	Owner's Address	
Owner's Telephone		
Owner's Facsimile		
<b>6. Subdivisions (see definition "Customer's Premises")</b>		
	Lots requiring electricity supply	
	Other Lots (reserves etc)	

For the Information of the Applicant

By law, Ausgrid may only provide customer connection services under a Customer Connection Contract. Customer connection services include the connection of any premises to the electricity distribution system, or an increase in the maximum capacity of any premises' existing connection to the electricity distributor's distribution system. Ausgrid's Standard Form Customer Connection Contract applies to this application. This contract is deemed, under provisions of the Electricity Supply Act 1995, to become applicable from the time that the occupant or owner of premises applies, or someone applies on behalf of the owner or occupant, for customer connection services (refer Section 1.4 of the Contract)

More complete details in respect of our requirements for the provision of services necessary to connect premises or extend the electricity distribution network into new developments are contained in Ausgrid document ES10: Requirements for Electricity Supply to Developments.

You are advised to familiarise yourself with the relevant documents, available on our website or by request from our Customer Operations Division, before signing this application and agreeing to the following declaration.

Declaration

- (a) I/We hereby submit the above information and attach any relevant drawings not already provided and wish to be advised of Ausgrid's requirements (design information) with regard to the provision of customer connection services for the above development.
- (b) I/We acknowledge that the Ausgrid Standard Form Customer Connection Contract is applicable to this application to connect premises to the Ausgrid electricity distribution network or increase the capacity of an existing network connection. A copy of this contract has been made available for my/our information.
- (c) I/WE ACKNOWLEDGE THAT I/WE HAVE READ THE REQUIREMENTS CONTAINED IN PUBLICATION ES10: Requirements for Electricity Supply to Developments AS IN FORCE AT THE DATE OF THIS PUBLICATION AND AM/ARE FAMILIAR WITH ITS CONTENTS. A copy of this document has been made available for my/our information.
- (d) I/We agree that, at all times, this application is subject to the Ausgrid requirements detailed in publication ES10 and that it shall also become subject to the conditions of the Agreement for Electricity Supply to Developments (Ausgrid publication ES9).
- (e) I am either a proper officer of the Developer/Owner/Occupier (an incorporated entity) who is duly authorised to sign this application on behalf of such Developer/Owner/Occupier Company, or I am the Developer/Owner/Occupier acting in my own right.  
OR  
In the capacity stated below I represent the Developer/Owner/Occupier of the premises previously described and I am authorised to sign this application on behalf said Developer/Owner/Occupier.
- (f) I/We acknowledge that there will be a requirement for the Developer/Owner/Occupier of the premises to enter into a formal Agreement for Electricity Supply to Developments (ES9) prior to the commencement of Network connection works.
- (g) I/We understand that Network connection works are contestable and that the developer/owner/occupier is obliged to engage Accredited Service Provider(s) to carry out contestable works. On satisfactory completion, all the Network connection works will be vested in Energy Australia and will become part of its electricity distribution system, as specified in Section 11.4 of ES10. Assets so vested in Ausgrid will be maintained by Ausgrid at its own cost subject to the warranty requirements for contestable works.
- (h) I/We are acting on behalf of the Developer and have fully acquainted the developer/owner/occupier of the premises with the undertakings given in (a) to (g) above.
