- RECOMMENDATIONS FOR TRENCHING AND ROADS WITHIN DEVELOPMENT AREA (MARTENS):**
- On hillslopes excavation should preferably not exceed 2.5m below ground level.
 - On lower slopes (below RL12.5m) excavations > 1m in depth (other than deep infiltration pits) should be plastic lined and backfilled with low permeability materials.
 - Roads in low lying areas (below RL12.5m) to be constructed assuming groundwater table is close or within subgrade materials.
