Dear Sir

Re: Mixed Use Development – 110-114 Herring Road Macquarie Park (MP10_0112 and MP10_0113)

We would like to object strongly against the above development for the following reasons:

We already have units built within the Macquarie Park area, which are only small in structure, allowing a development of up 22 stories would be an eye sore. How can you allow such a development and these will look out of place and once approved, would allow for more to be built.

This will change our community let alone our environment.

Our area has already changed with the development of more commercial buildings being built in the North Ryde area over the past few years.

Infrastructure of our roads – our roads are congested enough now without more future high rise apartments, more apartments mean more cars and our streets can not accommodate more cars. Think about it, most families have at least two or more cars now, so parking would only be in our streets. We already have two hour parking restrictions outside our homes now, with this development traffic and parking problems will be more widespread.

We have lived in this house for over twenty years and have seen many changes, our once quite streets have sadly gone with more and more traffic using this area as a short cut to either reach Lane Cove Road or Epping Highway. Instead of a ten minute trip to our local shopping centre you now have to allow forty minutes. How ridiculous.

We are not against development, however, we are against high rise infrastructure that will change our local area.

Yours faithfully
