

SHEPHERDS BAY URBAN RENEWAL

38. PEDESTRIAN WAYS, CYCLEWAYS AND SHARED ZONES

LEGEND:

-  Pedestrian access
-  Bicycle paths

The Concept Plan requires the provision of clear, legible pedestrian access through the site. Four (4) north-south pedestrian spines are provided through the new public open spaces and roads. These have been designed to provide attractive and direct linkages through the development and connect to the east-west pathways which run along Constitution Road, Nancarrow Avenue and the foreshore. The extension of the foreshore pedestrian and cycle connections across the foreshore park frontage will complete the link as planned in Council's Riverwalk Plan. This will provide direct off-road access to a number of existing parks along the foreshore, Meadowbank Ferry wharf and beyond. The openness of the paths and their location close to residential development and roads will create opportunities for passive surveillance and maximise the safety of public domain users. At night lighting will be provided to pedestrian paths to enhance safety.

The development of a shared path/ cycleway through the site along the foreshore linking the development to the existing network and public transport will help to promote alternate modes of transport. The installation of cycle racks/ bicycle rooms in the buildings and open spaces in and around the development will encourage a healthy lifestyle.

Recommended Development Principle
Pedestrian ways, cycleways and shared zones across the Concept Plan site are to be provided generally in accordance with the Pedestrian and Cycle Access Plan and Report at **Figure 47**.
