

Project Description	Marrickville Metro Shopping Centre	MP09 0191 - Marrickville Metro
Name	CHRIS (first name)	BRIGHT (surname)
Organisation (if applicable)		
Address	20 Rome St Canterbury 2193	Home or Work (please circle)
Email		
Overall view/position on the Metro proposal	Support <input checked="" type="radio"/> Object <input checked="" type="radio"/> Other (please circle)	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Project Description	Marrickville Metro Shopping Centre	MP09_0191 - Marrickville Metro
Name	Karleen (first name)	Margaret (surname)
Organisation (if applicable)		
Address	6/350-362 Inmingol Rd Marrickville	Home or Work (please circle)
Email		
Overall view/position on this proposal	• Support <input checked="" type="radio"/> Object <input type="radio"/> • Other (please circle)	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The application doesn't acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation. However, the plans reveal a large expansion over the current Metro site and also onto a large warehouse site that is zoned for industrial use.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Yours sincerely

John 6/2/01

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Overall view/position on the Metro proposal	* Support * Object * Other (please circle)	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings

TRAFFIC

The application doesn't acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation. However, the plans reveal a large expansion over the current Metro site and also onto a large warehouse site that is zoned for industrial use.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood

Yours sincerely

Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Project Description	Marrickville Metro Shopping Centre	MP09 0191 - Marrickville Metro
Name	Catherine (first name)	Desmer (surname)
Organisation (if applicable)		
Address	2 Park Rd, Marrickville	(Home) or Work 0413592527 (please circle)
Email		
Overall view/position on the Metro proposal	* Support * Object * Other (please circle)	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Project Description	Marrickville Metro Shopping Centre	MP09 0191 - Marrickville Metro
Name	<i>Walter</i> (first name) <i>Walter</i> (surname)	
Organisation (if applicable)	<i>3X/2CH 802ND MARRICKVILLE</i>	
Address	Home or Work (please circle)	
Email		
Overall view/position on the Metro proposal	<input type="radio"/> Support <input checked="" type="radio"/> Object <input type="radio"/> Other (please circle)	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Project Description	Marrickville Metro Shopping Centre	MP09 0191 - Marrickville Metro
Name	Nicola (first name)	yates (surname)
Organisation (if applicable)		
Address	56 metropolitan Rd Enmore 2042	Home or Work (please circle)
Email	nicola.yates@hotmail.com	
Overall view/position on the Metro proposal	<input type="radio"/> Support <input checked="" type="radio"/> Object <input type="radio"/> Other (please circle)	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.
