Overall view/position on the Metro proposal (please circle)	• Support • Object • Other	

i object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE - it will create negative visual impact

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC - it will create significant negative traffic impact

The proponent does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment. I request that the Dept of Planning conduct an independent traffic impact study before considering this proposal.

PUBLIC TRANSPORT - it is not adequately serviced by public transport

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES - an expansion may result in loss of significant trees

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES - it will create negative economic impact on local shopping strips

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION - these issues are not addressed in the current proposal

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION - and misleading information caused confusion in community

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES - an expansion may result in loss of significant trees

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES - it will create negative economic impact on local shopping strips

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION - these issues are not addressed in the current proposal

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION - and misleading information caused confusion in community

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use: Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Yours sincerely & As Backhouse

Marrickville Metro Shopping Centre

i object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase nerse and air pollution, and it will have a negative impact on the amenity of residents and the community.

220.5

~

(if applicable)

Phone: 9891447

SIZE -- it will create negative visual impact

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC - it will create significant negative traffic impact

The proponent does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a farge increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been knored in the AMP traffic assessment. I request that the Dept of Planning conduct an independent traffic impact study before considering this proposal.

PUBLIC TRANSPORT - it is not adequately serviced by public transport

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES - an expansion may result in loss of significant trees

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES - it will create negative economic impact on local shopping strips

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips. & despite AMP's assertion that this will be minimal, the negative effects of such refevelopment can be observed at Double Bay. Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION - these issues are not addressed in the current proposal

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities

INADEQUATE COMMUNITY CONSULTATION - and misleading information caused confusion in community

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant returbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Overall view/position on the Metro proposal please circle)	* Support Object Other

object to the above proposal to expand the Marrickville Merro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase ncise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE - it will create negative visual impact

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height, its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC – it will create significant negative traffic impact

The proponent does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the The proponent does not acknowledge than the hage increase in relies not applied for again, and independent analysis predicts that anost obuiding the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by size or me centre win markedly more derived with and an easily over our or new method and reader in the precise method precise marked with increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3^{ed} supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment. I request that the Dept of Planning conduct an independent traffic impact study before considering this proposal.

PUBLIC TRANSPORT - it is not adequately serviced by public transport

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES – an expansion may result in loss of significant trees

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES - it will create negative economic impact on local shopping strips

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION - these issues are not addressed in the current proposal

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION - and misleading information caused confusion in community

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forevet change the fabric and character of our neighbourhood.

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the afready over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 76% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current 'rat runs' through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. -	YEE YEE 53 EDGEWARERD	YEE YEE (first name) 53 EDGEWARERD ENMORE	YEE YEE (first name) MY/N/T 53 EDGEWARE RD ENMORE Home) or Work

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC

The applicant does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3rd supermarket. It will worsen current 'rat runs' through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment.

PUBLIC TRANSPORT

The rail stations are at least a kilometre away, loo far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Yours sincerely

Overall view/position on the Metro proposal (please circle)	Support Object Other	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE - it will create negative visual impact

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC -- it will create significant negative traffic impact

The proponent does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3nd supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment. I request that the Dept of Planning conduct an independent traffic impact study before considering this proposal.

PUBLIC TRANSPORT - it is not adequately serviced by public transport

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES - an expansion may result in loss of significant trees

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES -- it will create negative economic impact on local shopping strips

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay. Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION - these issues are not addressed in the current proposal

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION – and misleading information caused confusion in community

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.

Yours sincerely

Overall view/position on the Metro proposal C (please circle)	Surfreit Object Other	
	· · · · · · · · · · · · · · · · · · ·	a term of the college incorrection. It is while

I object to the above proposal to expand the Marnckville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community

SIZE - it will create negative visual impact

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC - it will create significant negative traffic impact

The proponent does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the The proportion does not address that the noge increase in relation of space in algunation paper on the star of the but/s on saturbays and rules on measury evenings, in measury oriente a large increase in more to serve the unanonal major stores and 5, supermarket. It will worsen current rat runs' through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment. I request that the Dept of Planning conduct an independent traffic impact study before considering this proposal.

PUBLIC TRANSPORT ~ it is not adequately serviced by public transport

The rail stations are al least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King SI are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES - an expansion may result in loss of significant trees

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - This ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES -- it will create negative economic impact on local shopping strips

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay. Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION - these issues are not addressed in the current proposal

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION – and misleading information caused confusion in community

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood

Overall view/position on the Metro proposal (please circle)	• Support Object • Other	

I object to the above proposal to expand the Marrickville Metro Shopping Centre. The redevelopment of this centre is inappropriate. It is unlike other shopping centres and requires special consideration of its unique situation. It is not located on a main road, is not adequately serviced by public transport, it will increase traffic problems, it is out of character with the surrounding low-rise residential area, it will drain business from local shopping strips, it will increase noise and air pollution, and it will have a negative impact on the amenity of residents and the community.

SIZE - it will create negative visual impact

The proposal, though scaled down in the revised plans, will increase by 75%. It will increase by 140% in height. Its overall presence will dominate and overwhelm the small-scale single residential dwellings around it, and is out of character with the streetscape of period buildings.

TRAFFIC -- it will create significant negative traffic impact

The proponent does not acknowledge that the huge increase in retail floor space will significantly impact on traffic. It is self-evident that almost doubling the size of the centre will markedly increase traffic on the already over-burdened small local roads. An independent analysis predicts that traffic will increase by 50% on Saturdays and 75% on Thursday evenings. It will also generate a large increase in trucks to service the additional major stores and 3st supermarket. It will worsen current "rat runs" through narrow streets as vehicles try to avoid traffic build-ups. Key streets affected, such as Lord and Darley Streets, have been ignored in the AMP traffic assessment. I request that the Dept of Planning conduct an independent traffic impact study before considering this proposal.

PUBLIC TRANSPORT -- it is not adequately serviced by public transport

The rail stations are at least a kilometre away, too far to carry heavy shopping. The 3 bus routes from the Metro do not adequately service the needs of the local area, as they exit the LGA to go to Bondi Junction or Millers Pt. The other bus routes from Enmore Rd or King St are again too far to carry a lot of shopping. Public transport is inadequate and the expansion will encourage more car travel.

LOSS OF TREES - an expansion may result in loss of significant trees

While the new plans have retained most of the trees on Murray & Smidmore Streets that were designated for removal in the original plans, there are many other trees that may still be under threat of removal. Especially along Victoria Road where most of the landscape-significant Hills Weeping Fig trees are described as "consider for retention" - this ambiguous terminology is no guarantee for the protection of these magnificent trees that form a continuous leafy canopy that shelters much wildlife and birds as well as adding shade and beauty to the streetscape.

SHOPPING CHOICES - it will create negative economic impact on local shopping strips

The addition of a third supermarket & two more discount department stores is a duplication of services offered at other nearby shopping centres & is unnecessary. One of the characteristics of this area is its diverse shopping experience & lack of major retail chain stores. There is real concern that an expanded Metro centre will draw business away from local shopping strips, & despite AMP's assertion that this will be minimal, the negative effects of such redevelopment can be observed at Double Bay, Paddington & Bondi after the expanded Bondi Junction centre.

LITTER, TROLLEYS AND POLLUTION - these issues are not addressed in the current proposal

Many issues have not yet been addressed in the new proposal. More cars and trucks will add to air and noise pollution. The management of abandoned trolleys and litter is currently very unsatisfactory. Noise disturbance will worsen due to increased operational and cleaning activities.

INADEQUATE COMMUNITY CONSULTATION - and misleading information caused confusion in community

The community consultation process conducted for AMP was unsatisfactory and disingenuous. It sought to mislead people into believing that "revitalisation" meant refurbishment or renovation, but the plans reveal a huge expansion over the current centre and onto a large warehouse site that is zoned for industrial use. Contrary to AMP's reports, extensive independent surveys of local residents confirm they oppose the plans.

Our community does not want or need this massive redevelopment forced on them. We want a clean and inviting environment to shop in but not a massive expansion that will forever change the fabric and character of our neighbourhood.
