) are non-employing. The majority of these businesses are sole operators and the region needs organisation?s like North Byron Parklands to provide much needed jobs. Byron has had a long history in hosting world class events however such events have always been held at suboptimal venues, most of which are no longer available. The Blues Festival has recently bought a site but it is my understanding that they only intend to hold this one event there each year. The North Byron Parklands on the other hand is significantly bigger and has better highway access and large buffers around the site to contain noise and other activities. Approving this development will allow the growth of such popular events as Splendour in the Grass to stay in NSW. There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city. Name: Richard Barrett Organisation: Human Resources Manager

P2495	Project Website Submission	01/11/2010	Online Submission from alex morgan of N/A (support)	Address: 56 Duntreath StreetKeperra QLD 4054 IP Address: - 203.49.227.145 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 The North Byron Parklands proposal is likely to improve wildlife corridors, fauna habitat and consolidation of fragmented forest blocks. This is shown by the level of environmental assessment that has been conducted across the site by North Byron Parklands. All assessments indicate that the proposal will have minimal environmental impacts. Not only does the North Byron Parklands offer an economy boost for local businesses and employment opportunities, it also brings awareness to tackling waste, recycling and consumption. While it is understood that business ventures such as North Byron Parklands are focussed on turning a profit, it is also really pleasing to see they have expended a fair amount of effort on protecting and enhancing the environment in which they operate. Initiatives such as light spill and noise management and inducting all staff and contractors is a great way to protect the environment and demonstrate a commitment to sustainable best practice. I think that events like this help people grow, experiencing North Byron Parklands would be one of those growing experiences for me. Name: alex morgan Organisation: N/A

				Address: 47 Henson Road, Salisbury, QLD, 4107 IP Address: cpe-61-9-213-156.static.qld.bigpond.net.au - 61.9.213.156 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2496	Project Website Submission	01/11/2010	Online Submission from Rachel Corderoy (support)	North Byron Parklands has held a number of tree planting days on the site where they have invited the public to get their hands dirty and plant a tree in the parts of the wildlife corridor that were just open paddock. It speaks volumes for the hypocrisy of local objectors that not one of them ever turned up to put a seedling in the ground to help expand the fragmented wildlife corridor that they so loudly claim to be safeguarding. Those 7,500 trees are now some metres high and thriving. At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. $55,000 compared to NSWâ□™s average annual income of $71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need. One of the most significant environmental controls being put in place by North Byron Parklands is the limiting of major events to 12 event days each year. Effectively this will mean 2 or 3 events over 2 or 3 days each once the venue is up and running to capacity. What does this mean for the local ecology? It means that disturbances of light, noise and traffic will only occur for a fraction of time each year. This plus the numerous other environmental controls means that the impact on fauna and flora will be temporal and minimal in nature. Name: Rachel Corderoy

				Address: 2 Warrabri Place, West Pymble, NSW IP Address: c220-239-105-42.belrs4.nsw.optusnet.com.au - 220.239.105.42 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2497	Project Website Submission	01/11/2010	Online Submission from Abby Cowan of Look Forward (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. The Parklands team have a long and enviable track record in developing and holding outdoor cultural arts and music events. They have a massive amount of experience in managing all aspects of events including noise, traffic and other aspects which if not correctly managed, have the ability to impact on surrounding land uses. It is pleasing to know that competent event managers will be involved with all events held at North Byron Parklands. Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management. This proposal really needs to be approved by local government. The young people in the region will support the events and attend. Some will be able to be employed by the event managers for what seems like an endless possibility of jobs, from musicians performances

to fence erecting.

P2498	Project Website Submission	01/11/2010	Online Submission from Marcel Dorembus of rt Solutions (support)	If this proposal is approved, the Byron Shire area will be able to market itself as a place for sustainable events and creativity. We will have a world class cultural event venue that will provide new employment and training opportunities to the young people in our community. Name: Marcel Dorembus Organisation: rt Solutions Address: 20 Odessa StreetSt Kilda, Vic. 3182 IP Address: mail.windana.org.au - 203.45.60.150 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2499	Project Website Submission	01/11/2010	Online Submission from Dana Diament (support)	The North Byron Parklands people have obviously spent a lot of time developing up systems and processes to manage the environment in which they operate. It impressive to see that during events they propose to have a wildlife rescue crew in place in the unlikely event that an animal is in need of help. What other proposal has this level of thought and detail when it comes to considering the health of the environment? Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. Byron Shire Council has always longer for a permanent event site in its LGA, particularly now that the existing sites are either no longer available or are two inadequate to deal with

world class events. The Blues Fest have bought a site which they intent to use only for their event which leaves a very big demand for a sustainable events venue elsewhere in the area. The North Byron Parklands venue would fill this vacuum and provide a world class event space which local and NSW people could be proud of. The project has so many benefits environmentally and socially that it would such a shame for the NSW government not to approve it.

North Byron Parkland events are not only for the youth, theyâ□™re for the whole community, young and old. Events can rejuvenate and reconnect us with our elders and our juniors.

P2500	Project Website Submission	01/11/2010	Online Submission from Louise Trenkner (support)	I have been to many outdoor event sites over the past number of years but have never come across a venue that has taken so much effort to develop and implement so many environmental programs. When events are not being staged at North Byron Parklands, there will be reafforestation and noxious weed removal activities. When there are events at this site they will need to comply with a bunch of strict environmental policies and procedures. If only other venues could take a leaf out of these guyâ™s book. At the moment the average household income per year in the Byron shire and the Northern Rivers is much lower than the rest of NSW. The Byron Shire and Northern Rivers average annual income is aprox. $55,000 compared to NSWâ™s average annual income of $71,000. Bringing Splendour home to Byron Bay to the North Byron Parklands site would open up many opportunities of employment to a community in real need. Name: Louise Trenkner Address: 4/62 Coventry Street, Southbank VIC 3006 IP Address: - 119.225.72.167 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2501	Project Website Submission	01/11/2010	Online Submission from Adam Kupferman (support)	Many who attend Splendour choose to stay a few days before or after the festival and make more of a holiday of their time in the area. The spin-off from such visitors must be extremely valuable to the many other tourism-related businesses in and around Byron Bay. It therefore stands to reason that a venue hosting a number of other events throughout the year would create many more opportunities, including employment, for the local community and the local economy. What other venue in NSW or Australia for that matter has paid so much attention to

environmental management considerations as North Byron Parklands? If all other outdoor venues even implemented 10% of what Parklands is proposing then we would see a massive improvement in environmental outcomes for this important creative industries sector. This development is likely to become the best practice benchmark for all other similar organisations.

While the North Byron Parklands has some valuable forest cover it must be recognised that much of this cover resembles a patch quilt, the result of decades of agricultural use. To improve the value and function of these disparate forest blocks there is a much needed planting program similar to that proposed by the North Byron Parklands people to join and reconnect the vegetation. This one action of mass plantings will absolutely improve the environmental value across and adjacent to the proposal.

P2502	Project Website Submission	01/11/2010	Online Submission from Kirsten Simms (support)	North Byron Parklands has provided employment opportunities for local indigenous people through the planting of over seven thousand native trees across the site. The Madhima Gulgan rainforest regeneration team has also built and implemented over 25 nest boxes for local wildlife across the site. The environmental assessments completed for the North Byron Parklands proposal identify a number of threatened species which in the most part are winged creatures. It is most likely (based on research elsewhere) that these creatures will move away from any light and noise disturbances for no longer than for the period they occur. This is particularly true if there are specific food resources available on the North Byron Parklands site. So, once an event is finished it is more than probably that these animals will return and enjoy the quietude that will prevail at this site for the vast majority of the year. Name: Kirsten Simms Address: 1 Armen Way, Hornsby Heights IP Address: mail2.curwoods.com.au - 210.193.155.2 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2503	Project Website Submission	01/11/2010	Online Submission from Tegan Marshall of f8media (support)	It is widely acknowledged that the operators of the Woodfordia venue where Splendour in the Grass was held in 2010 know how to set up and manage a sustainable, enviro-conscious venue. It is my understanding that the highly respected operators of that venue, the Woodford Folk Festival, fully support the plans for North Byron Parklands and are actively advising the NBP owners on the best way forward. This is a major stamp of approval for the whole project, given that Woodfordia stands to lose the very valuable Splendour business should NBP come into being With such high unemployment rates in the Northern Rivers I am sure that the government is aware just how important it is to approve such a project as North Byron Parklands. I know many young people who would love the change to work on such a project. The government needs to take into account the generation of employment this proposal will create. After reading the environmental assessment report for this proposal I can confidently say I support North Byron Parklandsâ□™ proposal 100% . The local government should approve this application. The North Byron Parklands offers our minds to look outside the square, to see what is on offer including employment opportunities, economy profit and enjoyment. P2504	Project Website Submission	01/11/2010	Online Submission from Nicole Reece (support)	So many individuals, families and businesses rely on the tourism dollar for their living. In the North Coast region a large majority of business are geared towards the tourism market. With the dollar at record heights more Australians are considering overseas travel and this will impact on local tourism dependant businesses. If a project like North Byron Parklands succeeds in gaining approval then this region stands to deliver a much needed and welcomed tourism boost. The government must seriously take this into account. The North Byron Parklands site has been subject to intensive agricultural activities and land clearing practices for many, many years. The North Byron Parklands will be the first proposed land use that will actually see a huge improvement in environmental outcomes due to planned mass plantings, fauna habitat creation and most importantly no event activities for some 260 plus days a year. This has to be seen as a major positive outcome for the local environment. Apart from extensive consultation with indigenous groups and various elders the North Byron Parklands group has already established a long history of working with and employing local indigenous bush regeneration teams to plant thousands of trees across their site. This tree planting program has been a great way to involve traditional land owners in helping to restore what is currently quite a degraded site. P2506	Project Website Submission	01/11/2010	Online Submission from Jenna Langton (support)	The North Byron Parklands proposal combines ecology with events and community giving. This is exactly the type of training and experience we need our young people to look to. Name: Jenna Langton Address: 3/8 Princess st Fairfield, QLD, 4103 IP Address: - 203.94.140.195 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2507	Project Website Submission	01/11/2010	Online Submission from Alexis Dewick of Personal (support)	Tourism is a massive income generating activity for Byron Shire and the northern rivers region. The Parklands proposal will bring tens of thousands of people to the area, all of whom will need accommodation and food. It is so important that this project be approved because the positive economic impacts are so significant. The North Byron Parklands proposal brings together economic growth, world class events and community giving. It needs to be approved because this is the kind of business young people are looking to for training and experience. North Byron Parklands is committed to developing world class sustainable event site through careful planning and management of activities that take place throughout the year. Byron Bay needs Splendour in the Grass. As the event continues to grow and become more popular, it becomes an increasingly large part of Australian culture. The festival is not only suited to Byron Bay, but does wonders for the small, tourism-funded community and people that live in this area.

This festival is estimated to reach the popularity and success of Big Day Out, if it continues to be held at Byron Bay, which is a convenient location for those residing in both Queensland and NSW, it will continue to grow and put Byron Bay on the map as a central music destination.

P2508	Project Website Submission	01/11/2010	Online Submission from Kathryn Stacey of Mitchells (support)	I welcome the establishment of a cultural event site for the region. The Parklands site will host the community to come together for a wide range of community events to celebrate, to learn, for ceremonies, to exchange ideas, to demonstrate and showcase new ways of doing things. This is good for people and the planet. Name: Kathryn Stacey Organisation: Mitchells Address: 16a Arthur St, Balmain, NSW 2041 IP Address: - 115.186.227.68 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2509	Project Website Submission	01/11/2010	Online Submission from Peter Cunningham (support)	I fully support this proposal! North Byron Parklands commintment to the preserving and enhancing the local ecosytems is shown through the large amount of ecological planning that has already gone into the proposed site. Parklands has developed a environmental, health and safety management manual to ensure the end result is a sustainable cultural events site. Tourism is one of the biggest industries and employers on the north coast and is very important to many people for their livelihood. In recent years the industry has struggled somewhat due to economic and other factors and there is a real need to do everything possible to help support this industry. One such way is to approve projects such as that proposed by North Byron Parklands. This project alone will generate massive visitor numbers and importantly the influx of the visitors will occur during traditional slow times such as winter, etc.

				Byron Bay has so much beauty to offer and the North Byron Parklands is a perfect way to put it on display. I say yes, to this proposal.
				Name: Peter Cunningham Address: 200 Kennedy Terrace, Paddington QLD 4064 IP Address: cpe-124-179-205-152.lns6.woo.bigpond.net.au - 124.179.205.152 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2510	Project Website Submission	01/11/2010	Online Submission from Akshay Partha of university of sydney (support)	This proposal offers career opportunities and new life to Byron Bay for both young and old, there are many people in our community looking outside Byron for employment opportunities, why not offer work to them at home.
				As part of Parklands proposed construction phase they have developed a range of measures to mitigate environmental impacts. These include erecting signage, supervision of minor tree removal by a qualified ecologist, compensatory planting, fauna culverts and the installation of sediment and erosion control systems. This is just for the construction component of the project. The environmental controls proposed for the operation phase are even more detailed and impressive.
				One of the unintended effects on the environment from outdoor events is light spill. So it is

				pleasing to see that this issue is well addressed under the organisationâ™s environmental standard. This standard requires lighting to be directed downwards, away from forest blocks, using low pressure sodium vapour lights where possible, and turning off light towers at a certain time of night. Such measures will greatly reduce disturbances to any localised fauna during such events.
				Name: Akshay Partha Organisation: university of sydney Address: 12 euroka rd westleigh NSW 2120 IP Address: c211-30-211-229.thorn2.nsw.optusnet.com.au - 211.30.211.229 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2511	Project Website Submission	01/11/2010	Online Submission from Kate Hayes (support)	I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.
				Splendour in the Grass festival belongs in the Byron Bay area! When the festival comes around yearly the whole town gets a special buzz, the stores give their shop windows a Splendour in the Grass theme, and people from the wider community come together to celebrate life and music. It would be such a shame to lose it. Bring splendour home!

				A cultural event site such as the one proposed by North Byron Parklands will help develop creative industries on the north coast. Events such as Splendour In The Grass inspire and encourage young adults to be creative and also provide special initiatives such as the young artists program, Splendid. Lets build up the creative industries in the region!
				Name: Kate Hayes Address: Unit 4 83 Lindsay Street Hamilton NSW 2303 IP Address: d110-32-178-26.sbr23.nsw.optusnet.com.au - 110.32.178.26 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2512	Project Website Submission	01/11/2010	Online Submission from Chelsea Ayling (support)	Parklands ensures that the site area and the adjoining sites are protected by maximising â˜down timeâ™ between large events. This allows time for the rehabilitation of habitats and normal ecosystems processes.
				Many projects that have occurred across the North Coast of NSW have not undertaken even a tenth of the assessment, survey and fauna/flora investigations as that completed by North Byron Parklands. The extensive vegetation mapping and the identification of fauna across the site, coupled with two koala surveys (which did not locate any koalas) demonstrate the level of environmental assessment undertaken by this organisation. When you then add the environmental controls as proposed in their environmental, health and safety management manual it is evident that these people are very serious about environmental management.
				North Byron Parklands will join forces with local learning institutes like Southern Cross University and SAE (School of Audio Engineering) to further improve the areas creative

				industries. This alliance will provide the community with world class training and work experience opportunities. Name: Chelsea Ayling Address: 1/237 Fullarton Road, Eastwood SA 5063 IP Address: - 203.217.150.69 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2513	Project Website Submission	01/11/2010	Online Submission from Matthew Ostergaard (support)	Many supposed local environmental groups have been invited to visit the North Byron Parklands and to participate in the public tree planting days that have been held over the past few years. Unfortunately none of these groups have actually converted their words into action by helping to repair this partially degraded site. The local indigenous bush regeneration team on the other hand has been responsible for planting thousands of trees in key locations and is another example of the Parklands group working with its community. P2515	Project Website Submission	01/11/2010	Online Submission from Jessica Tunnicliff (support)	I just heard about the proposed North Byron Parklands and got instantly excited. What better way to show the beauty Byron Bay has to offer? In areas such as Byron, the Tweed and the Richmond Valley employment prospects for young people are difficult to come by. Bring an employer like North Byron Parklands to the area will generate much needed jobs and give many young people to opportunity to earn a regular pay packet. Name: Jessica Tunnicliff Address: 23/2-26 Rosetta St, Fortitude Valley QLD 4006 IP Address: brismail.pronto.com.au - 202.9.17.110 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2516	Project Website Submission	01/11/2010	Online Submission from Nigel Moore of Blockbuster (support)	Three words. Jobs, tourism and culture. All of these are in rapid decline in the northern rivers region and in NSW. Its time to stand up and support these vibrant industries that promise to do so much for so many. The application has the necessary checks and balances in place to make any event operate in a sensitive and responsible manner. Its to time approve the North Byron Parklands proposal. Many people worry about financially providing for themselves and their families and rightly so. Today it is hard to find a good job outside of the larger cities. When a project such as North Byron Parklands comes along offering lots of jobs it is surely in the interests of working families that such a project is located in a regional area. It should be approved just on its employment capabilities let alone any other benefits it is bound to bring.

				One of the big threats to the environment is the accidental ignition of a bushfire. The North Byron Parklands group have identified this as a risk and have developed a Bushfire Standard that address this issue and places a number of carefully considered controls such as provision of bulk water tanks, having the Rural Fire Brigade onsite during major events and the provision of fire extinguishers, etc. I am confident that with such measures and given most of the site is cleared that this issue will be well managed.
				Name: Nigel Moore Organisation: Blockbuster Address: 1/122 Canterbury RoadHurlstone Park NSW2193 IP Address: - 202.124.74.247 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2517	Project Website Submission	01/11/2010	Online Submission from Benjamin Symons (support)	If Woodfordia in Queensland can be highly respected as an enviro-friendly venue which hosts a number of festivals with large crowds, then surely North Byron Parklands can achieve the same level of acceptance and respect if given the chance. This proposal has endless opportunities including networking with Southern Cross University and SAE, furthering our regions creativeness, training and work experiences. North Byron Parklands has adopted the mapped wildlife corridors from the Byron Biodiversity Conservation Strategy as areas to be dedicated to restoration of tree cover. Future plantings and assisted regeneration in these areas will significantly increase

				opportunities for movement of terrestrial fauna. This is only one of many significant programs that will enhance the environment within and adjacent to the site. Skilling up the region is vital and this proposal delivers in so many ways. It is multi-faceted, delivering high quality events, a cultural centre, sustainability initiatives and ongoing community consultation. The training and work experience opportunities offered by such a proposal are highly valuable to a regional workforce.
P2518	Project Website Submission	01/11/2010	Online Submission from Martine Hirsbrunner (support)	Name: Benjamin Symons Address: 140 Porteus Drv Seven Hills QLD IP Address: cpe-121-208-139-243.eqmp1.cha.bigpond.net.au - 121.208.139.243 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982 To whom it may concern, First of all, I went to my first Splendour this year and it was an amazing experience, I enjoyed it so much that I have to come back. So I have never seen or experianced Splendour in Byron, but so many people told me how it is a great spot for a festival and that the whole going to the beach in the morning, enjoying amazing music in the afternoon and at night time thing, is great. So please bring Splendour back to Byron. Our environment, events, culture and celebration is an amazing reason to go ahead with this proposal.

The establishment of the North Byron Parklands will generate additional employment opportunities for the management and maintenance of the venue and event organisations. I think this is a really important benefit for this region.

I must say that protecting the environment is high on my list and that holds when talking about festival event sites. The North Byron Parklands team have obviously spent considerable time and money developing up an environmental, health and safety management manual designed to identify, manage and monitor environmental performance. This as far as I understand is a first for such cultural activities and should be strongly supported.

North Byron Parklands would offer a large array of employment opportunities that I think will benefit Byron and the Northern Rivers region. Bring on the variety and the possibilities!

P2519	Project Website Submission	01/11/2010	Online Submission from jamie wall of student (support)	All along the NSW coastline tourism businesses provide employment and income to hundreds of thousands of individuals and families. This is certainly the case in the northern rivers region where the proposed North Byron Parklands is to be located. Such an important project as this which will see up to 150,000 extra visitors coming to the region per annum which will translate into massive business benefits for the local tourism sector. Being young itâ□™s important to get out there. North Byron Parklands offers us opportunities to interact on levels that promote us to look outside the square. It would be a great opportunity for us to have this venue available. Name: jamie wall Organisation: student Address: 155 pentecost ave turramurra sydney nsw IP Address: c220-239-120-239.belrs4.nsw.optusnet.com.au - 220.239.120.239 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2520	Project Website Submission	01/11/2010	Online Submission from Nolan Press of Rio Tinto (support)	The local area containing the Parklands site has an ancient meeting place for Aboriginal people to come to together for cultural purposes. The local indigenous stakeholders have been consulted and do not object to the Parklands proposal. It is fitting that the Parklands proposal will now serve as a cultural meeting place for all people. I cannot stress how important it is to approve this project. Even if it is considered just based on employment opportunities it should be approved. Regional unemployment is a massive issue and I think that the government needs to help businesses to operate in what is already a very tough business climate. Therefore we should be getting right behind this type of proposal.

The tourism business in Byron Bay this past winter has been very slow. With the loss of Splendour in the Grass to Queensland a much needed income stream during winter evaporated. The North Byron Parklands proposal would see a number of major events coming to the region and with it a significant increase in demand for tourist accommodation and activities. The project should be carefully considered by the government due to the much needed injection of funds into the local tourism industry. Many families would benefit from this proposal.

P2521	Project Website Submission	01/11/2010	Online Submission from Oliver Bastow (support)	The North Byron Parklands proposal sounds amazing, exactly what Byron and its community needs. If you look at the multitude of government regional growth forecasts for areas such as the northern rivers it is plain to see that will a rapidly expanding population there is a strong need for a diverse and stable employment base. Jobs will be critical to the longer term sustainability of the region and therefore when projects such as North Byron Parklands come along they should be embraced and assisted by state and local governments. Don't lose this festival to Queensland! Name: Oliver Bastow Address: 31 Gregory St, Wyoming IP Address: pkfdmzcsmail.pkf.com.au - 203.185.219.230 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2522	Project Website Submission	01/11/2010	Online Submission from Diana Lee of n/a (support)	North Byron Parklands staff have already developed a solid working relationship with National Parks ground staff, local indigenous bush regeneration teams and local council ecology staff. To date North Byron Parklands has planted thousands of trees adjacent to the Billinudgel Nature reserve, installed dozens of nest boxes to improve habitat opportunities and removed thousands of metres of barbed wire fencing to reduce impediments to fauna movement. These actions have been completed prior to asking for any sort of approval for use of the land as an outdoor venue. What is truly impressive is the number of environmental programs this organisation is proposing should the application be approved. This proposal is so important for the Northen Rivers region because of the number of great

things that will come out of it. North Byron Parklands event site will bring more tourism to the area which in turn will lead to a boost in business for local businesses. The events at the site will also offer employment opportunities to the local community and help build the skills of the young workforce.

P2523	Project Website Submission	01/11/2010	Online Submission from Kerryn Stint (support)	It is very exciting to see a proposal of this sort in the Byron Shire. North Byron Parklands will see a rise in employment opportunities for residents, a boost in sales in local businessâ□™, and a influx of cultural events. This development will make the north coast a definite stop on the tourist map for years to come. Lets get behind it! North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations. Please approve this project, it really sounds exciting for various reasons, arts, employment and cultural awareness. How fantastic! Name: Kerryn Stint Address: 3/81 Lachlan Street, Macquarie, ACT, 2614 IP Address: - 203.9.73.203 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
P2524	Project Website Submission	01/11/2010	Online Submission from natasha richards (support)	I have recently moved back to Western Australia after having lived in the Byron Shire for the past 6 years. My families main reason for moving is that it has been near impossible for my husband and I to find work close to home. I was lucky enough to be employed by Splendour in the Grass in a variety of roles over the past 6 years and have gained experience and knowledge that I would not have been able to gain in any other employment in the Shire. Young people living on the north coast have a tough time finding employment, and particularly jobs that are of interest to them. The Parklands proposal will provide hundreds of jobs for people in our area and this represents a huge plus for a lot of kids. We need to look to the future for training and employment opportunities. A real estate

industry is not enough and we will lose our young people to cities if we do not offer them opportunities such as those provided by this proposal.

Please bring Splendour back to the Byron Shire. The employment opportunities are many and varied and will help keep our youth interested in where they live, learning new skills and being proud of their home.

Yours

Natasha Richards

P2525	Project Website Submission	01/11/2010	Online Submission from Samantha Leggett (support)	The opportunity to showcase the stunning nature in the Byron region through a sustainable event venue is surely a wonderful proposition. Outdoor events bring people closer together, letâ□™s show the way Australia. Bring Splendour home! One of the many environmental programs to be undertaken by North Byron Parklands is the staged exclusion of cattle by fencing of existing forest blocks which will also assist with connectivity for terrestrial fauna by allowing the development of ground-layer and mid-layer vegetation and by providing additional shelter and food resources. Deployment of nest-boxes will also assist habitat connectivity for gliders by providing shelter sites in areas with low natural hollow abundance. These are very positive initiatives. The real question is why would North Byron Parklands proposal not be approved? I can only see positives to such a development. Name: Samantha Leggett Address: 15 Jasper Rd Baulkham Hills 2153 IP Address: c122-107-82-58.blktn5.nsw.optusnet.com.au - 122.107.82.58 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2526	Project Website Submission	01/11/2010	Online Submission from Tom Kralikas (support)	The North Byron Parklands project has undertaken both a high level of fauna and flora assessments and a comprehensive environmental risk assessment process. As a result they have developed a management manual that covers a range of aspects including the environment. They have even developed a standalone environmental induction form for all staff and contractors that clearly stipulates what can and cannot take place while on site. These measures are very impressive indeed. The North Byron Parklands is a fantastic opportunity for Byron Bay and surrounding economies. Promoting career paths of all different avenues for a wide range of people. It?s exactly what we as a community need. How many fantastic cultural events and opportunities has NSW lost to other states, particularly to Queensland and Victoria over the past decade. Lets not make the same mistake again by letting the North Byron Parklands project slip through our fingers. They have the necessary controls, they have an amazing cultural vision and they stand to tip the artistic balance back into the favour of this State. We should all get behind it. Name: Tom Kralikas Address: 20 Malt St Fortitude Valley IP Address: 203-158-57-248.dyn.iinet.net.au - 203.158.57.248 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982

P2527	Project Website Submission	01/11/2010	Online Submission from Sian Kilgour of Sian Elizabeth PR (support)

North Byron Parklands aims to maintain the integrity of the events site and manage the sites usage using the latest environmental mangement and monitoring systems to ensure a sustainable events site for future generations.

Byron Shire and the wider northern rivers region has been a fast growing area for the creative industries sector. Huge numbers of people have moved into the region with expectations of finding work in this sector and more than ever there is a need to ensure that projects that directly and indirectly benefit this growing sector are supported. The Parklands proposal if approved will become a dominant force in expanding the creative industries sector and will provide substantial job opportunities.

Currently many things are conspiring against the tourism industry, particularly the very strong Australian dollar. Enticing domestic travellers to holiday in Australia rather than abroad is a huge challenge for the tourism sector. When a project such as North Byron Parklands comes along that proposes to attract 35,000 people per event to a region such as the North Coast of NSW, this must be given serious consideration by approving authorities. Add to the fact that a number of these large events will eventually occur each year, the economic and tourism benefits are substantial.

There are many parts of the North Byron Parklands proposal that will directly benefit the young members of the community. These benefits include more employment opportunities, an increase in cultural events, and more incentives to remain in the area rather than moving away to the city.

Byron Bay is Splendour, Splendour is Byron Bay. I refused to go to Splendour in 2009 because it was not in Byron Bay. It was the first Splendour I had missed since 2002. Please do not destroy this dream

P2528	Project Website Submission	01/11/2010	Online Submission from Hester van Eersel (support)	The North Byron Parklands proposal will see the largest restoration program the region has seen for the past 5o years as a result of its highly detailed vegetation management plan which will result in 1000?s of trees being strategically planted around the site. The wildlife corridor has been significantly degraded over many decades due to primary production and agriculture activities. This means the corridor is currently very fragmented and in real need of revegetation. Jobs are hard to come by these days. Many businesses are struggling to make ends meet. The arts and events industry has provided a lot of employment opportunities on the far north coast and North Byron Parklands should be approved because it will be a major employer in the area. Name: Hester van Eersel Address: 4 Guardian Parade, Beacon Hill, NSW IP Address: eth6032.nsw.adsl.internode.on.net - 59.167.240.143 Submission for Job: #3210 Cultural Events Site (Project Application) https://majorprojects.onhiive.com/index.pl?action=view_job&id=3210 Site: #1982 Cultural Events Site - Tweed Valley Way and Jones Road, Yelgun (09_0028) https://majorprojects.onhiive.com/index.pl?action=view_site&id=1982
