

Major Development Assessment
Department of Planning
GPO Box 39 SYDNEY 2001

19th April 2011

Project application numbers 10_0129 & 10_0130

I vehemently object to the proposals listed above.

I was devastated to hear of this plan to destroy the lifestyle so many of us have worked so hard to achieve. It is a crying shame that rezoning of this land took place without any consideration of the impact on the lives of residents of Horsley Park & Mt Vernon.

I know I for one purchased my property in Greenway Place for the quality of life it would extend to me & my family, a peaceful, safe place with attractive rural landscapes & room to fulfill the dreams & hobbies of my family. Now a proposal is in place to shatter the quiet enjoyment of my property with 24 hour 7 day a week industrial noise, light, pollutants & traffic. We will be confronted by unsightly factories & warehouses on our doorsteps & property prices will plunge.

My life savings went into my property & it is earmarked to fund my retirement. Who will buy houses so close to an industrial site? This proposal will certainly put an end to my future plans but even more importantly will destroy my quality of life in the short term.

It seems ironic that when building my council asked me to submit colours & building materials in my application to ensure they were consistent with the aesthetics of the semi rural environment. I had to plan gardens & plantings to maintain the attractiveness of the area but a large Company can come along & cut into the undulating landscape & cover it in ugly warehouse & factories pumping pollutants into the atmosphere without a thought to the integrity of the area.

I, Merran Nightingale of 48 Greenway Place certainly do object to project applications 10_0129 & 10_0130

yours sincerely

Merran Nightingale
