**Subject:** RE: Kirrawee; resident submissions for reply - Windtech

Dear Daniel,

In response to the resident submissions on the Kirrawee development:

In the Pedestrian Wind Environment Statement for the proposed redevelopment of the Kirrawee Brick Pit (Report Ref: WA951-01F02(rev2)) we presented an opinion on the likely impact of the proposed design on the local wind environment of the critical outdoor areas within and around the redevelopment. The results of this study indicate that generally the expected wind conditions around the site will be suitable for their intended use and with the implementation of the treatments discussed in the report that wind conditions around the entire site are expected to be suitable for their intended use.

Regards,

**Dr Nicholas Truong**
